WYOMING.—E. H. Saltiel, Pres. of Wyoming Land, Iron & Coal Co., Rawlins, Wyo., informs us that the only railway that will probably be built from the main line of the Union Pacific R. R. into the Seminoe mining district, will run from Grenville station, six miles west of Fort Fred Steele, to the iron and coal mines and limestone quarries of this company at Iron City, 24 miles distant. This company will also construct new blast furnaces, etc.

STREET AND ELECTRIC RAILWAYS.

BOSTON, MASS.—The railroad commissioners have approved of the location of new street railway tracks on Walnut and Humboldt Aves.

EXETER, N. H.—At the annual meeting of the Exeter St. Ry. Co. an issue of $50,000 of new stock was authorized for track extension, as was a 10-year lease of the Hampton & Amesbury line, the construction of which will be begun at once. Pres., William Lee; Ch. Engr., J. S. Adams.

BABYLON (L. I.), N. Y.—Preparations are under way for the construction of the New York and North Shore Ry. from Babylon to Northport, a distance of 16 miles. Surveys have been made and the consent of the property owners is being secured. This company is also reported to have let the contract for grading the road from the Sanford Ave. tracks in Flushing to Jamaica, to Thos. J. McKenna, of Flushing. The contracts for laying the ties and steel rails has been let to Hogan Bros.

BUFFALO, N. Y.—It is reported that the Buffalo & Lockport Ry. Co. proposes to double-track its roadbed from Tonawanda to Lockport during the next six months; also that a new power station will be built midway between these cities.

GLEN FALLS, N. Y.—The Green sawmill on the canal between Glen Falls and Sandy Hill will be fitted up as a reserve power station, according to reports, for the Glen Falls, Sandy Hill & Fort Edward St. R. R. Ch. Engr., E. A. Clark.

KINGSTON, N. Y.—The Colonial City Traction Co., of Kingston, has certified to the Secretary of State that it proposes to extend its line from Strand and Gill Sts. to Bath Beach. Pres., C. M. Preston, 22 East Strand St.

NIAGARA FALLS, N. Y.—The Niagara Falls & Suspension Bridge Ry. Co. has stated its intention to lay a 94-lb. rail on 2d St., next spring.

NYACK, N. Y.—We are informed that the track-laying and overhead construction work on the proposed electric railway to be built at Nyack, for the Nyack Traction Co., has been let to B. F. Sweeten & Son, Camden, N. J., as stated in our last issue. The length of the line will be nine miles, and the motive power, 700 HP. Isaac A. Walker & Son, Girard Bldg., Philadelphia, Pa., are the general contractors.

CAMDEN, N. J.—An ordinance was introduced in the council, Oct. 27, granting the right of way for a double-track elevated railway for an electric line projected between Philadelphia and Atlantic City. The applicants are Walter N. Boyer, Frederick S. Dickinson, Lewis W. Moore and Daniel Caldwell.

NEW BRUNSWICK, N. J.—It is announced that the Brunswick Traction Co. has completed the purchase of the New York & Philadelphia Traction Co.'s property in New Jersey. The only line that has been completed by this latter company is that running from Bound Brook to Raritan, a distance of about seven miles, which is part of the main line projected from New York to Philadelphia. Pres., G. Krueger, New Brunswick.

PHILADELPHIA, PA.—W. Caldwell, Stephen Girard Bldg., is said to have completed plans and specifications for a car barn and power house for the Southwestern Traction Co., at Penrose Ferry, Schuylkill River. It will be of brick and iron, 200 × 50 ft., with slag and tin roofing.

NEWPORT NEWS, VA.—Reports state that Alexander Brown & Sons, of Baltimore, Md., and others have purchased a controlling interest in the Newport News, Hampton & Old Point Ry. Co., and that a general consolidation of this company, the Newport News & Old Point Ry. & Electric Co. and the Chesapeake Light & Power Co. will be effected. Extensive improvements are contemplated. Pres., W. J. Payne, Richmond, Va.; Treas., H. L. Schmelz, Hampton, Va.

NEW ORLEANS, LA.—It is reported that the Orleans & Jefferson Ry. Co. has made arrangements for the grading of its proposed street railway. Engr., Robert R. Zell, 708 Union St.

VICKSBURG, MISS.—The Vicksburg Electric St. R. R. Co. is stated to have awarded a contract for the construction of four miles of electric railway, to be ready for operation by Dec. 1. Secy., M. J. Mulvihill, of Vicksburg.

CINCINNATI, O.—The Cincinnati, Lawrenceburg & Aurora Electric St. Ry. Co. was incorporated, Oct. 24, with a capital stock of $10,000, with headquarters at Aurora, to construct a line which will be a continuation of the system of electric railway which was built from Dayton, O., to Hamilton last year, and completed from the latter city to Cincinnati this year. The incorporators are, J. C. Hooven, George H. Helvey, G. A. Rentchler, C. E. Hooven and Fred D. Schafer.——The Mill-Creek Valley St. Ry. Co. is said to have contracted with the International Construction Co., of Detroit, New York and London, to construct its line from Cincinnati to Hamilton, for about $1,000,000, before June 1, 1899. A power house will be built at Hartwell. The main line will go direct up the Springfield Pike, right of way over which is assured. A Corliss engine will be furnished by the Arbuckle-Ryan Co., of Toledo; boilers by A. Lewis, of Cincinnati, and electric apparatus by the Simmons-Holske Co., of Chicago.

CLEVELAND, O.—The board of control has granted permission to the Little Consolidated St. Ry. Co. to extend its Superior St. cable line from Doan St. to the easterly city limits. Supt., G. G. Mulhern, Western Reserve Bldg.

COLUMBUS, O.—The Columbus Central St. Ry. Co.'s property has been ordered to be sold, according to reports, in order to terminate the receivership.

DAYTON, O.—The Dayton & Eastern Traction Co. has been incorporated, with a capital stock of $10,000, to operate an interurban electric railway. The directors are Henry B. Pruden, George E. Wright, H. O. Cox, William A. Mays and W. S. McConnaughey.——The Dayton & Xenia Traction Co. has also been incorporated to build an electric railway; capital stock, $300,000. The directors are J. M. Wilson, O. O. Ozias, F. D. Bittinger, Isaac G. Kennedy and Philip A. Kemper.

LANSING, MICH.—L. C. Chase, Dansville, Mich., informs us that the surveys have been made and the right of way obtained for the proposed Lansing, Dexter & Ann Arbor Electric Ry. from Lansing to Ann Arbor, via Holt, Mason, Dansville, Pinckney and Dexter, a distance of 61 miles. A contract has been made with John F. Wilmot, 516 Union Trust Bldg., Detroit, Mich., to construct and equip the lines, and he is now sub-letting the work. The route is through a productive portion of Michigan, connecting the Huron lakes. Pres., C. A. Mapes, Lansing.

VERNON, MICH.—The Vernon township board has granted a franchise to the Long Lake, Durand & Corunna Electric Ry. Co. The company now has a clear right of way, and expects to begin work next April.

CHICAGO, ILL.—The Illinois Traction Co. has been incorporated, with a capital stock of $100,000, by Augustus Kelly and others, connected with the law firm of Matz, Fisher & Boyden, 107 Dearborn St. The proposed route is from the terminus of the Chicago City Ry. at 75th St. and South Chicago Ave., and thence to Houston Ave. and 93d St., South Chicago.

KENOSHA, WIS.—The Milwaukee, Racine & Kenosha Ry. Co. has been granted a franchise by this city, and it is said that work will begin soon, so that the line could be operated before winter sets in.

ST. LOUIS, MO.—We are informed that Enright & Tiernan, 7th and Cerre Sts., St. Louis, contractors for the St. Louis & Belleville Electric Ry., have about completed their contract between East St. Louis and Belleville, Ill., but that they will have 45 miles additional to sub-let in a few days. The grades on this road are 3%, curves 30°, gage 4 ft. 10 ins., and the line is expected to provide both a freight and passenger service.

HAMILTON, ONT.—W. I. Degear, Grimsby, Ont., is said to have been awarded the contract for the construction of the Hamilton Radial Electric Ry., to Port Nelson. Pres., A. Turner, 90 James St., North.

BURNLEY, ENGLAND.—We are informed that the town clerk of Burnley is asking for information as to the relative values of the overhead trolley wire system and the underground conduit system. Burnley has just taken over the tramway system and is thoroughly reconstructing it, so the matter may be of financial importance to those interested in electrical tramways. Further information may be obtained from Milo R. Maltbie, Secy. of Reform Club, 52 William St., New York.

RHEIMS, FRANCE.—Press reports state that La Compagnie de Tramways de Rheims, Sharbeck, Brussels, Belgium, is about to change the motive power of the passenger railways of this city from horse power to the electric trolley system. Contractors and furnishers of material in the United States will probably have an excellent opportunity to compete. The city authorities have given permission to make the change.

BERLIN, GERMANY.—Press reports state that Wandruzska & Co., Engineers and Contractors, of Berlin, have secured a concession for a projected electric railway between Erkner and Rudersdorf, and that they are negotiating for the purchase of material in the United States in order to get early deliveries.

WARSAW, RUSSIA.—Bids are asked by the municipal council of Warsaw for the exploitation of the tramways of Warsaw under municipal control. It is intended to replace the present horse car system by electric traction. For information address the president of the city.

ELECTRIC LIGHT AND POWER.

PORTLAND, ME.—J. W. Fogg writes us that the plans for the proposed plant are not sufficiently mature to furnish details as yet.

PORTSMOUTH, N. H.—Bids are asked until Nov. 15 for furnishing a switchboard, a dynamo, five motors and one block and dead-eye machine for the navy yard. Edwin Stewart, Paymaster-Gen., U. S. N., Washington, D. C.

BRANDON, VT.—Local papers state that E. D. Blackwell, formerly treasurer of the Neshobe Electric Co., has secured control of the entire water power of Sucker Brook west of the Goshen line and will form a company to develop the power and bring it to Brandon. The water power is the fall which is known as Llana Cascade, and with the falls immediately above and below the cascade Mr. Blackwell has a fall of something over 350 feet, and it is said he will bring to Brandon about 1,000 HP.

LAWRENCE, MASS.—Local papers state that plans are being considered for removing the electric plant of the Lawrence Gas Co. from the present location to a site near Butler's Mills, South Lawrence, where better water power may be secured. Treas. and Mgr., C. J. R. Humphreys.

SALEM, MASS.—J. Clifford Entwisle, Cy. Clk., writes us that the city does not anticipate building a municipal plant, as reported last week.

WORCESTER, MASS.—The county commissioners received the following bids Oct. 25 for furnishing and installing a plant for the new court house:

Armington & Sims, Boston, Sims engine	$3,525
Dick & Church, Boston	3,770
American Engine Co., Boundbrook, N. J.	3,587
Edwin C. Lewis, Boston	3,647
Plummer, Ham & Richardson, Worcester	3,353
Page Electric Co., Worcester	3,245
Walworth Supply & Construction Co., Boston	3,177
Ridgeway Dynamo & Engine Co., Boston	3,250
Bibbee, White & Co., Boston	3,745
Columbia Electric Co., Worcester	3,318
Charles D. Parker, Worcester	3,525

ANSONIA, CONN.—It is stated that the E. A. Perkins Electrical Co. has increased its capital stock from $5,000 to $20,000. The company has purchased the lands and buildings thereon, which were owned by Edison Perkins.

AKRON, N. Y.—The board of trustees will probably soon ask for bids for constructing the proposed plant, according to reports.

ALBANY, N. Y.—The question of a municipal plant is being considered. Alderman Geo. H. Stevens may be addressed.

CANANDAIGUA, N. Y.—M. D. Munger writes us that nothing can be done in regard to building a plant until the franchise has been granted, it having already been asked for by Mr. Munger and Thos. H. Bennett. The plant proposed will have a 2,000 light alternator, an engine of about 175 HP, and, possibly, an arc light dynamo of 65 lights.

GENEVA, N. Y.—Mayor Herendeen has vetoed the second light contract. His objections are that the company does not agree to furnish 2,000 c. p. lights; that the contract does not require 3,500 hours of lighting before offered; that a franchise would be given away, while parties have offered to pay for it and that the contract is for five years, whereas the city cannot let one for more than one year.

MALONE, N. Y.—J. F. Wright, Malone, informs us that the proposed water power plant to be built by Messrs. Kilburn, Abbott & Wright will have a capacity for 80 2,000-c. p. arc and 2,000 16-c. p. incandescent lights. The plans are not far enough advanced for further information. The franchise was granted Oct. 24.

NEW YORK, N. Y.—Bids are asked until Nov. 7 for furnishing a plant for school building No. 17, Richmond. Address the building committee, board of education, 585 Broadway, Manhattan.

SKANEATELES, N. Y.—The question of building a municipal plant at a cost of about $30,000 is being considered, according to reports.

WHITESBORO, N. Y.—This place voted Oct. 24 to light the streets with 29 2,000-c. p. arc lights at a cost of $2,100 a year. The present company will make an addition to its plant at once.

CAMDEN, N. J.—The Citizens' Light, Heat & Power Co., 317 Market St., has applied for a franchise. A. Stewart Scull, Camden, may be addressed.

CAPE MAY CITY, N. J.—The question of the municipal ownership of the plant is being considered.

LANCASTER, PA.—Gustavus Groezinger has assigned the franchise for building a plant and the contract for lighting the city to the Lancaster Electric Plant, Heat & Power Co. The plant will cost about $100,000.

NEWTOWN, PA.—Bids are asked until Nov. 5 for lighting the streets for one year from Jan. 8, with privilege of renewing from year to year. Secy. Council, M. A. Buckman.

PHILADELPHIA, PA.—J. E. & A. L. Pennock, 305 Walnut St., have been let the contract to build the power house for the Commercial Museums in West Philadelphia. It is to be one story high, 60 × 224 ft., and will be built of rock face stone, and will cost about $50,000. Work will be begun in a few days.

WRIGHTSVILLE, PA.—It is stated that the Walter Bradley Co., Oswego, N. Y., has been awarded the contract for building a dam and excavating at Wrightsville, for the Martic Water & Power Co., at about $100,000. Ch. Engr., Jas. H. Harlow, Wrightsville.

ROANOKE, VA.—Estimates are reported as being received by C. L. Moses & Co. for a plant of 500 incandescent lights.

ASHBORO, N. C.—M. O. Hammond, Mayor, writes us that the city has no plant, but the board of commerce is in communication with a company in Norfolk, Va., with a view to putting in a plant. Pres. Bd. of Commerce, Jno. T. Moffitt.

DALTON, GA.—It is stated that this city is arranging for the construction of a plant and sewers to cost $30,000.

FORSYTH, GA.—The question of issuing $8,000 in bonds for a plant will be voted upon Nov. 26. Cy. Clk., W. A. Pye.

MILLEDGEVILLE, GA.—L. C. Hall, E. T. Alling, B. B. Adams, Jr., and T. J. Crowley are on the committee to investigate the question of a municipal plant. The council has refused to renew the contract with the Milledgeville Electric Light Co. The proposed plant will have a capacity for 50 arc and 1,000 incandescent lights. Mayor Horne may be addressed.

WOODLAWN, ALA.—Jno. T. Hood writes us that the town is considering the question of building a plant in connection with the proposed water-works. The works will cost about $25,000. Population, 3,200.

NEW ORLEANS, LA.—Councilman Felix J. Dreyfous writes us that the city will advertise for bids for lighting the upper districts (6 and 7) by electricity, gas or vaporized oil. Bids will probably be opened Feb. 2. The city is now paying $35,000 a year for lighting these districts. Conduits will be laid in the commercial portion of the city by the several wire companies within the next year.

FRANKLIN, KY.—The council is reported to have awarded the contract for public lighting to B. F. Gardner, Bowling Green, Ky.

BELLE CENTER, O.—The question of building a plant is being considered.

GIRARD, O.—Estimates are wanted for a plant for lighting this place; population, 3,000. Frank Pringle, Chn. Com.

WOODSFIELD, O.—T. A. Way, Mayor, writes us that it is proposed to build a plant for street lighting; estimated cost $7,000.

HUNTINGBURG, IND.—Information is being secured for a municipal plant of 500 incandescent and 35 arc light capacity. J. W. Schwartz, Mayor; Councilmen Henry Prior and Bretz are on the committee.

INDIANAPOLIS, IND.—Bids are asked until Dec. 8 for the lease for 30 years of the water power, etc., belonging to the Indianapolis Water Co., 113 Monument Place. F. A. W. Davis, Vice-Pres.

GRAND RAPIDS, MICH.—The Grand Rapids Electric Light and Power Co. propose to build a storage battery plant and make other changes to its plant. Jos. W. Spooner, Secy.

GRAND RAPIDS, MICH.—Geo. Lohman, Arch., has completed plans for the building for the municipal plant, the contract for which has been let to the Chase Construction Co., Detroit.

KALAMAZOO, MICH.—Press reports state as follows: Work on the construction of a dam on the Kalamazoo River by the Kalamazoo Valley Electric Co., has been begun, and construction will be completed by the middle of January. The dam proper will cost $125,000. It will be located about four miles southwest of here in Trowbridge township. It is estimated that about 13,500 HP. will be developed. Four water wheels will be put in. The company proposes to furnish both electric lighting and power, and it is probable that Allegan, Kalamazoo, Oswego, Plainwell and other towns will be lighted by the company. It is said that considerable of the machinery has already been purchased. H. C. Hoagland, Supt. Kalamazoo Electric Co., and J. D. Foote are interested.

CHICAGO, ILL.—Bids are asked until Nov. 9 for arc lamp repairs. Edward B. Ellicott, Cy. Electrician.

CLINTON, ILL.—Harry Swigart has been granted a 20-year franchise for a plant. Press reports state that bids will soon be asked by the council for lighting the city, the contract with the Clinton Electric Light Heat & Power Co. expiring in a few months.

EDWARDSVILLE, ILL.—Press reports state that the plant of the Edwardsville Electric Light & Power Co., which was destroyed by fire Oct. 24, will be rebuilt at once. The loss was $30,000. Dudley Pogul, Mgr.; C. H. Fischer, Pres.

ELBURN, ILL.—The question of building a plant in connection with the proposed water-works is being considered. Councilman A. W. Collins may be addressed.

LITCHFIELD, ILL.—The Decatur Light Co., Decatur, Ill., it is stated, is considering estimates for a plant for this place.

MORGAN PARK, ILL.—Bids were asked until Nov. 1 for building a power house for the water-works and the electric light plant. The building will be 50 × 66 ft. Arch., N. N. Waterman, 925, 218 La Salle St., Chicago; M. H. King, Pres. Bd. Local Improvements.

ROCK ISLAND, ILL.—Bids are asked by the city clerk until Nov. 7 for a combination system of high and low lights. There is to be one tower in each ward, and six lights on each tower, the tower to be at least 100 ft. high. The elevation of the low lights is to be 28 to 35 ft. Bids are asked for one-year, two-year and three-year contracts, and for lighting according to the Philadelphia schedule, or all night, the council to choose when the bids are opened.

COLUMBUS, WIS.—The question of building a private plant is being considered. Mayor Leitsch may give information.

GREEN BAY, WIS.—The city clerk writes us that bids were received Oct. 21 for building a plant, but up to a late date the contract had not been let.

FOUNTAIN CITY, WIS.—It is stated that H. & F. Roettiger have been granted a franchise.

MERRILL, WIS.—Plans are being prepared for rebuilding the burned plant of the Merrill Ry. & Light Co. The new plant will be larger than the old one, which cost $10,000. J. N. Cotter and E. S. King, of Merrill, and F. P. Hixon, of La Crosse, Wis., are interested.

DES MOINES, IA.—The Des Moines Edison Light Co. has increased its capital stock from $130,000 to $450,000. Plans are prepared for the improvement of the water power plant at Center St., where a building is being constructed. It will be equipped with water wheels. R. H. Frazer, Supt.

CLARENCE, MO.—It is stated that this place has voted to issue $5,000 in bonds for a plant.

INDEPENDENCE, MO.—W. T. Felton, of Kansas city, Mo., has applied for a 20-year franchise for a plant.

SARCOXIE, MO.—This place has voted to grant a franchise for a plant to the Sarcoxie Electric Co.

SENECA, MO.—The question of building a plant is being considered, according to reports. J. E. Schreiner may be addressed.

ARKADELPHIA, ARK.—The Brown Electric & Machinery Co., Little Rock, Ark., has been awarded the contract for a plant for the Arkadelphia Lumber Co.'s mills.

WYNNE, ARK.—Bids are asked until Nov. 10 for furnishing the materials and for building a plant and water works (postponed from Nov. 8). Engr., Owen Ford, Security Bldg., St. Louis; Chn. Com., W. M. Kennedy.

HOUSTON, TEX.—L. J. Luffly, Chn., writes us that the committee has selected the site for the proposed municipal plant to cost about $100,000. Up to Oct. 26 no engineer had been engaged.

BUTTE CITY, MONT.—Judge Lindsay has ordered Fred. J. Sterling, Missoula, Mont., Receiver Montana Power Co., to proceed to repair the Big Hole dam at a cost of about $67,000, in order to preserve the property. It is said that $470,000 has so far been spent on building the power plant. The expenses of all the necessary work is placed as follows: Repairing dam, $31,000; drain tunnel, $7,500; penstock and gates, $12,500; Wise River dam, $8,000; power house, $8,000; total, $67,000.

DENVER, COLO.—Press reports state that the construction of a part of the plant of the Denver Power & Irrigation Co. has been begun by building the reservoir on the Platte River. This reservoir will cost about $1,000,000. The entire plant and system will cost about $3,000,000. Alderman Robt. M. Golder has introduced an ordinance authorizing the granting of the franchise. Jas. E. Rhodes and Walter Rhodes, of Denver, are interested.

LEADVILLE, COLO.—Dr. M. J. Rickoff, London, England, will submit a report to an English syndicate in regard to the construction of a power plant at Malta, the power to be secured from the Lake Park reservoir. T. W. Jaycox, R. E. Goodell and Dr. Law may give information.

COLFAX, WASH.—Fanning & Brown are considering the cost of a plant for this place.

REDLANDS, CAL.—It is stated that F. C. Finkle, Engr. Electric Light & Power Co., is making surveys for extending the plant at Mill Creek.

MAGOG, QUE.—The question of issuing $10,000 in bonds for a plant will probably soon be voted upon, according to reports.

ACTON, ONT.—It is stated that this place will soon vote on the question of building a plant.

BOTHWELL, ONT.—This place is reported to have voted to issue $4,000 in bonds for a plant.

BRADFORD, ONT.—This place is considering the question of putting in a plant.

HAMILTON, ONT.—Percy Domville, Hamilton, has submitted his report on the proposed municipal plant. Estimated cost, from $40,516 to $97,130.

ST.THOMAS, ONT.—J. A. Bell, Cy. Engr., is reported as preparing plans for a municipal plant.

THOROLD, ONT.—An election will be held in January to vote on the question of building a plant to cost about $7,000, according to reports.

WINNIPEG, MAN.—The question of building a municipal plant is being considered by the council. Aldermen Bell, Chn., Mitchell and Martin are on the committee.

ROSSLAND, B. C.—The council has accepted the offer of the West Kootenay Power & Light Co. to provide five arc lights to be used in the city at a cost of $96 a year.

JAPAN.—The New York "Journal of Commerce" states that Shizuo Kondo, Pres. Japan-American Commercial & Industrial Association, Times Building, New York, has received data from Japan regarding the construction of new power plants wherein American machinery may be installed provided the manufacturers here take steps toward getting the work. There are at present but two electric railways in operation in Japan. They are the Kioto Electric Ry. Co., with a capital of 3,000,000 yen, and the Nagaya Electric Ry. Co., with 250,000 yen as capital. Both of these roads are earning good dividends, and consequently have proved quite an incentive toward the construction of other roads. Abundant waterfalls furnish additional inducements, and there are at present either in course of construction or in contemplation 27 new roads, of which but 10 will require steam plants. There are also in course of construction 31 electric light stations, of which 21 will receive their power from waterfalls. There are 17 water-power plants about to be built for manufacturing purposes and three steam plants. Mr. Kondo has the names and commercial standing of the concerns who are building these plants.

NEW COMPANIES.—Dundas Electric Co., Ltd., Dundas, Ont.; $40,000; Geo. H. Harper, R. T. Wilson, Jas J. Grafton, John Bertram.

Sutton-Steele Electrical Co., Dallas, Tex.; $20,000; Walter L. Steele, Henry M. Sutton, Emmett A. Ellis, J. L. Sale.

Kansas Gas, Water & Electric Light Association, Topeka, Kan.; for mutual protection and benefit; Pres., L. T. Palmer, Leavenworth; First Vice-Pres., E. Willis, Atchison; Second Vice-Pres., A. T. Rogers, Beloit; Secy. and Treas., Jas. H. Foley, Leavenworth.

Electric Heat & Power Co., Chicago, Ill.; $5,000; Chas. B. Coffeen, Alvah S. Hopkins, Howard B. Cook.

Edison Junior Electric Light & Power Co., New York; $100, with the privilege of increasing the same to $500,000; Thos. A. Edison, Jr., Valentine Robinson, H. C. Hepburn, E. A. Drake, C. S. Henry, R. M. Jordan, J. G. Batterson, Jr., F. J. Stone, New York city.

Tonawanda Cataract Power Co., North Tonawanda, N.Y.; $100,000; to distribute electricity for light, heat or power within Wheatfield, North Tonawanda, Niagara county, and Tonawanda, Erie county; Chas. A. Sweet, 1040 Delaware Ave.; Lincoln A. Grow, Buffalo; Edwd. D. Adams, Francis Lynde Stetson, Edward A. Wickes, William B. Rankine, Engr., Mills Bldg., New York.

Warsaw Electric Co., Warsaw, Ind.; $30,000; Noah J. Clodfelter, A. T. Spencer, Chas. J. Lohman, J. C. Hamilton, Monroe George.

Montezuma & Oglethorpe Light Co., Montezuma, Ga.; $3,000; Jule Felton, V. O. Brown.

South McAllister Electric Light Co., South McAllister, Ark.; $25,000; Pres., L. J. Graham.

BRIDGES.

BOSTON, MASS.—The following bids were received Oct. 27 for constructing the draw foundation and drawfender piers of the new bridge on Summer St. extension. William Jackson, Cy. Engr.: William L. Miller and William N. Ellis, $38,896; John Cavanagh & Co., $46,400; William H. Keyes & Co., $44,980; J. N. Hayes & Co., $52,000; William J. Lawlor, $33,460; Ross & Fowler, $51,000.

ASHTON, R. I.—An iron bridge, to cost about $10,000, is to be constructed over the Blackstone River, to connect Lincoln and Cumberland. Chas. N. Robertson, Chn., Lincoln, and Dennis Shea, Secy., Cumberland, of the committee, John E. Judson, Engr., Pawtucket, R. I.

BUFFALO, N. Y.—A hearing will be given Nov. 15 by the park board, the authorities of West Seneca and the Buffalo, Rochester & Pittsburg R. R. Co., to consider a proposition to change the grade crossing at the Ridge Road to an overhead crossing, to cost about $6,000.

LEYDEN, N. Y.—The towns of Lyonsdale and Leyden have voted to build a new iron bridge across Black River, according to reports.

CHESTER, PA.—A bridge will be constructed at Lloyd St. by the Philadelphia, Wilmington & Baltimore R. R. Co.

WASHINGTON, D. C.—Bids are asked until Nov. 22 for constructing foundations for bridges across Rock Creek on the lines of Massachusetts and Connecticut Aves. extension, as stated in our advertising columns. Address the District Commissioners.——Plans and estimates have been submitted by the engineering department for the proposed memorial bridge across the Potomac River, with masonry piers and steel superstructure, of three fixed spans and one draw span, 60 ft. wide, and with approaches, estimated cost, $1,385,000; for a bridge over the eastern branch of the Potomac River, in line with Massachusetts Ave., having a total length of 2,517 ft. and 52 ft. wide; estimated cost, $441,208; with swing span on pivot pier, $476,843; for a stone arch bridge over Rock Creek, on Massachusetts Ave., estimated cost, $568,545, or for a steel bridge, $199,204.

CUMBERLAND, MD.—A bridge on the Pittsburg division of the Baltimore & Ohio R. R., over Wills' Creek, has been destroyed.

SAVANNAH, GA.—Bids are asked until Nov. 10 for constructing steel and iron bridges, according to reports. Jas. W. McIntyre, County Clk.

NASHVILLE, TENN.—Bids are asked by the council until 3 p. m., Nov. 3, for constructing the substructure of the Broad and Church Sts. viaducts. The bids received Oct. 25 were rejected; they ranged from $18,000 to $26,000.——W. M. Leftwich, Jr., Cy. Engr., informs us that the following bids were received Oct. 25 for the approaches of the Broad and Church Sts. viaducts, advertised in Engineering News, Oct. 13:

Groton Bridge & Mfg. Co., Groton, N. Y.	$32,345
Virginia Bridge & Iron Co., Richmond, Va.	36,325
King Bridge Co., Cleveland, O.	46,820
Indiana Bridge Co., Muncie, Ind.	43,820
Geo. E. King Bridge Co., Des Moines, Ia.	38,000
Youngstown Bridge Co., Youngstown, O.	34,449
Gude & Walker, Atlanta, Ga.	34,975
Louisville Bridge & Iron Co., Louisville, Ky.	43,248

CANAL FULTON, O.—Bids are asked until Nov. 15 for constructing a bridge, 131 ft. long and 32 ft. wide, capacity 150 lbs. per sq. ft., over the Tuscarawas River. Wm. M. Reed, County Andr., Canton, O.

CLEVELAND, O.—Plans are being prepared and bids will soon be asked for the superstructure of the Center St. bridge, over Cuyahoga River, to cost about $130,000. M. E. Rawson, Ch. Cy. Engr.

COLUMBUS, O.—Henry Maetzel, County Surveyor, has reported to the county commissioners that a number of steel and iron bridges are in need of immediate repair.

LORAIN, O.—Bids are asked until Dec. 22 for furnishing plans and for constructing the superstructure of either a swing or lift bridge over the Black River; estimated cost, $150,000. Osborne Co., Engrs., Osborne Bldg., Cleveland, O.

EAU CLAIRE, WIS.—A contract was awarded Oct. 28 to the Milwaukee Bridge & Iron Works, Milwaukee, Wis., at $26,175, for building the superstructure only and taking down the old bridge at Kelsey St. T. P. Cochrane, Cy. Clk.

WAVERLEY, IA.—Bids are asked by the county supervisors until Nov. 14 for a bridge over Cedar River, according to reports.

DULUTH, MINN.—R. E. McFarlane, 1811 West First St., informs us that plans have been prepared for the proposed steel bridge at Garfield Ave. E. J. Duffies, Des. Engr., City Hall, Duluth.

SEATTLE, WASH.—Bids are asked until 2 p. m. Nov. 7, for furnishing the material and constructing a combination truss bridge across Green River and approaches. E. H. Evenson, County Clk.

CORNING, CAL.—Reports state that a bridge 200 ft. long, will be constructed over Thomas Creek. W. F. Lunning, County Surveyor, Red Bluff, Cal.

TILBURY, ONT.—Bids are asked until 12 m., Nov. 4, for furnishing the material and constructing two steel highway bridges, over Big Creek, in Tilbury West township. Wm. Newman, Engr., Windsor, Ont., or Thos. Anderson, Comber, Ont., may be addressed.

BUILDINGS.

BRISTOL, VT.—A fire in the Union Block, on Main St., Oct. 26, caused damage estimated at $50,000.

HAVERHILL, MASS.—Two 4-story buildings, owned respectively by Herbert B. Newton and C. H. Tarleton, were destroyed by fire Oct. 27, causing a loss of about $50,000.

NATICK, MASS.—W. L. Bullard, E. W. Marsden and others have been appointed as a committee to erect a new library building in this town, to cost about $30,000.

ALBANY, N. Y.—The board of aldermen has passed an ordinance providing for the erection of a $30,000 public bath at 665 Broadway.

Y., a, $176,740, West Rutland, Vt.; b, $26,390; c, $29,000; 18 mos. McIlvain, Unkerfer Co., Pittsburg, Pa., a, $160,690, Vermont Marble Co.; b, $21,500; c, $16,000; 14 mos. Charles McCall, Philadelphia, a, Adams Co., $149,975, Lee, $157,699; b, $23,649; c, $25,208.

MORRIS PLAINS, N. J.—Bids are asked until Nov. 10 for the construction of a stone boiler house and iron smokestack, at the New Jersey State Hospital, at this place. Arch., Robert C. Walsh Savings Bank Bldg., Morristown.

PASSAIC, N. J.—Bids are asked until Nov. 17, according to reports, for erecting an 8-room school building to cost about $16,000. S. J. Post, Chn. of Com.

PATERSON, N. J.—Ackerman & Ross have been selected as architects for the new building for School No. 3, on Main St., to cost about $45,000.

CHAMBERSBURG, PA.—The trustees of Wilson College, Oct. 25, decided to erect a new $75,000 building. Pres., S. A. Martin, D. D.

BALTIMORE, MD.—George Mann has been awarded the contract for the erection of the new Northern police station, at $58,023.

CHARLESTON, S. C.—Plans are asked until Nov. 15 for an auditorium building, with a seating capacity of about 7,500 to cost not more than $20,000. Address the Auditorium Committee, Confederate Veteran Reunion, care of South Carolina Loan & Trust Co., Charleston.

ATLANTA, GA.—Bids are asked until Dec. 21 for erecting a 4-story brick and stone annex for the Fulton county court house, to be 116 × 156 ft. Arch., Grant Wilkins, 9½ Peachtree St.; Clk. of Comrs., A. L. Kontz, of Atlanta.

CHICAGO, ILL.—Reports state that the Edward Hillman Dry Goods Co., has secured a lease of the building at 112 to 116 State St., and that improvements will be made thereto, to cost about $40,000.——A permit has been granted to C. E. Bartley for the erection of an apartment building, 46 × 98 ft., at 4015 and 4017 Grand Boulevard, to cost $35,000. Arch., John Duncan.——Plans have been prepared for a 3-story school building for St. Francis' Roman Catholic Church, on St. Louis Ave., near Douglas Boulevard, to cost about $25,000. Archs., Burtar & Gassman, 1081 West 12th St.

PEORIA, ILL.—We are informed that the bids received for the construction of a steam tunnel for the Asylum for Incurable Insane, at Peoria, were those of the Crescent Stone Co., at $7,424, and Jobst Bros., at $6,800. Engr., Jacob A. Harman, Arcade Bldg., Peoria.

DULUTH, MINN.—Bids are being received, according to reports, for the erection of a freight station, 45 × 504 ft., for the Eastern Minnesota branch of the Great Northern Ry. N. D. Miller, Ch. Engr., St. Paul, Minn.

HENDERSON, COLO.—Bids are asked by the commissioners of Arapahoe county, at Denver, until Nov. 28, for the installation of a complete heating plant in the new county poor farm near Henderson. The contract for the erection of the buildings has been let to Frank Taylor, at $21,493.

CHEMAWA, ORE.—Bids are asked by the U. S. Indian Service, until Nov. 18, for building materials, including 66,500 ft. of assorted lumber, etc. Supt., Thos. W. Potter.

BOISE, IDAHO.—The following bids were received by the supervising architect, Washington, D. C., Oct. 27, for the foundations, etc., of the public building in this city: H. D. Mitchell & Co., $11,346; John S. Jellison, $9,800; Finnegan & Eastman, $8,244.

WATER-WORKS.

LAMOINE, ME.—The Lamoine Beach Water Co. has been incorporated with a capital stock of $5,000, of which $50 is paid in; H. E. Hamlin, Pres., Ellsworth, Me.; John A. Peters, treas., Ellsworth.

BERLIN, VT.—The council of Montpelier has asked for permission from the legislature to furnish this place with water. Another bill is also before the legislature authorizing the incorporation of the Berlin Aqueduct Co., which proposes to build works; capital stock, $40,000.

HAMPTON, N. H.—Chas. M. Lamprey, Clk., writes us that parties in Boston are making arrangements to make a survey for the proposed works, with a view to making an offer for constructing the works. The water supply will be secured from springs.

BOSTON, MASS.—Bids are asked until Nov. 14 for repairing the pumping engines at the station, Calf Pasture, Dorchester; check, $1,000. E. D. Leavitt, Mech. Engr., 2 Central Square, Cambridgeport, Mass.; Benj. W. Wells, Supt. Sts.

SWAMPSCOTT, MASS.—M. D. Porter, Town Clk., writes us that no contracts will be let for changing the source of water supply to the Metropolitan water-works. The pipe is already laid and only connections are to be made. The town voted Oct. 24 to secure water from the Metropolitan works.

PROVIDENCE, R. I.—The question of a filtration plant at the water-works is being investigated.

HARTFORD,CONN.—A new reservoir is to be built in Granby for the Hartford works. Jno. S. Hunter, Pres.

ALDEN, N. Y.—Reports state that Jacobs & Co., Bellaire, O., have been awarded the contract for building the works, at $14,323. The contract for the brick power house has been let to Wm. Witty, of Alden. J. F. Witmer, Engr., Buffalo, N. Y.

BAINBRIDGE, N. Y.—J. C. Scott, Clk., writes us that the following contracts have been let for furnishing the materials and for building the works: Chas. Millar & Son, Utica, N. Y., pipe and special castings; Lewis & Birdseye, Herkimer, N. Y., labor; Eddy Valve Co., Waterford, N. Y., valves, etc. The water will be supplied by gravity from a creek; estimated cost of works, $22,000. The contract for building the reservoir was not let up to Oct. 27. J. Warren Lamb, Des. Engr., Cooperstown, N. Y. Bids for the purchase of $22,000 of water-works bonds are asked by the trustees until Nov. 19.

LEWISTON, N. Y.—The trustees have granted J. Boardman Scovell and others a right to organize a company and supply the village with water. The supply will probably be taken from the lower Niagara River.

NIAGARA FALLS, N. Y.—City Engineer Jones has submitted to the board an estimate for laying a 6-in. main, to cost about $3,600.

ORCHARD PARK, N. Y.—It is stated that Dr. Frank P. Vandenbergh, Erie County Bank Bldg., Buffalo, and others are interested in the proposed works, for which a franchise was recently granted.

VALLEY STREAM, N. Y.—It is stated that the Valley Stream Water Co. is to be organized to supply this place and Lynbrook with water. E. Delavan Smalley, Engr., Syracuse, N. Y., is interested.

WINDSOR, N. Y.—T. N. Furman, village pres., writes us that the contracts for building the new works, voted for in August, will be let about May 1. The water will be secured from springs 1½ miles distant. There will be about six miles of pipe, a reservoir 30 × 100 ft., etc. Up to Oct. 26 the engineer had not been selected. Population 800.

HIGHBRIDGE, N. J.—The council is reported to have decided to build works, for which estimates are being prepared; estimated cost, $12,000. H. Latimer, Clk.

MILFORD, N. J.—The Spring Mills Water Co. has been incorporated to construct and maintain water-works; capital stock, $55,000; incorporators, Michael T. Lynch and H. T. Wuchter, of Phillipsburg, N. J.; J .William Flad and E. W. Evans, of Easton, Pa.

PENNGROVE, N. J.—The question of building works is being considered, according to reports.

DOYLESTOWN, PA.—Bids are asked by the water committee until Nov. 7 for a wooden or metal covering for the water-works basin. The question of securing an increased water supply is being considered. The committee will probably sink test wells. Councilman Wilson, Chn. Com.

NEW KENSINGTON, PA.—The National Foundry & Pipe Works, Scottsdale, Pa., has been awarded the contract for furnishing 39,000 ft. of cast iron water pipe. The contract for laying the pipe has been let to Chandley Bros. & Co., Beaver Falls, Pa. These improvements to the works will cost about $25,000.

BALTIMORE, MD.—We are informed that Clendennin Bros., 111 South Gay St., have been awarded the contract for furnishing such pig lead as may be required, in all about 150 tons, at about $11,000.

DENTON, MD.—Harry A. Roe, Howard Melvin, and Jas. H. Nichols have applied for a franchise for works to cost about $8,000.

NORFOLK, VA.—Press reports state that the water board opened bids Oct. 26 for constructing dams, waste wier and canals in the utilization of the Little Creek addition to the water supply. The lowest bid, that of John Lavelle, of Cleveland, O., at $105,000, work to be completed within seven months, will probably be accepted. The water board is also considering the question of filtration, for which it is estimated that it will require about $50,000 to begin the work. H. L. Smith, Supt.

KEYSTONE, W. VA.—Bids are wanted within 90 days by R. Elsinger, Chn. Com. for building works, to cost about $2,500. J. K. F. Steele, Recdr.

WASHINGTON, GA.—It is stated that the council is again considering the question of issuing bonds for the proposed works, estimated to cost $5,000.

SUMMIT, MISS.—We are informed that the contract for building the works has been let to P. H. Porter, Columbia Bldg., Louisville, Ky. The itemized bids are given under Contract Prices. Alber & Byrne, Engrs., 1821 Second Ave., Birmingham, Ala.

WOODLAWN, ALA.—Jno. T. Hood writes us that the works will cost about $25,000. Population, 3,200.

McCOMB CITY, MISS.—Bids are asked until Nov. 17 for building works to cost about $40,000. Sanders & Porter, Engrs., Columbia Bldg., Louisville, Ky.; J. D. Harrell, Cy. Clk.

GEORGETOWN, KY.—At the election Nov. 8 this place will vote on the question of issuing $12,000 in bonds for municipal works, according to reports. N. H. Sinclair, Mayor.

WEST COVINGTON, KY.—Arrangements are reported as being made by a company to build works at once. Mayor Moser may give information.

BEREA, O.—T. J. Quay, Mayor, writes us that the town will vote at the next election on the question of issuing $30,000 in bonds for works. No plans have yet been prepared. Population, 3,000.

CINCINNATI, O.—Bids are asked until No. 9 for laying water pipe on Baltimore Ave. G. H. Spellmire, Clk. Bd.

IRONTON, O.—The council has appointed a committee to consider the question of putting in a filtration plant.

ZANESVILLE, O.—The water trustees have been asked by the Harris Brick Co. to extend the water mains for better fire protection. Frank Myers, Secy. water-works trustees.

FORT WAYNE, IND.—The following bids were received by the trustees Oct. 20 for furnishing a new pump: Holly Mfg. Co., $20,500, 18 × 32 × 24 × 32—110 million duty; Henry R. Worthington, $22,660, 18 × 36 × 22 × 36—115 million duty; $16,580, 13 × 21 × 34 × 22 × 36—100 million duty; Blake Mfg. Co., $21,555, 18 × 36 × 16 × 36—110 million duty; $16,310, 11 × 19 × 33 × 22 × 36—75 million duty; $12,796, 15 × 30 × 22 × 36—60 million duty.

CHEBOYGAN, MICH.—At the election Nov. 8 this place will vote on the question of issuing $7,000 in bonds for extending the works.

DETROIT, MICH.—The matter of securing a pure water supply for Detroit, and all the other cities that can be reached by tunnel from Lake Huron for a distance of 60 miles, has been referred by the state board of health to a committee. Benj. F. Bush, Grand Blanc, Mich., is preparing maps and estimates. An enabling act will have to be passed by the legislature, which meets in January, to establish a sanitary district.

TRAVERSE CITY, MICH.—Mayor Smith has appointed Perry Hannah, H. S. Hull and Alderman Lardie a committee to take active steps towards securing the proposed municipal works.

CHICAGO, ILL.—Bids are asked until 3:30 p. m., Nov. 4, for laying water pipe in a number of streets.

ELBURN, ILL.—Bids are asked until Nov. 15 for sinking a 10-in. well about 200 or 300 ft. for a water supply. H. D. Hallet, Engr., 108 Grand Ave., Aurora, Ill.; A. W. Collins, Chn. Water-Wks. Com.

MELROSE PARK, ILL.—The contract for building the works has been let to Isharg, Miller & Co., at $45,000. W. B. Ewing, Engr., Marquette Bldg., Chicago; Wm. Leeseberg, Clk.

MILLEDGEVILLE, ILL.—The contract for building works has been let to J. L. White, of Chicago. The pump, tanks and engine will cost about $4,000, and the two miles of piping and laying will cost about $4,000. This also includes 25 hydrants.

APPLETON, WIS.—Herman Erb is reported to have been appointed receiver for the Appleton Water-Works Co.

IRETON. IA.—Allen & Co., Hawarden, Ia., have been awarded the contract for works for this place, at $5,500.

KENWOOD PARK, IA.—At the election, Nov. 8, this place will vote on the question of granting a 25-year franchise for works to the Kenwood Park Water & Light Co.

BURLINGAME, KAN.—Preliminary surveys for works to cost $20,000 have been made by H. V. Hinckley Topeka.

MANKATO, KAN.—The question of building municipal works, to cost about $21,000, is being considered. H. V. Hinckley, Engr., Topeka.

ST. MARYS, KAN.—H. V. Hinckley, Topeka, Kan., has made surveys, etc., for works, to cost $28,000.

WAMEGO, KAN.—An election will be held Nov. 15 to vote on the question of issuing $25,000 in bonds for the proposed works. H. V. Hinckley, Engr., Topeka; F. S. Haacke, Cy. Clk.

FORT BERTHOLD, N. DAK.—Bids are asked until Nov. 29 for constructing works at the Indian Agency here. Address the U. S. Indian Warehouse, 1602 State St., Chicago, Ill., or the Commissioner of Indian Affairs, Washington.

MARYVILLE, MO.—The question of the municipal ownership of the works of the Maryville Water Co. is being considered, according to reports.

TEXARKANA, ARK.—Press reports state that a number of improvements will be made to the works of the Water Co. of Texarkana, including a 30,000,000-gallon reservoir, etc. R. A. Munson, Supt.; Wm. M. Paul, Pres., Moorestown, N. J.

WYNNE, ARK.—Bids are asked until Nov. 10 for furnishing the materials and for building the works. (Postponement from Nov. 8, on account of election.) Owen Ford, Engr., Security Bldg., St. Louis, Mo.; Wm. McKennedy, Chn. Bd.

FLORENCE, COLO.—Bids are asked until Nov. 28 for furnishing the materials and for building works, as described in our advertising columns. Hiram Phillips, Des. Engr., 306 Oriel Bldg., St. Louis, Mo.; P. T. McGuire, Mayor.

DALLAS, ORE.—It is stated that this place has voted to issue $25,000 in bonds for works.

BREMERTON, WASH.—The following were the only bids received Oct. 22 by the bureau of yards and docks, Washington, D. C., for extending the works at the naval station: Taylor & Youngs, Seattle, Wash., $3,987, and Pacific Heat & Power Co., Seattle, $3,668.

ANAHEIM, CAL.—E. A. Honey, Orange, Cal., is reported to have purchased the works of this place, owned by the A. T. & S. Fe Ry. Co., and will at once improve it.

SANTA BARBARA, CAL.—The city engineer is making surveys for a 5,000,000-gallon reservoir, to cost about $7,000, according to reports.

OAKLAND, CAL.—Bids are asked by the supervisor until Nov. 7 for laying water pipe in Dacoto township.

PASADENA, CAL.—The Pasadena & Lake Vineyard Water Co. has decided to build a cover to Reservoir No. 2, at a cost of about $7,000.——The Pasqual Land & Water Co. has been incorporated.

SACRAMENTO, CAL.—City Tapper Watts has estimated the cost of constructing the proposed additional water mains at $95,000. Engineer Wolf estimates that a vertical triplicate pumping engine, incidental to the proposed new water mains, will cost about $30,700. The corporation counsel has been instructed to prepare an ordinance embodying the proposition calling for an election to vote on the issuing of bonds for the construction of a sewerage system, for a high school and for improving the water-works at the next regular meeting of the board.

SAN LUIS OBISPO, CAL.—J. A. Gardish, Cy. Clk., writes us that the city is negotiating for the purchase of the works of the San Luis Obispo Water Co.

SAN MATEO, CAL.—R. H. Jurg, Cy. Clk., writes us that the proposition to issue $80,000 in bonds for works failed to receive the two-thirds vote at the election Oct. 22.

WHITTIER, CAL.—An election will be held Nov. 22 to vote on the question of issuing $40,000 of 5% bonds for improving the works, noted last week. W. E Butler, Cy. Clk.

SALT LAKE CITY, UTAH.—A. A. Robertson writes us that F. C. Kelsey, Cy. Engr., is making investigations for a better water supply. Nothing will be done until he makes his report, which is not likely to be submitted for six months.

COALVILLE, UTAH.—This place voted Oct. 24 against issuing $8,000 in bonds for works.

GANANOQUE, ONT.—Geo. Taylor, M. P., writes us that the town has works for fire protection. This place wants complete works, to cost about $60,000. It prefers to build its own works, but may decide to grant a franchise for both water and electric lighting. The question is only being considered at present. Population, 4,000.

ROSSLAND, B. C.—The question of securing works and a light plant, to cost about $85,000, is still being considered, according to reports.

VANCOUVER, B. C.—T. H. Tracy, Cy. Engr., has submitted estimates for improving the works, as follows: A new flexible jointed main across the narrows, to cost about $8,000; 300 tons of iron pipe, for general extensions throughout the city, $12,000; new 22-in. main on the north side of the Narrows, as far as the rock tunnel, $50,000; hydrants and miscellaneous supplies, $3,000; total cost, $83,000.

BILLINGS BRIDGE, ONT.—James Perry, Contractor, has submitted a proposition to build works and a light plant for this place and Ottawa East.

SEWERAGE.

SOUTHBRIDGE, MASS.—Local papers state that the city will soon adopt plans for the proposed sewerage system and sewage disposal. C. W. Hill, Clk. Com., and Selectman J. M. Olney may be addressed.

BUFFALO, N. Y.—R. E. Parsons, Secy. Bd. Pub. Wks., writes us that the following bids were received Oct. 20 for building a brick sewer in Bryant St. and Ashland Ave.: W. G. Smith, $3,793; F. J. Martin, $4,970; Geo. Parks & Sons, $5,150; L. Ritzman, $4,444; John Harrer, $5,000; Henry Harter, $4,271; Andrew Beaser, $4,217, and Wm. Franklin, Jr., $3,950.

FISHKILL LANDING, N. Y.—D. S. Merritt, Tarrytown, N. Y., is preparing plans for a separate system for this place. C. E. Spraight, trustee, may be addressed.

KINGSTON, N. Y.—The borough engineer has submitted specifications for a system. Councilmen Reynolds, Shepheard and Lynn may be addressed.

NEW YORK, N. Y.—Bids are asked until Nov. 16 for rebuilding sewers in Ward No. 3 (Jamaica) Queens. Jas. Kane, Comr. of Sewers, 265 Broadway, Manhattan.

PATCHOGUE (L. I.), N. Y.—We are informed that bids will be opened in the first week of November for constructing 1,050 ft. of 18 to 12-in. storm water pipe sewer; average cut, 7 ft. Emmett F. Smith, Engr.,Patchogue; J. M. Pierce, Village Pres.

ROCHESTER, N. Y.—It is proposed to build sewers in several streets, at a cost of about $63,000. Peter Sheridan, Cy. Clk.

TROY, N. Y.—Bids are asked until Nov. 11 for constructing pipe sewers in two streets. E. O. Ross, Secy. Contracting Bd

PLAINFIELD, N. J.—We are informed that ordinances for 1,140 ft. of 24-in. storm pipe sewers will be passed within a month; average cut, 10 ft.; estimated cost, $2 200. Andrew J. Gavett, Engr. and Comr.; E. T. Barrows, Chn. Com.

SOUTH ORANGE, N. J.—The joint sewerage committee held a meeting Oct. 26, when a report was received from Alex. Potter, Engr., 137 Broadway, New York, in which he submitted the following figures showing what the cost would be to each of the municipalities interested in the joint outlet sewer to Staten Island Sound: South Orange village, $44,672; South Orange township, $21 824; Irvington, $28,220; Milburn, $21,764; West Orange, $56,834; Newark, $29,319; Vailsburg, $21,941. It is stated that the work will be pushed forward as rapidly as possible. It will be necessary for West Orange and South Orange townships and Milburn to take a vote on the question before the municipalities can legally do anything. South Orange village, Irvington, Vailsburg and Newark are practically ready to go on with the improvement.

NORTH BRADDOCK, PA.—The question of building the system, now partly constructed,wholly independent of Braddock, without using the main of Braddock as outlets, for a proper consideration; or, whether mains shall be extended for several miles to get around Braddock to its eastern and western limits, is now being considered.

GROVE CITY, PA.—Owens & Robinson, Meadville, Pa., have been awarded the contract for building sewers in this place.

WASHINGTON, D. C.—Bids are asked by the district commissioners until Dec. 10 for constructing the northerly portion of the Tiber Creek and New Jersey Ave. high-level intercepting sewer, as stated in our advertising columns.

SALISBURY, N. C.—The South Main Sewer Co. has been incorporated with a capital stock of $2,000 by D. L. Gaskill, W. C. Coughenour and O. D. Davis.

MOBILE, ALA.—The contract for building the system has been let to T. J. Shea, of Quincy, Ill., at $186,273. T. W. Nicol, Supervising Engr., informs us that the following are the total bids for the work, the bids being received Oct. 17; the work will be through sand and clay, and the average cut will be 5 ft.:

J. B. Neely & Co., Chattanooga, Tenn.	$216,644
T. J. Shea, Quincy, Ill	186,273
Greenville Con. Co., Greenville, O.	193 290
Dowdle & Dungan, Chicago, Ill.	234,161
Van Sandt & Meeds, Cincinnati, O.	316,817
Guild & Co., Chattanooga, Tenn.	277,645
M. T. Lewman & Co., Louisville, Ky.	285,506

NEW ORLEANS, LA.—Councilman F. J. Dreyfous writes us that the city wants bids for building a system on the basis of so much for each connection.

YOUNGSTOWN, O.—The question of making improvements to the sewers in certain streets is being considered.

EVANSVILLE, IND.—Bids are asked until Nov. 19 for constructing local sewers in certain streets. George W. Swearingen, Clk. Bd. Pub. Wks.

SHERIDAN, IND.—Bids are asked until Nov. 7. for building sewers. W. E. Clements, Town Clk.

SOUTH BEND, IND.—Bids are asked until Nov. 28 for constructing certain sewers. L. A. Hull, Cy. Clk.

DETROIT, MICH.—Bids are asked until Nov. 7 for constructing certain pipe sewers. D. W. H. Moreland, Pres. Bd. Pub. Wks.

LAKE LINDEN, MICH.—The question of issuing bonds for a system will soon be voted upon, according to reports.

PEORIA, ILL.—We are informed that the following bids were received Oct. 27 for sewers for the Illinois asylum for the incurable insane: John Woods & Co., 514 Weber St., Peoria—Plan No. 1, $1,763; plan No. 2, $3,109; plan No. 3, $4,339; and Crescent Stone Co., Peoria—Plan No. 1, $1,935; plan No. 2, $3,205; plan No. 3, $5,438.

MADISON, WIS.—The Reichert Construction Co., Racine, Wis., has been awarded the contract for building sewers in the Livingston and Lake St. districts at $9,050. The other bidders were as follows: Harding & Nelson, Racine, $9,380; Fetter & Crosby, $12,938; Nicholas Quinn, $10,373; Gottfried Moery, $12,550. Plans and specifications for the completion of the sewage disposal plant—the building, machinery, etc.—have been submitted by Engineers Dodge and Nader. It is proposed to put the plant in operation Jan. 1. John Corscot, Sewerage Comr.

ST. PAUL, MINN.—Bids are asked until Nov. 7 for constructing a sewer in Earl St. C. H. Bronson, Clk. Bd. Pub. Wks.

NEWTON, KAN.—Local papers state that a company will be organized to build a sewer in the south side. The capital stock will be $2,000. The Newton Milling & Elevator Co. may be addressed.

CARROLLTON, MO.—This place voted Oct. 25 to issue $50,000 in bonds for a system and for paving.

HELENA, MONT.—Bids are asked until Nov. 7 for building a pipe sewer in State St. Edward Horsky, Cy. Clk.

SHERMAN, TEX.—E. M. Kearney, Cy. Secy., writes us that a franchise has been granted to Geo. W. Ruch, 2851 Hutchinson St., Philadelphia, Pa., for the system on the plans of the Pennsylvania Sanitation Co. A. A. Fielder, Mayor; C. P. Gregory, Chn.

GRAND JUNCTION, COLO.—W. P. Ela, Mayor, writes us that no definite steps have yet been taken in regard to a system.

PUEBLO, COLO.—The city engineer has submitted plans for the proposed sewer for Bessemer. It is stated that about $7,500 will be spent at once.

GRANT'S PASS, ORE.—The question of building a sewer to cost about $5,000, is being considered.

PALO ALTO, CAL.—Bids are asked until Nov. 5 for building the system, $40,000 in bonds for which were voted Oct. 28. The bonds have been sold to E. H. Rollins & Son. C. E. Moore, Engr., Santa Clara, Cal.; H. W. Simkins, Clk.

SANTA ANA, CAL.—Bids are asked until 5 p. m., Nov. 7, for furnishing the materials and building the lateral sewers, about 18 miles in all; manholes, etc. Edward Telford, Cy. Clk.

SANTA MONICA, CAL.—J. C. Steel, Cy. Clk., writes us that it is proposed to construct at once three-quarters of a mile of 8-in. pipe sewer, at a cost of 58 cts. a ft. E. Carrillo, Cy. Engr.

PEMBROKE, ONT.—Plans for a system are reported to have been submitted to the council.

WALKERTON, ONT.—Bids are asked until 3 p. m., Nov. 7, for building about 5,000 ft. of 9 to 6-in. pipe sewers. R. H. McKay, Chn. Bd. of Wks.

GARBAGE DISPOSAL—STREET CLEANING

CAMDEN, N. J.—The Utilization Co., 3d and Market Sts., has been incorporated, with a capital stock of $300,000, by Kennedy Crossan, Philadelphia, Pa., Jno. T. Dyer, Morristown, N. J., Horace J. Subers, Ashborne, Pa., and Jas. E. Hays, Camden.——Street Commissioner Mohrman has submitted a report stating that it will cost about $1,000 to repair the garbage crematory.

NEW ORLEANS, LA.—Councilman Felix J. Dreyfous writes us that the city wants bids for garbage incinerators on the basis of so much a ton.

CHICAGO, ILL.—The Supreme Court has handed down a decision against the city's awarding 5-year garbage disposal contracts. The following were the contracts awarded last January: First district—Mulcaire & Burke, $350,000; Second district, Dowdle & Chamberlain, $790,000; Third district, Hanrahan & Downey, $349,312; Fourth district, Mulcaire & Burke, $384,509. Local papers state that in view of the Supreme Court's decision, it is proposed by Commissioner L. E. McGann to revive the garbage commission established last year to consider the question of building municipal crematories and letting contracts annually for the removal of refuse to those reduction plants. The commission consists of Mayor Harrison, Commissioner McGann, Superintendent of Streets Doherty, Alderman Powers and ex-Alderman John Maynard Harlan. The cost of the crematories is estimated at over $100,000.

DALLAS, TEX.—The council has received bids for building a garbage disposal plant for $10,000. Councilmen Barry and Hahn may be addressed.

SAN FRANCISCO, CAL.—H. C. Farquharson, Deputy Clk., writes us as follows, in regard to the contract for collecting and removing the garbage and refuse: The board of supervisors, Sept. 26, 1898, by resolution, directed the clerk to advertise for bids for the removal of house refuse and garbage for a period of two years, from January 1, 1899. On Oct. 10, the clerk caused a notice to be published, inviting bids to be received on Oct. 17. After publishing the notice for one day, the board directed that further publication be stopped, and postponed further action on the whole matter until Nov. 11. The present method of disposing of house refuse and garbage is by cremation, a franchise for which having been granted the Sanitary Reduction Works, 8th Floor, Mills Bldg., San Francisco, for a period of 50 years. In the matter of street cleaning, Mr. Farquharson states that the work is let by contract for a period of two years; the present contractor is the City Street Improvement Co., Rooms 10, 11 and 45 Mills Bldg., 5th Floor, whose term of contract expires Dec. 1, 1898.

MEXICO, MEXICO.—Local papers state that Lauro Arizcorreta, the concessionary, has succeeded in raising the capital necessary for the building and equipment of a crematory for the city offal, which is to be established in the Zoquipan Square, where now all the sweepings, garbage, etc., of the city is piled. It is the plan of the concessionary to use the heat of the crematory for steam purposes and to establish in its immediate vicinity a number of factories.

BUFFALO, N. Y.—The German Rock Asphalt & Cement Co., Ltd., has submitted the lowest bid for asphalt paving on Mechanic St., at $3,988, and Hydraulic St., at $2,981. ——The council has decided to pave portions of Clinton St., Ferry St., Morgan St., and Lafayette Ave., with asphalt.

DEERFIELD, N. Y.—C. W. Adams, State Engr., Albany, has awarded a contract for constructing two miles of road, extending from Deerfield Corners to the Herkimer county line, to James J. Dwyer & Co., Utica, at $13,806.

RIVERHEAD (L. I.), N. Y.—The county commissioners are considering the question of constructing new gravel and macadam roads.

LANSINGBURG, N. Y.—Bids are asked by the council until Nov. 9 for the purchase of $30,000 of paving bonds.

PATCHOGUE (L.I.), N.Y.—Emmet F. Smith, Cy. Engr., informs us that a contract has been awarded to the Eastern Paving Brick Co., Catskill, N. Y., at $3,460 for 2,300 sq. yds. of brick paving.

SYRACUSE, N. Y.—The following bids have been received for paving Jefferson St. with sheet asphalt from South Clinton St. to Lemon St. Russell R. Stuart, Cy. Engr: Columbia Construction Co., $39,906; Syracuse Improvement Co., $37,993; Warren-Scharf Asphalt Paving Co., $41,720; Asphaltina Construction Co. (asphalt), $39,748; (asphaltina sheeting), $37,185; Empire Contracting Co., $40,042.

JERSEY CITY, N. J.—Bids are asked until Nov. 7 for about 750 sq. yds. of Belgian paving, 3,700 sq. yds. of macadam, curbing, etc., on Greenville, Ave. Geo. T. Bouton, Clk. St. and Water Bd.

NEW BRUNSWICK, N. J.—The county freeholders have purchased the toll road from New Brunswick to Old Bridge, at $3,000. The road will be improved.

PHILADELPHIA, PA.—An ordinance is being considered by the council to pave several hundred small streets, to cost about $500,000. E. W. Patton, Chn. Com.

READING, PA.—The board of public works has awarded a contract to the Pennsylvania Asphalt Paving Co., at $9,365 for paving Fifth St., between Laurel and Canal Sts.

HUNTINGTON, W. VA.—Bids are asked until Nov. 24 for laying a brick sidewalk with gutter on Seventh St., between Fourth and Fifth Aves. F. L. Doolittle, Clk.

MONTGOMERY, ALA.—Bids are asked until Nov. 7 for paving Washington St., from Bainbridge to Lawrence St., with brick; also sidewalks of hexagon block. R. H. Sommerville, Treas.

JACKSONVILLE, FLA.—Chairman Stockton, Chn. Bd. Pub. Wks., has directed City Engineer Priolieu to prepare estimates for the proposed brick paving on Main St.

SHREVEPORT, LA.—The council is considering the question of issuing $40,000 in bonds for paving, according to reports.

LAWRENCEBURG, KY.—Bids are asked until Nov. 7 for brick paving, according to reports. J. W. Waterfill, Cy. Clk.

CLEVELAND, O.—Bids are asked until Nov. 9 for grading and draining about 1½ miles of the Berea Road. J. C. Dorn, Clk. County Comrs.

DAYTON, O.—Bids are asked until Nov. 7 for about 1,927 sq. yds. of brick paving and 1,478 lin. ft. of curbing. J. E. Gimperling, Cy. Comptroller.

ELYRIA, O.—The question of county road improvements will be submitted to a vote at the election in April, 1899.

HAMILTON, O.—The following bids have been received for paving Second St. with asphalt, from Central Ave. to Black St. L. A. Dillon, Cy. Engr.:

	With l'mstone curb & gutr.	With cement curb & gutr.
Block Asphalt.		
August J. Heinkle	$59,934	$57,149
J. M. Quill	59,136	56,862
Sheet Asphalt.		
David Folz Asphalt Paving Co.	$52,669	$49,245
Warren-Scharf Asphalt Paving Co.	51,178	46,598
Columbia Construction Co.	47,552	45,298

SPRINGFIELD, O.—Bids are asked until Dec. 6 for the purchase of $5,000 of 5% street improvement bonds, according to reports. Philip Huonker, Cy. Clk.

TOLEDO, O.—Joseph Hofman, County Surveyor, writes us that the engineer's report on the proposed stone road has been submitted to the county commissioners. No final action has been taken yet. Plans and surveys will probably be ordered sometime after Jan. 1.

FORT WAYNE, IND.—A petition will be presented to the board of public works by the residents of Lakeside for asphalt paving on several streets.

INDIANAPOLIS, IND.—Bids are asked until Nov. 9 for laying cement sidewalks on McLean Place, between Meridian and Illinois Sts. M. A. Downing, Chn. Bd. Pub.Wks.

UNION CITY, IND.—Bids are asked until Nov. 9 for grading, graveling and constructing walks on North Howard St. G. A. Rosenbush, Clk.

CHICAGO, ILL.—Bids are asked until 3.30 p. m., Nov. 4 for curbing and paving with asphalt on Vernon Ave. and curbing, grading and brick paving on Illinois St. and La Salle Ave. L. E. M'Gann, Pres. Bd. Local Improvements, 212 City Hall.

GALESBURG, ILL.—Two blocks of South Chambers St. will probably be paved in the spring.

QUINCY, ILL.—Bids are asked for the construction of the Missouri stone road to Taylor, 12,100 ft. long and 21-ft. roadway; estimated cost, $12,000. N. Heintz, Chn. Com., 523 Maine St., Quincy; F. A. Grover, County Engr.

FORT MADISON, IA.—Bids will soon be asked for macadamizing on the Burlington Road. J. R. Robertson, Cy. Engr.

KEOKUK, IA.—Plans and estimates have been submitted to the council for two blocks of brick paving.

ST. PAUL, MINN.—L. W. Rundlett, Cy. Engr., has estimated the cost of the proposed paving of 10th St. with asphalt, at $40,220; brick, $34,560; sandstone, $42,110. The paving between the tracks by the street railway company will cost $19,970 with asphalt, $17,120 with brick and $12,920 with sandstone.

ST. PAUL, MINN.—Bids are asked by the board of public works until Nov. 10 for improving Summit Ave., from Dale to Lexington Ave.

CARROLLTON, MO.—It has been voted to issue $50,000 in bonds for paving and constructing sewers.

KANSAS CITY, MO.—Bids are asked until Nov. 8 for furnishing the material and constructing brick, hexagon block and granitoid sidewalks on certain streets. Henry A. Wise, Cy. Engr.

BOULDER, COLO.—The council is considering a proposition to pave the main streets of the city, according to reports.

SIOUX FALLS, S. DAK.—Reports state that bids will be asked at the next meeting of the council for constructing several miles of sidewalks.

BEAUMONT, TEX.—L. E. Beadle, Galveston, Tex., is preparing plans and specifications for paving. D. P. Wheat, Mayor.

SANTA BARBARA, CAL.—The council has passed an ordinance for the extension of the Plaza del Mar Boulevard; estimated cost, $20,000. A. Crane, Cy. Clk.

MANUFACTURING PLANTS.

CAMBRIDGE, MASS.—Plans have been filed for the construction of a new plant for the Boston Bridge Works on 6th and Binney Sts. The building will be of brick, 275 × 162 ft., and the height, one and two stories, in sections.——The lumber mill of Geo. W. Gale, on Albany St., Cambridgeport, was destroyed by fire, Oct. 26, causing a reported loss of $30,000, fully insured. The building was a 2-story wooden structure, 60 × 30 ft.

MILLBURY, MASS.—Reports state that H. L. Bowden & Co., of Boston, have purchased the plant of the C. D. Morse Mfg. Co., in Millbury, and intend to equip it at once with about $35,000 worth of new machinery.

WALLINGFORD, CONN.—Reports state that an addition will soon be built to the Simpson, Hall, Miller & Co.'s factory, adjoining the west end of the brick factory.

JAMAICA (L. I.), N. Y.—The Diogenes Brewing Co., of which John Badenhoop is president, has filed plans for the erection of a new 4-story brick brewery, at Wyckoff Ave. and Decatur St., to cost $30,000. It will have all modern machinery, and will be built by Theodore Engelhardt, of Brooklyn. The contract for the mason work has been awarded to Dietrich Cook, Brooklyn, N. Y.

ONEONTA, N. Y.—It is announced that the Sidney Novelty Co. has increased its capital stock to $100,000, and will at once build a new shop 125 × 60 ft., which will double the present output of the plant.

OSWEGO, N. Y.—The plant of the Tonkin Boiler & Engine Works was destroyed by fire Oct. 28. The buildings were erected four years ago by J. J. Tonkin, of Oswego, and others, at a cost of $105,000, including the equipment; insurance $45,000.

BEAVER FALLS, PA.—It is reported that the Beaver Falls Enamel Iron Works Co. is making preparations to enlarge its plant. Owner, M. W. Gillespie, of Pittsburg.

ERIE, PA.—The American Meter Co., which has recently bought the Metric Metal Co.'s plant on East 10th St., will erect an addition to the factory, for use as a brass foundry, at a cost of $20,000.

JOHNSTOWN, PA.—The American Specialty Co. expects to erect a new plant in this city for the manufacture of earthenware; estimated cost, $5,000.

WHEELING, W. VA.—Plans are being prepared for a 5-story brick and stone factory building to be erected on 19th St., for the Exley & Watkins Co., manufacturers of spices and preserves, to cost about $15,000.——Plans are also under way for a 40-ton ice plant, to be erected on 28th St., South Side, for the People's Ice & Storage Co. It is said that contracts will soon be let. Pres., Chas. B. Lemmon.

BALTIMORE, MD.—It is reported that Hubbard & Co. have leased a tract of land on the water front, and that they will erect a large fertilizer plant thereon.

ORANGEBURG, S. C.—The Enterprise Cotton Mills will issue $75,000 in bonds in order to purchase at once a complete equipment for the manufacture of cotton yarns. The mill as planned will contain 11,200 spindles and 350 looms. Electric lighting plant will also be included in the mill, according to reports.

SALEM, O.—The Standard Pottery Co., of East Liverpool, O., contemplates the erection of a new pottery plant in this city.

WELLSVILLE, O.—This town expects to give a bonus of $10,000 to A. Plumer and others, who are to erect at this place a window glass factory to cost $60,000.

FORT WAYNE, IND.—C. E. Moellering & Co. have recently been awarded the contract for erecting a 3-story addition 50×80 ft., to the factory of the Fort Wayne Organ Co., on Fairfield Ave.

MERRILL, WIS.—A fire in this city Oct. 19 damaged the large sawmill of the T. B. Scott Lumber Co., causing a reported loss of $60,000; insurance, $35,000.

MARE ISLAND, CAL.—Bids are asked until Nov. 26 for the construction of a sawmill, boiler house and steel chimney, at the navy yard, Mare Island. Address Mordecai T. Endicott, Ch. of Bureau of Yards and Docks, Washington, D. C.

VANCOUVER, B. C.—A fire in this city Oct. 25 destroyed the Hastings sawmill, owned by the Royal City Planing Mill Co., which had a capacity of 90,000,000 ft. a year. Estimated loss, about $200,000.

GAS PLANTS.

BUFFALO, N. Y.—Bids are asked until Nov. 10 for sinking a gas well in South Park. G. H. Selkirk, Secy. Park Comrs.

GREEN BAY, WIS.—The A. M. Sutherland Co., of New York, has purchased the bonds of the Green Bay Gas & Electric Light Co., and also one-quarter of the capital stock. An improved Lowe water gas plant will be put in at a cost of $50,000, and about 13 miles of new iron pipe will be laid and all the wooden mains will be taken up.

MANITOWOC, WIS.—E. R. Davis, Chicago, Ill., submitted a proposition to the council Oct. 17 to construct a gas plant in this city to cost about $40,000, provided the city should grant him a 50-year franchise. Many of the residents of Manitowoc are anxious to have a gas plant built here for both fuel and lighting.

TOPEKA, KAN.—Bartlett Hayward, Baltimore, Md., has been awarded a contract by the gas company of this place for constructing a gas holder 82-ft. in diameter and 68 ft. high, capacity about 300,000 cu. ft. It is reported that 8 and 10-in. mains will be laid in a number of streets and that other improvements will be made, at a cost of about $50,000. C. K. Holliday, Jr., may be addressed.

NEW COMPANIES.—Jerome Oil Co., Cleveland, O.; $150,000, with $500 paid in; to bore for oil and gas; Edward Bushnell, A. Fostler, J. H. Sampline, T. H. Bushnell, Cleveland, O.; C. A. Neff, Glenville, O.

Empire Oil Co., Cleveland, O., $100,000, with $1,700 paid in; to produce and deal in oil; W. C. Wood, H. S. Miller, Henry Wilkes, O. A. Treiber, L. A. Wood, Cleveland, O.

Chester Light & Heating Co., Middletown, N. Y.; Pres., William A. Lawrence; Secy., Charles W. Kerner; Treas., George M. Roe; Trustees, W. A. Lawrence, C. W. Kerner, G. M. Roe, Joseph Board, Jonas D. Millspaugh, Dr. C. P. Smith, Frank Durland and R. H. Marvin.

MISCELLANEOUS CONTRACTS.

FIRE ALARM SYSTEM.—New Orleans, La.—A resolution has been passed by the council to rebuild the fire alarm system, according to reports.

BRICK.—Esquimalt, B. C.—Bids are asked by the officer in charge at H. M. naval yard, Esquimalt, B. C., for furnishing 600,000 building brick.

WHARF AND PARK.—Vancouver, B. C.—Reports state that the question of appropriating $12,000 for constructing a wharf, and $150,000 for laying out a park, will soon be submitted to a vote.

TELEPHONE SYSTEM.—St. Joseph, Mo.—An ordinance has been introduced in the council to grant a franchise to the Hanamo Telephone Co. to operate in this place. Alderman Garvey, Chn. Com.

PARK.—Scranton, Pa.—The council is considering the question of appropriating about $75,000 in the bond ordinance, for a proposed park for West Scranton. Address Park Commissioner Bedford.

DOCKS AND PIERS.—Cleveland, O.—The board of control has approved the contracts with L. P. & J. A. Smith for the construction of docks and piers between Seneca and Erie Sts., on the lake front.

SUBWAY.—McKeesport, Pa.—J. J. Bedell, Councilman, will introduce an ordinance for the increase of the municipal debt to the amount of $100,000, to construct a subway for electric wires and erect a city hall.

FIRE ALARM SYSTEM.—Lancaster, O.—Bids are asked until Nov. 12 for installing a complete electrical fire alarm system, to contain four circuits of No. 12 copper wire and 28 alarm boxes. H. T. Mechling, Cy. Clk.

PIERS.—Brooklyn, N. Y.—The department of docks and ferries has decided to construct two new piers, 650 × 65 ft. and 640 × 90 ft., respectively, at the Wallabout basin, estimated cost, about $70,000. J. A. Bensel, Ch. Engr.

LEVEE WORK.—Pueblo, Colo.—Frank Taylor has submitted the lowest bid for constructing the levees from Union to Victoria Aves. at $10,495 for the south side and $13,496 for the north side levee. Mayor Orman may be addressed.

TUBULAR BOILERS.—San Francisco, Cal.—Bids are asked until Nov. 28 for installing two return tubular boilers of the Scotch type, for the light-house tender "Madrona," surety, $1,500. Capt. Geo. N. Coffin, 404 Safe Deposit Bldg., San Francisco.

REMOVING ROCK.—Athens, N. Y.—T. D. Welch & Co., Nassau, N. Y., have been awarded a contract to remove about 7,000 cu. yds. of rock at Four Mile Point, Hudson River, four miles north of this place. N. O. Belyea, Engr., 547 State St., Hudson, N. Y.

TUNNEL.—Dunkirk, N. Y.—The construction of a tunnel at this place, to be 800 ft. long, and cost about $20,000, is being considered by the Lake Shore & Michigan Southern, the Western New York & Pennsylvania and the New York, Chicago & St. Louis Ry. Cos.

LEVEE WORK.—New Orleans, La.—Bids are asked by the board of state engineers until Nov. 8 for work on the William levee, on the Red River, in Rapides parish, about 165,000 cu. yds., and the De Lee enlargement, on the Atchafalaya River, in Avoyelles parish, about 30,000 cu. yds.

TELEPHONE LINE.—Augusta, Ga.—Local papers state that Thomas Barnard, of the American Telephone Co., New York, has been receiving bids at Arlington, Ga., for the construction of a telephone line between Augusta and New York, via Lynchburg, Va., Danville, Va., Greensboro, N. C., Charlotte, N. C., Columbia, S. C., and Aiken, S. C. The line will be about 500 miles long, and require about 35,000 25-ft. poles, to be completed by April 1.

MINING.—San Francisco, Cal.—The California Debris Commission, having received application to mine by the hydraulic process from the Excelsior Mining Co., in the Excelsior Mine at Lowell Hill, Nevada county, to deposit tailings in the North Fork of Steep Hollow; from Toy Kee, in the Fair Play Mine near Scales, to deposit tailings in Fair Play Ravine; from S. F. Bullard and A. M. Gray, in the Gravel Hill or McCutchean Placer Mine, near Nevada City, to deposit tailings in Little Deer Creek; and from Elmore Rutherford, in the Plumas Bonanza Gravel Mine, near Buck's Ranch, Plumas county, to deposit tailings in Sherman Ravine, gave notice that a meeting will be held in the Flood Building, San Francisco, Nov. 7.

CONTRACT PRICES.

SHELL.—Washington, D. C.—The Chief of Ordnance, U. S. A., received the following bids Oct. 21, 1898, for furnishing shell; (1) being for 1,500 7-in. common steel mortar shell; (2) for 1,000 5-in. common shell; and (3) for 1,500 7-in. common shell for howitzers: Midvale Steel Co., Philadelphia, (1) $10.69 each; (2) $3.85 each; (3) $8.98 each. U. S. Projectile Co., 1st Ave. and 53d St., Brooklyn, (1) $11.50, (2) $5.50, (3) $10.50; American Ordnance Co., Washington, (1) $12, (2) $5.70, (3) $11.25; Taylor Iron & Steel Co., Highbridge, N. J., (1) $13.30, (2) $5.49; (3) $12.85.

SHOT AND SHELL.—Washington, D. C.—It is stated that the following bids were received by the Chief of Ordnance, U. S. A., Oct. 17, 1898, for furnishing (1) 5-in. armor-piercing shot and (2) shell: U. S. Projectile Co., Brooklyn, (2) $16 each; Midvale Steel Co., Philadelphia, (1) $18.43, (2) $11.93; Benjamin Atha & Illingsworth Co., Harrison, N. J., (1) $22; Carpenter Steel Co., Reading, Pa., (1) $22, (2) $20; Firth Sterling Steel Co., Pittsburg, Pa., (1) $22; (2) $20.

DREDGING, ETC.—Wilmington, Del.—Maj. W. F. Smith, U. S. Engr., has awarded the contract for removing the rock in the Christiana River to John J. Fitzpatrick, Plattsburg, N. Y., at $7.13 a cu. yd.; the work to be completed by July 1. The contract for dredging in the river has been let to the New York Dredging Co., New York, at 12⅗ cts. a cu. yd., the plant to have a capacity of 3,500 yds. a day. The bids for this work were given in our issue of Oct. 20.

GRADING AND DREDGING.—Boston, Mass.—The following bids were received Oct. 24, 1898, by Benj. W. Wells, Supt. of Sts., for grading Columbia Road, South Boston, between I and Atlantic Sts., and dredging and filling in, for a beach, in all about 188,000 cu. yds.: Eastern Dredging Co., 48⅘ cts. a cu. yd., total, $91,744; Perkins, White & Co., 53 cts., $99,640; S. J. Donovan, 46½ cts., $87,420; John W. Hensby, 53 cts., $99,640.

SIDEWALKS.—Toledo, O.—C. Peck & Sons have been awarded the contract for laying a stone sidewalk at 12⅛ cts. a sq. ft; M. J. Goulden has been awarded the contract for plank walks at 24 cts. a ft. for those 6 ft. wide, and 19 cts. a ft. for those 4 ft. wide.

DREDGING.—Narragansett Bay, R. I.—Maj. D. W. Lockwood, U. S. Engr., Newport, received the following bids Oct. 26, 1898, for dredging Providence River and Narragansett Bay, R. I., on the basis that there are to be removed about 2,036,491 cu. yds., giving a channel with a mean depth at low water of 25 ft. 400 ft. wide from the ocean to Providence Harbor through the West Passage; the government specifies that the work shall begin by March 1, 1899, and be completed by July 1, 1902:

Bidder.	A cu. yd. cts.
Wm. H. Taylor, Jr., Jersey City, N. J.	14⅜
W. H. Beard Dredging Co., New York, N. Y.	20¼
The International Contract Co., Syracuse, N. Y.	12½
Frank H. Brainard, 24 State St., New York	24
Perkins & O'Brien, 256 Broadway, New York	10⅘
R. C. & J. S. Packard, New York	21
J. Clements Shafter, Richmond, Va.	21½
Morris & Cumings D. Co. and P. S. Ross, Jersey City	15⅕
Rittenhouse-Moore Dredging Co., Mobile, Ala.	21
McDonald Dredging Co., 33 Wall St., New York	16¾

ASPHALT PAVING.—Niagara Falls, N. Y.—S. F. Arkush, Cy. Clk., informs us that the following bids were received Oct. 28, 1898, for asphalt paving in two streets:

Quantities.		Barber Asp. Pvg Co., New York.	H. P. Burgard, Buffalo.
Asphalt pavement	7,015 sq. yds.	$2.29	$2.05
Excavation	150 cu. yds.	.50	.40
Rock	30 " "	3.50	3.00
Overhaul	100 " "	.02	.01
Connections: Sewer.	100 lin. ft.	1.50	1.00
Water	100 " "	.95	1.00
Gas	100 " "	.25	.50
Catchbasins	3 each	50.00	40.00
Brick gutters	60 sq. yds.	2.40	2.05
Total		$16,808*	$15,025

*Overhaul not included in total of this bid. Curbing is included in price per sq. yd. of pavement in both bids.

Cherry Ave., 1st to Main St., Barber Asphalt Paving Co., pavement, 1,175 sq. yds., $2.43; total, $3,233; H. P. Burgard, Prudential Bldg., Buffalo, $2,20 a sq. yd., total, $2,926. The bids for the other parts of the work are the same as in the 2d St. bid, although in some cases the quantities are a little less.

WATER-WORKS.—Summit, Miss.—We are informed that the following contract was let Oct. 25, 1898, to P. H. Porter, of Porter & Sanders, Columbia Bldg., Louisville, Ky., for furnishing the materials and building the works; Engr., Albert Byrne, 1821 Second Ave., Birmingham, Ala.:

Items.	Cost. Piece.	Cost. Total.
Cast-iron pipe, a ton	$20.60	$4,573.20
Special castings, a ton	40.00	160.00
Fire hydrants, each	20.50	410.00
8-in. gate valves, each	13.75	26.50
6-in. " " "	10.00	40.00
4-in. " " "	6.25	37.50
Valve boxes, each	2.25	24.00
Laying 8-in. pipe, a lin. ft.	.14	84,00
" 6-in. " "	.12	671.04
" 4-in. " "	.10	1,062.00
Furnishing and laying, 2-in. vit. pipe	.15 }	
" " " 1½-in. pipe	.12 }	483.00
" " set'g pump & heater		975.00
" " " 2 boilers		1,150.00
" " " stand-pipe		2,603.76
Building power-house		450.00
Sinking well, 6-in. casing		600.00
Deep-well pump and pumping basin		525.00
Total		$13,875.00

SEWER PIPE, CEMENT, ETC.—Newtown, Mass.—Chas. W. Ross, St. Comr., West Newtown, informs us that the following bids were received Oct. 21 for furnishing about 90,000 ft. of 24 to 4-in. sewer pipe, about 4,700 bbls of American cement, etc.; the bids for the sewer pipe were rejected:

Bidder.	Sewer pipe, discount.	Cement. American, 4,700 bbls.	Cement. Portland, 800 bbls.
Fiske, Hames & Co., Boston, Mass.	78%	$0.75	$2.15
Berry & Ferguson, Boston	77½%	.82	...
Waldo Bros., Boston	77½%	.81	2.15
Ham & Carter, Boston	80%	.80	...
Portland (Me.) Stone Ware Co.	78%	...	...
W. G. Nash, Boston	..	.82	...
Smith-Green Co., Worcester, Mass.	..	.82	2.03

	Manhole covers, 200, each.
A. Russell & Sons, Newburyport, Mass.	$5.98
Concord Foundry Co., Concord, N. H.	4.95
Portland (Me.) Stone Ware Co.	4.87
Chelmsford Foundry Co., Boston,	4.69
Osgood & Hart, Charlestown, Mass.	4.65
Mechanics' Foundry Co., Boston,	4.59
Sessions Foundry Co., Bristol, Conn.	4.44
Somerville Foundry Co., Somerville, Mass.	4.47
Le Baron Foundry Co., Middleborough*	4.28

*Awarded contract.

STATE HIGHWAY.—Sudbury, Mass.—The following contract was let Oct. 20, 1898, to White & Gaffney, Medford, Mass., for building in state highway in this city for the Massachusetts State Highway Commission; Secy., A. B. Fletcher, Boston: Excavation, 1,375 cu. yds., at 25 cts. a cu. yd.; excavation, borrow, 200 cu. yds., 50 cts.; ledge excavation, 100 cu. yds., $2.00; rubble masonry—laid dry, 38 cu. yds., $2.75, laid in cement, 100 cu. yds., $7.00; gravel, 425 cu. dys., 50 cts.; Telford, 100 sq. yds., 30 cts. a sq. yd.; shaping, 6,778 sq. yds., 2½ cts.; broken stone in place, 1,743 tons, $1.50 a ton; 12-in. cast-iron pipe, 50 lin. ft., $1.50 a lin. ft.; 20-in. cast-iron pipe, 34 lin. ft., $3.00; fencing used as guard rail, 500 lin. ft., 17 cts.; side drains, 300 lin. ft., 35 cts.; stone monuments, 14, each $1.50; catchbasins, 2, each $20.00; superstructure of bridge, lump sum, $450; total, $5,353.

SEWER, ETC.—Hamilton, O.—The following bids were received by the board of control Oct. 16, 1898, for constructing a sewer in 4th St., and for arching the hydraulic: S. E. Irwin—12-in. single strength sewer pipe, 40 cts. a lin ft.; manholes, each $15.00; inlet basins, each $21.00; brick sewer, $9.49 a lin. ft.; Jos. T. Guillaume—12-in. single strength sewer pipe from street crossings, 40 cts.; manholes, $11; inlet basins, $13; brick sewer, exclusive of first three items, $9.13; Gus Drach—12-in. single strength sewer pipe, 50 cts.; manholes, $2; inlet basins, $22; brick sewer, $9.51; Louis Drach—Concrete conduit, complete, $8 a lin. ft. (this bid is on separate plan of the bidder); W. H. Louthan—12-in. single strength, 25 cts.; manholes, $10; brick sewer, A, $9.80; 20-in. single strength, 34 cts. a lin. ft.; 18-in., 27 cts.; 15-in., 21 cts.; 12-in., 16 cts.; less than 6 ft. deep, 12 cts.; 6 ft. deep and over, 12 cts.; manholes, $15; inlet basins, $15; iron pipe laid with lead joints, $25. Total, about $17,000. Jos. T. Guillaume is the lowest bidder.

ENGINEERING MATERIAL PRICES.

TRACK MATERIALS—
- New York—Angle bars, 1.05 cts. to 1.10 cts.; spikes, 1.40 cts. to 1.50 cts.; track bolts, hexagonal, 1.80 cts. to 1.85 cts.; square, 1.60 cts. to 1.70 cts.
- Chicago—Angle bars, 1.10 cts.; spikes, 1.55 cts. to 1.60 cts.; track bolts, hexagonal, 1.90 cts. to 2.00 cts.; square, 1.80 cts. to 1.90 cts.

RAILS, STEEL—
- New York, new, $18.00 to $19.00; old iron, $11.00 to $11.50; old steel, $9.00.
- Chicago, new, $20.00 to $22.50; old iron, $12.50 to $13.25; steel, $8.00 to $10.00.
- Pittsburg, new $18.00 to $20.00; old iron, $13.50 to $13.75; steel, $10.00.

STRUCTURAL STEEL—
- New York—Beams, 1.35 cts. to 1.45 cts.; channels, 1.35 cts. to 1.45 cts.; tees, 1.45 cts. to 1.50 cts.; angles, 1.25 cts. to 1.30 cts.; rivets, 1.75 cts. to 1.85 cts.
- Chicago—Beams, 1.35 cts. to 1.50 cts.; channels, 1.35 cts. to 1.50 cts.; tees, 1.40 cts. to 1.50 cts.; angles, 1.30 cts. to 1.35 cts.
- Pittsburg—Beams, 1.20 cts. to 1.30 cts.; channels, 1.20 cts. to 1.30 cts.; tees, 1.20 cts. to 1.25 cts.; angles, 1.10 cts. to 1.15 cts.

PLATES AND SHEETS—
- New York—Universal mill plates, 1.25 cts. to 1.30 cts.; tank, 1.35 cts. to 1.40 cts.; shell, 1.40 cts. to 1.45 cts.: flange, 1.60 cts. to 1.70 cts.; firebox, 2.25 cts. to 2.50 cts.
- Chicago—Universal mill plates, 1.30 cts. to 1.35 cts.; tank, 1.25 cts. to 1.30 cts.; shell, 1.55 cts. to 1.65 cts.; flange, 1.30 cts. to 1.50 cts.; firebox, 1.75 cts. to 4.00 cts.; sheets, 2.00 cts. to 2.10 cts.
- Pittsburg—Universal mill plates, 1.10 cts. to 1.15 cts.; tank, 1.10 cts. to 1.15 cts.; shell, 1.30 cts. to 1.35 cts.; flange, 1.20 cts. to 1.25 cts.; firebox, 1.50 cts. upwards; sheets, 1.85 cts. to 1.95 cts..

MERCHANT STEEL—
- Machinery, per lb., 1.60 cts. to 1.70 cts.
- Tool, per lb., 5.50 cts. to 7 cts.

IRON—
- Pig iron:
  - New York—No. 1, $11.25 to $11.50; No. 2, $10.50 to $10.75.
  - Chicago—No. 1, $11.50 to $12.50; No. 2, $11.00 to $12.00.
  - Pittsburg—No. 1, $10.50 to $10.75; No. 2, $10.00 to $10.10.
- Bar iron:
  - New York, common, 1.07½ cts. to 1.10 cts.; refined, 1.15 cts. to 1.20 cts.
  - Chicago, common, 1.05 cts. to 1.10 cts.; refined, 1.15 cts. to 1.20 cts.
- Sheets:
  - Common, American, per lb., 1.45 cts. to 2.55 cts.
  - Russia, per lb., 10½ cts. to 11.00 cts.

LUMBER—
- New York:
  - Hemlock timber, 20 ft. and under, per M, $12.00 to $12.50.
  - Piling, Eastern spruce, 35 to 40 ft., 30 to 40% 12-in. butts, 4 cts.
  - Spruce, special cargoes, per M, $15.00 to $17.50.
  - Yellow pine, random cargoes, $15.50 to $17.00.
  - North Carolina pine, $2.25 to $2.40 advance over Norfolk rates.
- San Francisco:
  - Oregon pine, per M, $15.50 to $17.50.
  - Redwood, per M, $18.20 to $20.00.
  - Redwood tank stock, up to 10 ft., $24.00 to $25.00.

GENERAL MATERIALS—
- Lead, New York, $3.65 cts. to $3.70 cts.
- Nails, Pittsburg, 1.40 cts.
- Solder, per lb., 8¼ cts. to 11½ cts.
- Spelter, per lb., 3.90 cts. to 4.00 cts.
- Copper ingots, 12.40 cts. to 12.50 cts.
- Granite, rough, New York, cu. ft., 40 cts. to 50 cts.
- Limestone, New York, cu. ft., 70 cts. to 80 cts.
- Ohio freestone, New York, cu. ft., 85 cts. to 90 cts.
- Slate, Penn., block, per square, $4.00 to $5.00.
- White lead, American, per lb., 5½ cts. to 6 cts.
- Lime, common state, per bbl., 70 cts.

INDUSTRIAL NOTES.

THE DETROIT GRAPHITE MFG. CO., Detroit, Mich., has removed its Chicago office from 1033 Marquette Building to 1564 Monadnock Block.

THE GOHEEN MFG. CO., Canton, O., has recently introduced a paint for galvanized iron. This has the trade name of "Galvanum" and will, according to claims, adhere satisfactorily to galvanized surfaces.

THE HARRISBURG FOUNDRY & MACHINE WORKS, Harrisburg, Pa., has an order for boilers and engines, as well as a complete steam plant, to be used in a large woolen mill near Pekin, China. The mill, it is said, will be the first of the kind ever erected in China.

THE RITER-CONLEY MFG. CO., Pittsburg, has a contract to build for the Mexican City Tramway Co. an engine and boiler house, a main building, a coal storage building, etc. About 300 tons of structural steel will be required, together with other material needed in structures of the kind.

THE WE FU GO COMPANY, Smith and Augusta Sts., Cincinnati, announces that the Lorain Steel Co., Lorain, O., now of the Federal Steel Co., has adopted its system of purifying water for boilers, at its new blast furnace. The plant will purify 1,200,000 gallons each 24 hours, sufficient water for 12,000 HP. water-tube boilers. This company has had live steam purifiers in use at the steel mills for some time, but it is expected that the device now adopted will give better results than the mechanical purifiers and save money.

THE RUSSELL SNOW PLOW CO., Tremont Building, Boston, Mass., reports the following recent orders: New York Central & Hudson River R. R. Co., one Russell wing-elevator snow-plow, size No. 2, and one Russell standard snow-plow, size No. 2, both for the Western division of the main line; also for two Russell wing-elevator snow-plows, size No. 2, for their Rome, Watertown & Ogdensburg line. Also an order from the Saginaw, Tuscola & Huron R. R. Co. for one Russell snow-plow, size No. 3, with air flanger, and an order for two Russell snow-plows, with hand flanger, size No. 4, and for one size No. 3 for the Washington County R. R., a new road in Maine.

THE BERLIN IRON BRIDGE CO., East Berlin, Conn., is creating a steel lattice truss about 68 ft. long for the Seamless Metal Co., Sing Sing, N. Y. The truss crosses the railway and affords access to different parts of the company's works. The company is also erecting for the United Gas Improvement Co., Waterbury, Conn., the steel work for a generator room and an engine room. These roofs are to have steel trusses, supporting the roof covering. This covering is corrugated iron lined with the Berlin Iron Bridge Co.'s patent anti-condensation fireproof lining. The engine room has a span of about 33 ft., and the span of the generator room is about 51 ft.

PERSONAL.

Lieut. Eben T. Tannatt, Second Regiment, U. S. Volunteer Engineers, has resigned.

Mr. E. Sherman Gould, M. Am. Soc. C. E., of Yonkers, N. Y., has returned from Cuba.

Mr. Abram Wing, Superintendent of the City Water Supply Co., Ottumwa, Ia., has resigned.

Mr. R. C. Gemmell, M. Am. Soc. C. E., of Salt Lake City, has been appointed State Engineer of Utah.

Mr. W. Oswald, General Manager of the Rambach Steel Co., Rambach, Germany, is visiting Birmingham, Ala.

Mr. Samuel A. Benner, of the Carnegie Steel Co., Ltd., Pittsburg, Pa., will represent that company in Mexico, with headquarters in the City of Mexico.

Brig.-Gen. Roy Stone, Chief of the Road Information Bureau of the Agricultural Department. has returned to Washington, D. C., from Ponce, Puerto Rico.

Mr. George Wash has been appointed Superintendent of the Braddock (Pa.) Wire Works of the American Steel & Wire Co., to succeed Mr. John McIllvried, resigned.

Mr. Myron Chace Clark, of the business department of the Engineering News Publishing Co., was married Oct. 5, to Miss Nell Mansfield Fogarty, of Lakewood, N. J.

Capt. Charles B. Kahler, First Regiment, U. S. Volunteer Engineers, has been honorably discharged on account of physical disability. His home is in Baltimore, Md.

Mr. F. R. Griffin has been appointed Assistant Superintendent of the Nebraska Division of the Union Pacific R. R., with headquarters at Omaha, Neb., to succeed Mr. Harry E. Flaving, transferred to Denver, Colo.

Mr. Clark W. Harrison, formerly the Vice-President and Manager of the South Pittsburg Pipe Works, South Pittsbrug, Tenn., has been appointed General Western Manager for the American Pipe & Foundry Co., Chattanooga, Tenn., and will have his headquarters at 1625 Marquette Bldg., Chicago, Ill.

Mr. Walter J. Graves, civil engineer, has been appointed Recorder on the United States Lake Survey, with headquarters in the U. S. Engineer's Office, Port Huron, Mich. Mr. Graves is a graduate of Cornell University, Ithaca, N. Y., in the class of 1898, and was formerly with the Lake Shore & Michigan Southern Ry., at Toledo, O.

Mr. Frank E. Ward, General Superintendent of the Montana Central Ry., with headquarters at Great Falls, Mont., has been appointed General Superintendent of the Great Northern Ry., with headquarters at St. Paul, Minn., to succeed Mr. Russell Harding, whose resignation to become the Vice-President of the Cotton Belt System, with headquarters in St. Louis, Mo., was noted in our issue of Oct. 27.

Mr. H. E. Wittenberger, Trainmaster of the Grand Trunk Ry., at Stratford, Ont., has been transferred to London, Ont., in the same capacity, to succeed Mr. C. S. Cunningham, who has been transferred to Montreal, Que., succeeding Mr. R. P. Dalton. Mr. H. E. Costello, formerly Trainmaster of the Columbus, Hocking Valley & Toledo R. R., at Toledo, O., has been appointed to succeed Mr. Wittenberger.

Mr. Arthur P. Davis, Assoc. M. Am. Soc. C. E., hydrographer, and Dr. C. Willard Hayes, geologist, have returned to Washington, D. C., after 11 months' absence in Nicaragua. They were detailed from the U. S. Geological Survey to service under the Nicaragua Canal Commission. Mr. Davis has been measuring the larger rivers and the outflow of Lake Nicaragua; and Dr. Hayes has had in charge the borings for bed rock at the sites of large dams.

OBITUARY.

Mr. Edward C. Nichols, Water Commissioner, of Reading, Mass., died Oct. 29, aged 66.

Mr. Thomas A. Roberts, architect, of New York city, died at Asbury Park, N. J., Nov. 6. aged 66.

Mr. Charles F. Parker, of the firm of Chas. F. Parker & Co., contractors, of New York city, died Oct. 17.

Mr. Dore Lyon, contractor and builder, of New York city, died at his home in Westchester, N. Y., Nov. 4, aged 57.

Mr. William McGregor, of the firm of William McGregor & Co., boilermakers, of Chicago, died in that city Oct. 31, aged 72.

Mr. Edward M. Garner, Sr., owner of the water-works at Luzerne and Hadley, N. Y., died in the latter place Nov. 1, aged 65.

Mr. Charles H. Summers, Chief Electrician of the Western Division of the Western Union Telegraph Co. at Chicago, died Nov. 2, in San Francisco, Cal.

Mr. A. L. Poudrier, civil engineer and surveyor, committed suicide recently while camping on one of the Queen Charlotte Islands, British Columbia.

Lieut. Thomas Randolph Sullivan, First Regiment United States Volunteer Engineers, died in New York city Nov. 3, aged 26. He returned several weeks ago from Puerto Rico, where he contracted malarial fever.

Mr. Frank C. Doran, M. Am. Soc. C. E., whose death was noted in our issue of Oct. 27, had been for some years Chief Engineer and General Roadmaster of the Chicago & Western Indiana R. R. and the Belt Ry. of Chicago, and held this position at the time of his death.

Mr. Charles H. Patterson, civil engineer, died of heart disease at Mapiui, Mex., Aug. 26. He was a native of Doylestown, Pa., and went to Brazil, about 1874, with the Collins party, to make surveys for the proposed Madeira River Ry. In January, 1881, he was engaged to make preliminary surveys for the National Construction Co., of New York, in the provinces of Tamaulipas and Nuevo Leon, Mexico, and on the line of one of the surveys a railway was afterward constructed, from Laredo to Monterey. He returned to the United States for a time, but again went to Mexico and for a long time was stationed near Lampazos in charge of railway construction.

Col. James C. Biddle, civil engineer and manufacturer, died at his home, in Philadelphia, Pa., Nov. 2. He was born in that city, Oct. 3, 1835, and graduated from the University of Pennsylvania in 1853, as a civil engineer. He followed his profession for many years, assisting in the construction of a number of Pennsylvania railways, and at the outbreak of the Civil War enlisted as a private in the Union Army. On Aug. 1, 1861, he was breveted Lieutenant-Colonel and four years later was made Colonel for meritorious services before Richmond. After the war he engaged in the manufacture of chemicals and woolens until a few years ago.

Dr. David Ames Wells, inventor, scientist, educator and political economist, died at his home, Norwich, Conn., Nov. 5. He was born in Springfield, Mass., June 17, 1828, and graduated from Williams College, Williamstown, Mass., in 1847. In 1848, while on the staff of the Springfield "Republican," he invented a machine for folding newspapers and books, and the same year entered the Lawrence Scientific School of Harvard University, Cambridge, Mass. In 1851 he became an Assistant Professor at Harvard and Lecturer on Physics and Chemistry in Groton Academy, Groton, Mass. At Cambridge, in 1849, he began with Mr. George Bliss the publication of the "Annual of Scientific Discovery," which continued until 1866. In 1856 he invented valuable improvements in the method of manufacturing textile fabrics. He was a member of the firm of G. P. Putnam & Co., publishers, of New York city, in 1857 and 1858, and compiled several scientific text-books. He came into National prominence in 1863 as a writer on economic and financial subjects, and was consulted by President Lincoln with regard to the financial policy to be adopted by the government upon the termination of the Civil War. He was appointed Special Commissioner of the Revenue, in January, 1866, an office created for him, and held this post until 1870, when he was appointed chairman of a commission to examine the tax laws of the State of New York. In 1876 he was appointed Receiver of the Alabama & Chattanooga R. R., and in 1878 he made an exhaustive report on the subject of tolls on the New York State Canals. He was in the latter year elected a member of the Board of Arbitration of the Associated Railways of the United States. Mr. Wells was elected a Foreign Associate of the French Academy of Political Science, in 1874, and was President of the American Social Science Association from 1875 to 1879.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

SOCIETY OF NAVAL ARCHITECTS AND MARINE ENGINEERS.
Nov. 10-11. Annual meeting. Secy., Francis T. Bowles, 12 West 31st St., New York.
ST. LOUIS RAILWAY CLUB.
Nov. 11. "The Performance of a Four-Cylinder Compound Locomotive." Discussion. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.
CENTRAL RAILWAY CLUB.
Nov. 11. Secy., H. D. Vought, 114 Fifth Ave., New York city.
MONTANA SOCIETY OF ENGINEERS.
Nov. 12. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.
TECHNICAL SOCIETY OF NEW YORK.
Nov. 12. "The Breaking Up and Magnetic Cleansing of Iron Ore," C. G. Buchanan. Secy., F. H. Gottlieb, 192 Third Ave., New York city.
ENGINEERS' CLUB OF KANSAS CITY.
Nov. 14. "Rectification of the Red and Atchaflaya Rivers," A. F. Woolley, Jr. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.
THE LOUISIANA ENGINEERING SOCIETY.
Nov. 14. Secy., J. F. Coleman, 712 Union St., New Orleans, La.
NORTHWEST RAILWAY CLUB.
Nov. 15. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.
ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.
Nov. 15. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.
WESTERN RAILWAY CLUB.
Nov. 15. Secy., F. M. Whyte, 225 Dearborn St., Chicago, Ill.
ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Nov. 16. Secy., Frank H. Olmsted, Los Angeles, Cal.
BOSTON SOCIETY OF CIVIL ENGINEERS.
Nov. 16. Secy., S. E. Tinkham, City Hall, Boston, Mass.
ENGINEERS' CLUB OF ST. LOUIS.
Nov. 16. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.
WESTERN FOUNDRYMEN'S ASSOCIATION.
Nov. 16. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.
WESTERN SOCIETY OF ENGINEERS.
Nov. 16. "The Manchester Ship Canal," Elmer L. Corthell. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.
AMERICAN SOCIETY OF CIVIL ENGINEERS.
Nov. 16. "Launhardt Formula and Railroad Bridge Specifications," H. B. Seaman. Secy., C. W. Hunt, 220 West 57th St., New York city.
NEW YORK RAILROAD CLUB.
Nov. 17. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.
SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Nov. 17. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.
ENGINEERS' CLUB OF CINCINNATI.
Nov. 17. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.
CHICAGO ELECTRICAL ASSOCIATION.
Nov. 18. "The Development of the Motor-Cycle," F. B. Rae. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.
ENGINEERS' CLUB OF COLUMBUS.
Nov. 19. Secy., H. M. Gates, 12½ North High St., Columbus, O.
TECHNICAL CLUB OF OMAHA.
Nov. 21. Secy., J. Harry Lawrie, Omaha, Neb.
ENGINEERS' CLUB OF MINNEAPOLIS.
Nov. 21. Secy., H. E. Smith, 1620 S. E. 4th St., Minneapolis, Minn.
ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Nov. 21. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.
FRANKLIN INSTITUTE.
Nov. 22. Secy., Wm. H. Wahl, 15 South Seventh St., Philadelphia, Pa.
CIVIL ENGINEERS' CLUB OF CLEVELAND.
Nov. 22. Secy., Wm. H. Searles, Case Library Bldg., Cleveland, O.
ENGINEERING ASSOCIATION OF THE SOUTH.
Nov. 24. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.
CANADIAN SOCIETY OF CIVIL ENGINEERS.
Nov. 24. Secy., C. A. McNab, 112 Mansfield St, Montreal, Canada.
AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS.
Nov. 30. Secy., Ralph W. Pope, 26 Cortlandt St., New York city.
TECHNICAL SOCIETY OF THE PACIFIC COAST.
Dec. 2. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.
BROOKLYN INSTITUTE OF ARTS AND SCIENCES.
Dec. 2. Secy., Henry I. Weed, Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.
ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Dec. 5. Secy., H. J. March, Library Bldg, Buffalo, N. Y.
CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Dec 5. Secy., C. L. Annan, City Engineer's Office, St. Paul, Minn.
DENVER SOCIETY OF CIVIL ENGINEERS.
Dec. 13. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Col.
NEW ENGLAND RAILROAD CLUB.
Dec. 13. Secy., Edw. L Janes, P O Box 1158, Boston, Mass.
NORTHWESTERN TRACK AND BRIDGE ASSOCIATION.
Dec. 16. Secy., D. W. Meeker, St. Paul, Minn.
THE ENGINEERS' CLUB OF PHILADELPHIA.
Dec. 17. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

CHICAGO ELECTRICAL ASSOCIATION.—At the meeting on Nov. 4 Mr. George A. Damon presented a paper on "The Electrical Equipment of a Model Printing Establishment." The plant referred to is that recently established at Hammond, Ind., by the W. B. Conkey Co. A brief abstract of the paper is given on another page of this issue.

WESTERN SOCIETY OF ENGINEERS.—At the meeting on Nov. 2, a paper on "The Construction of Retaining Walls for the Sanitary District of Chicago," by Mr. James W. Beardsley, was presented. This was illustrated by a number of views showing the walls along the line of the drainage canal. A paper by Mr. Charles V. Kerr, on "The Berthier Method of Coal Calorimetry," was also presented.

BROOKLYN INSTITUTE OF ARTS AND SCIENCES.—At the last meeting of this society, held on Nov. 4, Mr. T. C. Martin, editor of "The Electrical Engineer," presented an illustrated lecture on "Electric Power Transmission. The dangers of over estimating the minimum flow of water of streams was pointed out and attention was called to the interesting fact that the usually progressive Eastern part of the United States was only beginning to use methods of power generation and transmission that had been in use in the West for a considerable time.

FRANKLIN INSTITUTE.—A regular meeting of the Institute was held at 15 South Seventh St., Philadelphia, Pa., on Nov. 8, to listen to a paper by Mr. William A. Rosenbaum on "The Status of Electrical Invention."

In this paper the author traced the progress of electrical invention, starting with Faraday's discoveries in 1831 and pointing out successively what he terms the "mile-stones" of progress, in other words, the root inventions from which have grown up whole classes of industries.

The first of these was the telegraph, and the growth of this now great industry was traced through its successive stages of ribbon recording instruments, sound instruments, simplex, duplex, quadruplex, repeaters and finally "wireless" telegraphy. In the same way the telephone, electric light dynamo, electric machinery, chemical generation of current and electric railways were taken up and brought down to date.

ENGINEERS' CLUB OF ST. LOUIS.—The 478th meeting of this club was held on Nov. 2, with 31 members and visitors present.

Capt. F. H. Macklind gave an address upon "Roads and Roadways." He pointed out the necessity of good roads to our present civilization and showed how city streets had developed from country roads. The value of various pavements from different standpoints was discussed, and the paper closed by giving the methods used and the cost of cleaning the streets in different cities.

Prof. Kinealy then exhibited a machine for boring triangular, square, pentogonal, hexagonal and octagonal holes. The machine can be used in connection with any drill press, and bores the hole at one operation in about twice the time taken to bore a round hole. The inventor of the machine was introduced to the club, and explained the manner of operating the drill.

Richard McCulloch, Secy.

TEXAS RAILWAY CLUB.—A two days' session of this club was held at Rockport, Texas, on Sept. 15, at which the following papers were read:

"Safety in Train Air-Brake Appliances," F. Hufsmith; "Necessity of Harmony in the Departments of Railway Service," A. S. Grant; "Economy in the Increased Capacity of Cars," N. L. Smitham. There was also a discussion of two papers presented at previous meetings, "Economy in the Use of Fuel," S. R. Tuggle, and "Car Inspection," James McGee.

The next meeting will be held on April 17 at Bryan, Texas, and the following papers will be presented at that time: "The Use of Electric and Pneumatic Power and Tools as Applied to Shop Practice," William Jennings; "The Impression of a Motive Power Man as Gathered in a Trip Abroad," R. H. Soule; "The Responsibility of a Cast Chill Car Wheel Maker; Its Uses and Abuses," E. S. Marshall; "Relative Merits of Improved Metal Draft Gear," J. R. Cade. There will also be a discussion of papers presented at previous meetings.

◆

NEW PUBLICATIONS.

LITERARY MAGAZINES.—The war stories are still with us, as the November magazines bear witness, "McClure's" has an interesting paper in which is included most of the official dispatches which passed between the chief naval officers and the Department in West Indian waters while Cervera's fleet was being tracked to its hiding place in Santiago harbor. In the same magazine, the diary of the British consul at Santiago during the hostilities gives a realistic account of life inside the besieged city and of the suffering that came to the women, children and other noncombatants during its attack and capture. There is also a popular account of Vesuvius and its recent eruption, and of the first ascent of Aconcagua and Tupungato, two peaks of the Argentine Andes, which are said to be the highest in the Western hemisphere, their altitudes being respectively about 23,000 and 22,000 ft.

The "Nineteenth Century" for October contains a most interesting account of the life of Alfred Nobel, the inventor of dynamite. It is not generally known, we believe, that Nobel came to the United States when 16 years old, and until he was 21 was a pupil of the late John Ericsson. The story of his life with its marvellous successes reads like a romance. As our readers will remember the bulk of his fortune, amounting to $12,500,000, was left to endow a fund the interest of which will be given annually in five prizes for the most important discoveries in chemists, physics, physiology or medicine, for the highest literary work and for the greatest achievements in the promotion of universal peace.

In the October "Fortnightly" we find the first part of the diary of the late Consul Ramsden at Santiago, referred to in our review of "McClure's" above, and also an interesting account of the Congo Free State and the works of civilization which the Belgians have accomplished in Central Africa.

"Harper's" for November has a paper by Archibald Colquhoun on "The Eastward Expansion of the United States." He urges that the United States should join England in demanding "the open door" in China, and his article is one of the best presentations of the arguments for this course that we have anywhere seen. Recent geographic explorations in Central Asia and in the Arctic and Antarctic are summarized in a paper by Mr. J. Scott Keltie. Lieut. John C. Freemont, U. S. N., writes an interesting account of life on the torpedo boat "Porter" during the war, while Frederick Remington tells anew the story of the Santiago duel in such an inimitable fashion that it is a new story to the readers even though he has heard it all before.

In the November "Atlantic" Prof. Ira V. Hollis, of Harvard University, formerly an engineer in the navy, writes on "The Navy in the War with Spain." He warns against the danger of drawing too positive and broad conclusion from isolated experiences in this war. His article is on the whole about the ablest critical review of the navy's work in the present war that we have anywhere seen. President David Starr Jordan has in the same magazine a paper describing the government which the United States has given and still gives to its only colonial possession, Alaska. We know of no more effective presentation that has been anywhere made concerning the urgent need that some radical changes should be made in our system of government, if we are to have placed upon us the responsibility for the government of remote colonies.

In "The Century" for November Lieut. Bradley Fiske, U. S. N., the inventor of the Fiske range finder, describes the Battle of Manila Bay and tells the reasons which he believes explain the wonderful success of the American fleet and the complete loss of the Spanish. Capt. Sigsbee begins a story of the "Maine's" voyage to Havanna and her subsequent destruction, and a French writer tells of the methods by which the Paris Exposition of 1900 is being brought into shape.

The "Contemporary Review" for October contains an excellent article on the Soudan and its possibilities under a civilized rule. There is also a paper concerning the proposed government purchase of the telephone system in England.

"The Powers of the Interstate Commerce Commission" is the subject of a paper in the "North American Review," by Hon. Chas. A. Prouty, of the Commission, and he presents in a perfectly clear manner the reasons why the amendment of the law, giving the Commisssion authority to compel readjustment of rates, should be made. "National Public Health Legislation" is the title of another paper in the same magazine that deserves mention here.

"Appleton's Popular Science Monthly" for November contains a paper on "Possible Fiber Industries of the United States," in which the possibilities in the cultivation of flax, ramie, jute, etc., are well set forth. Mr. Edgar R. Dawson has a brief popular description of Swiss methods of river regulation, and a French Scientist discusses the causes of rain.

The article in the November "Review of Reviews" of most interest to engineers are two papers on the Nicaragua Canal, by Prof. L. M. Keasbey, author of "The Nicaragua Canal and the Monroe Doctrine," and Emory R. Johnson. The former writer discusses the internation aspect of the canal enterprise and thinks that there would be little difficulty now in securing a revision of the Clayton-Bulwer treaty which would permit us to build and control the canal without friction with England. Prof. Johnson discusses the effect of an Isthmian canal upon the commercial interests of the United States, and gives some tables of distances by various routes. He does not, however, give any figures as to the volume of traffic that might be expected to use a canal if it were built.

The November "Cosmopolitan" contains a popular account of modern methods of placer gold mining, by John E. Bennett, a paper by Joseph Leiter, describing the development of the system of purchasing, warehousing and transportation under which the wheat crop of the Northwest is now handled from the farmer to the consumer, and an account of the marvellous career of Ernest Terah Hooley, the prince of company promoters, who in the course of a couple of years made and lost the comfortable sum of $35,000,000.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

STONE SAWING MACHINES.—Lincoln Iron Works, Rutland, Vt. Pamph., 9 × 6 ins; pp. 16; illustrated.

This pamphlet describes some of the standard stone sawing machines made by the company named. The designs show machines with screw feed, gravity feed, and various patent feeding devices, straight cut gang saws, circular saws for soft stone, and various fittings and sundries.

DRAWING MATERIALS AND SURVEYING INSTRUMENTS.—Eugene Dietzgen Co., 183 Monroe St., Chicago. Paper, 4½ × 6 ins.; pp. 161.

This is a compact and comprehensive catalogue and price list of drawing instruments and supplies, surveying and optical instruments, etc. Among the drawing materials are lettering angles, which are rectangular set squares, having the upper edge slotted at the various angles for different letters of a given style. A device for printing titles, etc., on maps or drawings, is also shown.

DEPRECIATION OF CANDLE-POWER OF WELSBACH MANTLES.—General Electric Co., Schenectady, N. Y. Circular; 3½ × 5 ins.

This little circular gives a number of interesting items relative to the depreciation of candle-power of Welsbach mantles for gas lamps and of incandescent electric lamps, based upon actual tests. The conclusion drawn is that the electric lamp falls off in efficiency less rapidly than the gas lamp. Attention is briefly called to the enclosed arc lamps manufactured by the General Electric Co.

CORRUGATED STEEL WORK.—Cincinnati Corrugating Co., Piqua, Ohio. Paper; 8 × 6 ins.; pp. 9; illustrated.

This firm makes corrugated steel arches, and here gives tables setting forth thickness of sheet, loads and deflections for spans ranging from 4 to 10 ft., and with several types of corrugations. They also manufacture iron and steel roofing, steel lath, iron doors and shutters, etc. The corrugated sheets are made with a patent edge, for which great advantages are claimed in fastening, water-tight qualities, efficiency, strength and economy in metal.

SKYLIGHTS WITHOUT PUTTY.—Vaile & Young, Baltimore, Md. Pamph., 6 × 9 ins.; pp. 32; illustrated.

The special feature of this skylight construction is the sash or framework which carries the glass. This consists of an open, tubular supporting bar, which acts also as a gutter, and a cap which lies close to the glass on top. This cap is of lead, and is designed to make a water tight joint with the glass, but should leakage occur, the gutter-shaped bar carries the water away safely. The bar is usually made of galvanized iron, but copper is also employed when specified. This pamphlet describes and illustrates the various standard skylight constructions of this system, and shows views of a number of the important structures in which they have been used. Among these we note the new Library of Congress building, the works of the Maryland Steel Co., the new conservatories at Druid Hill Park, in Baltimore, Md., and several large train sheds.

METAL SKYLIGHTS AND LATHING.—George Hayes, 71 Eighth Ave., New York. Paper; 10 × 6¾ ins.; pp. 85; ilustrated.

The Hayes method of building skylights and other glazed structures was invented about 30 years ago and has been since widely applied. This pamphlet illustrates and describes the many forms in which it is used, together with the special appliances employed with it. The second part of the pamphlet treats of metal lathing and a system of fireproof construction adapted to buildings of all types. This lathing is corrugated, expanded and punctured, and has lipped and tongued apertures, and is claimed to be a perfect mortar-holding device and a brace to the wall as well. The text ilustrates and describes it as used in a multitude of forms and for many purposes, both in iron and in wood construction.

STANDARD CRABS AND WINCHES.—Brown Hoisting & Conveying Machine Co., Cleveland, O. Circular.

This circular illustrates, describes and prices the Weston patent crabs and winches, formerly made by the Yale & Towne Mfg. Co., but now manufactured by this company. The standard crabs range in lifting capacity from ½ to 2½ tons; weigh from 226 lbs. to 812 lbs., and cost, for crabs alone, from $35 to $100. The winches have a similar capacity; weigh from 215 to 864 lbs., and cost from $35 to $100. The feature of these crabs and winches is the safety-brake, which makes it impossible for the load to run down; and the load will not lower unless the cranks are turned backwards, and motion ceases when the cranks are released.

RAILWAYS.

ATLANTIC COAST LINE.—F. Gardner, Ch. Engr., Wilmington, N. C., informs us that bids were received from the following contractors, Nov. 4, for the grading and trestle work on the extension of the Charleston & Western branch from Denmark to Robbins, N. C., a distance of 34.7 miles, as advertised in Engineering News: A. & C. Wright Co., Richmond, Va.; M. N. Moorman, Lynchburg, Va.; Geo. W. Calahan, Knoxville, Tenn.; Abercrombie & Williams, Montgomery, Ala.; B. O. Watkins, Birmingham, Ala.; Lane Bros. & Co., Esmont, Va.; V. E. Steen, Kansas City, Mo.; L. B. Lacy, Anniston, Ala.; Walker & Oliver, Langley, S. C.; Dunn & Leland Bros., Birmingham, Ala.; Mason, Hoge & Co., Frankfort, Ky.; Douglas, Frick & Nordin, Baltimore, Md.; Batchelder & McGruder, Winston, N. C. The bid of A. & C. Wright Co. was accepted.

CLEARWATER VALLEY.—This company has been incorporated in Oregon, with an authorized capital stock of $3,000,000, to build and operate several hundred miles of railway and telegraph lines in Oregon, Washington and Idaho, the line to Clearwater being the chief of those projected. The incorporators are: W. H. Kennedy, Ch. Engr. of the Oregon River & Navigation Co., Portland, Ore., and C. W. Mulks, J. C. Haveley and Charles Steel, all of whom are connected with this same company.

CUBA.—Congressman John Dalzell is said to be one of a party of Pennsylvania capitalists which is investigating the district around Santiago with a view to the construction of a railway connecting Santiago and Havana.

DALLAS TERMINAL.—A meeting of the stockholders of this company will be held at Dallas, Tex., on Dec. 10, to take action on a proposed amendment of the charter, which will permit of an extension of the line from Dallas to Fort Worth, a distance of 32 miles. The issue of about $1,000,000 in bonds is contemplated. W. C. Connor, Pres., Dallas.

DENMARK.—Press reports state that the Danish state railway authorities, at Copenhagen, are asking for bids on 2,123 tons of steel rails, 133 tons of fish-plates, 17½ tons of fish-bolts and nuts and 66 tons of nails. Early in October many European manufacturers were trying to secure the business, and, up to that time, no American concern had made any effort to compete. Many orders for railway material from Copenhagen are going both to Germany and England. The buyers are obliged to wait a long time for delivery of goods, which would not be the case if the Americans secured the orders, a fact which is much in their favor.

DETROIT & MACKINAC.—Reports from Bay City, Mich., state that Prescott & Sons are building a branch line from Prescott, on the Detroit & Mackinac, to Hiles Lake, through a pine timbered district. J. D. Hawks, Pres. and Gen. Mgr., Detroit, Mich.

FAIRCHILD & NORTH EASTERN.—G. W. Godfroy, Ch. Engr., Fairchild, Wis., informs us that grading and track-laying is in progress on the extension of this road from Greenwood northeast to Beaver, Wis., a distance of five miles, and work will be completed by Dec. 1. Contractor, Jas. W. Gorman, Minneapolis, Minn. Pres., N. C. Foster, Fairchild.

GALETON & LEETONIA.—This company was incorporated in Pennsylvania, Nov. 1, with a capital stock of $330,000, to construct a steam railway between Germania and Leetonia, Pa., a distance of about ten miles. The incorporators are: Chas. H. Rexford, Pres.; W. A. Rexford, J. L. Snyder, J. R. Dangle and Harry J. Wilcox, all of Galeton, Pa.

GREAT NORTHERN.—This company is said to intend making application to the next session of the Canadian Parliament for a franchise to extend the Spokane Falls & Northern through Southern British Columbia. The real object is represented to be a paralleling of the Crow's Nest Pass branch of the Canadian Pacific through Southern British Columbia, in addition to the Kettle River line.——Track laying has been almost completed on the extension of the Great Northern from Cass Lake, on the new Fosston branch, south to Akely, Minn., 13 miles.——Construction is expected to be undertaken next spring on a new cut-off which has just been surveyed from Coon Creek north about 50 miles to Brook Park, via Cambridge, Minn. N. D. Miller, Ch. Engr., St. Paul, Minn.

GULF, BEAUMONT & KANSAS CITY.—Reports state that the surveyors have finished locating the line of the proposed road from Orange to Kirbyville, Tex., and that several miles of the right of way have been cut. Construction is expected to begin soon. Jas. F. Weed, Ch. Engr., Beaumont, Tex., informs us that this company has just received 1,000 tons of 56-lb. steel rails, from the Carnegie Steel Co., to be used on this 11-mile extension from Kirbyville, which will be ready for operation about Feb. 1.

HOCKING VALLEY & LAKE ERIE.—W. H. Jennings, formerly connected with the Columbus, Hocking Valley & Toledo Ry., is said to be chief engineer of this railway projected to run from Athens to Toledo, via Columbus, O., and for the construction of which contracts are said to have been let. The line must be completed by Jan. 1, 1900.

IOWA.—Reports state that L. F. Wakefield, Engr., Sioux City, Ia., is in charge of a corps of surveyors now at work in South Siuox City surveying a route for a new line of railway. There is a rumor to the effect that a syndicate has been formed to construct a line from Sioux City to Omaha which will go down on the Nebraska side of the Missouri River, and will be when surveyed about 25 miles shorter than either of the Sioux City & Pacific or the Omaha.

IOWA CENTRAL & WESTERN.—This company was incorporated in Iowa, Oct. 29, with a capital stock of $3,000,000, to construct a line from Oskaloosa to Des Moines, Ia.; also a line intersecting the Iowa Central Ry. at or near Belmont to Algona and thence northwesterly to the northern state line. The incorporators are: Pres., L. M. Martin, Gen. Mgr. of Iowa Central; George W. Seevers and C. E. Lofland, of Oskaloosa; Seth Zug and P. E. Bousquet, of Pella.

LEADVILLE MINERAL BELT.—This company has been incorporated in Colorado, with a capital stock of $100,000, to construct a belt line tapping the rich ore gulches in Lake and Park counties. The incorporators are: Frank Trumbull, Receiver of Union Pacific, Denver & Gulf Ry., Denver, Colo.; A. D. Parker, H. W. Cowan, Elmer E. Whitted and I. R. De Remer.

MICHIGAN.—The East Jordan Lumber Co., of East Jordan, Mich., expects to build a 10-mile standard-gage line this fall south to its lumber lands. Surveys are now being made. All material has been purchased for the first ten miles. A farther extension of eight miles to Antrim is contemplated.——A railway from Greenland to Houghton, Mich., 70 miles, is said to be projected by Richardson, Hill & Co., of Boston, and other firms.

MIDLAND & NOVA SCOTIA.—Reports state that this company has decided to build its line from Windsor to Truro, N. S., 60 miles, via Clifton, which town has voted a bonus of $30,000, and that work between Five Mile River and Truro would be at once vigorously undertaken. Most of the earthwork between Windsor and the Shubenacadie River has been done. Pres., William Strachan, Montreal, Que.

MUSCATINE, NORTH & SOUTH.—W. L. Willis, Ch. Engr., Wapello, Ia., is reported as saying that the road bed of this new line has been graded to the Iowa River, a distance of ten miles, and most of the heavy work done on eight miles on the other side of the river. Stirling Birmingham, Vice-Pres. and Secy., 120 Broadway, New York.

NEW YORK & OTTAWA.—The supreme court of New York, has rendered a decision which, if sustained by the higher courts, will prevent the construction of an extension of this line to a connection with the Adirondack Ry., at North Creek, N. Y., and thereby frustrate the plan for shortening the distance by rail between New York and Ottawa by 59 miles. The proposed line would run through the Adirondack Park Preserves, which is declared to be unlawful.

NORTON BAY & YUKON RY. & NAVIGATION.—Bids are being asked by the Anglo-Alaskan Syndicate, Ltd., of London, according to reports, for rails and rolling stock for this proposed 76-mile line in the Yukon district, from a point 45 miles northeast of St. Michael, Alaska, to the Yukon River, 35 miles below Nulato. F. A. Hill, Ch. Engr., National Bank Bldg., Seattle, Wash.

NORTHERN PACIFIC.—This company has filed papers in the Waterville land office asking for ten miles of right of way from Lake Chelan to the Columbia River, in Washington.

NOVA SCOTIA.—The ratepayers of Amherst, N. S., have decided to make a subsidy towards the construction of a railway from Amherst to North Point, on the Northumberland Straits, a distance of 20 miles.

OSHKOSH & STEVENS.—Albert Schaeffer, St. Paul, Minn., and J. W. Edwards, of Winneconne, Wis., are said to be the incorporators of this company, which expects to build a railway between these two cities in Wisconsin, via Almond, a distance of about 70 miles. Surveys have been commenced; a part of the line will be built at once.

PENNSYLVANIA.—Bids are asked until Nov. 12, according to reports, for constructing 5½ miles of railway to a connection with the Baltimore & Ohio Ry. at Layton, Pa., including several bridges. Engrs., Taylor & Romine, McKeesport, Pa.

PERRIS & LAKE VIEW.—This company is reported to have been incorporated in California, with a capital stock of $80,000, to construct a standard gage road from Perris in a northeasterly direction to Lakeview, Cal., 8.05 miles. The directors are: W. C. Nevins, G. Holterhoff, E. Chambers, H. J. Stevens and A. P. Maginnis.

PITTSBURG & WESTERN.—Reports state that contracts for the construction of nine miles of new track on this line near Harmony, Pa., have been let. The work is to be done on the proposed double track line between Pittsburg and New Castle, Cal., and will be completed early next year. Paul Didier, Asst. Ch. Engr., Allegheny, Pa.

RIO GRANDE, SIERRA MADRE & PACIFIC.—This company is said to have decided to build an 80-mile narrow gage railway, which will branch off from the present terminus at Casa Grande, Mexico, and traverse the mineral and heavily timbered region to the west known as the Yaqui gold country. The main line of the railway now connects El Paso and Juarez with Casa Grande, and is 150 miles long. When the narrow gage line connects with the timber region the value of the line to El Paso will be greatly increased. Work on the new railway will soon begin. Pres., A. Foster Higgins, 54 Exchange Place, New York; Ch. Engr., J. Fewson Smith, El Paso, Tex.

SPRING GARDEN CONNECTING.—The committee on corporations, of Allegheny, Pa., has favorably recommended the ordinance granting a franchise to this company. The road will be a branch of the Pittsburg & Western line, run over the tracks of the West Penn and over Ohio St., west of McFadden St., above grade, tunnel Troy Hill to Spring Garden Ave., and run thence to Valley St., so as to reach Lappe's and other tanneries in that section. The company was incorporated, Jan. 24, with a capital stock of $200,000, by William Kirkland, Frank Felkel and Jas. D. Swindell, the last named being from Allegheny, Pa.

ST. LAWRENCE RIVER & ADIRONDACK.—This company has been incorporated, with an authorized capital stock of $3,000 a mile, to construct a line from the St. Lawrence River to North Creek, following the Raquette River to its source, a distance of about 100 miles. Pres., L. S. Putney; Vice-Pres., O. E. Martin; Secy., H. G. Atwater; Treas., J. G. McLeod

VIRGINIA.—Surveys are now being made, according to reports, for a proposed railway across Frederick county, Virginia, which is designed to bring the rich coal fields and timber lands of West Virginia within easy reach of the East, North and South.

WEST VIRGINIA SHORT LINE.—Surveys have been completed for this proposed railway from Clarksburg to New Martinsville, W. Va., a distance of about 60 miles. Construction work is expected to begin shortly.

STREET AND ELECTRIC RAILWAYS.

MARLBORO, MASS.—It is reported that the power house for the Hudson, Marlboro and Framingham divisions of the street railway will be on Maple St., Marlboro. An addition to the present power house, 37 × 50 ft., is being built. A new 300-HP. engine and generator will be installed and will be utilized in addition to that already in use.

MILFORD, MASS.—The selectmen have granted a franchise to the Milford, Woonsocket & Attleboro St. Ry. Co. George W. Wiggin, of Franklin, Mass.; E. J. Whittaker, Wrentham, Mass., are interested.

MERIDEN, CONN.—The Meriden, Middletown & Waterbury R. R. Co. has been incorporated, with an authorized capital of $100,000. It is believed that electricity will be the motive power. Judge A. Heaton Robertson is said to be interested.

MIDDLETOWN, N. Y.—William B. Royce, of Middletown, has been appointed receiver of the Middletown & Goshen Traction Co., which operates an electric street railway from Middletown to Goshen, and a small park in connection therewith, by Justice Pryor, of the Supreme Court, on the application of Ferdinand McKeige, Hugh H. Douglass, W. A. Granterin, and other directors. The company had an office at 35 Nassau St., New York.

ALBANY, N. Y.—It is reported that work will be resumed on the construction of the Greenbush & Nassau Electric Ry., under new management. Surveyors are again at work on the proposed route in East Greenbush.

LITTLE FALLS, N. Y.—The council has granted an extension of one year in which work is to be commenced on the Little Falls & Herkimer Electric St. Ry. Gen. Lansing said the company would certainly build the road in the spring and all that was keeping them back now was the obstacles to completing the preliminary work.

SCHUYLERVILLE, N. Y.—An electric railway will soon be constructed between Schuylerville and Greenwich, according to reports. J. D. Powers, of Sandy Hill, N. Y., is interested in the project.

BOUND BROOK, N. J.—It is reported that the Brunswick Traction Co. has completed its trolley line between Bound Brook and Plainfield, a distance of eight miles. Pres., E. H. Radel, New Brunswick, N. J.

JERSEY CITY, N. J.—Mayor Hoos has signed the ordinance granting to the North Hudson St. Ry. Co. the privilege of changing the motive power of its Grove St. line from horses to electricity.

HATBORO, PA.—The Hatboro Ry. Co. was incorporated in Pennsylvania Nov. 1, with a capital stock of $30,000, to construct an electric street railway from Hatboro to Willow Grove. The incorporators are, James McGregg, James Van Horn, Sam. J. Garner, Jas. W. Rusling and R. Ashurst, Philadelphia, Pa.

WASHINGTON, D. C.—Permission has been granted the Capital Ry. Co. by the district commissioners for an extension of its line from Congress Heights through Pencote Woods to the Alexandria branch of the Baltimore & Ohio R. R.——O. T. Crosby, C. A. Lieb and F. A. Stevens have purchased a controlling interest in the bonds of the Washington & Anacostia Ry. It is reported to be the intention of these gentlemen to equip the line with underground electricity. They have already succeeded in getting the affairs of the Eckington Ry. and its allied lines in such shape that now, under the name of the City & Suburban, contracts have been made and the work commenced of installing the underground electric system. The installation on G St. will be kept until the last.——The district commissioners have authorized the Washington & University R. R. Co. to issue bonds and stock to the amount of $175,000 in order to build and equip their line. This road will start at Quincy St. and Wisconsin Ave., running west and north past the American University to the District line. It will be double track, about three miles long, and concrete will replace the wooden ties ordinarily employed. J. D. Croissant, Washington, D. C.——The Columbia Ry. Co. has obtained all but one parcel of land for their right of way and this is now being condemned. Construction will begin immediately.——The district commissioners have allowed the Capital Ry. Co. 60 days longer in which to experiment with the Brown system of underground propulsion.

NEWPORT NEWS, VA.—The Peninsular Ry Co., composed of W. A. Post, Frank Lee, A. L. Parker, W. E. Cottrell, L. P. Stearnes, J. A. Willett and J. G. Livezay, have applied to the council for a franchise for the construction of a new street railway in this city.

CANTON, O—The council has passed an ordinance granting the Canton & Massillon Electric Ry. Co. a franchise to build an electric railway over Navarre St. and Dueter Ave.

CAMDEN, O.—The Camden, Dunkirk & Albany Traction Co. has been incorporated with a capital stock of $150,000 to build apparently over the same route as that proposed by the Albany, Dunkirk & Camden Traction Co. The incorporators are, G. W. and J. A. Simpson, of Chicago, Ill., and Geo. W. Whittaker, Dunkirk, Ind.

DAYTON, O.—Reports state that the surveys of the Dayton, Spring Valley & Wilmington Electric Ry. have been begun under the direction of General Manager J. M. Wilson.

KENDALLVILLE, IND.—The commissioners of Noble county have granted a franchise to the Northern Construction Co. to build an electric railway through the county. The promoters of the enterprise have secured the necessary privileges to build the road from Logansport to Kendallville. Steps will be taken at once to commence work.

MARYSVILLE, O.—M. A. Wright and others have petitioned the county commissioners for a right of way for an electric railway connecting Richwood, Pharisburg and Magnetic Springs with Marysville. Work is expected to begin about April 1.

ANDERSON, IND.—N. N. Morse representing capitalists of Indianapolis, Ind., has filed a petition with the county commissioners for a franchise to build an electric railway from Anderson to Ingalls, via Pendleton.

OWOSSO, MICH.—W. H. Avery and others, of Detroit, Mich., are said to be investigating the construction of an electric railway through Owosso which will be a continuation of the line from Detroit to Pontiac.

SAGINAW, MICH.—Press reports state that Fitzgerald & Co., of Lincoln, Neb., have been awarded the contract for the construction of that part of the Saginaw Suburban Ry. between Bay City and Flint. The old right of way of the Rapid Transit Co. between Bay City and Saginaw will be used. President Swarthout, of Saginaw, may be addressed.

STILLWATER, MINN.—It is reported that Thomas Lowry, of Minneapolis, and others, contemplate the construction of a new street railway in this city to connect with the Wildwood line.

LAWRENCE, KAN.—Frank Kern, of Mattoon, Ill., has accepted the electric railway franchise granted by this city.

INDEX, WASH.—The Sunset Falls Power Co. is having a line surveyed for a proposed electric road from Index up the north fork of the Skykomish to Galena. The company's power house will be at Sunset and Eagle Falls on the Skykomish River.

LOS ANGELES, CAL.—A. B. Patton has been granted six months extension of time within which to begin the construction of the proposed electric railway to Whittier, the franchise for which was granted May 3.

TOKIO, JAPAN.—Press reports state that the Siemens & Halske Electric Co. is considering a proposition from the Japanese government to form in Chicago a syndicate with a capitalization of about $10,000,000 to install and operate all electric street car lines and incandescent lighting and electric power plants which are to be established in the domain of the mikado as another step in the modernizing of the principal cities of Japan.

ELECTRIC LIGHT AND POWER.

CONCORD, MASS.—Bids are asked until Nov. 19 for installing the steam and water piping in the light plant, as stated in our advertising columns. Stone & Webster, Engrs., 4 Post Office Square, Boston; R. F. Barrett, Chn. Bd.

MILTON, MASS.—It is stated that a controlling interest in the Milton Electric Light & Power Co. has been purchased by parties who control the Hyde Park and Dedham electric plants. The new company will probably enlarge the plant and furnish the power for the new electric road.

NORTH TONAWANDA, N. Y.—The Niagara Falls Power Co. is reported to have been granted a franchise in this city.

UNADILLA, N. Y.—D. R. Buckley, Supt. Standard Light, Heat & Power Co., writes us that the following contracts have been let for furnishing the equipment for the plant, it to have a capacity for 70 2,000-c. p. arc and 2,500 16-c. p. incandescent lights: Water-wheels, Jas. Leffel & Co., Springfield, O.; electrical work, General Electric Co., Schenectady, N. Y.; boilers, Abendroth & Root Mfg. Co., 28 Cliff St., New York.

ASBURY PARK, N. J.—The committee is reported as soliciting information for the proposed plant. T. F. Appleby, Cy. Clk.

LANCASTER, PA.—We are informed that everything is completed for the extension of the plant of the Lancaster Electric Light, Heat & Power Co. excepting a few circuits for incandescent lights.

WRIGHTSVILLE, PA.—It is stated that the Merritt-Chapman Wrecking Co., New York, has secured from the Martic Water & Power Co. the contract for rebuilding the Columbia dam.

BIG STONE GAP, VA.—The Virginia Tanning & Extract Co. is in the market for a dynamo, etc., of about 250 incandescent lights, according to reports.

FREDERICKSBURG, VA.—Bids are asked until Nov. 22 for furnishing and installing the equipment for a plant, as stated in our advertising columns. The plans and specifications are on file at the office of Engineering News, St Paul Building, New York. T. McCracken, Chn. Com.

CHARLESTON, S. C.—J. H. Dingle, Cy. Surv., writes us that the matter of an electric light plant, which the city proposes to build, is now in the courts, together with the water-works question.

MONTEZUMA, GA.—We are informed that the Montezuma & Oglethorpe Lighting Co. has its plant completed and will require nothing more, excepting general supplies.

KEY WEST, FLA.—It is stated that the plant of the Key West Gas & Electric Light Co. will be improved.

OCALA, FLA.—J. C. Norcross, Supt. electric light plant, writes us that the General Electric Co. has been awarded the contract for 2 MP. 4-pole 30-K-W. generators of 1,050 revolutions per minute, and slate panels, complete, making a total capacity for the plant of 1,200 16-c. p. incandescent lights.

ENSLEY, ALA.—Press reports state that contracts were let Nov. 1 for the erection of three electric lighting plants at Ensley. One to cost $30,000 will be used for lighting Ensley and Pratt City and the others for use at the new steel mill and by-products plants. The Ensley plant will be built by J. M. Meigham & Co. That for the steel mill will be built by the Excelsior Electric Co., Birmingham, Ala.

HENDERSON, TENN.—It is stated that a company is being organized to build a plant and an electric railway.

MEMPHIS, TENN.—Robt. Moran, Cy. Electrician, is reported by local papers as urging the city to have all electric wires, etc., placed in underground conduits. Mr. Moran recently returned from Northern cities where he secured considerable information.

WARSAW, KY.—The question of building a plant is reported as being considered.

BELLE CENTRE, O.—H. M. Cline, Mayor, writes us that the council at its last meeting passed an ordinance granting a 10-year franchise to the Belle Centre Electric Light & Power Co.

CHICAGO JUNCTION, O.—Louis Simmermacher, Clk., writes us that the following bids were received Oct. 25 for furnishing the materials and for putting in a plant:

Isaiah W. Newcomer, Lebanon, O*	$976
Chas. F. Sturtevant, St. Louis, Mo	11,215
G. P. Jacobs, Chicago Junction	11,150

---

*Semi-annual payments for a term of 15 years. The contract was let to Chas. F. Sturtevant.

DAYTON, O.—Henning & Henning, Attorneys, write us that an ordinance was introduced, Nov. 3, before the board of city affairs, asking for a franchise whereby great reductions will be made in the charge for city and private lighting. No definite action has as yet been taken in regard to securing plans, specifications, etc.

LOVELAND, O.—We are informed that nothing is likely to be done in regard to an electric light plant until the spring.

FAIRMOUNT, IND.—Gilbert Larue is securing estimates for a plant to include 40 enclosed arc lamps of 220 volts, etc., according to reports.

HUNTINGBURG, IND.—We are informed that it is proposed to have a company build a plant and lease it to the city for 6% or less on the cost of construction and $1,000 a year on the principle until paid. J. W. Schwartz, Mayor.

CHARLEVOIX, MICH.—This place voted Oct. 31 to issue $10,000 in bonds to purchase the plant of the Charlevoix Electric Co.

WYANDOTTE, MICH.—The council has decided to appeal the case of the Wyandotte Electric Light Co. vs. the City, which Judge Grove recently decided in favor of the plaintiffs, thus restraining the city from interfering with the company's extension of its wires. City Attorney Marr has been instructed to take immediate steps towards carrying it to the supreme court. Alderman Gorman has proposed that the city negotiate with the light company with a view to purchasing the plant. Mayor Gartner has appointed Aldermen Clark, Kiley and Gorman a committee.

CLINTON, ILL.—Bids are asked until about Dec. 1 for constructing a plant, according to reports. Harry Swigart has been granted a 20-year franchise, as noted last week. R. E. Rock has charge of the work.

EDWARDSVILLE, ILL.—Geo. D. Pogue, of the Edwardsville Electric Light & Power Co., writes us that the company wishes to correspond with manufacturers of electrical machinery for the plant to take the place of the one destroyed by fire Oct. 24, causing a loss of about $30,000. The plant will have a capacity for 60 2,000-c. p. arc and 3,000 16-c. p. incandescent lights.

GREEN BAY, WIS.—The plant of the Green Bay Gas & Electric Light Co., it is stated, will be extended at a cost of about $50,000. Sinclair Mainland, Mgr. and Purchasing Agent.

SUN PRAIRIE, WIS.—C. B. Hayden is said to have been granted a franchise for a plant.

ST. PAUL, MINN.—New specifications for lighting have been made whereby more competition may be secured. It is intended to offer a 10-year franchise and permission to do commercial business to the successful bidder. There will be 105 additional arc lights, making a total of 375 arc lights. The contract for lighting the city for one year will be let this month.

INDEPENDENCE, MO.—We are informed that the franchise for a plant for this place applied for by W. T. Felton, Kansas City, Mo., is still pending.

DENVER, COLO.—Aldermen Robt. M. Golder writes us that the aldermen have passed the ordinance granting a franchise to the Denver Power & Irrigation Co. The supervisors will act on the franchise this week; it will probably be passed. The plant will cost about $2,000,000. Address Rhodes Bros., 639 Equitable Bldg., Denver.

DENVER, COLO.—Bids are asked until Nov. 28 for installing an electric and heating plant, etc., for certain buildings at the county poor farm near Henderson. Jos. H. Smith, County Clk.

LEADVILLE, COLO.—We are informed that information in regard to the proposed power plant at Malta, noted last week, may be secured from J. G. White, Engr. and Contractor, 29 Broadway, New York. Thos. W. Jaycox, Leadville, is interested.

COVALLIS, ORE.—Bids were asked until Nov. 4 for furnishing and installing a plant for the state agricultural college at Covallis. E. M. Lazarus, 665 Worcester Block, Portland, Ore.; W. E. Yates, Secy.

PORTLAND, ORE.—Local papers state that surveys are being made for a power plant on the Sandy River. It is supposed that the promoters intend to transmit the power to Portland and Gresham. Judge J. E. Mayo, Portland, is said to be interested.

TILLAMOOK, ORE.—It is proposed to issue $15,000 in bonds for a plant and water-works, according to reports.

CLAREMONT, CAL.—C. G. Baldwin writes us that W. H. Sanders, Pomona, Cal., has made surveys for the proposed power plant at the head of Mill Creek, near Redlands, Cal. The company expects to spend between now and June $200,000 in hydraulic work and electrical installation. The company is not ready to ask for bids. The use will be for pumping water for irrigation and mines in San Jacinto, Lake View, etc.

HEALDSBURG, CAL.—Press reports state that the Healdsburg Electric Lighting Co. has applied to the superior court for an injunction against the city to prevent the sale of $80,000 of bonds for the purpose of constructing water-works and an electric light plant, contracts for which were recently let.

REDLANDS, CAL.—A report from San Bernardina states that the Redlands Electric Light & Power Co. has filed claim to 4,000 inches of water flowing above the surface and underground in Mill Creek, the point of diversion being Aker's Narrows. The water is to be used to develop power to generate electricity and compressed air, drive machinery, produce light and heat, operate all kinds of transportation facilities, and for other mechanical purposes. The power will be transmitted from a power house up Mill Creek canon to all the important towns and cities in Riverside, Los Angeles and San Bernardino counties. The water will be diverted by means of a tunnel 4 ft. wide and 6 ft. high, and a dam 300 ft. in width and 10 ft. high.

ALAMOGORDO, N. MEX.—J. A. Eddy, Alamogordo, N. Mex. and El Paso, Tex. (P. O.), writes us that the Alamogordo Lumber Co. will put in a plant to be operated by waste fuel from the mill. Address C. P. Henderson, Scranton, Pa.

GRANGEVILLE, IDAHO.—H. Orchard, of Portland, Ore., has been granted a franchise for a plant and water-works to cost about $30,000, according to reports.

COLVILLE, WASH.—Paul Laplant has applied for a franchise for a plant and water-works. The power will be secured from the dam on Mill Creek.

OTTAWA, ONT.—Bids are asked until Nov. 10 for furnishing about 4,000 electric light line poles for the proposed electric line for the Metropolitan Electric Co., recently incorporated. The poles are to be 30 to 50 ft. long and 7 ins. in diameter at the top. Jos. Robinson, Montreal, Que., and A. B. Broderick, Ottawa, are interested.

ORILLA, ONT.— We are informed that bids for constructing the proposed plant will be received about Dec. 1. There will be a 10,000-volt transmission plant, two 600-K-W. generators, S. U. and S. D. transformers, 1,000-HP. hydraulic plant. The plant will have a capacity for 50 2,000-c. p. arc and 1,200-c. p. incandescent lights; the power will be transmitted 18 miles; estimated cost of plant, $75,000. Roderick J. Parke, Elec. Engr., Toronto, Ont.

PEMBROKE, ONT.—Estimates for a municipal plant of 50 arc and 3,000 incandescent lights are being furnished by Roderick J. Parke, Toronto.

PRESCOTT, ONT.—We are informed that plans for a plant will be considered immediately after the construction of the proposed water-works and sewerage system which will cost about $100,000. John Galt, Engr., Canada Life Bldg., Toronto; J. B. White, Town Clk.

MONTREAL, QUE.—Wm. C. McDonald, Montreal, has given McGill University $30,000 with which to furnish a department of electrical engineering.

CASCADE CITY, B. C.—It is stated that the machinery for the plant of the Cascade Water Power & Light Co. will be put in next spring. Surveys, etc., are being made by Mr. Anderson.

NEW COMPANIES.—Grand Falls Water Power & Boom Co., Fredericton, N. B., Can.; $1,000,000; to build and operate a plant and mills at Grand Falls, N. B.; Redfield Proctor, U. S. Senator, Burlington, Vt.; Russell A. Alger, Secy. Army Dept., Washington, D. C.; G. A. Hobart, Vice-Pres. U. S., Washington; Sir Wm. C. Van Horne, Pres. Canadian Pacific Ry. Co., Montreal, Que.; Lt. Hugh M. McLean, St. John, N. B.

Fort Smith Traction, Light & Power Co., Fort Smith, Ark.; $200,000; Pres., Samuel McLeod.

New Light Corporation, New York, N. Y.; to manufacture lighting machinery; $10,000; Frank M. Ashley, 97 Greene Ave., Brooklyn.

Bonham Electric Light & Power Co., Bonham, Tex.; $25,000; J. F. Heledge, J. B. Russell, J. N. Rainey, E. F. White.

Joplin Illuminating Co., Joplin, Mo.; $80,000; with three-fourths paid in; John C. Porter, Harrison J. Drummond, John J. Dunham, Francis Kuhn, Charles Nelson.

American Incandescent Lighting Co., Meriden, Conn.; $50,000; Thos. E. Webster, Bay City, Mich.; Lyman T. Lawton, Meriden; Robt. L. Doran, Nashville, Tenn.

BRIDGES.

CANAJOHARIE, N. Y.—Bids are asked until Nov. 15 for a lift bridge over the Erie Canal at Church St. Geo. W. Aldridge, Supt. Pub. Wks., Albany.

HOOSICK FALLS, N. Y.—Bids are asked by the town board until Nov. 13 for constructing the following bridges: 106-ft. span, 16-ft. roadway; 36-ft. span, 16-ft. roadway; 26-ft. span, 16-ft. roadway; 23-ft. span, 16-ft. roadway; two 18-ft. spans, 16-ft. roadway. Capacity of each bridge, 40 lbs. per sq. ft. D. M. Greene, Engr., Troy, N. Y.

HORNELLSVILLE, N. Y.—F. W. Dalrymple, Cy. Engr., has been instructed to advertise for bids for moving the present bridge on Canisteo St. to Van Scoter St., and for building a new bridge with 24-ft. roadway on Canisteo St.

SANDY HILL, N. Y.—It is reported that a new iron bridge will be constructed over the canal next winter. Meanwhile the street railway company will erect a temporary bridge east of the union hose house. Superintendent Kinmouth may be addressed.

BETHLEHEM, PA.—A hearing was to be given Nov. 9 by Jas. M. Porter, Easton, Pa.; J. B. Leith, Hellertown, Pa.; Alexander Singmaster, Macungie, Pa., and others, who have been appointed viewers by the Northampton and Lehigh county commissioners to consider the question of constructing a bridge over the Lehigh River at Main St.

READING, PA.—A resolution has been passed by the council to have S. S. Hoff, Cy. Engr., prepare estimates for both a tunnel and an overhead bridge at Spring St. and a bridge at Pike St. and Philadelphia & Reading Ry.

WILLIAMSPORT, PA.—A petition has been presented to the county commissioners by Armstrong township for a bridge over Mosquito Creek, on the road from Duboistown to Nippenose valley. F. H. Keller, Edward Eldred and John Blair have been appointed viewers.

WILMINGTON, DEL.—The Baltimore & Ohio R. R. Co. will construct a bridge at Fourth and Hawley Sts., according to reports.

NORFOLK, VA.—The council has decided to offer the bridge company $8,000 for the bridge from the first ward to Brambleton and if the offer is not accepted bids will be asked for a new bridge from Mariner to Lovitt Ave.

SALEM, VA.—Walter Watson writes us that the following bids were received Oct. 22 for two bridges:

	80-ft. span.	60-ft. span.
Wrought Iron Bridge Co., Canton, O	$1,010	$895
Champion Bridge Co., Wilmington, Del	1,045	950
Massillon Bridge Co., Massillon, O	1,070	921
Pittsburg Bridge Co., Pittsburg, Pa	1,008	875
Youngstown Bridge Co., Youngstown, O	1,025	855
Bellefontaine Br. & Iron Co., Bellefontaine, O	1,150	900
Geo. E. King Bridge Co., Des Moines, Ia	1,074	967
Canton Bridge Co., Canton, O	1,150	950
Toledo Bridge Co., Toledo, O	1,000	850
King Bridge Co., Cleveland, O	1,120	900
*Virginia Bridge Co., Richmond, Va	1,000	775

---

*$1,740 for both bridges. Recommended for acceptance.

CLEVELAND, O.—Plans are being prepared by the park engineer for a proposed stone arch bridge, 60-ft. span, at the Wade Park Ave. crossing of the lower drive in Rockefeller Park.

LORAIN, O.—Bids are asked until Dec. 22 for furnishing the material and for constructing the superstructure for the Black River bridge, as stated in our advertising columns. Geo. H. Lewis, County Audr., Elyria, O.

ZANESVILLE, O.—Bids are asked until Dec. 8 for the material and for constructing the stone work for the west end approach of the Monroe St. bridge. Jas. L. Starkey, County Audr.

ELK RAPIDS, MICH.—The counties of Antrim and Kalkaska have decided to jointly construct a bridge over the Torch River, according to reports.

GRAND HAVEN, MICH.—F. F. McEachron, Dist. Clk., informs us that at the election Oct. 21 the county decided not to construct the proposed two bridges across the Grand River, to cost $10,000 each.

SAGINAW WEST SIDE, MICH.—The Flint & Pere Marquette R. R. Co. has applied to the county supervisors for permission to construct a bridge over the Tittabawassee River, in Saginaw township, according to reports.

MILWAUKEE, WIS.—The park board proposes to construct a viaduct 800 ft. long and 100 ft. wide, on the Highland Boulevard, over the Chicago, Milwaukee & St. Paul Ry.

MINNEAPOLIS, MINN.—L. A. Lydiard, Cy. Clk., informs us that this city was to vote on the question of constructing a new bridge over the Mississippi River, at 32d Ave., at the election Nov. 8.

LEXINGTON, MO.—We are informed that this place is desirous of awarding a contract for the construction of a high bridge or a low draw bridge over the Missouri River, to accommodate wagons and an electric railway, to cost about $50,000. The bridge proper will consist of three single-track fixed spans, each 420 ft. long. Frank Bowman, Secy. Com.

KANSAS CITY, MO.—The park board proposes to construct a stone arch bridge over the Kansas City Suburban Belt Ry., on the extension of Boston Boulevard, to be about 72 ft. long and 40 ft. wide.

WICHITA, KAN.—W. Q. Church, Gen. Mgr., Wichita Ry. Co., writes us that two pile bridges 200 ft. and 300 ft. long, respectively, are to be constructed over the Little Arkansas River.

SHERMAN, TEX.—Bids are asked for furnishing the material and for constructing a steel bridge over Post Oak Creek, on the Bloomer Road. J. H. Wood, County Judge; L. M. Tuck, County Clk.

LOS ANGELES, CAL.—Bids are asked until Nov. 21 for furnishing the material and constructing bridges on Ninth St., Feliz Road, Ave. 26 and Sixth St.; estimated cost, $23,000. C. H. Hance, Cy. Clk.

OAKLAND, CAL.—Bids will soon be asked by the county clerk for repairing the Alice St. bridge; estimated cost, $2,300.

VICTORIA, B. C.—Bids are asked until Nov. 30 for constructing a steel arch bridge at the gorge, Victoria Arm. W. S. Gore, Deputy Comr. of Lands and Wks.

BUILDINGS.

AUGUSTA, ME.—Bids are now being received for a steam heating plant for the Augusta House. Proprietor, H. E. Capen.

BOSTON, MASS.—Bids are asked by the school committee of this city until Nov. 14 for erecting a primary school building in Roxbury; also for furnishing and installing a heating and ventilating apparatus and a plumbing system. Arch., James Mulcahy, 60 State St., Boston.

WORCESTER, MASS.—J. T. Cahill has been awarded the contract for plumbing in the new 8-room school building on Millbury St., at $2,957; and N. J. Deady, for plumbing in the East Kendall St. school building, at $2,985. Other bidders were, O. S. Kendall & Son, F. J. Borden, A. A. McLoughlin and Maher & McGrath.

ALBANY, N. Y.—The trustees of the West Albany Y. M. C. A. have decided to erect a new $20,000 building on Watervliet Ave., near the West Albany Bridge, and has appointed a committee to secure plans and specifications.

AUBURN, N. Y.—The Lehigh Valley R. R. Co. has awarded the contract for the erection of a new passenger station in this city to A. F. Chapman & Co., 476 Ellicott Square, Buffalo, N. Y. The cost of this work, together with new railway shops at Sayre, Pa., will cost about $130,000.

BROOKLYN, N. Y.—Adiel S. Hall, of Brooklyn, was awarded the contract by the armory board, Nov. 4, for changes and improvements to the 22d Regiment Armory, at $4,600.——The state armory board, Nov. 2, awarded the contracts for a new rifle range and improvements to the drill hall of the 47th Armory in Brooklyn to John J. Gillis, of Brooklyn, at $23,065; for gallery seats, to Frank T. Barnes, of New York, at $1,650, and for steam heating plant, to Gaylord & Eitspence, of Binghamton, N. Y., at $11,700.

NEW YORK, N. Y.—Bids are asked by the fire department, 157 East 67th St., until Nov. 16, for erecting a building for the fire department on Maiden Lane, 60 ft. east of Pearl St., Borough of Manhattan; sureties, $15,000; also for constructing and erecting a building on East 12th St., west of University Place, Borough of Manhattan; sureties, $12,000.——Plans have been filed by Thos. J. McGuire, 968 St. Nicholas Ave., for a 7-story brick flat building on Central Park West, near 90th St., to cost $90,000. Arch., Henry S. Howell, 748 East 138th St.; by David Cohen, for four 4-story brick flat buildings at 147th St. and 3d Ave., to cost $86,000. Arch., R. Werner, 7 Teasdale Place; by C. L. La Grassa, 60 Liberty St., for a 7-story brick flat and store building, at 96th St. and the Boulevard, to cost $200,000. Arch., C. Steinmetz; by Peleg C. Smith, Newark, N. J., for ten 4-story brick tenement buildings on Prospect Ave., near 150th St., to cost $140,000. Arch., W. C. Dickerson, 149th St. and 3d Ave.; by William Call, 1133 Broadway, for a 6-story brick flat building on Central Park West, near 94th St., to cost $125,000. Archs., J. E. Ware & Son and H. S. S. Harde, 489 5th Ave.; by Judson Lawson, 898 West End Ave., for a 6-story brick flat building on 117th St., near Manhattan Ave., to cost $70,000. Arch., S. M. Holden; by Francis Crawford, for five 3-story brick dwellings on 118th St., near 7th Ave., to cost $80,000. Arch., A. H. Taylor, 20 West 34th St.

NEW YORK, N. Y.—Bids are asked until Nov. 25 for taking down and rebuilding the west end wall of the rear building of the U. S. Assay Office. Jas. Knox Taylor, Supervising Arch., Washington, D. C.

NEW YORK, N. Y.—Bids are asked by the supervising architect, Washington, D. C., until Nov. 28. for the mailing platform extension and shed for the post-office building in New York, as stated in our advertising columns.

ENGLEWOOD, N. J.—The congregation of St. Paul's Episcopal Church of Englewood contemplates the erection of a new church building to cost about $35,000. Herbert B. Turner is interested.

NEWARK, N. J.—Bids are asked until Nov. 15 for the erection of a home for the aged and disabled firemen. Wm. H. Brown, Chn. of Com.; Ed. A. Wurth, Arch., 748 Broad St.

PHILADELPHIA, PA.—William Steele & Son, 506 Walnut St., have been granted a permit to erect a 7-story building, 48 × 161 ft., for J. & J. Dobson, at 809 and 811 Chestnut St., to cost about $60,000.

PHILADELPHIA, PA.—Charles McCaul, of this city, was awarded the contract Nov. 5 for the erection of the new mint building, at $441,743; time, 18 mos. Mount Desert granite will be used.

WILMINGTON, DEL.—Plans have been prepared, according to reports, for a 6-story office building to be erected at Market and 10th Sts., for Peter J. Ford, to cost $65,000. Arch., E. L. Rice, 503 Equitable Bldg.

BALTIMORE, MD.—An ordinance has been proposed to the city council appropriating $40,000 for the remodeling of the City Hall in order to secure more office space.

WASHINGTON, D. C.—The following proposals have been received by the commissioners for repairing and replacing the plumbing of the Jefferson school building: S. S. Shedd & Bro., $6,377.50; John J. Nolan, $5,200; Wm. Rothwell, $5,200; Ed. J. Hannan, $4,875.

LYNCHBURG, VA.—J. P. Pettyjohn & Co. were the lowest bidders Nov. 1 for erecting the new high school building (except heating), at $18,666. All bids were rejected.

NORFOLK, VA.—Bids have been rejected for the erection of new school buildings in this city, as they all exceeded the appropriation. It is said that $40,000 more will be appropriated, and plans changed accordingly.

FORT CASWELL, N. C.—Bids are asked until Dec. 7 for the construction of a torpedo storehouse at Fort Caswell, as advertised in Engineering News. Capt. W. E. Craighill, U. S. Engrs., Wilmington, N. C.

ABBEVILLE, GA.—Bids will soon be asked, according to reports, for erecting a $20,000 court house after plans by Andrew J. Bryan & Co., of Atlanta, Ga.

ATLANTA, GA.—The Nashville, Chattanooga & St. Louis Ry. Co., lessee of the Western & Atlantic Ry., and the other companies having lines running into this city, have combined to erect a new passenger station on the present site on Wall St., to cost between $200,000 and $400,000.——Plans have been prepared for a new club house to be built by the East Atlanta Land Co. for the East Atlanta Athletic Club, on Edgewood Ave. Archs., Blakely & Tyler, Fitten Bldg.

SAVANNAH, GA.—Bids are asked until Nov. 10 for the construction of hospital wards and other buildings necessary for a general hospital for 1,000 beds, at Savannah. Capt. John W. McHarg, Asst. Q. M. of Vols.

FORT WAYNE, IND.—The trustees of the Indiana school for feeble minded youth has decided to ask for an appropriation of $100,000 to be used in building four cottages on the grounds and in building a large barn on the farm. The appropriation will be asked for in two portions.

CHICAGO, ILL.—A committee consisting of W. A. Giles, Sarah H. Stevenson and Horace Oakley, has been appointed to investigate the advisability of erecting public comfort stations in this city.——Contracts have been awarded by John Hulla, Jr., for a 4-story apartment building to be erected on Grand Boulevard, near 41st St., at a cost of about $30,000.——Permits have been granted to Stanley R. McCormick for two 7-story brick store buildings at 130 and 133 Michigan Ave., to cost $300,000, and for a 6-story brick store building at 136 Michigan Ave., to cost $100,000.——The following bids were received by the supervising architect, Washington, D. C., Nov. 3, for the construction (except heating apparatus) of the extension to the U. S. temporary post office at Chicago:

		Time
E. Earnshaw & Son, Chicago	$31,740	60 days
McEwen Bldg. & Mfg. Co., Chicago	32,400	2 mos.
W. E. Frost Mfg. Co., Chicago	26,596	75* dys
Garthwait, McCall & Co., Chicago	33 883	60 "
Wm. Mayor Co., Chicago	32,565	2 mos.
E. F. Gobel Co., Chicago	31,189	2 "
Congress Construction Co., Chicago	29,879	52* dys
Hennessee Bros. & Evans Co., Chicago	29,500	2 mos.
L. L. Leach & Son, Chicago	32,000	2 "
John C. Robinson, Chicago	31,500	2 "
W. H. & C. J. Mortimer, Chicago	33,478	2 "
Jonathan Clark & Sons, Chicago	32,390	60 days
Ledgewood & Campbell, Chicago	31,954	2 mos.
Greenbaum Construction Co., Chicago	27,973	2 "

*Working days.

CHICAGO, ILL.—The N. E. Frost Mfg. Co., of Chicago, was the lowest bidder Nov. 3, at $26,469, for constructing the temporary post-office building in Chicago; time, 75 working days. As the appropriation for the work was but $20 000, new bids will be called for.

FREEPORT, ILL.—The following bids were received Oct. 31 for erecting the superstructure of the proposed City Hall, using Portage stone; George H. Tandy, Cy. Clk.; D. S. Schureman, Arch., Rockford, Ill.: Smith & Thomas, Freeport, Ill., $33,600; W. J. McAlpine, Dixon, Ill. (accepted), $28,380; Thos. J. Winchester, Rockford, Ill., $29,345.

LA HARPE, ILL.—Carl A. Anderson, of Burlington, Ia., has been awarded the contract for erecting a new school building in the city, at $12,300. The following bids for heating apparatus were received: Pittsburg Heating & Supply Co., $1,849; Law & Barber, Mendota, Ill. (accepted), $1,270; R. Ingraham & Co., La Harpe, $1,450; H. Ewinger, Burlington, Ia., $1,574.

ST. PAUL, MINN.—The contract for placing three smoke consumers on the Madison School building has been awarded to the Northwestern Automatic Smoke Preventer Co., represented by Ralph W. Cavanaugh, at $700.

DES MOINES, IA.—Plans are being prepared for a new 6-story brick, stone and terra cotta store and office building, 66 × 133 ft., to cost about $90,000. Archs., Foster, Liebbe & Co., 8th and Walnut Sts.

GARNER, IA.—Bids are asked until about Dec. 5 for the erection of a new court house. H. V. Reed, County Audr.; Arch., F. W. Kinney, Austin, Minn.

ST. LOUIS, MO.—Daniel Evans, contractor, has been granted a permit for the erection of a new armory building on Grand Ave., near Rutger St., to cost $45,000.——A new 10-story business building, 50 × 114 ft., is to be erected at 6th and Olive Sts., for the Reliance Realty Co., to cost about $200,000. Arch., Theodore C. Link.

SPRINGFIELD, MO.—Plans have been prepared for a hospital building to be erected here for the St. Louis & San Francisco Ry. Co., to cost about $35,000. Arch., Isaac C. Taylor, 900 Columbia Bldg., St. Louis, Mo.

CLEBURNE, TEX.—Bids are asked until Dec. 1 for erecting a new business building for Evans & Hoshour, of this city, to cost about $40,000. Arch., E. H. Silver, Dallas, Tex.

FORT BERTHOLD, N. DAK.—Bids are asked until Nov. 29 for the construction of a brick school building and a water system at the Fort Berthold Agency. W. A. Jones, Comr. of Indian Affairs, Washington, D. C.

PITKIN, COLO.—The store and bank building of R. R. Williams & Co., and many other business buildings, were destroyed by fire Nov. 7, causing a reported loss of $100,000.

SAN PEDRO, CAL.—W. A. Weldon, Chn. Bd. of Trustees, informs us that this city contemplates the erection of a new city hall building, and would like to receive plans for a suitable building. Bonds for the erection of a city hall and for water-works will probably be voted soon.

ST. THOMAS, ONT.—Bids are asked until Nov. 12 for plastering, plumbing, electric wiring, heating, etc., etc., required for the new municipal building. Alderman Sanders, Chn. Bldg. Com.; N. R. Darrach, Arch., Talbot St.

WATER-WORKS.

CHERRYFIELD, ME.—The board of trade is considering the question of building works, according to reports.

CHESTER, VT.—The Chester Water Co. has been incorporated.

ESSEX JUNCTION, VT.—The legislature is reported to have been petitioned to grant this place authority to issue $35,000 in bonds for the proposed works.

ST. JOHNSBURY, VT.—The question of securing an increased water supply is said to be under consideration.

BUFFALO, N. Y.—The Great Spring Water Co. has been incorporated with a capital stock of $10,000 by A. T. Mohr, Dr. F. P. Vandenbergh, Erie County Bank Bldg., Buffalo; J. M. Vandenbergh, John O. Adeit, J. F. Witmer, Civil Engr., 705 Ellicott Square, Buffalo; and W. J. Stanton, of Buffalo, and H. C. Vandenbergh, of New York city.

EASTHAMPTON (L. I.), N. Y.—A company has been organized to build works; capital stock, $25,000. Work will be begun at once, according to reports. Jos. S. Osborne, B. H. Van Sooy and J. T. Gardiner are interested. The works will consist of the following: Four and a-half miles of mains, a water tower 100 ft. × 12 ft., with a capacity of 85,000 gallons, to be built on a foundation of solid concrete, 20 ft. square by 9 ft. in height. Water will be secured from an artesian well 100 ft. in depth. The site chosen will be 35 ft. above the level of Main St. A gasoline engine of 15 HP. will run a triplex pump with the capacity of 8,000 gallons an hour. Twenty-six double nozzle hydrants are to be located 500 ft. apart.

EAST SYRACUSE, N. Y.—An election will be held Nov. 10 to vote on the question of issuing $3,500 in bonds for extending the works.

FISHKILL LANDING, N. Y.—Chas. A. Hague, 39 Cortlandt St., New York, is reported to have been engaged to make a survey for the proposed new works.

GREENPORT (L. I.), N. Y.—G. Corwin, Jr., Village Clk., writes us that the village is about to purchase the works of the Greenport City Water Co., built 10 years ago.

IRVINGTON-ON-THE-HUDSON, N. Y.—Bids are asked until Nov. 15 for furnishing the materials and labor for constructing the proposed reservoir, laying certain water pipe, etc. T. W. Crisfield, Clk. Bd. Trustees.

TROY, N. Y.—It is proposed to extend the mains to Albia so that borough may have a water supply. R. F. Hall, Water Comr.

CAMDEN, N. J.—The East Jersey Coast Water Co., 119 Market St., Camden, has been incorporated to construct water-works; capital stock, $100,000; incorporators, Geo. Reynolds, Ephraim Tomlinson, Peter V. Voorhees and John O. Wilson, of Camden county, New Jersey; H. Bayard Hodge, 1319 Filbert St., Philadelphia, Pa.; J. W. Hawley, Media, Pa.

IRVINGTON, N. J.—The committee has submitted a report on the proposed purchase of the works of the Irvington Water Co. The plant is valued at $49,690.

MILFORD, N. J.—J. W. Flad, Secy. and Treas. Spring Mills Water Co., writes us that the proposed works at Holland will have a reservoir of 1,500,000 gallons capacity, about 32,000 ft. of 10-in. pipe, 8,000 ft. of 3 to 6-in. service pipe, etc. The water will be secured from a spring yielding 50,000 gallons a day. L. A. Francisco, Engr., Easton, Pa.

VAILSBURG, N. J.—Eugene A. McMurray, 22 Clinton St., Newark, N. J., is preparing plans and specifications for supplying the borough with water in those streets which are not supplied by private companies. It is the intention of the borough to purchase the existing pipes and so form a supply throughout the entire borough under the control of the borough authorities. The supply is to come from the Commonwealth Water Co., of Summit.

WESTFIELD, N. J.—Press reports state as follows: A communication from the Westfield Water Co., E. C. Sergent, Pres., and W. S. Welch, Secy., has been presented to the Westfield township committee, asking that the voters of the township be given an opportunity to express their sentiments on the matter of the township owning its own water-works, and stating in substance that if the voters were not in favor of town ownership the company would then construct works.

ALLENTOWN, PA.—Mayor Lewis has signed the ordinance providing for the purchase of the Schantz spring property for $14,000, to be used as a new water supply for the city. The property is located about four miles west of the city.

ALLEGHENY, PA.—The water committee is reported by local papers as favoring the purchase of a new pump for the Montrose works. A pump of 15,000,000 gallons a day and to cost about $60,000 will be needed. J. L. Brown, Supt. Bureau of Water.

GLENSIDE, PA.—The Glenside Water Co. has been incorporated with a capital stock of $1,000 by W. T. B. Roberts, Forrest H. Roberts, J. P. P. Brown, Chester E. Albright, Charles F. Mebus.

WASHINGTON, D. C.—Plans have been made, the land bought and work about to commence on a 15,000,000-gallon reservoir on the high ground between 16th St. extended and Rock Creek Park, west of the Brightwood Driving Park. It will serve the middle high section. Estimated cost, $150,000. W. A. McFarland, Supt. Water Dept.

BALTIMORE, MD.—A company has been organized to purchase the Mount Washington (P. O. Baltimore) works. A number of improvements will be made, according to reports. Capital stock, $25,000. Edward L. Garnard, Gen. Mgr.; Arnold E. Walters, Treas.

DENTON, MD.—Nicholas S. Hill, Jr., of the water department of Baltimore, has made surveys for works to cost about $12,000. A report states that bids will be asked in about three months. Howard Melone, Jos. Nichols and Wm. D. Uhler are on the committee.

ST. MICHAELS, MD.—The town commissioners are considering the question of works, according to reports.

NORFOLK, VA.—J. Thomas Peelle, Registrar, informs us that the following bids were received Oct. 26 for building the proposed addition to the works, as advertised in Engineering News: Sanford & Brooks Co., Baltimore, Md., $124,000, in 300 days; The Degnon-McLean Construction Co., New York, $127,840, in 5 months; $122,840, in 6 months, and $117,840, in 8 months; John Lavelle, Cleveland, O., $115,000, in 4 months; $110,000, in 5 months, and $105,240, in 7 months. John Lavelle declined to comply with his bid. The contract was awarded the Degnon-McLean Construction Co., 1 Broadway, New York, at $117,840, to be completed in eight months.

RICHLAND, GA.—Press reports state that this place has voted to sink an artesian well for a water supply. A company will probably be organized. Population, 500.

GREENWOOD, MISS.—J. L. Gillespie, Cy. Clk., writes us that everything for works and a sewerage system will be wanted, if it is decided to make the improvements. The water will be secured from artesian wells. Population, 2,500. H. G. Kitchell, Engr., Greenwood.

NEW IBERIA, LA.—A. J. Cammack, Secy. and Attorney, writes us that no election has been held to decide the question of building works and light plant. It is not known when the election will be held.

WEST TAMPA, FLA.—Bids are asked until Dec. 5 for furnishing the materials and for building the proposed works, as stated in our advertising columns. J. N. Hazlehurst, Engr., Tampa; M. E. Gillette, Chn. Com.

MEMPHIS, TENN.—Mayor Williams is reported by local papers to be in favor of the city's purchasing the works of the Artesian Water Co.

TULLAHOMA. TENN.—W. H. McLemore, Cy. Clk., writes us that the city will not be ready to ask for bids for works before next spring. Population, 2,500.

CLARINGTON, O.—An election will probably soon be held to vote on the question of issuing $10,000 in bonds for works.

CLEVELAND, O.—Bids are asked until Nov. 25 for furnishing four new cylinders and otherwise repairing and rebuilding Worthington pumping engine No. 4. Geo. R. Warden, Dir. Pub. Wks.

JONESVILLE, MICH.—Bids are asked until Nov. 15 for furnishing materials and for constructing works. There will be required 2,550 ft., 64 tons of 8-in. pipe; 2,600 ft., 45 tons, 6-in. pipe; 17,000 ft., 198 tons, of 4-in. pipe; 5 tons of special castings; three 8-in. valves, three 6-in. valves and sixteen 4-in. valves; 42 fire hydrants; two steam pumps, each with capacity to pump 750,000 gallons per 24 hours; two return tubular boilers, each 60 ins. in diameter and 16 ft. long, or boilers of any other type of equivalent capacity; furnishing all other materials, including tools and labor, and laying pipe and special castings, including the setting of valves and hydrants, pump foundations, boiler settings and connections; for pipe and fittings for connection of supply wells with pumps, and making connections; also for furnishing materials and for constructing one metallic stand-pipe, 16 ft. diameter and 80 ft. high, including foundations and appurtenances. J. D. Cook, Consult. Engr., 56 Law Bldg., Toledo, O.; Chas. F. Wade, Pres.; W. M. Wetmore, Clk.

ALTON, ILL.—The council is again considering the question of building municipal works, plans for which are to be made by R. L. Brown and Geo. C. Morgan, of the Seckner Contracting Co., Chicago, according to reports.

CASEY, ILL.—The question of issuing bonds for works is reported as being considered.

CICERO, ILL.—The Cicero Water, Gas & Electric Light Co. has let a contract to L. Wilson, 53 Dearborn St., Chicago, Ill., to drill an additional artesian well at the works at Oak Park. The well is to be 8 ins. at bottom and is to be 1,600 ft. deep.

ELKHART LAKE, WIS.—An election will be held Nov. 16 to vote on the question of issuing $5,000 on bonds for works.

ALBERT LEA, MINN.—Press reports state that the council water committee has decided to purchase a new 2,000,000-gallon pump, and is considering estimates from eastern concerns.

DULUTH, MINN.—The supreme court has handed down a decision against the city's issuing bonds to purchase the works for $1,250,000.

PELICAN RAPIDS, MINN.—The council is reported as considering estimates for works to cost about $8,000. An election to vote on the question will probably soon be held.

EAST GRAND FORKS, MINN.—The question of building works and a light plant is being considered.

INDEPENDENCE, MO.—H. H. Pendleton, Cy. Engr., writes us that the Independence Water Works Co. was granted a 20-year extension to the franchise at the election Nov. 1. Extensions to the works will be made. R. D. Wirt, Supt.

MEXICO, MO.—Press reports state as follows: The fact was made public Oct. 27 that the bonds of the Mexico Water-Works Co. were recently purchased from New York parties by Samuel A. Locke and M. Butler Guthrie, of this city, who now own the works. The purchase price has not been made public, but it is supposed to be in the neighborhood of $400,000. John J. Steele, Supt. and Treas.

TEXARKANA, ARK.—R. A. Munson, Supt. Water Co. of Texarkana, writes us that no contracts will be let for improving the works; the work will be done by the company's own men.

McKINNEY, TEX.—Bids are asked until Nov. 30 for furnishing the materials and for building works to include the following: One frame pumping station, sheeted and roofed with corrugated iron; one reservoir or pump well 24 ft. in diameter and 12½ ft. deep; one double-acting deep well pump with an approximate capacity of 150,000 gallons in 24 hours and a lift of 450 ft.; one duplex compound high service pump with a capacity of one million gallons in 24 hours against a head of 160 ft.; one boiler plant of 2 tubular boilers 48 ins. in diameter and 16 ft. long, with fitting and all pipe connections, feed water pump and heater; one steel stand-pipe 20 ft. in diameter and 100 ft. high; 4,008 ft. of 12-in. cast-iron pipe with specials and valves; 704 ft. of 10-in. pipe; 3,240 ft. of 8-in. pipe; 11,880 ft. of 6-in. pipe, and 45 fire hydrants. J. M. Pearson, Mayor; W. B. Newsome, Jesse Shain, Water Comrs.

COLVILLE, WASH.—Paul Laplant proposes to build works in connection with the electric plant for which a franchise has been asked.

TILLAMOOK, ORE.—The question of the construction of municipal works and electric plant to cost about $15,000 is being considered.

FERNANDO, CAL.—The question of this place and Pocoima purchasing the works owned by J. P. Widney is being considered.

SAN PEDRO, CAL.—W. A. Weldon, Chn. Bd. Trustees, writes us that the city proposes in the near future to vote on the question of issuing bonds for works and a new city hall. The trustees were advertising Nov. 1 for a site for the works. Population, 2,000.

SONOMA, CAL.—The proposition to issue bonds for municipal works lacked four votes Oct. 24 of being carried. It is stated that another election will be held.

TEMPE, ARIZ.—Bids are asked by Geo. W. Hoadley, of Hoadley, Turnbull & Co., Phoenix, Ariz., for building a pumping plant of 100,000 gallons capacity. Payment will be in bonds.

GRANGEVILLE, IDAHO.—H. Orchard, Portland, Ore., is reported to have been granted a franchise for works and a light plant to cost about $30,000. There will be required six miles of mains.

HAMILTON, ONT.—E. G. Barrow, Engr., has submitted report, etc., on the proposed extension to the works to cost about $161,000 to $181,000. He has recommended that new distributing pipes be laid as soon as possible. About 31,000 ft. to 37,000 ft. of 20, 24 and 30-in. mains are recommended. Councilman Hannaford, Chn. Com.

STAYNER, ONT.—An election will be held in December to vote on the question of issuing $26,000 in bonds for works, according to reports. John Galt, Engr., Canada Life Bldg., Toronto, Ont.

OSHAWA, ONT.—Plans for works, a sewerage system and an electric plant are reported to have been prepared by John Galt, Canada Life Bldg., Toronto. Water will be secured from a spring about 13 miles distant. About 20 miles of mains and 100 hydrants will be needed. Estimated cost, $120,000.

PRESCOTT, ONT.—J. B. White, Town Clk., writes us that the proposed works and sewerage system will cost about $100,000. Bids will probably be asked some time during the winter. Permission to borrow $100,000 will have to be procured from the legislature. The water supply will be secured from the St. Lawrence River. John Galt, Engr., Canada Life Bldg., Toronto, Ont.; A. Whiting, I. W. Plumb and John Steel are on the committee.

SANDWICH, ONT.—This place will soon vote on the question of raising $1,500 for extending the water mains.

WATERLOO, ONT.—An election will be held Nov. 21 to vote on the question of issuing $50,000 in bonds for purchasing the works of the Waterloo Water Co. and also for improving the plant.

HAVANA, CUBA.—Bids are asked by the Quartermaster's Department, Army Bldg., Whitehall St., New York city, until Nov. 15 for furnishing for the new water-works at Havana, a 5¼ × 3½ × 5-ft. boiler feed pump, 3 duplex compound engines, 180,000 ft. of ¾ to 8-in. wrought and cast-iron water pipe, valves, faucets, bends, sleeves, tees, 14 cypress tanks, 20 tons soft lead, packing, etc. Goods to be delivered on board vessel at the wharf at Savannah, Brunswick, Ga.; Charleston, S. C.; Newport News, Va.; or New York.

VERA CRUZ, MEX.—Arrangements have been completed for works to cost about $600,000, to be paid for in 12 annual installments of $50,000 each. The water supply, it is said, will be taken from the Cotaxtla River.

LONDON, ENGLAND.—Reports state that the London county council last week decided by a large majority in favor of compulsory purchase of the works of all the London water companies, involving many millions of pounds sterling. Such a bill, however, will meet with great opposition in Parliament, where the vested interests are exceptionally strong.

COOLGARDIE, WEST AUSTRALIA.—English papers state that the government has decided to award the contracts for furnishing the pipe for the Coolgardie waterworks to G. & C. Hoskins, Sydney, New South Wales, and Mephan Fergusson, Melbourne and Perth. The two bids amount to about $5,450,000. There will be 61,832 lengths of 30-in. seamless pipe, each length 28 ft. long. A description of the proposed works was given in our issue of Feb. 10. C. Y. O'Connor, Engr.-in-Ch., Perth, Western Australia.

ST. PETERSBURG, RUSSIA.—A company is reported to have been organized to improve the works of this city and also to build a sewerage system; capital stock, $2,250,000.

IRRIGATION.

RIVERSIDE, CAL.—W. V. Covington has filed a claim to 600 ins. of water in the Whitewater and Snow Creek Junction, to be used for domestic, irrigation and mechanical purposes, according to reports.

SALT LAKE CITY, UTAH.—The council committee on irrigation is considering a proposition of the North Point Irrigation Co. to conduct the river water around White Lake, at a cost of about $5,000, or that the drain be extended to Salt Lake, which will cost about $30,000. E. W. Taylor, Arthur Parsons and T. J. Almy are interested.

McCAMMON, IDAHO.—A system to irrigate about 500,000 acres of land is about to be constructed by the Inter-State Canal & Power Co. George C. Parkinson, Pres., Preston, Idaho; Supt., Chester Call, Chesterfield, Idaho; Bishop E. G. Farmer, Treas., and James McMurris, Secy. A masonry dam will be constructed on the Bear River, south of Soda Springs, Idaho, to cost about $16,000. Surveys have been completed by John D. H. McAllister, Salt Lake City, Utah, for the canal which will tap the Bear River above the dam, and run about 11 miles in a northwesterly direction, covering about 20,000 acres.

NEW COMPANIES.—Consolidated Reservoir Co., Sheridan, Wyo.; $5,000; to construct the Martin reservoir to store water from Cross Creek in Big Horn county; W. E. Jackson, P. L. McKee, W. J. Croghan, F. M. Milligan and L. E. Martin.

Cedar-Mesa Ditch & Reservoir Co., Denver, Colo.; $1,000; to build ditches in Dela county and furnish power for irrigation, power, etc.; John W. Gallant, Daniel W. Hale, Harry E. Hale, Daniel S. Baldwin, and Harvey W. Stanley.

West Cache Irrigation Co., Trenton, Utah; $30,000; Myron W. Butler, Pres.; Charles G. Wood, Secy. and Treas.; Parley Merrill, George W. Adams, William Brigham and Joseph Wood.

Prenda Pumping Co., Riverside, Cal.; $50,000; to pump and deliver water for irrigation to the high lands above the Gage canal system. The water will be pumped from the canal by electrical power. W. G. Irving, Pres.; R. Henderson, Secy.; R. P. Winters and Robert M. Irving.

SEWERAGE.

BOSTON, MASS.—The North American Sewage Disposal Co. has been incorporated with a capital stock of $1,000,000 to build and operate sewage disposal plants and sewerage systems in cities of the United States. Perlie A. Dyar, Pres., Boston, Mass.; Henry W. Bowen, Treas., Roslindale, Mass.

MIDDLEBORO, MASS.—C. E. Grinnell and others have asked the state board of health to build a new system for this place.

SOUTHBRIDGE, MASS.—C. W. Hill, Clk. Com., writes us that plans for a system have been made, but no further action in regard to the matter has been taken.

BROOKLYN, N. Y.—The following bids were received Nov. 2 by the commissioner of sewers for building the 18th Ave. sewer for the Brooklyn Disciplinary Training School: John J. Cream, $4,591; Sigretto & Laurina, $4,585; James Jennings, $4,557; James Cacavajo & Co., $5,074; Mike Marrone, $8,635.

LIBERTY, N. Y.—Plans have been prepared for a system to cost about $32,000. A report states that other estimates make the system cost about $75,000.

NYACK, N. Y.—Bids are asked until 2 p. m., Nov. 10, for the purchase of $5,000 of 4% sewer bonds. J. M. Gesner, Village Treas.

SKANEATELES, N. Y.—Fred. Thomas, Civil Engr., is urging the board of trustees to build a system.

STAPLETON (S. I.), N. Y.—The question of issuing $238,000 in bonds for new sewers in this borough is being considered by the board of local improvements, Richmond Borough. Henry P. Morrison, Deputy Comr. of Sewers.

YORK, PA.—The York Sewer Co. has been incorporated with a capital stock of $1,000, by. D. F. Lafean, L. A. Marshall, and C. C. Frick.

HAGERSTOWN, MD.—The council is considering the question of building a system.

NASHVILLE, TENN.—The board of public works has asked for bids for building new sewers in Deluge and Grunby Sts.

HAMILTON, O.—Bids are asked until Nov. 25 for constructing storm sewers in three streets. L. A. Dillon, Cy. Engr.; M. O. Burns, Clk.

ELKHART, IND.—Bids are asked until Nov. 23 for constructing a sewer in Harrison St. D. F. Cordrey, Cy. Engr.

CHICAGO, ILL.—Bids are asked until 11 a. m., Nov. 11, for the extension of section No. 2 of the intercepting sewers as follows: About 1,370 ft. of 5-ft. brick sewer in Sheridan Road, from Pratt Ave. to Lunt Ave.; 1,365 ft. of 4½-ft. brick sewer in Sheridan Road, from Lunt Ave. to Touhy Ave.; 1,270 ft. of 3¾-ft. brick sewer in Sheridan Road, from Touhy to Bryan Ave.; length, about 4,005 ft.; estimated cost, $30,000; and also for building other brick sewers. L. E. McGann, Comr. Pub. Wks.

JERSEYVILLE, ILL.—Bids are asked until Nov. 12 for constructing a 12-in. pipe sewer in a certain district. H. H. Snell, Chn. Com.

VENICE, ILL.—The councils of Venice and Madison have decided not to join with Granite City for a proposed joint sewerage system.

MADISON, WIS.—Bids are asked until 7.30 p. m., Nov. 11, for machinery, buildings, etc., in connection with the sewage disposal works, as follows: Two buildings, 1 30-HP. dynamo, 4 motors, 1 triplex pump, 2 centrifugal pumps, 1 sludge press, 1 chemical mixer and tank, 2 gasoline engines, water wheel connections and governor, 12,000 ft. copper wire for power circuit, lamps and wiring, poles, etc., etc. Plans and specifications may be seen at the engineer's office, Madison, Wis., and at the Builders' & Traders' Exchange, Milwaukee and Chicago, Ill. O. S. Norsman, Cy. Clk.; McClellan Dodge and John Nader, Engrs.

ST. CLOUD, MINN.—The proposed system for this place will cost about $23,000, according to reports.

COLUMBUS, NEB.—C. J. Garslow, Secy. and Treas. Columbus Sewer Co., writes us that the contracts for building three miles of 10, 8 and 6-in. pipe sewers have been let to Dussell & Sale and J. W. Fouble, of Columbus. Ernest Stenger, Engr., Omaha, Neb.

CARROLLTON, MO.—Alex. Trotter, Comr., writes us that nothing has yet been done in regard to securing a system except to vote to issue bonds, as noted last week. The bonds up to Nov. 1 had not been sold.

INDEPENDENCE, MO.—H. H. Pendleton, Cy. Engr., writes us that this city voted Nov. 1 to issue $75,000 in bonds for a system.

KANSAS CITY, MO.—The South Highlands Land & Improvement Co has been incorporated with a capital stock of about $150,000 to improve what is known as Roanoke Place. It comprises about 118 acres. Sewers will be put in next year, besides considerable pavement will be laid. Edward E. Holmes, Real Estate Agent, and Jas. Haggart are interested.

SHERMAN, TEX.—The Sherman Sewerage Co. has been incorporated in New Jersey with a capital stock of $250,000 to build a system in this city. Geo. W. Ruch, Pres., 2851 Hutchinson Ave., Philadelphia, Pa., may be addressed. E. M. Kearney, Cy. Secy.

SPOKANE, WASH.—Fife & Conlan and Peter Costello submitted the lowest bids Oct. 25 for building sewers in Lincoln St., Main Ave. and Peaceful Valley, at $5,666 and at $6,882, respectively.

GRASS VALLEY, CAL.—The board of trustees is being urged to take immediate steps towards a system.

NEVADA CITY, CAL.—Press reports state that the board of trustees is considering the question of engaging an engineer to prepare plans for a system.

MONTREAL, QUE.—City Surveyor St. George has submitted specifications for a sewage disposal plant on the Fraser property at the far end of St. Denis St.

OSHAWA, ONT.—John Galt, Toronto, has prepared plans for a system and water-works to cost about $120,000, according to reports. The question of issuing the necessary bonds will probably be voted upon in January.

PRESCOTT, ONT.—J. B. White, Town Clk., writes us that the proposed system and water-works will probably cost about $100,000. Bids will be asked about March. John Galt, Engr., Toronto, Ont.

NELSON, B. C.—The aldermen have decided to build sewers in several streets. Mayor Houston and Alderman Whalley may be addressed.

VERA CRUZ, MEX.—Press reports state that Pearsons & Sons will begin the construction of the proposed system as soon as the harbor works are completed.

MORECAMBE, LANCASTER, ENGLAND.—The question of building a sewerage system and a disposal plant for this district at a cost of about $300,000 is being considered. Col. W. Langton Coke, Local District Council Board Inspector, may be addressed.

ST. PETERSBURG, RUSSIA.—Press reports state that a company has been organized to build a system and for improving the water-works of this city. Capital stock, $2,250,000.

GARBAGE DISPOSAL—STREET CLEANING

NEW ROCHELLE, N. Y.—Frederick Lorenzen, 145 Franklin Ave., writes us that there is no present expectation of building a garbage crematory. This place is under a village government with a special charter and has little or no power to raise money except by vote of the taxpayers, and a favorable vote probably cannot be secured at this time. The thickly settled part of the village is in need of a crematory but the outside taxpayers will vote the proposition down. New Rochelle has 14,000 to 15,000 inhabitants and tried to get a city charter last winter. The bill passed both houses of the legislature, but Gov. Black did not sign it. The people will make another effort this year and will probably succeed. If the city government is established one of the first things to be done is to be the building of a garbage crematory.

JERSEY CITY, N. J.—Bids will be asked by the street and water board until about Dec. 1 for collecting the ashes and garbage for one year.

CLEVELAND, O.—Bids are asked until Nov. 25 for cleaning the paved streets for the year ending Dec. 31, 1899. Geo. R. Warden, Dir. Pub. Wks.

CHICAGO, ILL.—A statement indicating that $365,526 had been expended in disposing of the city's garbage during the present year up to Oct. 1 has been submitted to Mayor Harrison. The report is to be considered in connection with the adoption of a new plan for removing garbage and ashes. The total appropriation for the year was $417,060. The unexpended balance on hand Oct. 1 was $51,534.30, and Superintendent of Streets M. F. Doherty says this sum is sufficient to continue the present service until January. It was decided Nov. 1 not to have the city build plants, but to ask for bids for collecting and disposing of the garbage according to the specifications of the five-year contract. Propositions from various companies are being considered.

WASHINGTON, D. C.—Dr. Wm. C. Woodward, Health Officer, has recommended that bids be asked not later than December, 1899, for collecting and removing the garbage, etc. The present contract expires June 30, 1900.

ST. JOSEPH, MO.—The health department is considering methods and estimates of various garbage disposal plants.

ALAMEDA, CAL.—The question of a municipal crematory is being considered.

STREETS AND ROADS.

BUFFALO, N. Y.—A resolution has been passed by the council to pave Glenwood Ave., from Main to Purdy St. ——The board of park commissioners has decided to construct a new drive on Humboldt Parkway, between Kensington and Delaware Aves.; also to issue $5,000 in bonds for the work.——A contract has been awarded to Henry C. Burgard, at $13,750, for surfacing Cherry St., between Michigan and Virginia Sts., with Alcatraz asphalt. A. H. Beyer, Chn. St. Com.

NIAGARA FALLS, N. Y.—Reports state that Henry C. Burgard, Buffalo, has been awarded a contract to lay asphalt pavements on Second and Cherry Sts., at $15,025.

PORT CHESTER, N. Y.—The highway commissioners have asked for an appropriation of $25,950 for the maintenance of the town roads.

MAY'S LANDING, N. J.—A petition was presented to the board of freeholders Nov. 2 for a road from Pleasantville to May's Landing; also for the completion of the Longport Drive through Great Egg Harbor township.

NEW PROVIDENCE, N. J.—A petition has been presented to the board of freeholders, Elizabeth, N. J., for the extension of South St. to the county line, a distance of three miles; estimated cost for macadam, about $7,750.

PLAINFIELD, N. J.—Bids are asked until Nov. 21 for furnishing the material and for macadamizing on East 9th St., East 6th St., and Franklin Place. Jas. T. MacMurray, Cy. Clk.

VAILSBURG, N. J.—Eugene A. McMurray, Borough Engr., informs us that the borough is about to close the contract for laying about 40,000 sq. ft. of cement sidewalk, with W. H. Farrell, 122 Clinton St., Newark, N. J.

PHILADELPHIA, PA.—The Fairmount Park committee has recommended the ordinance to macadamize Lincoln Ave. at a cost of $25,000.

SCRANTON, PA.—A contract was awarded Nov. 3 to the Alcatraz Co., New York, for paving Hyde Park Ave., from Lafayette to Division St.

SHARPSBURG, PA.—Booth & Flinn, Ltd., were awarded a contract Nov. 1, at $60,000, for asphalt and brick paving. The work will probably not be commenced before spring. T. R. Higgins, Clk.

SHIPPENSBURG, PA.—G. W. Wilt, Ch. Burgess, informs us that the question of issuing $10,000 in bonds for paving was to be voted upon Nov. 8. A contract for the work, if authorized, will not be let until spring.

BERKLEY, VA.—Bids are asked until Nov. 14 for curbing, guttering and macadamizing on Berkley Ave. A. H. Martin, Chn. Improvement Bd.

NORFOLK, VA.—W. T. Brooke, Cy. Engr., writes us that nothing has been done in connection with the paving of Brambleton and Park Aves. A vote will be taken at the election this fall to decide whether bonds shall be issued for the work.

PETERSBURG, VA.—N. T. Patterson, Jr., Pres. Council, writes that at the meeting of the council Nov. 1 the committee on streets asked authority to employ an expert to determine the best material to be used in paving Sycamore and other streets. At a conference of the finance and street committee it was agreed to recommend to the council that $50,000 be expended, and perhaps more, in the improvements of streets.

NEW ORLEANS, LA.—Plans will be prepared by A. C. Bell, Cy. Engr., for the paving of about 30 streets; estimated cost, about $300,000.

BRIDGEPORT, O.—John A. Fawcett, Clk., informs us that at the election Nov. 8 the question of issuing $75,000 in bonds for street improvements was to be voted upon.

FINDLAY, O.—Bids are asked until Nov. 10 for constructing sidewalks on North Main and three other streets. A. W. Ray, Cy. Clk.

NORWOOD, O.—Bids are asked until Nov. 21 for the purchase of $3,791 of 6% street improvement bonds. W. C. Wichgar, Clk.

SPRINGFIELD, O.—The board of public affairs has passed a resolution to improve Sherman Ave., from Harrison St., east.

CARTHAGE, ILL.—Reports state that the council has passed an ordinance to pave on North Main St.; estimated cost, $3,592.

WILMETTE, ILL.—Bids are asked until 7:30 p. m., Nov. 11, for grading, curbing and paving on Gregory Ave. Louis J. Pierson, Bd. Local Improvements.

WILWAUKEE, WIS.—The park board has resolved to extend the Highland Boulevard from 35th St. to the south entrance of West Park, to be 100 ft. wide. It is also planned to build a drive south from Highland Boulevard on Washington Ave. or 27th St., to the valley and across a viaduct to the south side.

CARROLLTON, MO.—Alex. Trotter, Chn. Com., informs us that the city is ready to let contracts and to employ an engineer for the proposed paving and sewers, for which $50,000 in bonds has recently been authorized.

BEAUMONT, TEX.—R. E. Kelley, Alderman, writes us that L. E. Beadle, Beaumont, is preparing plans for paving. Bids will be asked in about a month.

DALLAS, TEX.—Bids are asked until Nov. 14, for about 11,400 sq. yds. of asphalt and brick paving. I. A. Moore, Cy. Secy.

DALLAS, TEXAS.—The question of paving Main and Elm Sts. between San Jacinto St. and Washington Ave. is being considered. John H. Traylor, Mayor.

LOS ANGELES, CAL.—Bids are asked until Nov. 17 for furnishing 2,347 cu. yds. of gravel on Vernon Ave. T. E. Newlin, County Clk.

SACRAMENTO, CAL.—Plans will be prepared by J. C. Boyd, County Surv., for the macadamizing of Magnolia Ave.

TORONTO, ONT.—It is reported that the board of control has awarded the following contracts for paving: Dominion Paving & Construction Co., King St., brick paving, $6,183; Euclid Ave., cedar block, $3,107; Queen St., brick, $7,363; Construction & Paving Co., Sorauren Ave., brick, $9,018; W. F. Grant & Co., Queen St., Scoria Block, $5,432.

MANUFACTURING PLANTS.

BERLIN, N. H.—A. N. Gilbert has been awarded the contract for the construction of a bleachery, 110 × 65 ft., for the Burgess Sulphite Fiber Co.

BOSTON, MASS.—The factory building of the Trimount Mfg. Co., on Armory Ave., Roxbury, was burned, Nov. 5, damaging much machinery; reported loss, $15,000.

WINSTED, CONN.—Reports state that the M. E. Moore Bronze & Silverware Co., of New York, has decided to remove its entire plant to Winsted, near Ansonia.

GLEN COVE (L. I.), N. Y.—A fire in the National Starch Mfg. Co.'s plant, Nov. 3, caused damage estimated at $175,000.

GLOUCESTER CITY, N. J.—The Gloucester Mfg. Co. is said to be about to erect large additions to its present plant on adjoining land.

ALLENTOWN, PA.—James Nagle & Son, of Allentown, are reported to have been awarded the contract for erecting a new silk mill in this city.

BEAVER FALLS, PA.—Ground has been broken for the foundation of the large building to be erected on 3d St. for the Union Drawn Steel Co., but the contract for the building has not yet been let.

ELLWOOD, PA.—It is announced that the American Lamp & Brass Co., of Trenton, N. J., is to establish a new factory at Ellwood, at once, near the present plant of the Ellwood Tin-Plate Co.

JOHNSTOWN, PA.—It is reported that the American Specialty Enameling Co. has closed an agreement whereby it will erect a hollow-ware and enameling plant at this place.

SAYRE, PA.—A. F. Chapman & Co., 476 Ellicott Square, Buffalo, N. Y., have been awarded a contract by the Lehigh Valley R. R. Co. for the construction of new railway shops at Sayre, consisting of a cabinet shop, 75 × 200 ft.; a blacksmith shop, 75 × 200 ft., and a paint shop, 224 × 240 ft. The buildings will be of brick and stone, with iron truss roofs, with improved saw-tooth roofing on the paint shop. These contractors have also been awarded tht contract for erecting a new passenger station at Auburn, N. Y., the total cost of all the work being about $130,000.

WILKESBARRE, PA.—A new dye house, 24 × 30 ft., will soon be built for the Lee Park knitting mills. Pres., W. P. Morgan.

RICHMOND, VA.—Henry L. Valentine and others contemplate the purchase of the Haxhall mills, at a cost of $135,000, for the purpose of establishing a large paper and pulp mills.

PARKERSBURG, W. VA.—Reports state that the Oil Well Supply Co., of Pittsburg, will erect a large plant in this city for the manufacture of oil rigs and reels.

ATLANTA, GA.—Matthew and Thomas W. Prior, of Philadelphia, Pa., and others are said to contemplate the erection of a new cotton gin factory in Atlanta. W. T. Forbes, of Atlanta, is interested.

HARMONY GROVE, GA.—The erection of a new cotton mill is being contemplated by G. W. D. Harber, of Harmony Grove.

ENSLEY, ALA.—P. G. Shook, Secy. of the Alabama Steel & Shipbuilding Co., of Ensley, informs us that contracts have not yet been let for erecting the company's new plant at this place, nor has the time yet been determined when bids will be received.——Press reports state that the Alabama Steel & Wire Co. has let the contract for erecting a wire, rod and wire nail mill, with a daily capacity of 600 tons, at Ensley, to the Garrett Engineering Co. Secy., G. H. Schuler, Cleveland, O.

AKRON, O.—It is reported that the Franz Body Mfg. Co., now at Berlin, O., will remove its plant to this city. The company has just been incorporated with a capital stock of $60,000, for the manufacture of vehicle bodies.

CLEVELAND, O.—The works of the Standard Wheel Co., at 44 Bessemer Ave., were burned, Nov. 5, causing an estimated loss of $80,000.

TOLEDO, O.—Henry Speiker has been awarded the contract for erecting the Toledo Lamp Chimney Co.'s works on Detroit Ave; the building will cost about $20,000, and the machinery about $50,000.——W. H. Stewart, of Cincinnati, O., expects to erect a new building for the use of the Maumee Brewing Co. Architect Wachter may be addressed.

LAPEER, MICH.—The lumber and shingle mill of Robert King was destroyed by fire, Nov. 2, causing a reported loss of $50,000.

CHICAGO, ILL.—Contracts are said to have been let for erecting a brick, stone and iron brewery for Virgil M. Brand, at Elston Ave. and Snow St., to cost, complete, about $150,000. Arch., Louis Lehle.

SACRAMENTO, CAL.—A fire in the extensive railway shops of the Southern Pacific Ry. Co., damaged property valued at $200,000.

PORT ANGELES, WASH.—It is reported that Homer H. Swaney and others, of McKeesport, Pa., will build a new steel plant at this place, to employ about 100 hands. Work is expected to begin on the construction on Jan. 1.

SHANGHAI, CHINA.—Reports state that the Shanghai Ice, Cold Storage & Refrigerating Co., Ltd., of Shanghai, is said to be making preparations to purchase an ice-making plant of the latest and best design. American manufacturers will have an opportunity to compete. The company is capitalized at $65,000.

GAS PLANTS.

MILWAUKEE, WIS.—Bids are asked until 2 p. m., Nov. 10, for furnishing and installing gas and electric light fixtures in the U. S. building. O. L. Spaulding, Acting Secy., Treasury Dept., Washington, D. C.

NEW COMPANIES.—Clinton Gas Co., Prudential Bldg., Newark, N. J.; $100,000, with $1,000 paid in; to manufacture, sell and distribute illuminating and fuel gas throughout Essex and part of Hudson counties; Edward H. Wright, Jr., Edward J. Whitney, Nellie B. Crawford, Prudential Bldg., Newark, N. J.

Polk Creek Oil, Gas & Fuel Co., Weston, W. Va.; $50,000, with $16 paid in; to operate for oil and gas; S. E. Barrett, Andrew Edmiston, F. G. Orr, W. B. McGary, E. G. Davesson, Weston, W. Va.

MISCELLANEOUS CONTRACTS.

ELECTRIC FANS.—Dothen, Ala.—J. W. Jones asks for the address of manufacturers of electric fans.

WHARF.—Washington, D. C.—Bids are asked until Nov. 19 for constructing a wooden wharf at the naval magazine. Chas. O'Neil, Ch. Bureau Ordinance.

BOILERS.—Brooklyn, N. Y.—Bids are asked until Nov. 26 for furnishing boilers for the navy yard. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

BOILERS.—Boston, Mass.—Bids are asked until Nov. 26 for furnishing boilers at the navy yard. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

WHARF.—Bruce Mines, Ont.—The provincial government has appropriated $6,000 for the construction of a wharf at Marks St. R. E. Miller, Reeve, may be addressed.

TUG BOAT.—San Francisco, Cal.—Bids are asked until Nov. 28 for furnishing one tug boat. Lt.-Col. Oscar F. Long, U. S. Q.-M., 36 New Montgomery St., San Francisco.

TELEPHONE SYSTEM.—Paducah, Ky.—A franchise was granted Oct. 25 to the American Electric Telephone Co. The company has already secured over 400 subscribers.

CONDENSER TUBES.—Mare Island, Cal.—Bids are asked until Nov. 29 for furnishing condenser tubes for the navy yard. Edwin Stewart, Paymaster-Gen., Washington, D. C.

NAVAL SUPPLIES.—Washington, D. C.—Bids are asked until Nov. 15 for furnishing at the navy yard brass wire, block tin, slab zinc, pig iron, steel drill rods, etc. Edwin Stewart, Paymaster-Gen.

PARK WORK.—Cleveland, O.—Bids are asked until Nov. 16 for grading, draining, etc., of Edgewater Park, and for furnishing the materials. C. W. Pratt, Jr., Ch. Engr., Bd. Park Comrs., 185 Euclid Ave.

WHARF.—Toronto, Ont.—It has been decided to construct a wharf between Lorne and York Sts., with a frontage of 315 ft. and 500 ft. deep; estimated cost, $39,000. Address Alderman Sheppard.

SEAWALL.—Staten Island, N. Y.—Bids are asked until Dec. 1 for constructing a sea wall at the U. S. light-house depot, as stated in our advertising columns. Lt.-Col. D. P. Heap, U. S. Engr., Tompkinsville, S. I.

CRANE.—Brooklyn, N. Y.—Bids are asked until Dec. 10 for furnishing a crane of 100 tons capacity for the navy yard; appropriation, $100,000. M. T. Endicott, Ch. Bureau of Yards and Docks, Washington, D. C.

EXTENDING CANAL.—New Orleans, La.—Bids are asked until noon, Nov. 10, for cleaning and extending the Claiborne Canal, between Elysian Fields St. and Jourdon Ave. F. G. Freret, Secy. Drainage Comn., City Hall.

ENGINE AND BOILERS.—Fairmount, Ind.—Reports state that Gilbert Larue wishes to purchase one 14 × 16-ft. automatic engine and two 54 × 64-in. horizontal tubular boilers, with pipe fittings, duplex boiler feed pump, etc.

WHARF AND ROADWAY. — San Francisco, Cal.—Reports state that bids will soon be asked by the navy department, Washington, D. C., for constructing a wharf 200 ft. long and a 1,200-ft. roadway; estimated cost, $6,500.

DAMS.—Sacramento, Cal.—The commission of public works has in contemplation the construction of about 35 wing dams in regard to shoaling the Sacramento side of the river. Nothing will probably be done until next summer.

REMOVING WRECK.—Philadelphia, Pa.—Bids are asked until Dec. 5 for removing the wreck of the schooner "Joseph R. Ellis," in the Delaware River, near Tinicum Island. Lt.-Col. C. W. Raymond, U. S. Engr., 1428 Arch St., Philadelphia.

STEAMER AND FREIGHT SHEDS BURNED.—Collingswood, Ont.—The steamer "Pacific," owned by the Great Northern Transit Co., and the Grand Trunk wharves were burned Nov. 3. The steamer was valued at $65,000; insurance, $25,000.

CONDUIT SYSTEM.—Erie, Pa.—Bids are asked by the council until 5 p. m., Nov. 10, for the extension and equipment of the fire alarm, telegraph and police patrol conduit systems; appropriation, $2,500.——The bids opened Oct. 27 for electric conduits are given under Contract Prices.

CANAL.—Tampico, Ill.—Bids are asked until Dec. 6 for constructing about eight miles of feeder canal of the Illinois & Mississippi Canal, near Tampico, as stated in our advertising columns. Address Maj. W. L. Marshall, U. S. Engr., 1637 Indiana Ave., Chicago, or Asst. Engr. L. L. Wheeler, Sterling Ill.

SCALES, ETC.—Washington, D. C.—Bids are asked until Nov. 29 for furnishing for use of the Customs Service, during the period of one year from Jan. 1, 1899, such scales, beams, weights and other weighing apparatus and repairs of the same, as may be required, and to be delivered free of all charges for freight. O. L. Spaulding, Acting Secy., Treasury Dept., Washington.

TUNNEL.—London, England.—Bids the asked by the London county council until Jan. 24 for constructing a tunnel for pedestrian traffic under the River Thames, between the Poplar and Greenwich sides of the river. There will be a vertical shaft and staircase at each end of the tunnel. Plans and specifications may be secured, upon depositing $50, from the engineer's department, County Hall, Spring Gardens, S. W., London.

FIRE APPARATUS.—New York, N. Y.—Bids are asked until Nov. 16 for furnishing one double-extra first size steam fire engine, with La France pump and boilers; surety, $2,500; two double-extra first size steam fire engines, with Fox sectional water tube boilers; surety, $4,500; four first size hose wagons; surety, $1,200; 40 fire alarm boxes and 52 keyless doors for fire alarm boxes. John J. Scannell, Fire Comr., 157 East 67th St.

TRAVELING CRANE.—Norfolk, Va.—Reports state that the following bids were received Oct. 29 for furnishing a traveling crane at the navy yard: Morgan Engineering Co., Alliance, O., $14,952; William Sellers & Co., 1600 Hamilton St., Philadelphia, Pa., $11,980; Henry S. Manning, 111 Liberty St., New York, $14,221; The Wellman-Beaver Engineering Co., 1404 New England Bldg., Cleveland, O., $19.760.

FIRE ALARM SYSTEM CUT-OUTS.—Rochester, N. Y.—Local papers state that Louis W. Miller, of the Rochester Electrical Mfg. Co., which manufactures the Miller patent cut-out for protection of fire alarm and police telegraph boxes, has made a contract to equip the fire alarm and police systems of Brooklyn, N. Y., and Paterson, N. J., with the patent cut-out. There are 1,200 fire alarm boxes and 900 police boxes in Brooklyn. Rochester is the only city at present where fire alarm and police boxes are protected.

PUMPING.—San Francisco, Cal.—The executive committee of the Comstock Pumping Association has let the contract for draining the water 500 ft. below its present level (20 ft. below the Sutro Tunnel sill floor), which is as far as the present available power from water pressure for running the pumping machinery will permit, to the Risdon Iron & Locomotive Works, of San Francisco, at $30,000, payable in installments, and work guaranteed. Work will begin in a few days. The pumps are to handle about 13,000 gallons of water a minute.

TELEGRAPH LINES, ETC.—Tokyo, Japan.—We are informed that Saitaro Oi, of the Ministry of Communications, is visiting the United States to secure information in regard to telegraph lines, underground electric conduits, etc. The traffic throughout the islands has so greatly increased in the last few years that it has become necessary to extend the telegraph lines. The government will spend in all about $20,000,000 for this purpose. There are now in the country 50,000 miles of telephone lines, and many miles more are under construction. Mr. Oi will be in the United

States about a month, after which he will visit Europe, and will return to Japan by way of New York. His address while in the United States is care of S. Kondo, Pres. Japan-American Commercial & Industrial Association, Times Bldg., New York.

METAL WORK.—Mobile, Ala.—Lt.-Col. A. N. Damrell, U. S. Lighthouse Engr., Mobile, informs us that the following bids were received Oct. 31 for furnishing the metal work for six iron spindle day beacons for the Florida Reefs, Fla., advertised in Engineering News, Oct. 20:

Allentown Rolling Mills, Allentown, Pa	$2,328
Jonson & Co., Brooklyn, N. Y.	2,248
Tacony Iron & Metal Co., Tacony, Philadelphia, Pa.	2,190
Atlanta Machine Works, Atlanta, Ga	1,695
Chamblin & Scott, Richmond, Va	2,484
Emil Severin, Aurora, Ind	1,799
John P. McGuire, Cleveland, O	2,259

CONTRACT PRICES.

JETTIES.—Yaquina Bay, Ore.—Maj. W. L. Fisk, U. S. Engr., Portland, Ore., received the following bids Oct. 25 for extending jetties at Yaquina Bay, Ore., as advertised in Engineering News; the short ton is used for the two classes of stone and the rock removal, and the long ton for the rails used:

Bids Received at Portland, Ore., Oct. 25, 1898, for Jetties at Yaquina Bay, Ore.

Quantities.		Christie, Lowe & Heyworth, Chicago, Ill.	Wakefield & Jacobsen, Portland, Ore.	John Kiernan, Portland, Ore.	Daniel Kern, Portland, Ore.	Albany Contract Co., Albany, Ore.	W. L. Prather, Jr., Oakland, Cal.	Campbell & Buckman, San Francisco, Cal.	Columbia Bridge Co., P'rtl'nd, Ore.

CAST-IRON WATER PIPE.—Boston, Mass.—The Warren Foundry & Machine Co., 160 Broadway, New York, submitted the only bid to the pauper institutions department, Oct. 17, 1898, for furnishing 127 tons of 2,000 lbs. of cast-iron water pipe, at $17.20 a ton for straight pipe.

CEMENT, STONE AND SAND.—Fort Greble, R. I.—The following bids were received by Maj. D. W. Lockwood, U. S. Engr., Newport, R. I., Oct. 28, 1898, for furnishing cement, stone and sand for the construction of mortar battery at Fort Greble, R. I., as advertised in Engineering News; (1) being for Rosendale cement, (2) for broken stone, (3) for sand, (4) for Portland cement: S. & E. S. Belden, Hartford, Conn.—(2) $1.47 and $1.62 a cu. yd., delivered alongside wharf and on carts, respectively; Lawrence Cement Co., New York—(1) 68 cts. a bbl., on carts; Calvin Tomkins, New York—(2) $1.30¾ and $1.50¾, alongside wharf and on carts, respectively; Atlas Cement Co., New York—(4) $2.15 a bbl. on carts; Newark & Rosendale Lime & Cement Co., New York—(1) 78½ cts.; J. K. Sullivan, Newport, R. I.—(3) 90 cts. and $1.35 a cu. yd. on carts and at site, respectively; E. K. Chamberlin, New York—(2) $1.70 a cu. yd., on carts, and $1.80 a yd. at site; (4) $2.10 a bbl. on carts and $2.20 at site; Newark & Rosendale L. & C. Co.—(1) 70 cts. a bbl. (Brooklyn Bridge brand).

DREDGING.—Oakland, Cal.—O. P. Johnson submitted the lowest bid Oct. 17, 1898, to the board of public works for 550,000 cu. yds. of dredging in Lake Merritt, at 6.93 cts. a cu. yd., if allowed to furnish his own dumping place; total, about $38,000. The other bids were as follows: San Francisco Bridge Co, 9.87 cts. a cu. yd., if allowed to furnish own dumping ground; dredging to be finished June 30; if work is to be finished within one year from date of contract, 14.39 cts. for first 275,000 cu. yds., and 7.87 cts. for rest; no bid submitted under specification of city to furnish dumping place. Quimby & Harrelson, 9.09 cts. a cu. yd. city to furnish dumping ground, and work to be completed by June 30; bidders stipulated dump should be within a ½-mile of lake, the money for work to be appropriated in tax levy and levees and bulkheads about dumping place built to their satisfaction. Pacific Coast Dredging & Reclamation Co., 9 cts. a cu. yd. if city furnish dumping place; 11 cts. if contractor furnish place; also stipulated that city should build bulkhead at 8th St. if decided to pump mud between 12th and 8th Sts. O. P. Johnson, 10.09 cts. a cu. yd. if city furnish dumping place and work to be completed by June 30; or, 10.55 cts. if not to be finished in a year from signing contract; if contractor furnished dumping place, 6.93 cts. a cu. yd. if finished by June 30, or 7.39 cts. if finished year from signing of contract.

STATE HIGHWAY.—Erving, Mass.—The following bids were received Oct. 27, by the Massachusetts State Highway Commission, Boston, for building a macadam road in Erving; A. B. Fletcher, Secy., Boston:

Bids Received at Erving, Mass., Oct. 27, 1898, for Building a Macadam Road in Erving.

ELECTRIC LIGHTING.—Salina, Kan.—A five-year contract is said to have been let for electric lighting to the People's Light, Heat & Power Co., as follows: 34 2,000-c. p. arc lights, 1 50-c. p. incandescent, 1 16-c. p. incandescent and 17 lights now used in the city hall and hose house of 16 c. p. each, at $3,100 a year, payable monthly. This lighting to be furnished upon the moonlight schedule of 2,000 hours a year. Excess hours to be paid for at the rate of $3,100 for 34 lights, and if the number of hours under the moonlight schedule does not equal 2,000 hours, the corresponding reduction to be made in price. Any additional arc light to be furnished upon the same terms and conditions at $75 a light.

ELECTRIC LIGHTING.—Attica, N. Y.—It is stated that the board of trustees has closed a contract with the Maplewood Electric Light & Power Co. to furnish 26 arc lights of 2,000 c. p. each, and 35 incandescent lights of 25 c. p. each, at $10.65. The Attica Natural Gas Co. offered to furnish the lights asked for at $2 for each lamp a year and to keep the lamps lighted every night, moon or no moon.

HIRE OF DREDGE.—Mobile, Ala.—We are informed that the National Dredging Co., Wilmington, Del., submitted the following bid Oct. 13, 1898, for the hire of a dredging plant: A day, $260; number of yards to be removed a day above station 24, 300 to 1,200; below station 24, 2,875 yds.

INDUSTRIAL NOTES.

RUSSELL & CO., Massillon, O., are contemplating building a special traction engine for hauling freight.

THE MISSOURI CAR & FOUNDRY CO., St. Louis, Mo., has an order from the Baltimore & Ohio R. R. for 2,000 freight cars, according to report.

THE JOSEPH DIXON CRUCIBLE CO., Jersey City, N. J., has added an extension to its pencil factory, 40 by 100 ft., three stories high, driven by electric power from a dynamo placed in the main factory. The company will also sink an artesian well for a supply of water for factory use, and some time next year various other additions will be built to the plant. The company was established in 1827, but no year has equaled the present for volume of business.

THE KENNEY CO., 72 and 74 Trinity Place, New York, reports that the U. S. government inspectors have decided to equip the transport "Massachusetts," now being overhauled at the John N. Robbins Co. Ship Yard, Erie Basin, Brooklyn, N. Y., with the Kenney flushometer system. In addition 69 Kenney flushometers were recently installed on the transport "Mohawk." The company also informs us that the Bourne Bldg., now being erected on Liberty St., New York, by the Singer Mfg. Co., will be equipped with the Kenney flushometer system.

THE SAN FRANCISCO BRIDGE CO., San Francisco, Cal., has excavated 1,600,000 cu. yds. of material from Mare Island Strait, under its contract, on which work was begun September, 1897. There remains 200,000 yds. to excavate, which will give a channel 28 ft. deep at mean low water and varying in width from 250 to 600 ft., from the Navy Yard to deep water in San Pablo Bay. Two hydraulic suction dredges have been employed on the work and the material has been deposited in basins on Mare Island. The greatest distance of material pumped has been 3,500 ft. The company also has a contract from Mr. R. D. Chandler to build coal bunkers on pier 15, Green St., San Francisco, at a cost of $23,688.

THE BROWN HOISTING & CONVEYING MACHINE CO., Cleveland, O., and 26 Cortlandt St., New York, has prepared plans for the New London (Conn.) coaling station for the U. S. Navy, and the contracts for the work have just been awarded by the Bureau of Yards and Docks, U. S. Navy, to J. W. Hoffman & Co., Philadelphia. The former company will furnish and erect two of its extra heavy bridge tramways, the same as those now being supplied to the U. S. Navy at Key West and Dry Tortugas, Florida. These bridges are 180-ft. span, with 92-ft. cantilever extensions and 36-ft. projections over the front of dock. J. W. Hoffman & Co. will build the necessary piers and buildings to accommodate this machinery. This is the fifth coaling station awarded so far by the Navy Department, the coal handling machinery of which is being furnished by the Brown Hoisting & Conveying Machine Co.

C. O. LUCAS & CO., Greenville, O., report that they are now making a specialty of small water-works plants. They have recently received the contract to put in the machinery for the water-works at Trotwood, O., consisting of pump, gasoline engine and tank. The pump is built so as to deliver both water and air at the same time to a tank of 5,000 gallons capacity under a pressure of about 80 lbs. The air going to the top of the tank forms a cushion and being under pressure forces the water through the mains. This forms a ready and efficient service and does not require a stand-pipe or elevated tank, and in case of fire the compressed air doing the work until the gas engine is started to keep up the supply. The cost is claimed to be less than where an elevated tank or a stand-pipe is used and at the same time such a plant is always ready for use.

THE WESTINGHOUSE AIR-BRAKE CO. authorizes the following statement in regard to the New York and Boyden companies: "The purchase by the Westinghouse Air-Brake Co. of the patents and business of the Boyden Brake Co. is the final conclusion of a long and interesting litigation relating to air-brakes. The course of these suits has been followed with interest by railway men, because to a considerable extent they involved the right of the Westinghouse people to the sole manufacture of what is known as the 'Quick Action' brake. By the purchase of the Boyden inventions, which the Supreme Court said were highly meritorious, the Westinghouse Co. still claims to control the situation, although this is contested in the U. S. Courts by the New York Air-Brake Co. The Westinghouse Co. has been successful in compelling the New York Co. to cease making three different forms of brakes, and it claims that a fourth one now being put on the market is also an infringement of its patents. This question will be finally determined by the Court of Appeals, probably in November or December, the opinion of the lower court having been favorable to the New York Co. Should the decision be favorable to Westinghouse, then the New York Co. will once more be enjoined, and prevented from making its present style of brake. In addition to this particular suit, it appears that the Westinghouse people have brought three other suits against the New York Co., and it would therefore look as if litigation between these two concerns was to be, if anything, more protracted than that between the Boyden and Westinghouse companies."

Contract Work Should Always be Advertised in a Paper Read by Contractors.

Nearly Every Prominent Contractor and Manufacturer of Contractors' Supplies in North America Reads Engineering News.

INDUSTRIAL NOTES 164

PERSONAL.

Mr. W. M. Davis, for the past 13 years Town Engineer of Woodstock, Ont., has been appointed Town Engineer of Berlin, Ont.

Mr. Edward N. Sampson has been appointed Engineer of the Consolidated Sewer, Water and Highway Departments of Andover, Mass.

Mr. R. H. Cushing has been appointed Assistant Engineer of the Intercolonial Ry., in charge of the terminal station at St. John, N. B.

Mr. W. H. Neelands, electrical engineer, of the British Columbia Electric Ry., was married at Vancouver, B. C., Nov. 3, to Miss Ellen Alcock.

Sr. Manuel Torres Toriga, City Engineer, of the City of Mexico, Mex., is visiting Chicago, for the purpose of studying municipal improvements.

Col. Saml. M. Mansfield, Corps of Engineers, U. S. Army, has been appointed by President McKinley a member of the California Debris Commission.

Mr. Ferdinand W. Peck, United States Commissioner-General to the Paris Exposition of 1900, arrived in New York, Nov. 11, on the "St. Louis."

Mr. Nathaniel Roberts, M. Am. Soc. C. E., consulting engineer, 120 Liberty St., New York, has removed his office to 63 Ocean Ave., Jersey City, N. J.

Mr. H. S. Ayres has been appointed Secretary of the Michigan Brass & Iron Works, Detroit, Mich. He has been connected with this company for a number of years.

Mr. Edwin F. Wendt has been appointed Assistant Engineer of the Pittsburg & Lake Erie R. R., in charge of Maintenance of Way and Construction, with headquarters in Pittsburg, Pa.

Mr. Nicholas Turnbull, A. M. Inst. C. E., of the firm of Richard Johnson & Nephew, Manchester, England, is making a visit to the United States to inspect American manufacturing plants.

Mr. Edmund Alsop, civil engineer, of Philadelphia, Pa., has returned to that city from Porto Rico, where he has been for the purpose of securing a general idea of the business prospects in that island.

Mr. John Medway, formerly Superintendent of Motive Power on the Fitchburg R. R., has been appointed Master Car Builder for Swift & Co., Chicago, with headquarters at the Union Stock Yards in that city.

Mr. A. G. Menocal, M. Am. Soc. C. E., Civil Engineer, retired, U. S. Navy, has been sent to Cuba by the Navy Department to make a study of the arsenals, wharves and other accessories of the navy there.

Capt. Francis R. Shunk, Corps of Engineers, U. S. Army, has been relieved from duty at the United States Military Academy, West Point, N. Y., and has been ordered to duty at Manila, Philippine Islands.

Capt. Henry Jervey, Corps of Engineers, U. S. Army, has been ordered to New Orleans, La., for duty in charge of the Fourth District, Mississippi River Improvements, relieving Maj. Jos. H. Willard, Corps of Engineers.

Mr. Theodore Buskirk, of the engineering department of the Lake Shore & Michigan Southern Ry., has been appointed Assistant Engineer of the Track Elevation Bureau of Chicago, Ill., to succeed Mr. T. P. McDonough, resigned.

Mr. H. H. Vaughan, Mechanical Engineer of the Philadelphia & Reading R. R., and previously Mechanical Engineer of the Great Northern Ry., has accepted the position of Mechanical Engineer of the Q. & C. Co., with headquarters at its Chicago office, Western Union Building.

Mr. Friedrich Tischendorfer, Chief Engineer of the Electricitats Aktiengesellschaft, formerly Schuckert & Co., electrical manufacturers, of Nuremberg, Germany, is at the Belvedere House, New York. He is visiting this country for the purpose of purchasing electrical material and machinery.

Lieut. Clarke S. Smith, Corps of Engineers, U. S. Army, has been relieved from duty at the U. S. Engineer School, Willet's Point, N. Y., and has been ordered to New Orleans, La., for duty under Major Jas. B. Quinn, Corps of Engineers. Lieut. Amos A. Fries, Corps of Engineers, U. S. A., has also been relieved from duty at the U. S. Engineer School, and has been ordered to Portland, Ore., for duty under Maj. Walter L. Fisk, M. Am. Soc. C. E., Corps of Engineers.

Mr. W. H. Pratt has been appointed Manager of the works of the Universal Construction Co., Chicago. He was formerly Receiver and Manager of the Mount Vernon Bridge Co., Mount Vernon, O., and before that was connected with the Edge Moor Bridge Works, Edge Moor, Del.

Mr. Walter J. Sherman has been appointed Engineer of the Centennial Commission, Toledo, O., and will have charge of preparing the topographical map and plans of the reclaimed land along the water front of Bayview Park, in that city, which will be the site of the coming State Centennial.

Lieut. Frederick A. Altstaetter, Corps of Engineers, U. S. Army, has been ordered to duty at the U. S. Engineer School, Willet's Point, N. Y. Lieut. Harley B. Ferguson, Corps of Engineers, stationed at present at the U. S. Military Academy, West Point, N. Y., has also been ordered to duty at the U. S. Engineer School.

Mr. Henry Vier, for the past nine years in charge of the grade crossings work of the New York Central & Hudson River R. R., with headquarters at Buffalo, N. Y., has been appointed Chief Engineer of the Map and Survey Department, with headquarters at Syracuse, N. Y. Mr. H. C. Merriman has been appointed to succeed him.

Mr. W. E. Green, Division Superintendent of the Shreveport and Texarkana Division of the Kansas City, Pittsburg & Gulf R. R., with headquarters at Texarkana, Tex., has been promoted to be General Superintendent, succeeding Mr. F. Mertsheimer, with headquarters at Kansas City, Mo., and his former office has been abolished.

Mr. C. M. Setterwall, iron manufacturer, of Sweden, is visiting Pittsburg, Pa., for the purpose of studying American methods and comparing the relative costs of the production of iron and steel in the two countries. He is accompanied by Mr. N. Lilienborg, his New York agent, and their headquarters are at present at the Monongahela Hotel, Pittsburg.

Prof. William S. Aldrich, M. Am. Soc. M. E., of the College of Engineering and Mechanic Arts of the University of West Virginia, Morgantown, W. Va., has returned to his collegiate duties after five months of service in the Naval Engineer Corps as a Passed Assistant Engineer, with the rank of Lieutenant, on board the U. S. Repair Ship "Vulcan."

Lieut. Jas. P. Jervey, Corps of Engineers, U. S. Army, has been ordered to report at the U. S. Military Academy, West Point, N. Y., not later than Jan. 4, next, for duty in the Department of Civil and Military Engineering. Lieut. Harry Burgess, Corps of Engineers, at present stationed at Galveston, Tex., has also been ordered to the U. S. Military Academy for duty.

Mr. John Cassan Wait, M. Am. Soc. C. E., consulting engineer and attorney and counselor at law, has removed his offices from the American Surety Building, No. 100 Broadway, to the St. Paul Building, 220 Broadway, New York. Mr. Wait was formerly Assistant Professor of Engineering in Harvard University, Cambridge, Mass., and is the author of "Engineering and Architectural Jurisprudence."

Capt. E. E. Winslow, Corps of Engineers, U. S. Army, has been relieved from duty at the United States Military Academy, West Point, N. Y., and has been ordered to relieve Capt. Mason M. Patrick, Corps of Engineers, of the charge of the First and Second Districts, Mississippi River Improvements, with headquarters at Memphis, Tenn. Capt. Patrick upon being relieved by Capt. Winslow will assume the duties of Secretary and Disbursing Officer of the Mississippi River Commission, with office at St. Louis, Mo.

Mr. Claude W. Kinder, M. I. C.E., M. Am. Soc. C.E., and Chief Engineer of the Imperial Chinese Railway Administration, has the following personal record, according to "The Indian and Eastern Engineer": Mr. Kinder is the son of Major T. W. Kinder, formerly Master of the Mint in Hong Kong and later of the Japanese mint. One brother, Col. D. T. Kinder, was formerly in command in Burmah, and another brother is Commander Kinder, R. N. Mr. Claude W. Kinder began his professional career in the office of Brown & Marshall, of Birmingham, after studying in France. He later became an Assistant Engineer under Herr Basson, of the Engineering & Mining Co., of Alexandrofsky, on the Neva. In 1872 he was Assistant Engineer on the Japanese State Railways, and remained in that employ until the Satsuma rebellion. He then went to China and was Resident Engineer of the Tong colliery, and later became Engineer in Chief of the Chinese Engineering & Mining Co., and held that position until 1888, when he received his present appointment. While in the employ of the coal company he built, against great opposition, the first standard railway in China—the 7 miles between Tongshaw and the coal canal. He also improvised the first locomotive used on this line, out of a stationary engine and a platform car. In 1889 Mr. Kinder visited the United States and thoroughly inspected our railway system, and he believes generally in American railway methods.

OBITUARY.

Mr. C. H. Sutherland, mechanical engineer of the Grand Trunk Ry., died recently.

Mr. Elias Giesering, sewer contractor, of Marquette, Mich., was killed by a cave-in of a sewer trench, Nov. 3.

Mr. William H. Hand, contractor and builder, of New York city, died at his home, Nyack, N. Y., Nov. 15, aged 61.

Mr. E. A. Elder, General Superintendent of the Florida East Coast Ry., died in Toledo, O., Nov. 12, of malarial fever. His home was in St. Augustine, Fla.

Mr. Leighton Lee, Superintendent of the firm of Lee & Co., engineers and contractors, of Philadelphia, Pa., who was badly injured Oct. 14 by falling from the South Side Elevated R. R. structure, in Chicago, as noted in our issue of Oct. 20, died at the Mercy Hospital, in the latter city, Nov. 15.

Mr. Edwin A. Kimball, formerly Superintendent of the Mechanical Departments of the University of Illinois and of the Illinois Industrial Home for the Blind, Chicago, and an inventor and mechanical engineer, died in that city of pleuro-pneumonia, Nov. 15, aged 64. He was born in Orange, N. H.

The Hon. Joseph M. Rickey, of Steubenville, O., for many years County Surveyor, died in Cleveland, O., Nov. 9, aged 83. He was President of the commission which established the state line between West Virginia and Pennsylvania, and had contributed a number of articles on civil engineering to technical magazines.

Lieut. Keating (son of Mr. Edward H. Keating, M. Am. Soc. C. E., General Manager of the Toronto Ry. Co., Toronto, Ont., and formerly City Engineer of Toronto), died Oct. 26, in South Africa. Lieut. Keating graduated from the Royal Military College, Kingston, Ont., in 1888, and was assigned to the 100th Regiment, then stationed at Halifax, N. S., but which about three months ago was ordered to Africa.

Mr. J. C. Chapman, machinist and the inventor of the Chapman valve and other devices, died at his home in Boston, Mass., Nov. 4, aged 76. He was born at Newmarket, N. H., and learned the machinist's trade in Boston. He was subsequently Master Mechanic of the Charlestown Navy Yard. He resigned this position to become Superintendent of the factory of the Walworth Mfg. Co., Cambridgeport, Mass., which latter position he held until a few years ago, when he retired from active work.

Mr. John E. Dustin, Water Commissioner, of Methuen, Mass., died Nov. 2, aged 62. He was born in Derry, N. H., and learned the machinist's trade in Lawrence, Mass., under the late Aretas Blood. He was employed in locomotive works in Boston for two years, and then engaged in the manufacture of woolen machinery in Lawrence. He was master mechanic for the Brown Lumber Co., Whitefield, N. H., from 1871 until 1876, when he established a machine shop in Lawrence, which he conducted until the time of his death.

Mr. De Witt C. Cregier, formerly City Engineer of Chicago, died there, Nov. 9, aged 69. He was born in New York city and was apprenticed in an engineering establishment, where he began the study of mechanical engineering. For several years, until 1853, he was employed on steamers running between New York, Havana and New Orleans, when he went to Chicago to erect the first pumping machinery for the public water supply. He was Chief Engineer of the water-works for 28 years, and in 1861 became a member of the Board of Public Works. In 1878 he was appointed City Engineer, and four years later was made the head of the Department of Public Parks. He left this position to become Superintendent of the West Division Street Ry., and in 1889 was elected Mayor of Chicago. During his administration the territory of the city was increased by over 140 sq. miles, and he was conspicuous in the early work in the Columbian Exposition plans, being largely instrumental in securing the fair for Chicago. He designed the two largest pumping engines at the North Side Water-Works, Chicago, and was identified with the construction of the first two lake tunnels. He was also the inventor of many valuable appliances used on public works, and was a Past President of the Western Society of Engineers.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

NEW YORK ELECTRICAL SOCIETY.
Nov. 17. "Surface Contact Railways," Edward H. Johnson. Secy., George H. Guy, 120 Liberty St., New York city.
ROCHESTER ENGINEERING SOCIETY.
Nov. 18. "Trussing and Car Construction," Fred. R. Hertzog. Secy., John F. Skinner.
CHICAGO ELECTRICAL ASSOCIATION.
Nov. 18. "The Development of the Motor-Cycle," F. B. Rae. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.
ENGINEERS' CLUB OF COLUMBUS.
Nov. 19. Secy., H. M. Gates, 12½ North High St., Columbus, O.
ENGINEERS' CLUB OF PHILADELPHIA.
Nov. 19. "Engine and Boiler Testing," H. W. Spangler. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.
TECHNICAL CLUB OF OMAHA.
Nov. 21. Secy., J. Harry Lawrie, Omaha, Neb.
ENGINEERS' CLUB OF MINNEAPOLIS.
Nov. 21. Secy., H. E. Smith, 1620 S. E. 14th St., Minneapolis, Minn.
ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Nov. 21. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.
CIVIL ENGINEERS' CLUB OF CLEVELAND.
Nov. 22. Secy., Wm. H. Searles, Case Library Bldg., Cleveland.
FRANKLIN INSTITUTE.
Nov. 22. "Lightning and Lightning Arresters," A. J. Wurts; Nov. 23. Discussion, "The Micro-Structure of Bronzes,, and "Specifications on Structural Steel and Rails." Secy., Wm. H. Wahl, 15 South Seventh St., Philadelphia, Pa.

TENNESSEE RIVER IMPROVEMENT ASSOCIATION.
Nov. 23. Chattanooga, Tenn.
ENGINEERING ASSOCIATION OF THE SOUTH.
Nov. 24. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.
CANADIAN SOCIETY OF CIVIL ENGINEERS.
Nov. 24. Secy., C. A. McNab, 112 Mansfield St, Montreal, Canada.
AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
Nov. 30. Secy., Ralph W. Pope, 26 Cortlandt St., New York city.
BROOKLYN ENGINEERS' CLUB.
Dec. 1. Secy., A. J. Provost, Jr., 191 Montague St., Brooklyn, N. Y.
TECHNICAL SOCIETY OF THE PACIFIC COAST.
Dec. 2. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.
BROOKLYN INSTITUTE OF ARTS AND SCIENCES.
Dec. 2. Secy., Henry I. Weed, Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.
ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Dec. 5. Secy., H. J. March, Library Bldg, Buffalo, N. Y.
CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Dec 5. Secy., C. L. Annan, City Engineer's Office, St. Paul, Minn.
AMERICAN SOCIETY OF MECHANICAL ENGINEERS.
Dec. 6-9. Annual meeting, New York city. Secy., Prof. R. F. Hutton, 12 W. 31st St., New York city.
ENGINEERS' CLUB OF ST. LOUIS.
Dec. 7. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.
AMERICAN SOCIETY OF CIVIL ENGINEERS.
Dec. 7. Secy., C. W. Hunt, 220 West 57th St., New York city.
WESTERN SOCIETY OF ENGINEERS.
Dec. 7. "Electrolytic Corrosion of Underground Structures," Prof. D. C. Jackson. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.
ST. LOUIS RAILWAY CLUB.
Dec. 9. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.
MONTANA SOCIETY OF ENGINEERS.
Dec. 10. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.
THE LOUISIANA ENGINEERING SOCIETY.
Dec. 12. Secy., J. F. Coleman, 712 Union St., New Orleans, La.
ENGINEERS' CLUB OF KANSAS CITY.
Dec. 12. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.
DENVER SOCIETY OF CIVIL ENGINEERS.
Dec. 13. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Col.
NORTHWEST RAILWAY CLUB.
Dec. 13. Secy, T. A. Foque, Soo Line, Minneapolis, Minn.
NEW ENGLAND RAILWAY CLUB.
Dec. 13. Secy., Edw. L Janes, P O Box 1158, Boston, Mass.
NEW YORK RAILROAD CLUB.
Dec. 15. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.
ENGINEERS' CLUB OF CINCINNATI.
Dec. 15. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.
SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Dec. 15. Secy., F. A. Charpiot, P. O Box 13, Savannah, Ga.
NORTHWESTERN TRACK AND BRIDGE ASSOCIATION
Dec. 16. Secy., D. W. Meeker, St. Paul, Minn.
ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA
Dec. 20. Secy., R. A. Fessenden. 410 Penn Ave., Pittsburg, Pa.
WESTERN RAILWAY CLUB.
Dec. 20. Secy., F. M. Whyte, 225 Dearborn St., Chicago, Ill.
ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Dec. 21. Secy., Frank H. Olmsted, Los Angeles, Cal.
BOSTON SOCIETY OF CIVIL ENGINEERS.
Dec. 21. Secy., S. E. Tinkham, City Hall, Boston, Mass.
WESTERN FOUNDRYMEN'S ASSOCIATION.
Dec. 21. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

NEW YORK RAILROAD CLUB.—At the regular meeting, on Nov. 7, Mr. M. N. Forney delivered "A Short Lecture to Railroad and Supply Men on Conduct and Character."

FLORIDA GOOD ROADS ASSOCIATION.—The annual convention of this association will be held at Jacksonville, Fla., on Nov. 23. The Placide Hotel has been selected as headquarters. J. W. White, Secy.

MASSACHUSETTS STREET RAILWAY ASSOCIATION.—The regular monthly meeting of this association was held on Nov. 9, at Boston, Mass. Mr. E. Moody Boynton addressed the society upon "Rapid Transit."

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.—The regular monthly meeting of this society was held at the Society House, Pittsburg, Pa., on Nov. 15. Dr. R. G. G. Moldenke read a paper on "Cast Iron."

ENGINEERS' CLUB, OF COLUMBUS.—At the meeting on Nov. 5 Mr. F. Herbert Snow, Assoc. M. Am. Soc. C. E., of the firm of Snow & Barber, Boston, Mass., delivered an address on the system of sewer assessments recently established in Boston and Brockton.

WESTERN FOUNRYMEN'S ASSOCIATION.—The regular monthly meeting of this association was held on Nov. 16, at the Great Northern Hotel, Chicago. Major Malcolm McDowell read a paper, entitled "Metalloids in Castings," after which various topics of interest to foundrymen were discussed.

ST. LOUIS RAILWAY CLUB.—At the regular meeting of this club, held on Nov. 11, Mr. Willard Beahan, M. Am. Soc. C. E., presented a paper, entitled "The Proper Organization of the Engineering Department of a Railroad." There was also a discussion of a paper by Prof. R. A. Smart presented at a former meeting.

NATIONAL MUNICIPAL LEAGUE.—Beginning Nov. 30 and continuing through Dec. 2, there will be held at Indianapolis, Ind., a conference of those interested in good city government. The intention of the organization is to make a strong effort to place municipal affairs upon a higher plane. This will be the sixth meeting so far held.

WISCONSIN STATE CHEMISTS' ASSOCIATION.—This is a new society recently organized for the purpose of advancing scientific chemical research. It is the intention to have monthly meetings. The following are the officers for the ensuing year: Pres., Dr. P. Fischer, Milwaukee; Vice-Pres., Herman Schlundt; Secy., I. Ladoff, Milwaukee; Treas., J. H. Flebing.

THE NEW JERSEY SANITARY ASSOCIATION.—The 24th annual meeting of this association will be held at the Laurel House, Lakewood, N. J., Dec. 9-10. Among the papers to be read are the following:

"The Powers, Duties and Limitations of Boards of Health," Samuel A. Patterson, Asbury Park; "Methods of Sewage Disposal," Rudolph Hering, New York city; "Public Water Supplies and the Prevention of the Pollution of the Same," James H. Fuertes, New York city.

BOSTON SOCIETY OF CIVIL ENGINEERS.—On the evening of Nov. 11 this society celebrated the 50th anniversary of its organization at the Hotel Vendome. Over 100 members were present at the reception and afterwards listened to a lecture by President Howard A. Carson on "Glimpses of Boston Fifty Years Ago." Mr. Desmond FitzGerald gave a historical review of the society, and Secretary Tinkham read a number of congratulatory telegrams from engineering societies here and abroad.

LOUISIANA ENGINEERING SOCIETY.—This society gave its first "outing" on Nov. 5 in the form of a tour of inspection of the points of especial engineering interest in the vicinity of New Orleans. This included trips to the various canals and pumping stations connected with the new drainage system which is being installed in New Orleans. Fully 200 persons, members and friends, participated in the trip. In September last the society became a member of the Association of Engineering Societies.

ENGINEERING ASSOCIATION OF THE SOUTH.—This society held its annual meeting Nov. 10 at the U. S. Engineer's Office, Nashville, Tenn. The Secretary, Mr. C. B. Wilson, submitted his report. Amendments to the constitution intended to broaden the scope of the society were discussed and other general business transacted.

The following officers were elected for the ensuing year: Pres., W. F. Foster; First Vice-Pres., W. M. Leftwitch, Jr.; Second Vice-Pres., E. E. Betts; Secy. and Treas., H. M. Jones; Directors, H. McDonald, J. S. Walker and C. B. Wilson.

RAILWAY SIGNALING CLUB.—The meeting held Nov. 8 at the Great Northern Hotel, Chicago, was an informal one, owing to the small attendance. The resignation of the Secretary, Mr. Seitz, was presented and accepted, and Mr. Tilton was appointed acting secretary for the remainder of the term.

There was a brief discussion on points connected with the use of bracket posts, showing a wide variation of opinion as to the conditions under which such posts should be used.

The next meeting will be held in New York in January. This will be the annual meeting, for the election of officers, etc.

ALABAMA SCIENTIFIC AND INDUSTRIAL SOCIETY.—This society held its semi-annual meeting, Nov. 5, at the Birmingham Commercial Club, Birmingham, Ala.

The committee appointed to consider legislative enactment looking to a more complete record of the output of the various mines and kindred institutions in the State of Alabama, reported favorably on a proposed amendment to the state mining laws, making it compulsory for every operator or lessee of underground mines, ore or coal, lime and bauxite quarries, coke works, clay works, brick works and kindred institutions, to file a monthly report of the output to the state mine inspector, and annually a consolidated report. The recommendation of the committee was adopted, and the society will be represented before the next session of the legislature.

A committee was appointed to make arrangements for the annual meeting, which will be held in January.

ENGINEERS' CLUB OF PHILADELPHIA.—At the meeting on Nov. 5, Mr. Charles Piez presented the paper of the evening upon the subject of "Coal Handling Machinery." He divided machinery for handling coal into two general classes—continuous and non-continuous; the former comprising chain and belt elevators and conveyers as ordinarily manufactured, and the latter including the various types of automatic and tub hoists, overhead bucket tramways and cable railways, each class having its own field of superior usefulness. Mr. Piez confined his remarks to a brief discussion of continuous coal-handling machinery under the two heads of elevators and conveyors, and he described the requirements which must be met in handling different kinds and sizes of coal, and some of the best mechanical devices which are now employed.

Mr. Carl Hering presented an account of recent progress in electric traction. Reference was made to the declining traffic of the various elevated roads resulting from perfected surface systems.

THE CIVIL ENGINEERS' CLUB OF CLEVELAND.—A regular meeting was held Nov. 8th, with 39 members and visitors present. Mr. Oscar Textor, member of the Cleveland Chemical Society, presented a paper, entitled "A Review of Tests of Steel Rivets." The material was basic open hearth steel, with average chemical analysis as follows: Phosphorus, 0.015; manganese, 0.46; sulphur, 0.033; silicon, 0.005; and carbon, 0.11. The rivets were tested for tensile and shearing strength, also by nicking and bending cold, and for their behavior under the hammer, both hot and cold. Tests were also made to discover crystallization under the rivet head, if any. The results were described as being very satisfactory, and the conclusion was reached that with proper manipulation and attention to temperatures, such steel rivets are fully equal to the best wrought-iron rivets and possess superior tensile strength. W. H. Searles, Secy.

THE FOUNDRYMEN'S ASSOCIATION.—The 7th annual meeting of this association was held at the Manufacturers' Club, Philadelphia, Pa.

A report was presented by the executive committee stating the condition of business to be good and improving.

Officers for the ensuing year were elected as follows: Pres., P. D. Wanner, Reading Foundry Company, Ltd., Reading, Pa.; Vice-Pres., A. C. Pessano, George V. Cresson Co., Philadelphia; Secy., Howard Evans, J. W. Paxson Co., Philadelphia; Treas., Josiah Thompson, J. Thompson & Co., Philadelphia. Executive Committee: Walter Wood, Chn., R. D. Wood & Co., Philadelphia; Thos. Glover, Glover Bros., Frankford, Philadelphia; E. E. Brown, E. E. Brown & Co., Philadelphia; Stanley G. Flagg, Jr., Stanley G. Flagg & Co., Philadelphia; Wm. F. Sauter, G. Rebmann & Co., Philadelphia.

The discussion of the topic, "Who is responsible for the cost of patterns in case of a fire in a foundry," was postponed until the next meeting.

A paper, entitled "A Modern Foundry in Europe," was read by Mr. J. A. Penton.

FRANKLIN INSTITUTE.—The schedule of meetings for November and December is as follows:

Nov. 15, "The Agricultural Possibilities of Our New Possessions," Prof. Harvey W. Wiley, Chemist to the U. S. Department of Agriculture; Nov. 16, "The Burton Electric Process of Unhairing and Tanning Skins," George D. Burton, Boston, Mass.; "The Kitson Incandescent Oil Lamp," Arthur Kitson, Philadelphia, Pa.; "A Process for Fireproofing Wood to be Used on the Woodwork of War Vessels." Dr. Chas. J. Hexamer, Philadelphia, Pa.; "The Inflammable and Explosive Properties of Smoke When Confined in a Burning Building, and its Influence Upon the Spread of Fire," Wm. McDevitt, Philadelphia, Pa.; Nov. 22, "Lightning and Lightning Arresters," A. J. Wurtz, Pittsburg, Pa.; Nov. 23, "The Micro-Structure of Bronzes" and "Specifications for Structural Steel and Rails," discussions; Dec. 6, "Reaction Velocity," Dr. R. H. Bradbury, Philadelphia, Pa.; Dec. 13, "The Kite as an Instrument in Meteorological Research," Prof. Chas. F. Marvin, U. S. Weather Bureau; "Commercial Photometers and Light Standards," Prof. A. J. Roland, Drexel Institute, Philadelphia, Pa.; Dec. 14, "Fresh Studies of Pioneer Tools," Prof. H. C. Mercer, Doylestown, Pa.

A new section to be known as the "Mechanical and Engineering Section" has recently been formed for the consideration of subjects bearing upon the mechanic arts and the engineering problems connected therewith.

At the meeting of the Mining and Metallurgical Section, held on Nov. 9, Mr. Alex. E. Outerbridge, Jr., lectured on "The Mining and Minting of Gold and Silver," giving a brief review of the coinage of the Philadelphia Mint and a description of his work in connection with the study of the spectroscopic method of analysis of gold and silver alloys.

WESTERN SOCIETY OF ENGINEERS.—A special meeting was held Nov. 9, for the reading of the remainder of the papers on track elevation. Mr. W. H. Coverdale described the work on the Pittsburg, Fort Wayne & Chicago Ry. In this case, the bridges were erected on pile bents, set far enough from the ends of the girders to allow of the masonry abutments being built under them. The floor system consists of V-shaped transverse troughs, with broken stone ballast filled in to a depth of 6 ins. above the tops of the troughs. This ballasted floor produces very little noise when trains run over the bridge.

Mr. O'Neill, Superintendent of Track Elevation, representing the city, gave an interesting review of the history of track elevation and the various ordinances that have been passed respecting this work. He also described the work at the 16th St. crossing, recently described in our columns.

Mr. H. W. Parkhurst, of the Illinois Central R. R., described the work on the St. Charles Air Line, which rises to its new grade by an incline on the lake front, and then runs west to the Chicago River, the drawbridge over which had to be raised to correspond to the track elevation. Mr. L. H. Clarke, the engineer in charge of the elevation of the Lake Shore & Michigan Southern Ry. and the Chicago, Rock Island & Pacific Ry., was not present, though he had been expected. The work, however, was described by the engineer in charge of the field work. The floor system of the bridges consists of transverse I-beams, with a deck plate to which the rails are bolted. At Englewood, however, where the yard tracks cross the subways, girders projecting above the floor have been dispensed with, and the floor consists of I-beams crossed by Z-bars, to which the deck plates are riveted.

So much time was occupied by the descriptions of the works and the exhibition of a number of stereopticon views, that it was decided to defer all discussion on the paper until the next regular meeting.

On Nov. 11 a large party of members and invited guests, including several of the University Trustees, went to Champaign, Ill., to visit the University of Illinois, and particularly the engineering schools.

NEW PUBLICATIONS.

BRITISH RAILWAY STATISTICS.—Pub. Doc., London, Eng. Five pamphs.; 8 × 13 ins.; pp. 90, 32, 41, 13 and 18.

Two of these pamphlets contain the regular returns of accidents reported to the British Board of Trade and a third gives the results of a special investigation into shunting or switching accidents which was ordered by the House of Commons on June 28, 1898. These last figures cover the period of ten years ending Dec. 31, 1897. Of the two remaining pamphlets one is a report on hours of labor of railway servants, and the other a report on the capitalization, earnings, cost of operations, etc., of British railways for the year 1897.

MANAGEMENT AND CARE OF A STEAM BOILER. Complied and published by V. G. Moulson & Co., Cleveland, O. Pamph.; 5¼ × 7½ ins.; pp. 144.

The title page says: "This work gives the opinions and experience of the best known authorities as to the proper management and care of steam boilers." The book is a compilation of articles on boilers, boiler management, fuel, construction, incrustation, corrosion, explosions, etc., together with advertisements of about 50 concerns which deal in articles needed by steam users. The advertisements are alternated with the text throughout the book. The information given in the text is of all grades of merit, good, bad and indifferent. Some of it is rather old, such as the results of Prof. Johnson's tests of fuel, made in 1844, and some of it is erroneous, such as the statements that free-burning coals rapidly lose their heat-giving power on exposure, and that the slack of anthracite is worthless on the grates of a boiler. The book is apparently gotten up to be circulated gratuitously by those who have taken advertising space in it.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

LAUNDRY MACHINERY.—American Laundry Machinery Co. Cincinnati, O. Pamph.; 11 × 7¾ ins.; pp. 72.

This is a handsomely illustrated catalogue of all the machinery used in a modern steam laundry, including washing, drying, starching and ironing machines, boilers and engines, filters, ventilating fans, etc.

CEMENT MANUFACTURING MACHINERY.—The Jeffrey Mfg. Co., Columbus, O. Pamph.; 7 × 6 ins.; pp. 8; illustrated.

The larger portion of this pamphlet is taken up with a description of the combination separator, bolter and screen for sifting cement. Many claims are made as to the especial efficiency of this machine.

FOUNDRY MACHINERY.—Whiting Foundry Equipment Co. Chicago, Ill. Pamph.; 6 × 9 ins.; pp. 52.

This catalogue illustrates a great variety of machines and appliances used in iron foundries, including cupolas, cranes, ladles, derricks, air hoists, cars, trucks, turntables, brass melting furnaces, flasks, tumbling barrels, molding machines, etc.

TRACTION ENGINES AND AGRICULTURAL MACHINERY.—Russell & Co., Massillon, O. Paper; 10½ × 7½ ins.; pp. 60.

This firm does a large business in simple and tandem-compound traction engines and portable engines for farm work, which are illustrated and described in detail. The catalogue also illustrates a variety of threshers, stackers and other agricultural machinery.

ELEVATING AND CONVEYING MACHINERY, Power Transmitting Machinery, etc.—The Aultman Co., Canton, O. Catalogue C, 1898. Pamph.; 5¼ x 7¾ ins.; pp. 135.

This pamphlet is an illustrated catalogue and price list of elevators, conveyors, pulleys, shafting, bearings, rope drives, sprocket wheels, etc. It contain many illustrations showing practical applications of hoisting and conveying machinery.

CRUSHERS, PULVERIZERS AND SHREDDERS.—The Williams Patent Crusher & Pulverizer Co., St. Louis, Mo. Paper; 4¼ × 6 ins.; pp. 36.

These machines act by a combination of abrasion and percussion. On the shaft are a series of disks, having studs or bolts on the face, from which are suspended steel bars, each of which has a free arc of movement of about one-third of a circle. After striking a blow the hammer recoils, passing such of the material as is not shattered by the blow. The series of heavy blows reduces the material to powder. The machine has six sets of hammers, 13 to a set, and at 1,000 revolutions per minute the hammers strike 78,000 blows per minute. It has been used for grinding on clay, coal, oil cake, limestone and other material, and for shredding tan bark.

RAILWAYS.

ALABAMA.—Dunn & Lalande Bros., who have the contract to grade the right of way for the new railway to be built for the Pioneer Mining & Mfg. Co., from its furnaces at Thomas, Ala., to North Birmingham, where a new mine is being opened, began work on their contract Nov. 7. Thirty teams are at work and it is expected that the 4½ miles of road will be graded and trestles built within 60 days; estimated cost, $50,000.

ALLEGHENY VALLEY.—Plans are under consideration for the general improvement and enlargement of the yards of this company at 16th and Pike Sts., Pittsburg, Pa., the work to begin early next spring. The Low Point tunnel, 700 ft. in length, on the low grade division, is now being arched; the stone foundations for the arch have just been completed. D. McCargo, Gen. Supt., Pittsburg, Pa.

ARKANSAS & CHOCTAW.—W. H. Carson, Supt., Texarkana, Ark., is quoted as stating that grading has been completed on this road to a point 12 miles from the Arkansas line. The length of the route at present is 51 miles, and extends from Ashdown to Choctaw City, Ark.; the proposed extension is towards Anoka, Ind. Ter., where a connection will be made with the Missouri, Kansas & Texas Ry.

ATLANTIC COAST LINE.—We are informed that Abercrombie & Williams, Montgomery, Ala., and not the A. & C. Wright Co., as stated in our last issue, have been awarded the contract for constructing the extension of the Charleston & Western branch from Denmark to Robbins, S. C., 34.7 miles, including all the earth and trestle work. F. Gardner, Ch. Engr., Charleston, S. C. Abercrombie & Williams also inform us that they will have the work covered by Dec. 1.

BALTIMORE & OHIO SOUTHWESTERN.—Reports state that this company has begun its proposed series of improvements by beginning the laying of 5,000 tons of 85-pound steel rails between Chillicothe, O., and Parkersburg, W. Va.

BELLAIRE, ZANESVILLE & CINCINNATI.—As a result of the oil boom in this section of Ohio, this company is said to contemplate the changing of its road to standard gage between Woodfield and Bellaire, a distance of about 35 miles. J. K. Geddes, Recr. and Gen. Mgr., Zanesville, O.

CAPE FEAR & NORTHERN.—J. M. Bandy, Ch. Engr., Greensboro, N. C., informs us that surveys have been completed for 20 miles, and the right of way secured. Gibson & Carpenter, of Holly Springs, N. C., have graded 14 miles of the line and laid three miles of track; they expected to be at Holly Springs on Nov. 12. Work is being rapidly pushed between Apex and Williams, via Holly Springs and Blanchards, 20 miles. The length of completed line will probably be 150 miles. Pres., B. N. Duke, Durham, N. C.

CHICAGO, FORT MADISON & DES MOINES.—Press reports state that this line will be sold at Keokuk, Ia., Jan. 5, under a decree of foreclosure brought by the American Loan & Trust Co., of Boston.

CHICAGO, ST. LOUIS & TEXAS AIR LINE.—Reports state that the right of way has been obtained for this proposed railway from San Antonio to Brownsville, Tex., a distance of 280 miles, and that propositions to construct the line will now be considered. Pres., D. Griffin Gunn, San Antonio, Tex.

CHOCTAW & MEMPHIS.—We are informed that bids were to be opened on Nov. 11, and awarded Nov. 12, for the construction of this company's line from Howe, Ind. Ter., to Little Rock, Ark., a distance of 164 miles. F. A. Molitor, Ch. Engr., Little Rock, Ark.

COLUMBIA & WESTERN.—Press reports state that 5,000 men are now at work on the construction of this proposed branch of the Canadian Pacific system from Robson through the Gold Range mountains to Midway, B. C., a distance of 105 miles. No track has yet been laid. This undertaking is said to be one of the heaviest and most difficult pieces of work in the Northwest. There will be 5,300 ft. of tunnels, requiring the removal of about 66,000 cu. yds. of material, and numerous bridges and trestles. Foley Bros. & Larson are the contractors.

COLUMBUS, LIMA & MILWAUKEE.—The contract for ties, track-laying, ballasting, etc., on this line from Lima to Defiance, via Gomer and Continental, O., a distance of 40 miles, is reported to have been awarded to A. Brown, Ottawa, O. The rails will be supplied by the Johnson Steel Co., Lorain, O. Part of the roadbed and the bridges for this railway were built eight years ago, and have since lain idle. Pres., J. G. W. Cowles, of the Cleveland Trust Co., Cleveland, O.

DENVER & RIO GRANDE.—Reports state that the Veta Pass route of this line will soon be made standard gage as far as Alamosa, Colo. M. H. Rogers, Ch. Engr., Denver, Colo.

DULUTH, MISSISSIPPI RIVER & NORTHERN.—Reports state that this company will soon commence surveys for the location of a new line from Hibbing, Minn., to the Canadian boundary, and that it will build into Duluth, within a year. I. N. Gray, Ch. Engr., Swan River, Minn.

FOURTH POOL CONNECTING.—This company was incorporated in Pennsylvania, Nov. 7, with a capital stock of $150,000 to construct a steam railway between Charleroi and Jefferson township, Fayette county, Pa. The incorporators are: Samuel A. Roelofs, Pres., and H. P. Richardson, both of Ellwood City, Pa.; Albert McNamee, McKees Rocks, Pa.; Jos. F. Ryan and Chas. F. Patterson, of Pittsburg.

GALVESTON, LA PORTE & HOUSTON.—L. J. Smith, 313 American Bldg., Kansas City, Mo., has bought this Texan railway, and intends to extend it in a northerly direction.

GREAT EASTERN.—J. H. McCleary, Gen. Mgr., Suffolk, Va., informs us that contracts will be let in December for the construction of this proposed line from Selma to Leechville, on the Pungo River, via Snowhill, Lizzie, Winterville, Washington, Pantego and Fairfield, N. C., a distance of 130 miles. Surveys have been completed and the right of way and capital about secured. Pres., J. W. Lynch, Kinston, N. C.; Ch. Engr., E. F. Hurt, 41 West 74th St., New York.

GULF, BEAUMONT & GREAT NORTHERN.—Jas. F. Weed, Ch. Engr., Beaumont, Tex., informs us that a preliminary survey has just been completed on this line from Beaumont to Waskom, Tex., and the location of the same made from Waskom to Jefferson. The total distance from Beaumont to Jefferson is 210 miles.

JAMESTOWN TERMINAL.—This company was incorporated in New York, Nov. 9, with a capital stock of $50,000, to construct one mile of steam railway in Jamestown, N.Y. The directors are John W. Doubleday, of Jamestown, and others.

LOUISIANA, NORTH & SOUTH.—Reports state that this company has been incorporated to construct a rail- from New Orleans, La., to Fort Smith, Ark., via Arcadia and Hot Springs, a distance of 325 miles. A. L. Atkins, Vice-Pres., Arcadia, La.

MICHIGAN.—Reports state that the Mohawk Mining Co. has ordered steel for the extension of the Traverse Bay Ry., and will complete the line before winter. A new stamp mill, costing $150,000, will be built on Lake Superior, taking water from Tobacco River.

NORTHERN MICHIGAN.—C. A. Wright, of Hancock, Mich., is interested in a new line of railway to be built from Calumet to Watersmeet, Mich., a distance of about 90 miles, connecting with the Chicago & Northwestern Ry. at the latter place. The final survey will be made soon and construction work begun in the spring.

NOVA SCOTIA.—At a recent meeting of the ratepayers of Amherst, N. S., it was decided to grant a subsidy towards the construction of a railway from Amherst to North Port, on the Northumberland Straits, a distance of about 20 miles, which will open up coal and agricultural districts.

PITTSBURG, BRADY'S BEND & LAKE ERIE.—Harwood R. Pool, Secy., 62 Cedar St., New York, informs us that all the surveys have been made and one-third of the right of way obtained for this proposed line from Brady's Bend to Butler, Pa., a distance of 20 miles. Not all of the capital necessary for construction has yet been secured. Pres., Joseph Pool, New York; Ch. Engr., J. D. Haggerty, East Brady, Pa.

ST. LOUIS, PEORIA & NORTHERN.—The Laclede Construction Co., St. Louis, Mo., is reported to have been awarded the contract for the construction and equipment of a branch of this line from Clinton to Chicago, via Peoria, Ill., requiring about 250 miles of new track, to be known as the St. Louis & North Shore Line. Pres., W. E. Guy, St. Louis, Mo.

SANDYVILLE & WAYNESVILLE.—This company has been incorporated in Ohio, with a capital stock of $50,000, to construct a railway from Waynesville to a connection with the Cleveland Terminal & Valley R. R. at Sandyville. The directors are F. H. Goff, C. H. Gale, F. H. Bushnell, John H. Smart, John E. Morley.

SHREVEPORT & RED RIVER VALLEY.—Contracts will be let on Nov. 20, according to reports, for the construction of an 11-mile extension. Work is expected to be completed to Campti, La., by Dec. 1. Clarence Ellerbe, Pres. Louisiana Construction Co., Shreveport, La.

TALLAHASSEE & SOUTHEASTERN.—The first section of this new line has been completed as far as the Wacissa River, 20 miles from Tallahassee, Fla. It is expected to build further to Old Town, on the Suwanee River, a distance of 101 miles, where it will meet the Atlantic, Gulf & Suwanee River R. R., now in course of construction from Starke southeasterly. R. L. Bennett, Vice-Pres., Tallahassee.

TEXAS MIDLAND.—The Craney Construction Co., Paris, Tex., is reported to have been awarded the contract for the construction of the proposed Waco extension of this line, work to begin about Jan. 1. M. Duvall, Ch. Engr., Terrell, Tex.

WASHINGTON RUN.—Taylor & Romine, McKeesport, Pa., inform us that surveys have been made, the right of way and capital secured for constructing this proposed line of steam railway from Layton to Star Junction, Fayette county, a distance of five miles. Bids were closed Nov. 12. Pres., W. Harry Brown, Conestoga Bldg., Pittsburg, Pa.; Ch. Engr., E. J. Taylor, McKeesport.

WATERVILLE & WISCASSET.—President Thayer has been instructed to sign a contract for the construction of this line, with the Kennebec Construction Co., to cost about $260,000.

WYOMING & GRUNDY.—This company has been organized in California with a capital stock of $500,000, to construct a standard gage railway from a point on the Norfolk & Western Ry., near the mouth of Bull Creek, in McDowell county, W. Va., to Grundy, Va., 50 miles. The directors are: R. L. Beardslee, John M. Bonner, Herman de Laguna, E. E. Forrest, and Samuel H. Cohn, all of Stockton, Cal. S. D. Freshman, Secy. of the Sierra Co., is the treasurer.

STREET AND ELECTRIC RAILWAYS.

BELFAST, ME.—Reports state that James Mitchell, a railway contractor and promoter of Bangor, Me., will build about five miles of electric railway in the spring, between Belfast and Northport.

HAMPTON, N. H.—Soule, Dillingham & Co., Boston, Mass., are said to have been awarded the contract for the construction of the Hampton & Amesbury St. Ry., from Hampton through Hampton Falls and Seabrook to the state line, connecting with the Newburyport & Amesbury Ry., by a short link to be built. The new line will be operated by the Exeter Ry. Co.

SALISBURY, VT.—W. T. Dewey, E. D. Blackwell, of Montpelier, Vt., are among the proposed incorporators of the Lake Dunmore Power & Traction Co., which contemplates the construction of a railway through Salisbury, Leicester, Brandon, Pittsfield and Proctor to Rutland.

DEDHAM, MASS.—Work was begun on the construction of the Norfolk Western St. Ry., on High St., Nov. 7. The proposed route is from Medfield to Dedham, via Westwood, nine miles. Pres., W. W. Mitchell, Medfield, Mass.; Engrs., Hodges & Harrington, 60 State St., Boston.

NEEDHAM, MASS.—The selectmen have granted a franchise to the Needham & Boston St. Ry. Co. to lay tracks and operate a line of electric street cars between Post-office Square and the Dedham town line, via Great Plain, Dedham and Harris Aves. The road must be in operation by June 1, 1899.

NEW BEDFORD, MASS.—Reports state that the New Bedford, Middleboro & Brockton St. Ry. Co. was granted a franchise, Nov. 9, to construct and operate its line on the county road between the termination of the Union St. Ry. tracks at Lunds corner and the Freetown line. Work is to be completed before next June. A. P. Smith, of New Bedford, and Fred. C. Hinds, Newton, Mass., are members of the company.

TAUNTON, MASS.—The Taunton & Middleboro St. Ry. Co. has been organized, with a proposed capital stock of $55,000, to construct a street railway from the terminus of the East Taunton St. Ry., in Taunton, through Lakeville, to the location of the New Bedford, Middleboro & Brockton St. Ry., a distance of 5½ miles. The directors are Fred. C. Hinds, Newton; A. M. Bearse, Middleboro; A. P. Smith, New Bedford, and others.

WHITMAN, MASS.—Waldo Dyer, P. O. Box 566, Whitman, informs us that nothing will be done this winter towards building the proposed railway of the Old Colony St. Ry. Co., except to complete the organization of the company. The line will be about 12 miles in length, through a fine country, covering several coach lines, and will probably be built early next year.

NEWPORT, R. I.—The Newport St. Ry. Co. has petitioned the council for permission to extend its tracks from Broadway through Marlborough St. to the Old Colony R. R. station, etc. Pres., G. B. Reynolds, Spring and Franklin Sts.

NEW HAVEN, CONN.—It is reported that the Fairhaven & Westville R. R. Co. contemplates the extension of its lines to Seymour. Pres., H. S. Parmelee, 730 Chapel St.

WILLIMANTIC, CONN.—Report state that a syndicate represented by Jesse W. Starr, of New York, has purchased the franchise for the proposed street railway in this town, and that the construction of the line at an early date is now assured.

NEW ROCHELLE, N. Y.—The Westchester Electric R. R. Co., controlled by the Union Ry. Co., 128th St. and 3d Ave., New York, has filed with the secretary of state, at Albany, a certificate of an extension of its lines in this village.

PASSAIC, N. J.—We are informed that the directors of the Saddle River Traction Co. met, at Passaic, N. J., Nov. 11, and awarded the contract for the construction of the proposed railway from Passaic to Lodi. The line will be double track and will be operated as an extension of the Paterson Ry. Engr., Colin R. Wise, Passaic National Bank Bldg., Passaic.

PITTSTON, PA.—The Pittston & Scranton St. Ry. Co. was incorporated, Nov. 7, with a capital stock of $75 000, to construct an electric street railway from Pittston to Scranton, a distance of three miles. The incorporators are: Jas. A. Steese, Pres.; Chas. H. Mullin and D. A. Dunlevy, of Mount Holly Springs, Pa.; Lane S. Hart and W. H. Metzger, of Harrisburg, Pa.

WAYNESBORO, PA.—The Blue Ridge Electric Ry. Co. has been organized by August Beck and J. Reily Weaver, of Baltimore, Md.; Peter Rouzer, Rouzersville, Pa.; and others for the construction of a line connecting Waynesboro, Pen-Mar, Blue Mountain House, Monterey and Buena Vista.

YORK, PA.—Report state that the York Southern R. R. will convert its lines, covering 37 miles, into a trolley system. Ch. Engr., S. M. Manifold, York.

LEXINGTON, VA.—Reports state that John R Williams, of Richmond, Va., and owner of Hotel De Hart, contemplates the construction of an electric street railway to the hotel, which is in the suburbs. Engr., A. L. Johnston, of Richmond.

LYNCHBURG, VA.—The Lynchburg & Rivermont St. Ry. Co. has been granted a franchise to build a line to the Durham station and City Park, via 12th St. Pres. and Mgr., H. P. Woodson, 812 Church St.

VICKSBURG, MISS.—E. C. Collins, Supt. of Construction of the North American Ry. Construction Co., Chicago, Ill., has commenced the construction of the Vicksburg Electric St. Ry. The present contract is for the construction of four miles of track, using 60-lb. rails.

CHATTANOOGA, TENN.—Surveys are now under way and plans being prepared for the extension of the narrow gage railway on Lookout Mountain to Rock City, Lookout Inn and other points of interest. L. E. Montague, Pres of Lookout Incline & Lulu Lake Ry. Co.

EAST LIVERPOOL, O.—A syndicate composed of Chicago, Philadelphia and New York capitalists is said to propose the construction of an electric freight railway between this city and Lisbon, connecting the Erie system with the Ohio River at this point. A bonus of $60,000 is asked of East Liverpool, and of $25 000 of Lisbon. J. L Francis, of Chicago, is reported interested.

LEXINGTON, IND.—Press reports state that Benjamin Johnson, the engineer who built the Madison Electric St. Ry., has been engaged by Enoch H. Fudge and other Chicago capitalists to examine into the feasibility of constructing an electric railway from Lexington, on the Baltimore & Ohio R. R., through Hanover and Madison to Vevay, a distance of 40 miles.

HOUGHTON, MICH.—The council has granted a franchise for a street railway through this village to Wm. H. Taylor, of New York, according to reports, provided that enough franchise be secured to build a belt line about the county connecting Houghton, Hancock, Quincy, Franklin, Dollar Bay, Lake Linden, South Lake, Linden Laurium, Calumet and Red Jacket; a distance of about 20 miles.

OWOSSO, MICH.—Reports state that a party of Detroit capitalists has taken the initiative toward getting a franchise in this city and Corunna for an electric railway which will combine with the interurban road now running from Detroit to Sylvan Lake.

CHICAGO, ILL.—The United Traction Co. was incorporated at Springfield, Nov. 7, with a capital stock of $500,000, by Albert E. Wilson, Anson E. Meanor and L. J. Bean, 908 Stock Exchange Bldg., Chicago.

KANSAS CITY, MO.—A franchise has been granted by the county court to the Jackson County Electric Ry. Co for the construction of a double track electric railway on Prospect Ave., from the city limits to Dodson and Swope Park, about five miles. The company is under $1,000 bond to have the road in operation within one year. The incorporators of the company and also of the Missouri Electric Ry. Co., are: F. W. Sears, B. F. Burd, W. H. Brown, Dr. Chet McDonald, Henry Smith. The Missouri Electric Ry. Co. will operate the city end of the line: it was incorporated a month ago. A power house to cost about $40,000 will be erected at Brush Creek and Prospect Ave

EL PASO, TEX.—B. F. Hammett, Leigh Clark, J. J. Taylor and others are said to have been granted a franchise for an electric railway and electric light plant in this city.

PORTLAND, ORE.—An ordinance has been passed granting a franchise to the City & Suburban Ry. Co. to construct and operate a tramway on 22d St., from Savior St. to St. Helena County Road. Pres., H. Failing, 3d and Yamhill Sts.

LOS ANGELES, CAL.—Reports state that electricity as a motive power will be installed on the Glendale branch of the Los Angeles Terminal Ry. within 90 days. The Pasadena line will probably be equipped in the same manner as soon as the franchise can be secured. T. E. Gibbon, Vice-Pres. and Gen. Mgr., Los Angeles.

OTTAWA, ONT.—The city has taken action to compel the Ottawa Electric Ry. Co. to extend its Elgin St. line to the exhibition grounds. Pres., J. W. McRae, 337 Albert St.

VICTORIA, B. C.—William Jensen and Lawrence Goodacre have given notice of application for the incorporation of the Hardy Bay Tramway Co., to construct an 8-mile electric tramway from Hardy Bay to Cold Bay, Quatsino Sound.

CAMPECHY, MEX.—Press reports state that a street railway line is to be built in this city; population, about 16,000.

CHIHUAHUA, MEX.—It is positively stated that the Chihuahua capitalists will construct an electric railway in this city of 12,000 inhabitants.

MEXICO, MEX.—An entire new roadbed is now being constructed in this city for the new system of electric traction: it is expected to lay 26 miles of 85-lb. rails as soon as possible. The power house will contain three boilers of the Babcock & Wilcox type and three McIntosh & Seymour engines; the nominal horse power of the plant is calculated at 1 200. The General Electric Co. will furnish the electrical plant, the cars being equipped with 70 HP. motors. The J. G. Brill Co., of Philadelphia, is also said to be constructing 30 cars for the line.

HAVANA, CUBA.—Press reports state that the entire street railway system of Havana, about 25 miles in length, has been sold to an English stock company for $1 600 000. The motive power will probably be changed from horses to electricity.

TOKIO, JAPAN.—It is announced that the International Air Power Co., owning the Hoadley-Knight compressed air system for foreign shipment, has just closed a contract with Fraser & Co., 63 Wall St., New York, and Yokohama, for compressed air street cars to be installed in Tokio.

VIENNA, AUSTRIA.—The Siemens & Halske Electric Co., of Chicago, is reported to have been awarded a contract to install electricity on the tramway systems of Vienna, covering about 100 miles of road.

ELECTRIC LIGHT AND POWER.

BRANDON, VT.—E. D. Blackwell, Montpelier, Vt., and Brandon, writes us that bids will probably be received about Dec. 1 for furnishing the materials and for constructing the proposed water-power plant, to cost about $75 000. The plant will have 375-ft. head, 1,200 HP. There will be a 1,000-HP. impulse wheel, 600-K-W. alternating generator, 3,000 ft. of steel penstock, transformers, to step-up to 15,000 volts and back to 2,000 volts; 65,000 lbs. of copper wire, etc.

SANDY HILL, N. Y.—The Sandy Hill Electric Light Co. is considering estimates for additional arc and incandescent dynamos, according to reports. J. E. Howland, Pres.; H. P. Galley, Supt.

SENECA FALLS, N. Y.—Press reports state that Mr. H. H. Crowell, of Syracuse, N. Y., has been appointed receiver for the Seneca Electric Light & Power Co., embracing the plants at this place and Waterloo. The action was brought about by the Old Colony Trust Co., of Boston, as trustees of the company's bonds.

CAMDEN, N. J.—The council is reported to have granted a franchise to the Citizens Light, Heat & Power Co.

PHILADELPHIA, PA.—The Southern Electric Light & Power Co. proposes to increase its capital stock from $400,000 to $2,000,000. It is stated that the company will enlarge its plant. A meeting to decide the question will be held Nov. 23. Wm. J. Manning, Secy.

PHILADELPHIA, PA.—H. Brockelhurst, Philadelphia, has the contract for building an addition to the power house of the plant of the Midvale Steel Co., at Nicetown. The addition will be 30×115 ft.

PITTSBURG, PA.—G. H. Winslow, 339 Fifth Ave., Pittsburg, is preparing plans and specifications for an electric light plant in this vicinity for a manufacturing company.

READING, PA.—Geo. Hensher and Michael McDonough are reported as considering estimates for a plant for the building of the St. Peter T. A. B. Society.

WRIGHTSVILLE, PA.—Wm. A. Chapman & Co., 49 Westminster St., Providence, R. I., have been awarded the contract for the development of power, including the building of a concrete dam and power-house on the Susquehanna River, Wrightsville, for the Martic Water & Power Co. In our issue of Nov. 3 we incorrectly reported that this contract had been let to the Walter Bradley Construction Co., Oswego, N. Y.

PENNSBORO, W. VA.—The Collins Co. writes us that the company wants to purchase a plant of about 100 16-c.p. incandescent lights for the mill, and also an engine to run the same.

CHESAPEAKE BEACH, MD.—It is stated that a site has been located for the plant and the water-works at the Beach for the Chesapeake Beach Ry. Co., Washington, D. C. Geo. Cadogan Morgan, Engr., 808 Royal Insurance Bldg., Chicago, Ill.; Otto Mears, Pres., Washington.

HAGERSTOWN, MD.—Mayor Edwin M. Schindel writes us that the matter of a plant and a sewerage system are in the hands of the committees. No definite action will be taken for some months. Charles Webb, Chn.

WILLIAMSPORT, MD.—D. G. Adelsberger, 722 Pennsylvania Ave., Baltimore, Md., is preparing plans for a plant and water-works for this city.

PENNSBORO, W. VA.—The Collins Co. is reported as wanting estimates for a plant of 100 16 c.p. incandescent lights.

DECATUR, ALA.—R. D. Smith, of a Birmingham company, is reported as making an effort to secure permission to build a plant here.

THIBODAUX, LA.—This place voted Nov. 8 to issue bonds for a plant. F. Zermott, Mayor.

SOMERVILLE, TENN.—Bids are asked until Dec. 1 for furnishing and installing a plant and water-works, to cost about $10,000. The plant will have a capacity for furnishing about 15 2,000 c.p. arc and 750 16 c.p. incandescent lights. Geo. C. Morgan, Engr., 808 Royal Insurance Bldg., Chicago; W. D. Scruggs, Chn. Com.; E. R. Scruggs, Recdr.

LIMA, O.—We are informed that this city proposes to either build a plant or let a contract for about 300 arc lights. J. K. McClurg, Chn. Com.

MILFORD, O.—It is stated that the council is considering the question of granting a franchise.

NEW RICHMOND, O.—H. Buckley, Pres. Electric and Water-Works Trustees, writes us that plans and specifications for a plant and water-works will be completed soon and that bids will probably soon be asked. J. F. Witmer, Des. Engr., 705 Ellicott Square, Buffalo, N. Y.; Chas. R. Day, Cy. Clk.

PERRYSVILLE, O.—E. H. Vanderslice writes us that it it proposed to put in a water power plant as soon as arrangements can be completed. Estimates for a plant are now being considered.

WOOSTER, O.—W. E. Lee writes us that the city has made a contract with the old company and will therefore not build a plant, as has been reported.

CARO, MICH.—We are informed that bids will be asked next spring by the Caro Light & Power Co., just incorporated, for building a water and steam power plant, to cost about $25,000. O'Keefe & Orbison, Engrs., Appleton, Wis. J. H. Harris may be addressed.

KALAMAZOO, MICH.—The Kalamazoo Electric Co. has been granted permission to extend its plant, erect towers, and make a number of other important improvements to its plant. Work is said to have already been begun.

LANSING, MICH.—The committee has recommended that $1,200 be appropriated for the purchase of a 100-HP. engine, etc., for the light plant. Commissioner Earle, Chn. Com., may be addressed.

LANSING, MICH.—Local papers state that a company is organized to build a plant to light several blocks in the business portion of the city. C. P. Downey, of Downey's Hotel, and J. J. Baird are interested.

DANVILLE, ILL.—Bids are asked until Nov. 21 for furnishing the materials and for building a municipal plant. E. R. E. Kimbrough, Mayor; E. E. Boudinot, Chn. Com.

UPPER ALTON, ILL.—The village board is reported to have decided to change the public lighting from arc to incandescent lights.

MARSHFIELD, WIS.—John H. Thomas, Cy. Clk., writes us that the committee is considering the question of building a plant. Population 6 000. Henry Kolsched, Chn.; W. H. Kamps and P. J. Kraus are on the committee.

SUN PRAIRIE, WIS.—C. B. Hayden writes us that some bids for a plant have already been received. The plant will have a 50 HP. engine, 60 to 75 HP. boiler, a 350 to 500-light dynamo, etc. The wire has already been ordered; estimated cost of plant, $4,000.

WARRENS, WIS.—The Geo. Warren Co. has let the contract for a 300 incandescent light plant to Thos. Benson & Sons, of La Crosse, Wis.

E. GRAND FORKS, MINN.—Bids are asked until Dec. 1 for furnishing the materials and for building a plant and water-works, according to reports. W. I. Gray & Co., Engrs., Sykes Bldg., Minneapolis, Minn.

WINONA, MINN.—W. L. Raymond, Pres. Council, writes us that the committee is investigating the question of a municipal plant; it will report by Jan. 1. F. E. Gartside, Pres. Com.

OMAHA, NEB.—Bids are asked until 2 p. m., Nov. 18 for furnishing and placing combination gas and electric lighting fixtures in the court house and postoffice building of this city. O. L. Spaulding, Acting Secy., Treasury Department, Washington, D. C.

CARTHAGE, MO.—The question of issuing $25,000 in bonds for a city plant will be voted upon Nov. 22. The present light contract expires in August.

ST. LOUIS, MO.—Local papers state that it is probable that the board of public improvements will send an ordinance to the municipal assembly providing for a municipal electric plant. President McMath has expert assurances that such a plant could be erected by Jan. 1, 1900, when the present contract expires. The board is forced to this alternative by the persistency of the council in filing bills for letting a lighting contract. If the council turns down the municipal ordinance then the board will have to let a temporary contract.

WYNNE, ARK.—M. Jolly, Secy., Bd. of Improvements, writes us that G. Jaeger, Batesville, Ark., was awarded the contract Nov. 10, at $15,490, for building a plant and water-works.

EL PASO, TEX.—B. F. Hammett, Leigh Clark, J. J. Taylor and others have been granted a franchise for a light plant and street railway, according to reports.

IDAHO SPRINGS, COLO.—Press reports state that Aug R. Specht, 24 Devonshire St., Boston, Mass.; H. P. Malone, of Cleveland, and A. H. Johnson, Pres. Arkansas Midland R. R. Co., Helena, Ark., are interested in a power plant project on Clear Creek, several miles from this place. It will be used for furnishing power to mining plants. Right of way has been bought. Bids will soon be asked for furnishing machinery for developing, for 5,000 HP.

DAVENPORT, WASH.—R. H. Robinson, Arlington, Wash., it is stated, will build plants at this place and at Wilbur.

SAN BERNARDINO, CAL.—The plant of the San Berrardino Electric Co. is to be extended, according to reports.

CAMPBELLTON, N. B.—Duncan & McLellan, Campbellton, have been awarded the contract for a plant for this place, at $12,950.

HALIFAX, N. S.—The city engineer is reported to have been directed to prepare plans for a municipal plant. The committee estimates that it will cost about $54,335 to build the plant and $18,925 a year to maintain and operate it.

MAGOG, QUE.—W. W. Chalmers, Mayor, writes us that the proposed issue of bonds is to pay for the additions to the plant already made.

MONTREAL, QUE.—Prof. R. B. Owens, of the Electrical Engineering Dept., McGill University, writes us that $30,000 has been donated by W. C. McDonald, of Montreal, for the re-equipment of the department. The new apparatus includes direct and alternating current machinery, batteries, measuring instruments, etc.

ORILLIA, ONT.—Bids are asked until Nov. 30 for furnishing the materials and for building a power transmission plant at a point on the Severn River. The plant will consist of the following: Alternating current generators, two of 300 k.w. capacity each; step-up and step-down transformers, 600 k.w. capacity; transmission line and construction, 18 miles; switchboard equipment, for generating and receiving stations; hydraulic machinery, including masonry construction. The plant will cost about $75,000, as stated last week. R. J. Parke, Elec. Engr., 319 Temple Bldg., Toronto, Ont.; C. J. Miller, Chn. Com.

OTTAWA, ONT.—Bids are asked until Nov. 21 for installing a power house and electric plant for operating the locks, bridges and other structures along the Soulanges Canal, and also for lighting the canal its entire length. L. K. Jones, Secy., Dept. Rys. & Canals, Ottawa.

TORONTO, ONT.—The Anglo-American Electric & Supply Co., among others, submitted a proposition to the board of control Nov. 9 offering to supply electric power to light the city streets and supply energy for manufacturing purposes at the rate of 1 ct. a horse-power per hour. Its capital will be $5,000,000, and when the dividends reach 10% it offers to light the streets at cost price. It will also establish a manufactory for electric supplies, and the profits of this will come under the same agreement. The proposed plant will cost about $1,000,000, exclusive of site and wiring. G. P. Magann, Dr. R. A. Pyne, M. P. P., and G. S. Ransom are interested.

PUEBLA, MEX.—Press reports state that C. J. S. Hall, Arch., Puebla, is interested in a water-power project.

BRIDGES.

CHARLEMONT, MASS.—Bids are asked until Nov. 17 for constructing stone abutments and wing walls for a bridge. T. C. Mendenhall, Chn. Massachusetts Highway Comn., Boston.

WOONSOCKET, R. I.—Frank H. Mills, Cy. Engr., writes us that the proposed work at the Globe bridge consists of tearing down one stone arch and constructing a longer and wider one in its place, the extension of another stone arch, the widening of the street and the building of heavy retaining walls, with the necessary excavation, filling, etc.; estimated cost, $34,600. The work will not be done this year, and perhaps not next.

BUFFALO, N. Y.—The grade crossing commission has approved the plans submitted by Engineer Guthrie for a subway at South Division St., and for a bridge at Elk St. and Abbott Road. It is proposed to let the contracts early next spring.

CANASTOTA, N. Y.—Plans have been prepared by the state engineering department, Albany, for a hoist bridge over the Erie Canal at Peterborough St. A copy of the plans are on file at the office of Village Clerk Bell.

HOOSICK FALLS, N. Y.—The town board awarded a contract Nov. 13 to the Massillon Bridge Co, of Massillon, O., at $2,728, for constructing six small bridges.

NEW HACKENSACK, N. Y.—The town board of Wappingers has awarded a contract to the Groton Bridge & Mfg. Co., Groton, N. Y., at $1,095, for constructing a steel bridge 50 × 20 ft.

SYRACUSE, N. Y.—Reports state that $4,000 has been appropriated for the removal and placing of the old swing bridge over the Oswego Canal, at the foot of Butternut St. The city clerk has been authorized to ask bids. Russell R. Stuart, Cy. Engr.

NEWARK, N. J.—Jas. F. Kelly, Township Clk., Arlington, N. J., informs us in regard to the report of Engineer Fritcher, on the dangerous condition of the bridge over the Erie R. R. at Kearney Ave. and 4th St. The structure is 140 × 20 ft., and has at present a capacity of 35 lbs. per sq. ft. No plans have yet been made. The township committee is trying to compel the Erie R. R. Co. to put this bridge in suitable condition. The matter is in the hands of the Grand Jury.

FRANKSTOWN, PA.—The Baltimore & Ohio R. R. Co will construct a bridge across 2d Ave., for the extension of a track, which is now being built, to encircle the Pennsylvania Tube Works, to cost about $15,000, according to reports.

JACKSON, MISS.—The council has authorized the issuance of $18,400 of bonds for building bridges, according to reports.

SOMERVILLE, O.—L. A. Dillon, Surv., Hamilton, informs us that he is preparing plans for the construction of a bridge over Seven Mile Creek, near this place.

CHICAGO, ILL.—Bids are asked until Dec. 28 for furnishing the material and for constructing the substructure and superstructure of an eight-track railway bridge, over the main drainage channel. Jas. Reddick, Clk. Bd. Sanitary Trustees.

ST. PAUL, MINN.—L. W. Rundlett, Cy. Engr., is preparing plans for the widening of the south approach of the Wabasha St. bridge, by constructing a fill for 250 ft. and doing away with the last two spans. A roadway, 36 ft. wide, and two 10-ft. sidewalks will be provided; estimated cost, about $100,000.

ATCHISON, KAN.—Reports state that, provided the Atchison Bridge Co. does not submit to the terms of the railway companies by Dec. 1, an offer will be made to the Missouri Valley Bridge Co., Leavenworth, Kan., of $400,000 in bonds, for the construction of the proposed railway bridge.

CATHLAMET, WASH.—Bids are asked until Jan. 1 for building a draw bridge, according to reports. Elmer B. Cotwell, Audr.

TACOMA, WASH.—The council street committee and the county commissioners considered a proposition Oct. 29 to construct a bridge about 165 ft. long over the Puyallup River, on 11th St. It is proposed to extend the street about 1,200 ft. on the east side of the river.

NAPA, CAL.—Bids are asked until 10.30 a. m., Nov. 17, for constructing a stone bridge across Fagen Creek. N. W. Collins, Clk., Bd. Supervisors.

BUILDINGS.

BARRE, VT.—Phelps Bros. have been awarded the contract for the plumbing and heating of the city building, at $3,813.

BOSTON, MASS.—J. M. Meredith, 15 Congress St.; J. Murray Howe, 28 State St., and others, are said to be behind a project to erect a 6-story building on the site of the Old Boston & Albany R. R. station on Beach St., for the wholesale shoe trade; estimated cost, $500,000. Archs., Peabody & Stevens, 919 Exchange Bldg.——Plans have been prepared by Winslow & Wetherell, 3 Hamilton Place, according to reports, for an 8-story fireproof business building, at Essex and South Sts., for the Wm. B. French heirs.——Plans have been prepared for six brick and stone flat buildings, to be erected at Dorchester for J. J. Connell and Joseph Green, to cost about $90,000. Archs., J. F. & G. H. Smith, 13 School St.——A number of store and apartment buildings will be erected at Roxbury, according to reports, for C. F. Ayer, Lowell, Mass., to cost about $86,000. Arch., Arthur H. Bowditch, 85 Devonshire St.; contractor, Angus McDonald, 17 Otis St., Boston.

BUFFALO, N. Y.—Bids are asked until Nov. 23 for remodeling engine house No. 3 on Broadway, near Jefferson St., and for building an addition thereto. R. G. Parsons, Secy. Bd. of Pub. Wks.

SOUTH HADLEY, MASS.—A sum of $50,000 has recently become available towards the erection and equipment of a new dormitory building for Mount Holyoke College. Treas., A. L. Williamson, Northampton, Mass.

DANBURY, CONN.—Bids are asked until Nov. 26, according to reports, for the construction of a court house. Arch., Warren R. Briggs, 338 Main St., Bridgeport, Conn.

FARMINGTON, CONN.—Plans are being prepared, according to reports, for a 1½-story frame dwelling, 30 × 50 ft., for A. A. Pope, Cleveland, O., and Miss A. Pope, to cost about $50,000. Archs., McKim, Meade & White, 160 5th Ave., New York.

NEW BRITAIN, CONN.—The directors of the New Britain Institute have awarded the contract for building the proposed library, to B. H. Hibbard, of New Britain, at about $50,000. Archs., Davis & Brooks.

ALBANY, N. Y.—We are informed that plans are being prepared for a public bath to be erected on Broadway, near Orange St.; estimated cost, $30,000.

BROOKLYN, N. Y.—Bids are asked by the department of public charities, foot of East 26th St., New York, until Nov. 22, for the erection of one idiot pavilion, one nurses' home, two new wings, and materials and alterations to the central top story of the Kings County Hospital; work to be completed within 180 days.

BUFFALO, N. Y.—Bids were received by the commissioner of public works, Nov. 9, for erecting school buildings on Delaware Ave., near Bryant St., and at West and Delavan Aves., at $65,590 and $77,311 respectively.

NEW YORK, N. Y.—Bids are asked by the board of education, at 585 Broadway, until Nov 21, for supplying heating and ventilating apparatus and electric lighting plant for Public School 169, and for supplying furniture for Public School 166, Borough of Manhattan; also for supplying heating and ventilating apparatus for Public School 164, and for supplying furniture for Public School 167, Borough of Bronx; also for excavating, grading, concreting, etc., at Public School 94, Borough of Brooklyn, also for improving the sanitary condition of Public Schools 4, 17 and 18, Borough of Richmond.——Plans have been prepared, according to reports, for a 9-story theatre building, 100 × 175 ft., to be erected at 124th St. and 7th Ave., for George Blumenthal, Mgr. of Harlem Opera House, to cost about $450,000. Arch., Alfred Zucker, Decker Bldg.——Plans have been filed by Thos. McKeon, 338 East 66th St., for an 8-story brick and stone store and loft building, at 16 East 17th St., to cost $90,000. Arch., Wm. J. Dilthey, 1 Union Square; by John D. Karst, Jr., 258 West 38th St., for four 5-story brick flat buildings, at 438 to 444 West 29th St., to cost $70,000. Arch., Louis Korn, 37 Maiden Lane.

SYRACUSE, N.Y.—The Northcott Warming & Ventilating Co. has been awarded a contract for a heating apparatus for the Washington Irving school building, at $1,930.

TOMPKINSVILLE (S.I.), N. Y.—Bids are asked until Dec. 23 for metal work and erection of the West Bank light station, as stated in our advertising columns. Lieut.-Col. D. P. Heap, U. S. Engr., Tompkinsville.

ATLANTIC CITY, N. J.—Besides the new hotel building just completed for Clarence M. Busch, 606 Pacific Ave., at a cost of $55,000, reports state that extensive improvements will be made to the Hotel Rudolph, Chas. R. Myers proprietor; and also to the Scarborough, of which Aldred Wyman is proprietor, and the Wiltshire Hotel, S. S. Phoebus, proprietor.

BRIDGETON, N. J.—The Cumberland county freeholders, Nov. 8, adopted plans and specifications for a new $60,000 county insane asylum to be erected on the almshouse farm.

BRADDOCK, PA.—George Hogg, of Braddock, has been awarded the contract for erecting the new 2d Ward school building, at $47,677.

CANONSBURG, PA.—A fire in this town Nov. 14 destroyed a number of business buildings near West Pike St. and Jefferson Ave., causing a reported loss of $150,000.

PHILADELPHIA, PA.—Plans are being prepared, according to reports, for a 6-story office building, to be built at 10th and Market Sts., at a cost of about $70,000. Arch., E. L. Rice, Jr., Equitable Bldg., Wilmington, Del. ——Plans have been filed for a 17-story business building, 60 × 145 ft., to be erected for the Real Estate Trust Co., at Broad and Chestnut Sts.

PITTSBURG, PA.—A permit has been granted for the erection of the new Sterrett school building, on Lang Ave., at a cost of about $100,000.

PARKESBURG, PA.—The citizens of this borough have voted to issue $20,000 in bonds towards the immediate erection of a new school building.

SAVANNAH, GA.—The following bids were received Nov. 10 for the construction of hospital wards, etc., for a general hospital for 1,000 beds in Savannah; Capt. J. W. McHaig, A. Q. M.: William Armitage, Savannah, $129,200 90 days; Miles & Bradt, Atlanta, $93,000, 50 days; W. F. May & Co., Chattanooga, $77,934.33, 60 days; Nicholas Ittner, Atlanta, $83,323, 120 days; Woodward Lumber Co., Atlanta, $103,200, 100 days; George Moore & Co., Nashville, Tenn., $105,000, 90 days; L. W. Woodward, Augusta Ga., $92,000, 90 days; Harris & Black, Savannah, $132,176.87; Stewart Contracting Co., Savannah, Ga., $94,305; W. A. Miller, Waycross, Ga., $88,528, Feb. 1; Samuel H. Walker, Washington, D. C., $113,000, 60 days; Rezin W. Darby, Washington, $99,000, 40 days; Anderson Construction Co., Savannah, Ga., $99,900, 90 days; George Girvan, Manassas, Va., $117,000. There were nine bids for the plumbing contract, the lowest of which was that of Henry D. Roette, Baltimore, Md., at $12,679.

BIRMINGHAM, ALA.—Plans have been accepted for the new hospital building to be erected at Fountain Heights for the Sisters of Charity, to cost about $250,000 when completed. At present but one wing will be built at a cost of $60,000. Archs., T. U. Walters & Co., Birmingham.

SHELBYVILLE, KY.—L. C. Millis, Mayor, informs us that plans and proposals will probably be asked early next year for the new court house now under consideration by a joint county and city committee; estimated cost, $50,000.

EATON, O.—The following bids were received, Nov. 5, for heating, plumbing, etc., in court house, Eaton, W. A. Edison, County Auditor: Sanders & Essmein, Columbus O., $5,000; Barger Bros., Columbus, $4,925; Ware & Moodle, Dayton, $4,985; F. Desarmoux & Co., Springfield (accepted), $4,875.

PORT CLINTON, O.—The commissioners of Ottawa county have awarded the contract for the building of the new court house to Caldwell & Drake, of Columbus Ind., at $45,571. Marblehead stone will be used. Other bidders were: H. Karg, Fostoria, O., $49,000; William Doersbach, Sandusky, O., $44,900; Geo. Feick, Sandusky, $50,000; Proenn Bros., Toledo, O., $53,374; M. Rabbit, Toledo, $61,000; Eb Bursh, Port Clinton, $52,000; James Dacault, Columbus, O., $47,539.60.

DETROIT, MICH.—Robt. Y. Ogg, Secy., Bd. of Pub. Wks., informs us that Spitzley Bros. were the only bidders, on re-advertisement, for erecting the new G. A. R. memorial building, at $39,685, for Woolmith cut stone, and $39,000 for Ionia stone.

CHICAGO, ILL.—A permit has been granted to John Monk for erecting a 10-story store building, 30 × 90 ft., at 161 Market St., to cost about $60,000. Arch., H. B. Wheelock, 226 La Salle St.——It is reported that Charles Netcher, of the Boston Store Dry Goods Co., contemplates the erection of an addition to the present building on Madison St.——C. R. Cave, owner of the South Chicago department store, is also said to expect to erect the second half of his building at Indiana Ave. and 48th St., at a cost of $60,000.

SAN ANTONIO, TEX.—The large department store of T. W. Stewart was destroyed by fire Nov. 10; loss, $150,000; insurance, $40,000, according to reports.

SACRAMENTO, CAL.—Plans and specifications are asked by the board of education, until Dec. 6, for a new high-school building to cost about $80,000, excluding the site and the equipment.

SALINAS, CAL.—A special election will be held Dec. 15 to vote upon the proposition of issuing $30,000 in bonds for a new high-school building.

NASSAU, NEW PROVIDENCE, WEST INDIES.—J. A. MacDonald, builder, Miami, Fla., is said to have charge of the construction of a new 4½-story brick hotel building, to be erected here for Henry M. Flagler, 26 Broadway, New York, at a cost of about $200,000. Ingle & Almirall, Consulting Archs., 874 Broadway, New York.

WATER-WORKS.

CHESTER, VT.—We are informed that the Chester Water Co. has let the contract for building works to the C. H. Eglee Co., Boston, Mass. The water will be supplied by gravity from a brook. The works will be completed by July 1, at a cost of $40,000. L. N. Farnum, Engr., 17 Central St., Boston; J. E. Pollard, Pres.

ST. JOHNSBURY, VT.—R. S. Cheney, Supt. Water-works, writes us that no improvements or extensions to works are contemplated, as reported in our issue of last week.

BAINBRIDGE, N. Y.—T. L. Randall is reported as making surveys for extending the mains of the Bainbridge Water Co.'s works for a distance of four miles, and also for a new reservoir.

BUFFALO, N. Y.—The board of public works has selected a site for the new pumping station on the park lands. The point chosen for the shaft is 200 ft. from the street and for the building 100 ft. from Jersey St. The tunnel will be 5,800 ft. long, will run out to the Emerald Channel, and will cost about $300,000. Bids will be opened next spring and the work will take about two years. The two boards will decide upon the details of the building for the pumping plant, which is designed to be an ornament to the parks.

CHURCHVILLE, N. Y.—An election will be held Nov. 23 to vote on the question of issuing $5,500 in bonds for works. The water supply will be furnished by Sage & Potter.

DUNKIRK, N. Y.—R. L. Cary, Pres. Water Bd., writes us that the water board will undoubtedly soon purchase new pumping machinery. The capacity, cost, etc., have not yet been decided upon. No action has yet been taken toward letting the contract. C. J. Carney and Wm. Bookstaver are on the committee.

NEWBURGH, N. Y.—Jos. A. Sneed, Pres. Water Comrs., writes us that the city has a water supply from Washington Lake, but it is deemed inadequate by the engineers and the commissioners, who have recommended to the council to call an election to vote on the question of an additional water supply. The vote will not be taken before December. The estimated cost of the increase supply is $274,000. There will be required about 4½ miles of 30-in. cast iron conduit. The water will be furnished by gravity, with about 400 ft. head. Everett Garrison, Engr. Bd. Water Comrs.; John D. Van Buren, Consult Engr.

ARKVILLE, N. Y.—**H. Robinson**, of Stamford, N. Y., and Abner Morse are reported as making surveys for works for this place.

UTICA, N. Y.—The West Canada Water Co. has been granted a franchise to lay water pipe through this city to furnish New Hartford, New York Mills, etc. Water will also be supplied to this city. Work will be begun at once, the contract for building the works having been awarded to the T. A. Gillespie Co., Pittsburg, Pa., and Havemeyer Bldg., New York. Geo. L. Record, Pres. West Canada Water Co. Newark, N. J.; W. S. Bacot, Engr., 1 Broadway, New York.

ALLENHURST, N. J.—Bids were received Nov. 14, for the purchase of $60,000 of 4% 30-year gold bonds for the purchase of the property of the Coast Water & Sewer Co., voted for Nov. 4. E. P. Benjamin, Mayor.; E. H. Ward, Jr., Clk.

HIGHTSTOWN, N. J.—The New York Filter Co., New York, has been awarded the contract at $2,500 for putting in a filter at the water-works, according to reports.

BENNETT, PA.—C. W. Dankmyer, Clk., writes us that this place voted Nov. 8 to issue bonds for additional machinery, to pump water from the works of Millvale Water Co.

CANONSBURG, PA.—J. P. McNary, it is stated, is interested in the proposed works for this place.

DOYLESTOWN, PA.—J. L. Kramer, Pres. Council, writes us that the council does not think it will require a great deal of work to get an increased water supply as proposed. Population, 3,500.——The following bids were received Nov. 7 for a cover to the reservoir at the cemetery: Frederick Tibibls, $2,789; King Bridge Co, $2,100, and North Penn Iron Co., $1,900.

EPHRATA, PA.—The question of either having the Ephrata Water Co. increase its supply or of building municipal works is being considered.

BRADDOCK, PA.—The council of North Braddock is considering the question of building works. Reports state as follows: The committee, on Nov. 8, submitted to the borough council a plan for works that makes a requisition for 4.08 miles of 8-in. pipe, 6.27 miles of 6-in. pipe, 1.87 miles of 4-in. pipe, 72 hydrants, 35 8-in. valves, 18 4-in. valves, 103 boxes, a stand-pipe, 60 × 50 ft., and pumping station property; the works to cost about $80,000. The cost of operation will be about 4 cts. a 1,000 gallons on a basis of 500,000 gallons daily. The yearly revenue, after supplying the fire department, is estimated at $24,000, giving consumers a rate of 15 cts. a 1,000 gallons.

PHILADELPHIA, PA.—Plans and specifications for the proposed reservoir on George's Hill, West Philadelphia, are reported as about completed. It will have a capacity for about 100,000,000 gallons. Estimated cost, $500,000. Bids will probably soon be asked by the director of public works.——Macey, Henderson & Co., Heed Bldg., have the contract for the additions to the Shawmont Pumping Station in Fairmount Park, for the city. A flue stack, 175 ft. high, built of brick and stone, will be included.

READING, PA.—This city voted, Nov. 8, against issuing $225,000 in bonds for a water filtration plant. The vote was 2,029 for and 4,579 against the proposition.

ROBESONIA, PA.—The Robesonia Water-Works Co. has been organized to build new works. Capital stock, $15,000. Adam P. Miller, C. Z. Zimmerman and Frank Bricker are on the committee to consider sources of a water supply.

WILLIAMSPORT, MD.—D. G. Adelsberger, 722 Pennsylvania Ave., Baltimore, Md., is preparing plans for works and a light plant. There will be required cast iron water pipe, a steel water tower, valves, hydrants, pumps, etc.

BALTIMORE, MD.—D. G. Adelsberger, 722 Pennsylvania Ave., is preparing plans for works for Embla and Tuxedo Parks, suburbs of this city. Pipe, valves, hydrants, deep well pumps, gasoline engines, etc., will be required.

CHESAPEAKE BEACH, MD.—Arrangements are being made for the construction of the proposed works and electric plant at the Beach for the Chesapeake Beach Ry. Co. The water supply will be secured from artesian wells. There will be a water tower, pumping station, etc. Geo. C. Morgan, Engr., 808 Royal Insurance Bldg., Chicago; Otto Mears, Pres., Washington, D. C.

HIGHPOINT, N. C.—J. Elwood Cox writes us that there is under discussion the question of building works in the spring or summer. Population (1890), about 2,180. W. G. Bradshaw, Mayor; J. J. Cox, Secy. and Treas.

CANTON, GA.—B. F. Perry, Clk. and Treas., writes us that it is proposed to ask the legislature to grant the town authority to vote on the question of issuing $10,000 in bonds for works.

MONTICELLO, ARK.—Walter G. Kirkpatrick, Jackson, Miss., is preparing plans for works for this place.

NASHVILLE, TENN.—Local papers state that bids are wanted at once by Geo. Reyer, Supt. Water-Works, for furnishing about 340 tons of 6-in. and 60 tons of 8-in. cast-iron water pipe; 13 tons of special castings, 55 hydrants, four 8-in. and 40 6-in, gate valves, and ten tons of soft pig lead.

SOMERVILLE, TENN.—Bids are asked until Dec. 1 for constructing works and an electric plant to cost $10,000. Geo. C. Morgan, Des. Engr., Royal Insurance Bldg., Chicago, Ill.; E. R. Scruggs, Recdr.

GEORGETOWN, KY.—N. H. Sinclair, Mayor, writes us that the proposition to issue $12,000 in bonds for works did not carry at the election on Nov. 8.

MOUNT STERLING, KY.—Geo. W. Baird, Mayor, writes us that this place voted, Nov. 8, against issuing $80,000 in bonds for works.

CLEVELAND, O.—Bids are asked until Nov. 25 for furnishing and installing at the Division St. pumping station of the Cleveland water-works, a portable boiler, pulsometer pump, and carriages, complete. Geo. R. Warden, Dir. Pub. Works.

MARIETTA, O.—Press reports state that the contract for furnishing a 3,000,000-gallon pumping engine will be awarded to the Snider-Hughes Co., Cleveland, O., at $15,918.

BEREA, O.—This place voted, Nov. 8, to issue $30,000 in bonds for works.

McCONNELSVILLE, O.—Geo. Birch, Clk., writes us that bids will be asked about Jan. 1 for the purchase of $20,000 of water-works bonds, voted for in September. The bonds will be sold about Feb. 1.

NEW RICHMOND, O.—Plans and specifications for works and an electric plant are about completed by J. F. Witmer, 705 Ellicott Square, Buffalo, N. Y. H. Buckley, Pres. Trustees, writes us that bids will probably be called for next week. Bids for the bonds have been opened, but they have not yet been placed. C. R. Day, Clk.

TROTWOOD, O.—C. O. Lucas & Co., Greenville, O., have been awarded the contract for installing the machinery for the proposed works for this place. J. B. Gingry, Greenville, has the contract for the trenching and setting of hydrants.

WELLSVILLE, O.—This place voted, Nov. 8, to issue $15,000 in bonds for extending the works. D. A. Davidson writes us that no steps have been taken toward securing plans and specifications.

UPPER ALTON, ILL.—The council has granted a 25-year franchise for works to the Alton Water-Works Co.

DUQUOIN, ILL.—H. A. Keith, Redfield Ave. and Stein St., Chicago, and J. H. Thompson, 170 Washington St., Chicago, are reported to have been granted a franchise for works. In February a contract for building the works was awarded to them. Population, 5,000.

SHEBOYGAN, WIS.—The City Water Co., it is stated, will put in a new pump of 8,000,000 gallons.

PERSIA, IA.—Press reports state that bids will be wanted about May 1 for building works to cost $3,000. C. B. McColm and J. Seddon may be addressed.

ALBERT LEA, MINN.—M. M. Luce, Comr., writes us that a new pump has been purchased from the Deane Steam Pump Co., Holyoke, Mass. It will be installed either by the city or by contract. The council proposes to sink a 12-in. artesian well, to be an auxiliary to the 8-in. well.

EAST GRAND FORKS, MINN.—Bids are asked until Dec. 1 for constructing works and an electric plant, according to reports. W. I. Gray & Co., Engrs., Sykes Bldg., Minneapolis, Minn.

PERHAM, MINN.—T. M. Maguire, Minneapolis, Minn., is reported to have been awarded the contract, at $7,588, for the proposed works, excepting the tank and steel tower. Alex. Nelson, Wadena, Minn, has the contract for the power station.

NEBRASKA CITY, NEB.—The Missouri Pacific Ry. Co., it is reported, will put in works for its system in this city.

SIOUX FALLS, S. DAK.—L. M. Estabrook, City Audr., writes us that the proposition to issue $130,000 in bonds for the purchase of the works of the Sioux Falls Water Co., or for building municipal works, carried at the election Nov. 8.

STANBERRY, MO.—An election was held Nov. 15 to vote on the question of issuing $3,000 in bonds for a stand-pipe, according to reports.

WYNNE, ARK.—M. Jolly, Secy. Bd. of Improvements informs us that the following bids were received Nov. 10 for constructing works and an electric plant:

G. Jaeger, Batesville, Ark. (accepted)	$15,490
Rees Brothers, Fayetteville, Ark.	15,685
C. H. Jenks, St. Louis, Mo.	15,750

GUTHRIE, OKLA.—The council and the water commissioners are considering a proposition from John H. Havighorst for an increased supply. Mayor Berkey may be addressed.

HILLYARD, WASH.—The Hillyard Town Site Co. will spend about $10,000 for improvements to the water-works, streets, etc., at this place, according to reports. F. Lewis Clark, Pres.; A. D. Jones, Agent.

KLAMATH FALLS, ORE.—The Corona Land & Water Co. has been incorporated with a capital stock of $100,000, by Sam'l C. Trazner, A. L. Leavitt and C. L. Parrish.

PASADENA, CAL.—The San Pasqual Land & Water Co. has been incorporated with a capital stock of $500,000, of which amount $5,000 has been subscribed. The purposes of the organization are to buy and sell land and water rights, maintain water-works, etc. The directors are: P. M. Green, H. H. Markham, G. D. Patten, A. R. Dodworth and Frank S. Daggett, all of Pasadena. We are informed that the company will ask for bids about Jan. 1. The plans and specifications are not yet prepared. The water will be secured from artesian wells. Estimated cost, $100,000.

THREE RIVERS, QUE.—Bids are asked until Dec. 1 for constructing a pier and a suction pipe into the River St. Maurice. L. T. Desaulniers Secy. and Treas.

STAYNER, ONT.—This place will vote, Dec. 13, on the question of issuing $26,000 in bonds for the proposed works.

THESSALON, ONT.—The question of building works, it is stated, will be voted upon.

VAN KLEEK HILL, ONT.—The town clerk writes us that the council has abandoned for the present the idea of taking steps for building works.

SANTIAGO, CUBA.—Press reports state as follows: The main question now before Gen. Leonard Wood, Governor of the Military Department of Santiago, is that of a water supply. The rainy season is about over, and, usually, after a month or so of dry weather water has to be brought from the mountains and sold in the streets. Gen. Wood is anxious to avoid a repetition of such conditions, and has engaged the services of three engineers to report as to the best methods of supplying the city with water, whether with artesian wells or otherwise.

SEWERAGE.

BOSTON, MASS.—Local papers state that the following bids were received Nov. 14 for repairs on the pumping engines at Cow Pasture sewage pumping station, Dorchester. The items are (1) new valve gear, governor pumps, governor piping, gear guards, marking gears, jacket piping, and changes in galleries; (2) low pressure inlet cam, cam-shaft bearings clutches, clutch-lever latches and quadrants, cut-off tell-tales, crank indexes, valve-stem drip cups and valve chest drains; (3) pump-valve seats, pump valves, valve plates, valve guards, interchangeability, nuts for valve seats, pump valve patterns, packing spare valves, etc., records of pump valves and pump drain valves; (4) charge for each hour of working time of each fitter under section for scraping steam valves; (5) charge for each hour of working time for each helper in same section: I. T. Morris Co., Philadelphia, (1) $17,950, (2) $3,250, (3) $29,790, (4) 50 cts., (5) 25 cts.; Lockwood Mfg. Co., East Boston, (1) $8,300, (2) $240, (3) $21,785, (4) 60 cts., (5) 40 cts.; Atlantic Works, East Boston, (1) $14,970, (2) $2,500, (3) $25,561, (4) 60 cts., (5) 40 cts.; George F. Blake Mfg. Co., New York, (1) $6,400, from which will be deducted $450, provided it is not required to furnish any pumps with bases or attendant fitting of pump proper as covered by section 4 for governor pumps; (2) $1,600, (3) $30,000, (4) 80 cts., (5) 40 cts.; Bertelsen & Petersen, East Boston, (1) $15,178, (2) $945, (3) $23,844, (4) 50 cts., (5) 35 cts.; Builders' Iron Foundry, Providence, (1) $15,950, (2) $1,780, (3) $25,500, (4) $6, (5) $3.

WORCESTER, MASS.—Local papers state that the construction of the Water St. tunnel sewer will be begun as soon as the council passes the order. The committee has voted to recommend that $100,000 be appropriated for this work.

BROOKLYN, N. Y.—Daniel J. Creem and Edward J. Gorman have been awarded the contracts for building sewers in the East New York section, one in the Eastern Parkway, and the other in Butler St., at $20,200 and $20,700, respectively. The bids for this work were opened during the last administration.

BUFFALO, N. Y.—The city engineer is said to be considering plans for sewers for South Buffalo.

LIBERTY, N. Y.—The commissioners have adopted the plans of Wise & Watson, Passaic National Bank Bldg., Passaic, N. J., and will soon submit the question of the building of the sewers to the voters of Liberty. If the result of the election is favorable, the commissioners will at once proceed to get everything in shape for the work of construction as soon as spring opens.

NEWBURG, N. Y.—Bids are asked until Dec. 19 for constructing the First St. tunnel sewer, as described in our advertising columns. D. J. Coutant, Clk. Bd. Pub. Wks.

NEW YORK, N. Y.—Bids are asked by the department of public charities, foot of East 26th St., Manhattan, until Nov. 28, for furnishing and laying a cast-iron sewer pipe on Randalls Island, and by Jas. Kane, Comr. of Sewers, 265 Broadway, Manhattan, until Nov. 30, for constructing a temporary drain in Bronx Park.

SKANEATEALES, N. Y.—F. M. Thomas, Civil Engr., writes us that the citizens seem to be in favor of constructing a system. In making up the annual budget in February the trustees will probably include an appropriation for surveys for a system, with recommendations that the work be done in the spring.

ROCHESTER, N. Y.—It is proposed to construct a 5-ft. brick sewer in Culver road, at a cost of about $35,000.

ALLENHURST, N. J.—Bids were received Nov. 14 for the purchase of $60,000 of 4% 30-year gold bonds for the purchase of the property of the Coast Water & Sewer Co., voted for Nov. 4. E. P. Benjamin, Mayor; E. H. Ward, Jr., Clk.

RED BANK, N. J.—Bids are asked until Nov. 29 for the construction of sewers and appurtenances, as stated in our advertising columns. A. C. Harrison, Clk. Comrs.; Hedenberg & Kinsey, Engrs., 108 Fulton St., New York.

ETNA, PA.—Bids are asked until 7 p. m., Nov. 18, for constructing a certain sewer. S. E. Hanna, Chn. Com.

RANKIN, PA.—Bids are asked until noon, Nov. 21, for constructing about 1,800 ft. of brick main sewer and 3,400 ft. of pipe sewers. Trimble & Miller, Engrs., 430 Fourth Ave., Pittsburg; J. S. Sheekey, Clk.

BALTIMORE, MD.—The council has voted to build a 4-ft. brick sewer in Harris Creek at a cost of $24,000.

HAGERSTOWN, MD.—E. M. Schindel Mayor, writes us that the matter of a system is in the hands of the committee. No definite action will be taken for some months. S. M. Bloom, Chn. Com.; M. L. Byers, Cy. Clk.

NATIONAL SOLDIERS' HOME, VA.—Bids are asked until Nov. 25 for furnishing materials and constructing the underground steam, water and sewer connections with two wooden barracks in course of erection on the grounds of this Home; also, for furnishing and placing one steam pump for pumping salt water to said barracks. P. T. Woodfin, Governor of Home.

NORFOLK, VA.—Jos. L. Winston writes us that $150,000 in bonds for a system in Brambleton, and for improving the streets, voted Nov. 8, will be issued at an early date. W. L. Sterling, Secy. Local Bd. of Brambleton; W. F. Brooke, Cy. Engr.

MARIETTA, GA.—The question of issuing $20,000 in bonds for a system is being considered by the council. It will require state legislation before bonds can be issued. R. E. Lamboy, Cy. Clk.

WAYCROSS, GA.—Waring, Chapman & Farquhar, 874 Broadway, New York, have presented estimates for a system to cost about $37,262.

NEW ORLEANS, LA.—Councilman Dreyfous has introduced an ordinance asking for bids until March 27 for the purchase of a 50-year franchise for a system.

JACKSON, MISS.—Efforts are being made for the immediate construction of a system. Messrs. Milsaps Virden and John Hart may be addressed.

COSHOCTON, O.—Bids are asked until Nov. 19 for constructing about 4,000 ft. of 10 and 8-in. pipe sewer, 6 manholes, etc. F. F. Wagner, Clk.

EAST LIVERPOOL, O.—Arrangements are being made for constructing sewers in district No. 2, this winter; estimated cost, $10,000.

WELLSVILLE, O.—This place voted, Nov. 8, to issue $75,000 in bonds for a system.

MARION, IND.—It is proposed to build a portion of the South Marion storm sewer this winter, at a cost of about $21,000. The total length will be about 7,679 ft.

PONTIAC, MICH.—Bids are asked until Nov. 25 for constructing 3,180 ft. of 8 and 10-in. pipe sewers, as stated in our advertising columns. Wm. J. Fisher, Cy. Engr.

CHICAGO, ILL.—Nash & Dowdle, the contractors building the sewer on the north side, have received the contract for the intercepting sewer in Sheridan road, between Pratt and Bryan Aves., at about $30,000.

GREENVILLE, ILL.—The Chas. T. Bray Construction Co., Belleville, Ill., has been granted a twenty-year franchise for sewerage construction in this city.

JANESVILLE, WIS.—The council, according to report, is arranging for a system. Alderman Sennett may be addressed.

DENISON, TEX.—Plans and estimate of the cost of a system have been ordered by the council. It is reported that work will be begun soon. City Engineer McWillie and Mayor Lebrecht may be addressed.

BAKER CITY, ORE.—D. L. Mooman has submitted a proposition for a flume 2½ miles long for use as a sewer, to cost about $4,655.

LONG BEACH, CAL.—Thos. H. James, of Santa Monica, Cal., is to design a system for this place, for which it is proposed to vote bonds.

MONTREAL, QUE.—The contract for constructing the sewage disposal works and a ten years' lease of the St Denis Ward sewage disposal farm has been awarded to Engineer Janin, at $16,000.

PUEBLA, MEXICO.—The Puebla state legislature has passed a bill authorizing the city authorities to contract for the construction of a system to cost about $2,000,000.

GARBAGE DISPOSAL—STREET CLEANING

WOODMONT, CONN.—Bids are asked by the sanitary board until Nov. 21 for the collection and removal of the refuse and garbage of the village. C. M. Smith, Clk.

CAMDEN, N. J.—The Sanitary Street Sweeping Co. has been incorporated, to manufacture, purchase and acquire street cleaning and sweeping machines; capital stock, $100,000, with $1,000 paid in. The directors are Charles D. Nicolai, Lawrence S. Nicolai, John Fitzmorris and John H. Buscher, Washington, D. C., and James E. Hays, Camden.

RICHMOND, VA.—Thos. E. Neal, Atlanta, Ga., submitted a proposition to the health committee, Nov. 11, to construct and operate a Thackeray incinerator plant for 30 days, as an experiment. The committee was favorably impressed by the offer, and in view of the fact that about $1,200 will have to be expended on the crematory at the beginning of next year, the communication was referred to the board of health.

LOUISVILLE, KY.—The joint health committee of the council met Nov. 7 and decided that the installation of an incinerator for disposing of the garbage was necessary. Since the last meeting, Health Officer Allen has corresponded with a number of the health officials throughout the country, asking information as to the methods employed in their cities of disposing of the garbage. Committees will be appointed by the respective boards to visit the various cities where garbage is burned. The council is anxious to have the question settled within the next month, so that the new tax levy may be increased for the construction of the plant.

NEWPORT, KY.—A report on the feasibility, cost, etc., of erecting a plant to burn the garbage and other refuse of this city will be presented to the council this month by W. L. Glazier, Cy. Engr. The city has received correspondence from 11 concerns in response to advertisement in Engineering News, inviting correspondence concerning the disposal of garbage in a modern sanitary way.

CLEVELAND, O.—Health Officer Hess has completed specifications for collecting refuse other than garbage and for the construction of a disposal plant. These will be submitted to the citizens' garbage commission, and a contract will be awarded later.

FORT THOMAS, KY.—The following bids were received Nov. 2 for the construction of a garbage crematory. Capt. C. D. Palmer, Asst. Q. M., Chicago, Ill.: Joseph McDermott, Newport, Ky., $1,798; L. H. Wilson, Newport, Ky., $1,500; Dixon Garbage Crematory Co., Toledo, O. (own plans), $2,100 and $500; Henry A. Schriver, Newport, Ky, $1,777.

CHICAGO, ILL.—Bids are asked until Nov. 19 for the erection of a timber trestle snow dump on the lake front basin. L. E. McGann, Comr. Pub. Wks.

STREETS AND ROADS.

BRAINTREE, MASS.—H. L. White writes us that a contract for removing curb, screening and storing 2,500 cu. yards. of trap rock for street work, is soon to be let. Address chairman of selectmen or White & Wetherbee, Engrs.

NEW HAVEN, CONN.—Bids are asked until Nov. 21 for laying concrete walks and cobble gutters on certain streets. C. W. Kelly, Cy. Engr.

CORTLAND, N. Y.—A petition will be presented to the board of village trustees for paving Groton Ave., between Main St. and Otter Creek, a distance of 2,315 ft.

HAMILTON, N. Y.—It is reported that Dewitt S. Hadcock, Stockbridge, N. Y., has had plans prepared for a state road between Hamilton and Oneida, 18 miles long and 52 ft. wide; estimated cost, $40,000.

PITTSBURG, PA.—The following bids have been received by the county commissioners for improving portions of three roads: Streets Run Road: J. H. McQuaide, $44,116; J. M. McSpadden, $41,728; Keeling & Ridge, $32,716; Booth & Flinn (accepted), $31,919; Ott Bros., $32,196. Freeport road: Booth & Flinn, $44,315; Keeling & Ridge (accepted), $40,392; C. M. Driver, $45,336; Evan Jones, $46,395; J. C. McQuaide, $45,863; Ott Bros., $40,734. Crooked Run Road: John Dell & Dinlus Bros., $39,134; Keeling & Ridge, $47,014; J. C. McQuaide, $45,706; Booth & Flinn (accepted), $38,759.

SCRANTON, PA.—Bids are asked until 7.30 p. m., Nov 17, for repairing asphalt pavement for 10 years. M. T. Lavelle, Cy. Clk.

ROCKVILLE, MD.—Bids are asked until Nov. 23, for the purchase of $25,000 of 4% turnpike bonds. W. W. Welsh, Clk County Comrs.

LYNCHBURG, VA.—Bids are asked until Nov. 21 for furnishing and hauling about 5,000 cu. yds. of broken stone, and paving about 2,150 sq. yds. of Rivermont Ave. L. P. Rodes, Cy. Engr.

JACKSONVILLE, FLA.—Philip Prioleau, Cy. Engr., is preparing plans and estimates for about 20,350 sq. yds. of brick paving on Main St. He informs us that they will be submitted to the board of public works for approval, about Nov. 17.

OWINGSVILLE, KY.—It was voted Nov. 8 to issue $38,000 in bonds for county road improvements, according to reports.

DANVILLE, KY.—The county voted Nov. 8 to issue $40,000 of turnpike bonds, according to reports.

RICHMOND, KY.—Reports state that it was voted Nov. 8, to issue $70,000 of turnpike bonds.

MAYSVILLE, KY.—It is reported that an issue of $60,000 of bonds for county road work was authorized Nov. 8.

BOWLING GREEN, KY.—At the election, Nov. 8, the county commissioners voted to issue $140,000 of 4% turnpike bonds.

CARLISLE, KY.—The county voted, Nov. 8, to issue $40,000 of turnpike bonds.

VERSAILLES, KY.—An issue of $40,000 of turnpike bonds was authorized at the election, Nov. 8.

BRIDGEPORT, O.—This place voted, Nov. 8, to issue $75,000 for street improvements. J. A. Fawcett, Clk.

CLEVELAND, O.—An ordinance has been passed to improve portions of High and Melrose Aves. by grading, curbing, draining and brick paving. H. H. Burgess, Cy. Clk.——W. H. Searles and J. B. Davis, Engrs., have submitted a report to the county commissioners, on the proposed improvement of the Brecksville Road.

ATLANTA, GA.—Bids are asked until Nov. 21 for paving the roadway of the Mitchell St. viaduct, with asphalt, brick or wooden blocks and the sidewalks with hexagonal tiling, sheet cement or asphalt. R. M. Clayton, Cy. Engr.

DAYTON, O.—Bids are asked until Dec. 12 for furnishing the material and for paving about 7,631 sq. yds. with Buckeye block, etc., 5,630 lin. ft. of curbing and 165 ft. of circular curbing, on Sycamore, Council and Charter Sts. J. L. Baker, Pres. Bd. Cy. Affairs.

HYDE PARK, O.—Bids are asked until Nov. 23 for the purchase of $9,721 of 4½% street improvement bonds. Frank Lewis, Village Clk.

MIDDLETOWN, O.—Bids are asked until Nov. 18 for furnishing and constructing limestone curb and gutter on Main and 9th Sts. J. V. Bonnell, Cy. Clk.

TOLEDO, O.—A resolution has been passed to pave Woodruff Ave., from Ashland Ave. to Madison St., with asphalt, brick or granite. L. P. Harris, Cy. Clk.

WELLSTON, O.—Bids are asked until Nov. 28 for the purchase of $7,491 of 5% street improvement bonds. F. P. Wangler, Cy. Clk.

DECATUR, IND.—We are informed that the question of macadamizing two roads, about 17 miles, affecting the city of Decatur and Washington township, was favorably voted upon Nov. 8 by the county commissioners. The contract will soon be awarded. W. E. Fulk & Co., Engrs., Decatur.

WAUKEGAN, ILL.—City Engineer Bowen has been directed by the board of local improvements to prepare plans and estimates for the improvement of portions of 11 streets.

COUNCIL BLUFFS, IA.—Bids are asked until noon, Nov. 19, for about 27,525 sq. yds. of brick paving, and 3,737 lin. ft. of curbing, on portions of certain streets. N. C. Phillips, Cy. Clk.

FORT MADISON, IA.—J. Ross Robertson, Cy. Engr., informs us that a contract was let Nov. 10 to John Bullard, at $925, for 2,500 sq. yds. of macadam, on the Burlington Road.

ST. PAUL, MINN.—We are informed that the matter of paving 10th St., mentioned in our last issue, has been laid over until next spring, on account of the lateness of the season. L. W. Rundlett, Cy. Engr.

KANSAS CITY, MO.—Bids are asked until Nov. 24 for furnishing the material and for constructing sidewalks of hexagon block, pressed brick, stone and plank; also for furnishing the material and grading on certain streets. Henry A. Wise, Cy. Engr.

SIOUX FALLS, S. DAK.—L. M. Estabrook, Cy. Audr., informs us that sidewalks are built by special assessment. An ordinance providing for the construction of cement walks for certain districts is now being considered. No contracts will be let at present as it is too late in the season.

SEATTLE, WASH.—F. N. Little, Supt. Sts. and Parks, writes us that the council is trying to get the citizens and tax-payers interested sufficiently to appoint a committee to secure the right of way for a boulevard system of several miles, along the water front of the bay, Lakes Union and Washington.

SAN FRANCISCO, CAL.—The City Street Improvement Co. has submitted the lowest bid, at $51,000, for paving Market St. with bitumen, between Taylor St. and Van Ness Ave.

HAMILTON, ONT.—A by-law will be submitted to a vote at the next municipal election, to raise $200,000 for road improvements.

MANUFACTURING PLANTS.

BROCKTON, MASS.—Plans are completed for the enlargement of the Cobb shoe factory to be ready next June. S. L. E. Taylor Co., Brockton.

LYNN, MASS.—A fire here Nov. 7 damaged the forge shop of the American Ordnance Co., which is in a portion of the General Electric Co.'s plant; loss, about $10,000.

NEWBURYPORT, MASS.—It is reported that the Fiberloid Co. will erect an addition to its main factory and enlarge the boiler house, and install two new boilers.

SOUTHINGTON, CONN.—R. W. Cowles, Plantsville, Conn., has been awarded the contract for erecting a brick addition, 30 × 60 ft., to the factory of the Peck, Stow & Wilcox Co.

ELMIRA, N. Y.—John N. Stearns & Co., silk manufacturers, of 220 East 43d St., New York, are said to contemplate the erection in this city of a factory building, to cost $25,000, and employ about 800 hands.

SCHUYLERVILLE, N. Y.—The Liberty Wall Paper Co. has let the contract for the foundations and cellar walls of its new mill, 400 × 100 ft. Surveys are being made for a branch from the Fitchburg R. R. to the company's mill.

WHITESTONE (L. I.), N. Y.—The contract for the erection of a 2-story fireproof instrument repair shop, 100 × 26 ft., for the government at Willets Point, has been awarded; cost, $10,000.

GARWOOD, N. J.—The New Era Metal Co., according to reports, will build an addition to its plant.

BRADDOCK, PA.—It is reported that the Home Brewing Co., of this place, will build a brewery, having a capacity of 100,000 bbls. a year. P. J. Brennan, of Braddock, is interested.

FRANKLIN, PA.—The plant of the Franklin Mfg. Co., makers of asbestos materials, was destroyed by fire Nov. 7; loss, $40,000; insurance, $8,000.

PHILADELPHIA, PA.—Plans have been completed, according to reports for a 2-story brick and iron acid house, 50 × 200 ft., at Weccacoe Ave. and Delaware River, for the Pennsylvania Salt Works Co.

WILLIAMSPORT, PA.—The Lycoming Rubber Co. contemplates erecting a new building and installing new machinery in its plant; three large 72-in. tubular boilers have been ordered.

FORT PAYNE, ALA.—It is reported that E. N. Cullom, of Birmingham, purchaser of the Alabama Steel Works, will put the plant in operation soon, and that J. M. Caldwell, of Birmingham, will go East to purchase machinery for an additional rolling mill.

CLARKSVILLE, TENN.—Reports state that plans for a snuff factory, to cost $30,000, have been completed, and that contracts for erection will be awarded at once. B. F. McKeaye, Jr., is said to be interested.

BARBERTON, O.—Reports state that the Stirling Boiler Co., of Chicago, Ill., will enlarge its works at this place.

COLUMBUS, O.—A fire in this city Nov. 7, destroyed the warehouse and forge rooms, 250 × 45 ft., of the Columbus Skein & Iron Works; E. Stoneman, one of the owners, estimates the loss at $30,000; insurance, $7,000. It will probably be rebuilt at once.

STEUBENVILLE, O.—It is reported that the Riverside Iron & Steel Co. will erect a 500-ton Bessemer plant on its present site.

QUINCY, MICH.—The Michigan Portland Cement Co., according to reports, will erect a large plant at Quincy.

AVERY, ILL.—Kingman & Co., of Peoria, will remove the plant of the Wier Plow Co., at Monmouth, to this place. It is probable that buildings will be erected at once, according to reports.

JOLIET, ILL.—A fire in this city Nov. 10, destroyed the Great Western Tin Plate mills; loss, $150,000; insurance, $47,000.

JOLIET, ILL.—A fire in this city Nov. 10 destroyed the tin plate mills of the Great Western Co.; reported loss, $250,000; insurance, $47,500.

PEORIA, ILL.—The Illinois Sugar Refining Co., recently incorporated, is looking for a site in this city, for its beet sugar plant.——The Cordage Co. is preparing plans for a new 3-story brick building, 88 × 165 ft., probably not to be erected until spring.

MILWAUKEE, WIS.—The Abel & Bach Co., of this city, trunk and bag manufacturers, expects to erect a 7-story steel-frame building, 120 × 200 ft., protected by automatic sprinkler system, with a reserve water supply of 32,000 galls. in a tower, to cost $96,000, to be completed next August. Also a 2-story addition, 50 × 200 ft., to its present factory, and a new barn, 30 × 50 ft.

MINNEAPOLIS, MINN.—The plant of the Hennepin County Co-operative Barrel Co., 14th Ave. South and 5th St., was destroyed by fire Nov. 3; loss, $40,000; insurance, $20,400.

ATCHISON, KAN.—It is reported that F. J. and T. C. Thomas will erect a $25,000 artificial ice plant, capacity 20 tons daily, on the line of the Atchison, Topeka & Santa Fe Ry.

KANSAS CITY, MO.—Mr. John Kelley, of Leavenworth, Kan., according to reports, will build a barrel mill of 2,000-bbls. capacity a day, costing $40,000, and an elevator with storage capacity of 300,000 bushels, in this city.

ST. CHARLES, MO.—The plant of the Central Milling & Commission Co. was destroyed by fire Nov. 6; loss, $25,000; insurance, $11,000. J. H. Mertin, Pres., says that no definite plans for the future have been made.

ST. LOUIS, MO.—The Hamilton-Brown Shoe Co., according to reports, contemplates the erection of an additional factory to cost about $250,000.

BRANTFORD, ONT.—It is said that the Waterous Engine Works Co. contemplates the erection of an addition to its works.

TORONTO, ONT.—The T. Eaton Co. has been granted a permit for the erection of a 5-story factory building, to cost $21,000.

NANTES, FRANCE.—Reports state that capitalists here are contemplating the establishment of a large ice manufacturing plant. Edward Kerr, 3 Rue Gresset, Nantes, may be addressed.

DAGESTAN, RUSSIA.—It is reported that a cotton spinning, weaving and dye works is to be erected in Dagestan, near Petrofisk, by the Caspian Mfg. Co., with offices in St. Petersburg.

TIENTSIN, CHINA.—Press reports state that the M. A. Forbush & Son Machine Co., Philadelphia, Pa., has been awarded the contract for the construction of a woolen mill at Tientsin, the machinery to be operated by electric motors, supplied by the Westinghouse Co., of Pittsburg, Pa.; contract price, about $50,000.

MISCELLANEOUS CONTRACTS.

BOILERS.—Boston, Mass.—Bids are asked until Nov. 22 for furnishing five boilers at the navy yard. Edwin Stewart, Paymaster-Gen., Washington, D. C.

DREDGING.—Oakland, Cal.—The board of public works has awarded a contract to O. P. Johnson, at $55,500, for dredging Lake Merritt. The itemized bids were given in our last issue.

REPAIRING TRANSPORT.—Washington, D. C.—Reports state that the Bath Iron Works, Bath, Me., has submitted the lowest bid, at $94,500, for repairing and making alterations to the transport "Manitoba."

CHEMICAL ENGINE.—Jersey City, N. J.—Bids are asked until Nov. 22 for furnishing one horizontal Babcock chemical engine fitted with a rotary deluge nozzle. Chas. Esterbrook, Clk. Bd. Fire Comrs., 244 Bay St.

PARK WORK.—Toledo, O.—The Ohio centennial commission has engaged W. J. Sherman, The Nasby, for the surveying and levelling of Bayview Park for the centennial exposition of 1902 or 1903. The work of improving the park will commence at once, according to reports.

COAL STORAGE BUILDING.—Philadelphia, Pa.—A contract has been awarded by the United Gas Improvement to the Structural Iron Co., Baltimore, Md., at $20,000, for the erection of a steel building for the storage of coal.

TELEPHONE SYSTEM.—Summit, N. J.—A franchise has been granted to the New York & New Jersey Telephone Co. to lay and maintain a conduit system for telephone and telegraph purposes. Robt. J. Muldowney, Township Clk.

COALING STATION.—New London, Conn.—J. W. Hoffman & Co., Philadelphia, Pa., has been awarded a contract at $137,500, for the construction of coal storage buildings, wharves, conveyors, etc., at the navy yard. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

LEVEE WORK.—New Orleans, La.—Bids are asked by the board of state engineers until Nov. 22 for constructing the Shady Grove levee in Bossier parish, and the Bayou Pierre enlargement, each including about 50,000 cu. yds. of earthwork.

STEEL PIER.—Atlantic City, N. J.—An iron or steel pier, 130 ft. wide and 1,200 ft. long, will be constructed at States Ave.; estimated cost, about $150,000. Bids were asked Nov. 10 by G. A. Dentzel, Philadelphia, Pa., for the wooden superstructure. James A. Cathcart, Atlantic City, is also interested.

TILE.—Philo, Ill.—Bids are asked by the Embarrass River drainage district until Nov. 29 for furnishing and laying 2,700 ft. of 16-in. tile, 1,400 ft. of 15-in. tile, 1,400 ft. of 14-in. tile, 1,300 ft. of 12-in. tile, 870 ft. of 8-in. tile and 1,200 ft. of 6-in. tile. Address J. L. Ray, Champaign, Ill.

PARK WORK.—Philadelphia, Pa.—Bids are asked until Jan. 14 for furnishing plans and for the development of League Island Park, comprising about 300 acres. Prizes of $750 and $250 will be awarded for the two best designs. A. S. Eisenhower, Ch. Bureau Cy. Property, 130 City Hall, Philadelphia.

PARK GRADING.—Newark, N. J.—Bids are asked until Nov. 23 for about 200,000 cu. yds. of earth excavation and 100 cu. yds. of rock excavation, in the middle division of Branch Brook Park, surety $20,000, as described in our advertising columns. A. Church, Secy. Essex County Park Comn., 800 Broad St., Newark.

BOILERS, MACHINERY, ETC.—Detroit, Mich.—Bids are asked until Nov. 21 for furnishing the boilers and machinery for four steam fog signals, and until Nov. 28 for furnishing the boilers, machinery, etc., for four complete steam fog signals, as described in our advertising columns. Lieut.-Col. M. B. Adams, U. S. Engr., Detroit.

CONDUIT.—Dorchester, Mass.—The following bids have been received for constructing a brick conduit 10 ft. in diameter, in Callender St., between Don and Lyons Sts., including 4,000 cu. yds. of rock excavation. Benj. W. Wells, Supt. Sts., Boston: J. P. O'Connell, $20,159; C. E. Trumbull & Co., $21,442; D. F. O'Connell, $20,134; M. Russe & Co., $25,311; Jones & Meehan, $25,613; T. H. & G. M. Bryne, Hyde Park, Mass., $21,299; R. J. Malone (accepted), $16,395; John C. Coleman & Son, $20,851; George W. Judd, $24,639; H. P. Nawn, $20,039; H. A. Hanscom & Co., $35,170.

CONTRACT PRICES.

RIVER WORK.—Sacramento, Cal.—Geo. M. Randle, Asst. Engr. Pub. Wks., informs us that the following bids were received Nov. 2 for cutoffs in the San Joaquin River and Stockton Channel:

Bidder.	Levee work, cut-off No. 3, 45,000 cu. yds. cts.	Dredging, cut-offs, No. 3, 55,000 cu. yds. cts.	Dredging, cut-offs, No. 4, 40,000 cu. yds. cts.

*Setting. The 8-in. pipe includes discharge and distribution pipes.

DREDGING.—Port Royal, S. C.—The following bids were received by the bureau of yards and docks, Washington, D. C., Nov. 12, 1898, for dredging at the Port Royal Naval Station: Geo. E. Field, Port Royal, S. C., item (1), $1.80 a cu. yd.; (2) $1.60; P. Sanford Ross, 277 Washington St., Jersey City, N. J., (1), $1,45; (2), $1.10; The Alabama Dredging & Jetty Co., R. Moore, Agent, Mobile, Ala., (1), $1.80; (2), $1.50. Item (1) being price a cu. yd. for material dredged and deposited on station, leveled and graded, and (2) being for material dredged and not deposited on station. The contract was let to P. S. Ross for item No. 2. The appropriation for this work is $100,000. M. T. Endicott, Ch. of Bureau, Washington.

WATER PIPE.—Vallejo, Cal.—The trustees received the following bids Oct. 24, 1898, for furnishing 1,000 ft. of 8 or 10-in., 1,000 ft. of 1-in., and 1,000 ft. of ¾-in. cast or wrought-iron water pipe: John Hellermann, 1-in. pipe, 7⅜ cts. a ft.; ¾-in., 5½ cts.; Miller, Sloss & Scott, 1-in., 6 cts.; ¾-in., 4½ cts.; 3-in., 93 cts.; Crane Co., 10-in., 60 cts.; 8-in., 45 cts.; 1-in., 5 3/10 cts.;; ¾-in., 3¾ cts.; Christin Froelich, 8-in., 77 cts.; 1-in., 6½ cts.; ¾-in., 4 6/10 cts.

STREET IMPROVEMENT.—Los Angeles, Cal.—The following bids were received Oct. 25, 1898, for improving certain streets: De Long St., between Pico and 16th Sts.—A. B. Hogan, grading, 19 cts.; curb, 17½ cts. C. W. Shafer, grading, 24 cts.; curb, 15 cts. M. S. Cummings, grading, 27 cts.; curb, 17½ cts. A. G. Strain, grading, 22 cts.; curb, 14 cts. Tryon & Coverly, grading, 26 cts.; curb, 16 cts. 22d St., from Toberman to Union Ave.—Tryon & Coverly, grading, 30 cts.; curb, 29 cts.; sidewalk, 9 cts. E. W. Durrell, grading, 20 cts.; curb, 28 cts.; sidewalk, 8 cts. P. J. Richmon, grading, 23 cts.; curb, 27 cts.; sidewalk, 8 cts. C. W. Shafer, grading, 23 cts.; curb, 27 cts.; sidewalk, 8 cts. A. G. Strain, grading, 24 cts.; curb, 27 cts.; sidewalk, 8 cts.

PAVING, SEWERS, ETC.—Tampa, Fla.—The board of public works awarded the contract, Oct. 25, 1898, for vitrified brick paving to the Coaldale Paving Co., at $1.36 a sq. yd., according to reports.

ASPHALT PAVING.—Scranton, Pa.—We are informed that the Barber Asphalt Paving Co., New York, submitted the only bid, Nov. 3, for 400 sq. yds. of paving in Forest Court, as follows: Grading and paving, $2 a sq. yd.; for furnishing and setting 6 × 12-in. curb, 53 cts. a lin. ft.; for furnishing and setting circular curb, 98 cts. a lin. ft. Curb to be set in concrete. Joseph T. Phillips, Cy. Engr.

PAVING AND SIDEWALKS.—Kansas City, Mo.—The following contracts were let Oct. 25, 1898, for paving and sidewalks: A. R. Mense—Paving alley between Grand, McGee, 11th and 12th, brick, $1.59. Tim Brosnahan—Grading alley between Mercier, Holly, 23d and 24th, 21 cts. Wm. Trehey—Grading alley between Grove, Flora, Howard and 25th, 16 cts. W. H. White—Grading alley between Forest, Tracy, 13th and 14th, 27 cts. Mason Rowland—Curbing Harrison, 19th to 23d, 39.25 cts. Sidewalks—M Schoonmaker—East side, Brooklyn, 18th to alley south, brick, 8.9 cts.; Wyandotte, 17th to Southwest Boulevard, brick, 8 cts.; west side Broadway, Ninth to Hopkins residence, granitoid, 19 cts.; east side Brooklyn, Belt railway bridge to 20th, granitoid, 17 cts. J. J. Armstrong—West side Woodland, 12th to 13th, brick, 8.3 cts.; west side Harrison, 18th to 19th, brick, 8 cts. White & Redmon—East side Penn, 21st to Southwest Boulevard, brick, 8.4 cts. Missouri Sidewalk Co.—South side 30th, Michigan to Euclid, brick, 8.99 cts. Bandera Flagstone Co.—South side 10th, Virginia to alley, west of Tracy, natural stone, 18 cts.

BROKEN STONE.—Baltimore, Md.—The following bids were received Oct. 19, 1898, by the county commissioners for furnishing and delivering broken stone f. o. b. at stations on the line of the Baltimore & Lehigh R. R. in the 11th district: B. F. Pope, 5,000 perches at points no further than Hyde's, 98 cts. a perch; I. H. Peddicord & Son, 4,000 to 6,000 perches—three sizes, Nos. 1, 2, and 3—95 cts. a perch; R. W. Pearce, 60 cts. a perch, delivered on cars, county or buyer to pay freight; Geo. F. Narden, two sizes and top dressing, $1.13 a perch; M. W. Offutt, 5,000 perches, three sizes, Nos. 1, 2, and 3, run of crusher, $1 a perch.

LEVEE WORK.—Sacramento, Cal.—E. E. Leake, Comr. Pub. Wks, and T. B. Hall, a member of the Auditing Board to the Commissioner, have awarded to F. Lowery, of Sacramento, the contract for strengthening a section of the river bank near the old Chicory ranch, as follows: 600 sandbags, 20 cts. each; 550 stakes, 20 cts. each; 200 lbs. of wire, 5 cts. a lb.; 500 cu. yds. of brush, $2 a yd.; 1,700 cu. yds. of mattress foundation, 10 cts. a yr.; 2,200 yds. of repairs to levee, 15 cts. a cu. yd.; total $1,740.

CEMENT.—Seattle, Wash.—Capt. Harry Taylor, U. S. Engr., Burke Bldg., Seattle, Wash., received the following bids Oct. 13, 1898, for furnishing cement: Balfour, Guthrie & Co., Seattle, Wash., 5,500 bbls. (Condor brand), $3.10 a bbl., if taken on arrival, duty unpaid; 7,500 bbls. (Condor) at $3.50 if delivered in 2,500 to 5,000 bbl. lots, duty paid; 13,000 bbls. (Condor), $2.85 if taken on arrival, duty unpaid. The latter bid was recommended for acceptance. Taylor, Young & Co., Portland, Ore., 5,000 bbls. (Josson brand), $2.90 a bbl. if taken in 2,500-bbl. lots, duty unpaid; 5,000 bbls. (Josson) $3.22 if taken in 2,500 lots, duty paid.

RECONSTRUCTING BOTTOM OF SEWER.—St. Louis, Mo.—The following bids were received Nov. 10, 1898, for reconstructing the bottom of the Mill Creek sewer, in all about 926 ft.; the work will include the entire cost of timber and earth excavation, the construction, maintenance and removal of all flumes and dams, and the furnishing and depositing in place of all concrete necessary to form the invert, the plastering of the invert, and every other expense which may be necessary in doing the work. B. H. Colby, Sewer Comr.; all bidders of St. Louis: Robert Wycoff, $20 a lin. ft.; Fruin-Bambrick Construction Co., $19.20; McCully Stone Mason Co., $18.50; James Black Masonry Construction Co., $18.00; R. J. McDonald & Co., $17.90; Hill-O'Meara Construction Co., $15.15; Bambrick-Bates Construction Co., $14 67; Skrainka Construction Co., $13.90; H. F. Heman, $13.50; Patrick McIntyre, $12.90; H. Ruecking & Co., $11.20; Stiefel & Ruckert, $10.90; Heman Construction Co. (accepted), $9.45.

BRICK PAVING.—Hamilton, O.—The following bids were received Oct. 24, 1898, for vitrified brick paving in a number of streets; L. A. Dillon, Cy. Engr.: J. M. Quill, Roseville block, $1.35 a sq. yd.; Harris block, $1.40; Athens block, $1.45; Bolen block, $1.50; name of brick not given, $1.30; either cement, tar or asphalt filler. Aug. J. Henkel, Athens block, $1.30, cement filler; $1.31, tar and asphalt filler. These bids are for 24,800 sq. yds. in 2d St., 15,100 sq. yds. in North 2d St., and 9,700 sq. yds. in South 2d St. Bids for remainder of work is as follows with total amount of quantities for the three streets: Limestone curb, 15,340 lin. ft., J. M. Quill, 60 cts.; A. J. Henkel, 40 cts.; old curb redressed, etc., 900 lin. ft., Quill, 10 cts.; Henkel, 10 cts.; cement crub, 16,040 lin. ft., Quill, 50 cts.; Henkel, 30 cts.; adjusting basins, 24, Quill, $8 each; Henkel, $5.

BLOCK ASPHALT PAVING.—Hamilton, O.—L. A. Dillon, Cy. Engr., informs us that the following bids were received Oct. 24, 1898, for block asphalt paving in 2d St., North 2d St., and South 2d St.: A. J. Henkel, limestone gutter, 19,200 lin. ft., 40 cts.; J. M. Quill, 40 and 45 cts.; Henkel, cement combined curb and gutter, 14,600 lin. ft., 45 cts.; Quill, 70 and 60 cts.; Henkel, cement curb, 840 ft., 40 cts.; Quill, 40 and 45 cts.; Henkel, cement gutter, 4,600 lin. ft., 30 cts.; Quill, 40 cts.; Henkel, asphalt block paving, 46,600 sq. yds., $2.27 a sq. yd; Quill, $2.17, $2.18 and $2.19; Henkel, resetting basins, 24, $5 each; Quill, $4. When not otherwise stated the quantities and bids for the other work are in most cases the same as those given for brick.

◆

INDUSTRIAL NOTES.

THE GENERAL ELECTRIC CO., Schenectady, N. Y., has established a sales office in the Templeton Building, Salt Lake City, Utah, in charge of Mr. B. E. Chubbuck.

WM. B. POLLOCK & CO., Youngstown, O., have the contract to furnish the steel plate work for the new blast furnaces in course of erection by the Ohio Steel Co., Youngstown, O. The contract is said to amount to about $100,000.

MACEY, HENDERSON & CO., Heed Building, Philadelphia, have the contract, it is reported, for the additions to the Shawmont Pumping Station, Fairmount Park, in that city, including a flue stack of brick and stone, 175 ft. high.

THE RICHMOND LOCOMOTIVE & MACHINE WORKS, Richmond, Va., has an order from the Canadian Pacific Ry., it is stated, for 12 special compound consolidated locomotives, duplicates of 15 others, recently delivered to the same railway.

WM. A. CHAPMAN & CO., 49 Westminster St., Providence, R. I., have the contract to build the concrete dam and power house for the development of a water power on the Susquehanna River, at Wrightsville, Pa., for the Martic Water & Power Co., Baltimore, Md.

THE HENRY DU BOIS CO., New York, has been incorporated by Messrs. Abraham Du Bois, Chas. Du Bois, Henry N. Du Bois and Edwin W. Du Bois, with $50,000 capital, to carry on the business of building, dredging and excavating on land and water.

THE ROCHESTER ELECTRICAL MFG. CO., Rochester, N. Y., has secured contracts to equip the fire alarm and police telegraph systems of Brooklyn, N. Y., and Paterson, N. J., with the Miller patent cut-outs, for the protection of the alarm and telegraph boxes. There are 1,200 fire alarm boxes and 900 police telegraph boxes, it is said, in Brooklyn alone.

THE AMERICAN REDUCTION CO., Philadelphia, and the Consolidated American Reduction Co. and the General American Reduction Co., New York, have had application made against them for the appointment of a receiver on behalf of Peoples Bros. of the former city. The allied companies have been engaged in the garbage disposal business in Philadelphia and New York, but have failed to secure municipal contracts for the same.

THE ROBB ENGINEERING CO., Amherst, N. S., is reported to have an order for two 300-HP. tandem compound engines to be direct-connected to dynamos for an electric railway in Australia. The company has also recently shipped a 300-HP. engine to England; three 250-HP. engines to the Isle of Man; three 125-HP. engines to Spain, and a 125-HP. engine to Newfoundland.

THE CARMAN-THOMPSON CO., Lewiston, Me., is reported to have the following among other contracts: Springfield (Mass.) R. R., 3,000 HP. in boilers; Providence, R. I., railway station, three large engines and piping; St. John (N. B.), St. Ry., power house; Portchester (N. Y.) St. R.R., power house; B. Peck Co., Lewiston, Me., heating system.

THE F. C. AUSTIN MFG. CO., Harvey, Ill., is applying to its bending machines or bulldozers an attachment recently invented by an employe, consisting of an adjustable form or die, by the use of which 13 sets of separate forms for bending different shapes, weigh only 166 lbs., while if applied to the machine in the old way, their weight would be many thousand pounds.

THE PITTSBURG BRIDGE CO., Pittsburg, Pa., through its New England agents, Collins & Norton, 33 Lyman St., Springfield, Mass., has received a contract from the Burgess Sulphite Paper Co., Berlin, N. H., to furnish a steel coal bunker with chutes to automatically feed its boilers, according to plans furnished by Mr. H. S. Ferguson, engineer, of Lewiston, Me. The company has also received contracts from the towns of Easton, Conn.; Williamsburgh, Mass., and Buckland, Mass., to build highway bridges.

NEW COMPANIES.—Pasteurized Water Co., St. Louis, Mo.; $3,000, with all paid in; Claude P. Crandall, Peter A. Connolly and J. M. Meyers.

Thackeray Incinerating Co., First National Bank Bldg., Jersey City, N. J.; $100,000; commencing with $1,000; to collect and incinerate ashes, garbage, etc.; Chas. B. Thurston, Jersey City; F. W. Montgomery, 52 Broadway, New York; Lewis Perrine, Trenton, N. J.

Insulated Wire Co., 60 Grand St., Jersey City, N. J.; $500,000, commencing with $1,000; to sell insulated wire and other goods; Samuel B. Lawrence, 13 Astor Place, and John B. Summerfield, 62 Wall St., New York; Burnham C. Stickney, Elizabeth, N. J.

Mail Delivery Notice.

Special efforts are made to deliver our paper to its readers each week at the earliest possible moment. The largest binding and mailing establishment in New York begins work on Engineering News early each Wednesday evening, and all papers for Boston, Philadelphia and Washington are usually in the New York post-office by midnight; all Brooklyn and New York city papers by 3 o'clock—in ample time for the first delivery Thursday morning. The entire edition, including foreign copies, is in the mail soon after 6 o'clock Thursday morning. If your paper is not received promptly we advise that you make a complaint to your local post-office officials.

The Circulation of ENGINEERING NEWS among Prominent Contractors Probably EXCEEDS that of any other FIVE PAPERS.

ADVERTISE YOUR WORK IN ENGINEERING NEWS.

PERSONAL.

Mr. John M. Farley, M. Am. Soc. C.E., has been appointed Chief Engineer of the water-works at White Plains, N. Y.

Mr. A. S. Dickinson, civil engineer, of Westbrook, Mass., was married Nov. 17 to Miss S. E. Hueston, of Roxbury, Mass.

Mr. William Bradburn, civil engineer, has been elected County Surveyor of Harris County, Tex., with offices in Houston.

Mr. H. H. Vreeland, President of the Metropolitan St. Ry. Co., New York city, has been elected President of the New York Railroad Club.

Mr. Samuel McCoy, civil engineer, of Independence, Mo., has been appointed an Assistant Engineer on the Choctaw, Oklahoma & Gulf R. R.

Mr. Wallace Winter has been appointed Assistant Superintendent of the Western Division of the Omaha & St. Louis R. R., with headquarters at Omaha, Neb.

Mr. T. J. Shellhorn has been appointed Master Mechanic of the Fort Worth & Rio Grande Ry., with headquarters at Fort Worth, Tex., to succeed Mr. B. G. Plummer.

Mr. Walter Edward Irving, Jun. Am. Soc. C. E., with the firm of Lewinson & Just, engineers and contractors, of New York city, was married Nov. 9, to Miss Charlotte Adela Walker, of Troy, N. Y.

Maj. Franklin C. Prindle, M. Am. Soc. C. E., Civil Engineer, U. S. N., of Brooklyn, N. Y., has been ordered to duty in connection with the establishment of a government training station on Yerba Buena Island.

Mr. Geo. R. Bottum, of Rutland, Vt., has been appointed Chairman, and Mr. Frank Wells, of Burlington, Vt., has been appointed Secretary of the Rutland-Canadian R. R., which will be built from Burlington into Canada.

Mr. Gustave R. Tuska, Assoc. M. Am. Soc. C. E., Chief Engineer of the Panama R. R. Co., left New York, Nov. 18, for Panama, to make an examination of the company's wharves, tracks, etc. He will be absent several weeks.

Messrs. J. N. Bridges, Herbert Mattison and Andrew Rinker have been appointed as a Board of Water Commissioners of Great Falls, Mont. Mr. Rinker was City Engineer of Minneapolis, Minn., from April, 1877, to January, 1893.

Mr. Walter W. Schlecht, civil engineer, has returned to Washington, D. C., from Nicaragua, where he has been with the government surveying corps on the Nicaragua Canal. He is engaged at present plotting the surveys made by the corps.

Mr. William P. Cochran, electrical engineer, of Lancaster, Pa., has been appointed Electrical Assistant to the Chief Engineer of the Martic Water & Power Co., with headquarters at Wrightsville, Pa. He graduated last June from the Pennsylvania State College.

Mr. F. J. V. Skiff, Director of the Field Columbian Museum, Chicago, Ill., has returned to that city after a visit of several months to Europe. He was recently appointed to the management of the Department of Mines and Mining at the Paris Exposition of 1900.

Mr. Harry K. Seltzer, Jun. Am. Soc. C. E., of Ephrata, Pa., has accepted the position of Instructor in Civil Engineering in the University of Texas, Austin, Tex. He graduated from Lehigh University, South Bethlehem, Pa., in 1895, and since then has been engaged in bridge work in Missouri and Iowa.

M. Charles de Wendel, steel manufacturer, of Paris, France, is visiting the United States for the purpose of studying American steel plants, especially with reference to the method of transferring molten metal from the furnaces to the converters. He visited the plant of the Johnson Co., Lorain, O., last week.

Prof. Frederick W. Denton, M. Am. Inst. Min. E., Professor of Mining Engineering in the University of Minnesota, Minneapolis, Minn., has resigned to assume the management of a large iron mine in Michigan. He is a graduate of the School of Mines of Columbia University, New York city, and has held the above professorship for the past four years.

Mr. William W. Varney, Assoc. M. Am. Inst. C. E., of Baltimore, Md., according to local papers, is to be the next City Commissioner of Baltimore. He is a graduate of the Massachusetts Institute of Technology, Boston, and studied electrical engineering in Norfolk, Va. He is also a graduate in law of the University of Maryland, and follows that profession as well as electrical engineering. His father is Naval Constructor William H. Varney, U. S. N., of Baltimore.

Mr. Wm. S. Barstow, Assoc. M. Am. Inst. E. E., General Superintendent of the Edison Electrical Illuminating Co., Brooklyn, N. Y., has been appointed General Manager of the Kings County Electric Light & Power Co., of the same city. Mr. Edward F. Peck, Assoc. M. Am. Inst. E. E., Secretary of the latter company, has been appointed Assistant General Superintendent.

Mr. Urban H. Broughton, civil engineer, of Chicago, Ill., and Mr. H. T. Wilson, formerly City Engineer of Galveston, Tex., have been appointed arbitrators of the question of transferring the entire sewerage system of the latter city from private to municipal ownership. Mr. Broughton is the arbitrator for the city and Mr. Wilson for the Galveston Sewer Co., and they will select a third person to complete the commission.

Mr. Alfred Skitt, President of the Norfolk, Virginia Beach & Southern Ry., with offices in New York city, has been elected Vice-President of the Manhattan Ry., of that city, to succeed Mr. R. M. Gallaway. Mr. Skitt was the General Superintendent of the Fourth Ave. St. Ry., of New York, until the time that it was sold to the Metropolitan Traction Co. In this new position he will be the chief executive officer of the company.

Mr. Wm. J. Clark, Assoc. M. Am. Inst. E. E., General Manager of the Railway Department of the General Electric Co., was last month appointed by the Secretary of War, one of three members of a government commission to select camp sites, report on facilities for transporting troops, etc., in Cuba, during and after the evacuation of the island by the Spanish troops. Mr. Clark has recently published a book entitled "Commercial Cuba," to which Mr. E. Sherman Gould, M. Am. Soc. C. E., of Yonkers, N. Y., has written an introduction.

Mr. Cornelius Shields, Vice-President of the Spokane Falls & Northern Ry., with offices at Spokane, Wash., has been appointed Assistant General Superintendent of the Western District of the Great Northern Ry., with headquarters at Spokane, Wash., to succeed Mr. F. H. Britton, transferred to the Dakota Division, to succeed Mr. Jas. Russell, resigned, with office at Larimore, N. D. Mr. J. M. Davis, Division Superintendent of the Breckinridge Division, with headquarters at Breckinridge, Minn., has been transferred to the Montana Division, to succeed Mr. L. D. Button, resigned, with headquarters at Havre, Mont. Mr. L. B. Allen has been appointed Assistant Division Superintendent of the Fergus Falls Division, with headquarters at Melrose, Minn., to succeed Mr. W. T. Tyler, promoted to be Division Superintendent of the Breckenridge Division, with headquarters at Breckenridge, Minn. Mr. E. E. Lillie has been appointed Assistant Division Superintendent of the Northern Division, with headquarters at Grand Forks, N. Dak., to succeed Mr. W. D. Scott, resigned.

OBITUARY.

Mr. Chas. W. Lambee, dredging contractor, of Boston, Mass., died Nov. 19, aged 44.

Mr. Hiram T. Mirick, railway and canal contractor, of Lyons, N. Y., died Nov. 10.

Mr. John Hampden Brooks, Jr., civil engineer, died at Roselands, S. C., Nov. 13, aged 32.

Mr. Lysander Wright, builder of engines and machinery, of Newark, N. J., died Nov. 12, aged 76.

Herr Herman Heinrich Meier, founder of the North German Lloyd Steamship Co., of Bremen, Germany, and New York, died in the former city Nov. 18, aged 89.

Mr. Archie S. Miller, a civil engineer, on the Nicaragua Canal Commission's engineering corps, who had just returned from Nicaragua, died in Washington, D. C., Nov. 18, of yellow fever.

Mr. William E. Hale, President of the Toledo Traction Co., Toledo, O., and formerly President of the Hale Elevator Co., died in Chicago., Ill., Nov. 16, aged 63. He leaves a son, Mr. George E. Hale, who is an astronomer and Director of the Yerkes Observatory, Chicago.

Mr. John Field, civil engineer, of Columbus, O., died Nov. 12, aged 92. He was born in New Berlin, N. Y., and went to Ohio in 1824 as an engineer on the Ohio Canal. In 1829 he was Chief Engineer of the State Dam across the Scioto River. In more recent years he engaged in the lumber business in Columbus.

Mr. Joseph Albree, father of Mr. Chester B. Albree, of the Chester B. Albree Iron Works, Allegheny, Pa., died in London, England, Nov. 7. He was born in Pittsburg, Pa., Sept. 15, 1835, and graduated from the Western University of Pennsylvania. He engaged in the shoe business until 1887, when he became a partner with his sons, Chester B. and Ralph Albree, in the manufacture of ornamental iron work in Allegheny.

Mr. Thomas Sparks Bishop, M. Am. Soc. C. E., Engineer and Assistant Treasurer of the Russell & Erwin Mfg. Co., New Britain, Conn., until last June, died in Columbus, N. J., Nov. 13. He was born in the latter place March 12, 1846, and graduated from the Polytechnic School of Pennsylvania in 1868. In 1869 he became a civil engineer with the Camden & Amboy R. R. From 1875 to 1880 he was a civil engineer on the Pennsylvania R. R., and in the latter year went to New Britain, Conn., to become the Engineer of the Russell & Erwin factory. He was appointed Assistant Treasurer of the company in 1881, and held the position until last June, when he resigned on account of ill health.

Sir John Fowler, K. C. M. G., LL. D., and Member and Past President of the Institution of Civil Engineers, died in London on Nov. 21, in his 81st year. Sir John was born near Sheffield, and was educated as an engineer in the office and in field work. Among the early railways upon which he was engaged, was the London-Brighton line. He soon acquired a very extensive practice, and built a number of bridges, viaducts, etc., in Europe as well as in England. In 1870 he investigated the Norwegian railway system for the Indian government; he also reported upon the barrage of the Nile, and acted upon many other equally important commissions. In connection with the present Sir Benjamin Baker, he was one of the engineers of the Forth bridge. He was one of the earliest members of the Institution of Civil Engineers, having been elected on Feb. 6, 1844; he was President of that body in 1866-67. He was made a Knight Commander of the Order of St. Michael and St. George, for services in connection with the Soudan campaign.

Dec. 21. Secy., S. E. Tinkham, City Hall, Boston, Mass.
WESTERN FOUNDRYMEN'S ASSOCIATION.
Dec. 21. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.
AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
Dec. 28. Secy., Ralph W. Pope, 26 Cortlandt St., New York city.
AMERICAN INVENTORS' AND MANUFACTURERS' ASSOCIATION.
Jan. 15. Annual meeting, Washington, D. C. Secy., Arthur Steuart, Wash. Loan and Trust Bldg., Washington, D. C.
NORTHWESTERN ELECTRICAL ASSOCIATION.
Jan. 19-21. Semi-annual meeting, Milwaukee, Wis. Secy., Thos. R. Mercein, 511 Montgomery Bldg., Milwaukee, Wis.
MICHIGAN ENGINEERING SOCIETY.
Jan. 24-26. Annual meeting, Lansing, Mich. Secy., F. Hodgman, Climax, Mich.
ILLINOIS SOCIETY OF ENGINEERS AND SURVEYORS.
Jan. 25-27. Annual meeting, Champaign, Ill. Secy., Jacob A. Harman, Peoria, Ill.

WESTERN SOCIETY OF ENGINEERS.—At the meeting on Nov. 16, there was a brisk discussion on the several papers on "Track Elevation in Chicago," which were presented at the two previous meetings.

NEW YORK ELECTRICAL SOCIETY.—The 191st meeting of this society was held Nov. 17 at the College of the City of New York. Mr. Edward H. Johnson, President of the Sprague Electric Co., delivered an illustrated lecture on "Surface Contact Railways, with Special Reference to the Johnson-Lundell System."

MONTANA SOCIETY OF ENGINEERS.—A regular meeting of this society was held on Nov. 12, at Helena, Mont. The subject considered was a bill providing for the appointment of a State Engineer and defining his duties. Mr. F. W. Blackford, of the Butte & Centerville Electric Ry., read a paper on the subject.

LOUISIANA ENGINEERING SOCIETY.—The regular monthly meeting of this society was held Nov. 14. The paper of the evening, by Mr. A. F. Wooley, Jr., U. S. Assistant Engineer, was entitled "Rectification of the Red and Atchafalaya Rivers." In this the various projects recommended by several prominent engineers were explained in detail.

WESTERN FOUNDRYMEN'S ASSOCIATION.—At the meeting on Nov. 16 a paper by Mr. Malcolm McDowell on "Metalloids in Castings" was presented, and afterwards discussed. The paper was on the same line as Mr. McDowell's former paper on "The Value of Metalloids in Cast Iron." which was presented at the January meeting and published in our issue of Feb. 3.

AMERICAN ECONOMIC ASSOCIATION.—The annual meeting of this association will be held at New Haven, Conn., Dec. 27-29. The programme is as follows:

Dec. 27. President's address, "The Relation Between Economics and Politics," Prof. Arthur T. Hadley. Dec. 28. Report of Committee on the Twelfth Census; consideration of the subject of American Economic History. Dec. 29. Report of Committee on Reform of Currency; also "Some Aspects of the Recent U. S. Treasury Situation," Prof. F. F. Taussig; Discussions of—Labor Problems in France, Municipal Taxation as a Means of the Public Control of Corporations, and the Nature of Municipal Franchises.

WESTERN RAILWAY CLUB.—At the meeting on Nov. 15, Mr. F. M. Whyte read a paper on "The Framing of Cars," the object of which was to show the necessity of modifying the design, and especially the trussing, so as to transmit as much of the load as possible to the center plate and so reduce the trouble arising from the deflection of the bolsters.

The first topical discussion was on "Methods of Handling Ashes from Locomotive Ash Pits," in which there was some opposition to mechanical methods, on account of the cheapness of shoveling by hand. This was followed by a brief discussion on "Improved Means for Drying Sand and for Delivering it to the Sand Box on the Locomotive."

NEW PUBLICATIONS.

SEWERAGE AND MUNICIPAL SANITATION.—A Paper Read Before the Annual Convention of the Mayors' Association of South Carolina, held at Georgetown, S. C., May 10-12, 1898. By J. L. Ludlow, M. Am. Soc. C. E., Winston, N. C. Printed for Private Circulation. Paper; 6 × 9 ins.; pp. 15.

If there were more such conventions with more such papers, as that noted above, municipal sanitation would advance even more rapidly than it has during the last few years. The South, especially, has need of just such educational work, but no part of the country is beyond the need yet.

ILLINOIS SOCIETY OF ENGINEERS AND SURVEYORS.—Report of the 13th Annual Meeting, held at Peoria, Ill., Jan. 26, 27 and 28, 1898. Jacob A. Harman, Secretary, Peoria, Ill. Paper; 6 × 9 ins.; pp. 198; illustrated. Price, 50 cents.

The papers and committee reports in this volume most likely to be of greatest interest to our readers are as follows: "The Purification of Sewage by the Ferozone and Polarite System," by John W. Alvord; "Deep-Well Pumping," by E. E. Johnson; "The Improvement of Transportation in Country Districts," by E. E. R. Tratman; "Brick and Macadam Country Roads," by J. Ed. Miller, Monmouth; "Proposed State Supervision of Water Supply and Sewage Disposal," by Jacob A. Harman; Reports of Committees on Public Highways, Water-Works and Paving Brick Specifications and Tests. Appended to the report is a state directory of surveyors and civil engineers.

NEW YORK WEATHER BUREAU.—Eighth Annual Report. 1896. Under the Department of Agriculture, and in co-operation with the U.S. Weather Bureau. Created and organized under the Laws of the State of New York (Chapter 148, Laws of 1889). Reorganized and placed under the Department of Agriculture (Chapter 338, Laws of 1893). Central office at Cornell University, Ithaca, N. Y. State Printers. Cloth; 9 × 5½ ins.; pp. 525. Many maps.

The central office of this bureau says that the distribution of this report has been delayed by reasons beyond the agency of control of that office. The contents cover the meteorological reports for each month in 1896, and separately summarize these for the year; the stations are described, a sample crop report is given, and a separate chapter deals with the climate of the state of New York. A generally interesting map and description is one devoted to the physical features of New York, giving elevations of the surface above sea-level, from data secured in geological and state surveys and railway levels.

TRADE PUBLICATIONS

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

POWER PUMPS.—The Goulds Mfg. Co., Seneca Falls, N.Y. Paper; 8 × 7 ins.; pp. 92; illustrated.

This is a handsome descriptive catalogue of power pumps designed, the title page states, "for every service." There are also some useful tables.

SPECIAL MUNICIPAL SUPPLIES.—Henry W. Atwater, Manager, Imperial Building, Montreal, P. Q. Paper; 8 × 10 ins.; pp. 28; illustrated.

This catalogue describes a garbage incinerator, automatic gully or catchbasin cleaner, fire hose attachment, valves, pipe couplings, etc., made under the Decorie patents.

RECENT BALDWIN LOCOMOTIVES.—Baldwin Locomotive Works, Philadelphia, Pa. Pamph.; 9 × 6 ins.; pp. 32; illustrated.

This is No. 8 of the regular series of pamphlets which are being issued by the above firm illustrating and describing briefly the locomotives built by them to fill recent orders. Altogether the present number illustrates 15 different locomotives, including, besides the regular steam railway types, a number of mining, plantation and switching locomotives. Most of the engines shown were built to foreign orders, principally from the Central and South American countries, China, Russia and Australia, but there is one from the Lynton & Barnstaple Ry., in England itself.

HISTORIC RICHMOND.—Devoe & Raynolds Co., Chicago, Ill. Leather, 8½ × 6 ins.; ten photographs, with descriptive captions.

This is a portfolio of ten handsome photographs of buildings, statues, street scenes, etc., in Richmond, Va., which are of interest for their historical associations, and has been issued by the above firm as a souvenir of the sixth annual convention of the Association of Railway Superintendents of Bridges and Buildings, held at Richmond, Oct. 18-20, 1898 (Eng. News, Oct. 11, 1898).

MINING MACHINERY AND PLANT.—Gates Iron Works, 650 Elston Ave., Chicago. Paper; 6 × 9 ins.; pp. 130.

This very handsome specimen of trade publications is the company's general catalogue, covering the wide and varied field of its manufactures. It shows the various styles of the Gates, Blake & Dodge crushers for rock, ore, etc., and also different styles of crushing rolls. Then come ore feeders, stamp mills, the Tremain steam stamp mill, rotary driers, vanners, amalgamator pans, concentrators, etc. Smelting and roasting furnaces (the latter being of the rotary type) are shown. Engines, mining hoists, mine and dump cars, conveyors, etc., are included. The catalogue is illustrated by excellent half-tone engravings of the various machines, and views showing mills which have been equipped by this firm.

COAL MINING MACHINERY.—Sullivan Machinery Co., 58 N. Clinton St., Chicago, Ill. Catalogue No. 32. Pamph.; 9 × 6 ins.; pp. 20.

This catalogue illustrates the Sullivan coal undercutting and shearing machines, driven by compressed air. The undercutter is made in four sizes, weighing from 500 to 800 lbs., and capable of undercutting from 4½ to 6 ft. The shearing machine is a new departure in coal mining machinery. It makes a vertical cut in the face of the breast 6 ins. wide, 7 to 8 ft. deep and of the height of the coal seam.

RAILWAYS.

CHEROKEE MINING CO.—Reports state that this company, care of C. W. Howard, Times Bldg., Chattanooga, Tenn., will be in the market for a standard gage locomotive, a road-grading machine, and the necessary tools for railway construction.

CHICAGO, ST. LOUIS & TEXAS AIR LINE.—D. Griffin Gunn, Pres., San Antonio, Tex., informs us that the surveys have been completed, the right of way guaranteed and bonuses amounting to about $450,000 promised for this proposed railway from San Antonio to Brownsville, Tex., via San Diego, a distance of 275 miles. The cost of construction will be about $10,000 a mile. There will be but few bridges required, and no heavy grading will be met with as the route is through a prairie and small mosquito timber district. The contract for the entire work will be let to responsible parties, to be paid for in cash when completed.

CHOCTAW & MEMPHIS.—Among the bidders Nov. 12 for the construction of this company's new line from Howe, Ind. Ter., to Little Rock, Ark., a distance of 164 miles, were the following: J. H. McCarthy & Co., Little Rock; G. M. Garvey, Memphis, Tenn.; Edward A. Garvey, St. Louis, Mo.; Johnson Bros., St. Elmo, Ill.; Donald Grant & Co., Faribault, Minn.; R. M. Quigley, St. Louis; Mason Hoge & Co., Frankfort, Ky.; M. C. Hurley, Fort Worth, Tex.; J. W. Thompson, St. Louis; Corrigan & Lee, Kansas City, Mo.; St. Joe Construction Co., St. Joseph, Mo.; W. P. Chapman Co., 40 Wall St., New York; Ferguson Contracting Co., 69 Wall St., New York; J. S. Sherman, Utica, N. Y. J. H. McCarthy and Johnson Bros. are said to have been the successful bidders; estimated cost, about $2,000,000. F. A. Molitor, Ch. Engr., Little Rock.

COLORADO & SOUTHERN.—Reports state that the Union Pacific, Denver & Gulf, the Denver, Leadville & Gunnison (known as the South Park Line), and the Denver, Texas & Gulf Rys., and branch lines, are to be reincorporated, under the name of the Colorado & Southern Ry. Co., with Frank Trumbull, Denver, Colo., as President, and B. L. Winchell as General Traffic Manager.

CUBA.—Press reports state that within several weeks work will be commenced, under Col. Hecker's directions, upon a railway from Casa Blanca, on the east side of Havana Bay, to Guanabacoa, where it will connect with the tracks of the United R. R., thus facilitating the transportation of commissary supplies.

DALLASTOWN.—S. M. Manifold, of York, Pa., who is chief engineer of the York Southern R. R., is said to have been awarded the contract for the construction of this line near Dallastown, Pa., to be 1 1-10 miles in length, at $11,580. The grading work has been sub-let to John Dobblings. D. F. Lafean, Pres., York, Pa.

FLORENCE & GULF.—Interest is now being revived for the construction of this proposed railway from Florence to Mobile, Ala. Several years ago surveys were made under the supervision of the state for a line which will tap the Great Warrior coal fields at Tuscaloosa, passing through the long leaf yellow pine regions and the black lands of the southern part of Alabama. It is said to be the intention of those behind the project to build to Chicago. R. T. Simpson, Jr., of Florence, Ala., is the representative of the line for Lauderdale and Colbert counties.

FORT DODGE & OMAHA.—Jas. H. McShane, of Omaha, Neb., is stated to have been awarded the contract for grading this proposed line between Omaha and Loveland, and that he expects to have work completed in time to lay rails by April 1. This line will be an extension of the Illinois Central Ry., from Fort Dodge, Ia., to Omaha, 125 miles.

LAKE ERIE & DETROIT RIVER.—This company has been voted bonuses at St. Thomas, Ont., Dutton and other towns. It is expected to build an extension from Ridgetown to St. Thomas in the spring to a connection with its London & Port Stanley branch. Owen McKay, Engr., Windsor, Ont.

MONTEREY & FRESNO.—H. A. Greene, Vice-Pres. and Gen. Mgr., Monterey, Cal., informs us that a contract has been signed for the completion of this road as far as Hollister from Monterey; also the contract for rails, etc. A. W. Jones, Pres.; P. P. Dandridge, Ch. Engr., both of Monterey.

MUSCATINE, NORTH & SOUTH.—Grove M. Willis, Ch. Engr., Wapello, Ia., informs us that the location has been completed and entire right of way obtained for this railway, from Elrick to Muscatine, via Wapello, Grand View and Fruitland, 30 miles. Balch, Peppard & Johnson, Minneapolis, Minn., received the contract July 13, and now have 10 miles of track laid and the balance nearly graded and bridged ready for track. The station buildings have been erected. Pres., W. R. Stewart, New York.

NELSON & BEDLINGTON.—Reports from Nelson, B. C., state that Folliet & Guthrie have been awarded the contract for the construction of this new line from Bonner's Ferry, Idaho, to Nelson, a distance of about 60 days. Jas. J. Hill, Pres. of Great Northern, St. Paul, Minn., is interested.

OHIO.—The Cincinnati, Hamilton & Dayton, the Wheeling & Lake Erie and the Lake Shore & Michigan Southern Ry. Cos. are reported to be contemplating the purchase of Presque Isle, at the mouth of the Maumee River, Toledo, O., for use as a terminal during the Ohio Centennial. If the deal is consummated a large railway bridge will have to be erected.

PENNSYLVANIA.—Reports state that P. E. McGovern, Clearfield, Pa., has begun the construction of a railway for N. L. Hoover & Co., from a point near Glen Campbell, Pa., six miles west to a lumber tract owned by N. L. Hoover and John Du Bois. Mr. McGovern will employ about 100 men, and expects to have the road completed by about Jan. 15. The line will penetrate valuable timber and coal lands.

PHILADELPHIA, READING & NEW ENGLAND.—It is announced that the Poughkeepsie bridge route of this company was to be transferred to the bondholders on Nov. 15, and that the new company will be known as the Central New England. John W. Brock, of Philadelphia, will continue as president, and bids will be asked for building an extension to Springfield, Mass. C. H. Ewing, Ch. Engr., Hartford, Conn.

PORTLAND, VANCOUVER & YAKIMA.—Bids will soon be asked, according to reports, for the construction of an extension of this line to a point on the Chelatchie prairie. Plans are now in preparation. L. Gerlinger, Pres.; J. W. Coovert, Ch. Engr., both of Vancouver, Wash.

PIONEER MFG. CO.—J. H. Adams, Thomas, Ala., informs us that Dunn & Lallande Bro. are the principal contractors, as stated in our last issue, for the construction of 3½ miles of track to be built for the Pioneer Mining & Mfg. Co. from its furnaces at Thomas to coal mines at Sayreton. Edwin Thomas, Pres., Catasauqua, Pa.; P. S. Milner, Ch. Engr., Birmingham, Ala.

RUSSIA.—Press reports state that a new line is projected in Russia to run from Tscheljabinsk, the western terminus of the Trans-Siberian Ry., to Zarizyn, on the Volga, via Orenburg and Uralsk. The purpose of the road is to connect the wheat region of Western Siberia with a Black Sea port.

SUMTER & WATEREE.—R. D. Lee, Sumter, S. C., informs us that contracts to build this line are about to be let. The right of way has been secured and the surveys made. The route is from Sumter to Middleton, a distance of 15 miles. J. D. Blanding, Pres.; F. B. Beckar, Ch. Engr., both of Sumter.

TERRE HAUTE & LOGANSPORT.—J. T. Brooks, of the Pennsylvania Co., Pittsburg, Pa., is reported to have bought this line at a Master's sale, Nov. 18, at $1,060,000.

TRAIL & SALMON RIVER.—Application will be made to the legislative assembly of the Province of British Columbia for an act to incorporate this company with power to construct and operate either a standard or narrow gage railway from Trail to Sayward and to the junction of the Salmon River with the Pen D'Oreille River. Frank Fletcher, Pres.; Frank Moderly, Ch. Engr., Vancouver.

WARSAW & VIENNA.—Press reports state that this railway company will soon be in the market for a number of new locomotives, in addition to the 32 recently bought in America.

WEST BRANCH VALLEY.—This company was incorporated in Pennsylvania, Nov. 7, with a capital stock of $1,100,000, to construct a steam railway from Clearfield to Williamsport, Pa., along the Susquehanna River, a distance of about 111 miles. At Clearfield a connection will be made with the Buffalo, Rochester & Pittsburg Ry. It will have a low-water grade all the way and will therefore be the most economical route through Central Pennsylvania. It is thought that this will be part of a new trunk line through the state. A. E. Patton, Pres., of the Pennsylvania Construction Co., Curwensville, Pa.; H. B. Powell, Vice-Pres., Clearfield; F. J. Dyer, Treas., Curwensville.

WESTERN RY. CONSTRUCTION.—Bryan W. Tichenor, 27 Pine St., New York, informs us that this company proposes to construct a railway from Altata to Durango, via Culiacan and La Bajada, Mexico, 700 miles, of which 40 mile are now in operation between Altata and Culiacan. The route has been surveyed, a concession granted and negotiations for capital are pending. Further statement of facts cannot be made at present. The promoters are R. J. Hartman, Mexico City, Mex., and J. R. Newberry, Los Angeles, Cal.

WEST SHORE & EASTERN.—Press reports state that E. Woolford, of Pittsburg, is now making a permanent location for this proposed line from North Charleroi to the Youghiougheny River, near the Washington mines, via Allenport, Pa.

WISCONSIN CENTRAL.—This company has received judicial sanction to the issuance of $1,000,000 in bonds. It is said that the receivers will now purchase new equipment and buy considerable new rolling stock. H. F. Whitcomb, Recr. and Gen. Mgr., Milwaukee, Wis.

STREET AND ELECTRIC RAILWAYS.

HAMPTON, N. H.—Soule, Dillingham & Co., 8 Oliver St., Boston, Mass., contractors for the track and overhead construction work of the proposed Hampton & Amesbury St. Ry., inform us that all orders have been placed and construction work begun between Hampton and Seabrook, a distance of five miles. W. D. Lovell., Treas., 143 Federal St., Boston.

MONTPELIER, VT.—Reports state that the Hoosac Power & Traction Co. has been incorporated in Vermont.

FITCHBURG, MASS.—The council granted a franchise to the Fitchburg & Leominster St. Ry. Co., Nov. 15, to double track its Main St. line from Putnam St. to the upper common, and to build a line up Blossom and connecting streets. H. A. Willis, Pres.; A. H. Moore, Ch. Engr.

WEST SPRINGFIELD, MASS.—The selectmen of this town have granted a franchise to the Springfield St. Ry. Co., to build from the old toll bridge to the Agawan bridge, conditional upon the company constructing a line to connect the Bridge St. location with that at West Springfield Center. J. Olmstead, Pres., 1 Main St., Springfield.

WESTBORO, MASS.—The Westboro, Hopkinton & Milford St. Ry. Co., capitalized at $80,000, has petitioned this town for a franchise. Wm. H. Tylee, Worcester, Mass.; Edgar K. Ray, Franklin, Mass., are interested.

WILLIMANTIC, CONN.—Jesse Starr, Room 2, Unity Bldg., Hartford, Conn., informs us that he is in the market for material to fully equip ten miles of electric railway in this town. L. B. Wilson, of Hartford, is said to be the engineer.——The Willimantic St. Ry. Co. has recently been incorporated, with a capital stock of $1,000, by Eugene S. Boss, J. Griffin Martin and Solomon Lucas.

NEW YORK, N. Y.—The Fort George Extension Ry. Co. was incorporated at Albany, Nov. 17, with a capital stock of $10,000, to operate an electrical surface line from 172d to 185th St., on 11th Ave. The directors are: M. G. Starrett, W. F. Plummer, John Lambdon, Andrew Loughlin, D. W. Patterson and Harry Hartwell, of New York; John Kerr and Charles E. Corby, of Brooklyn; and H. A. Himely, Far Rockaway (L. I.), N. Y.——Papers were filed, Nov. 21, consolidating the North End St. Ry. Co., the Fort George & 11th Ave. R. R. Co., and the Fort George Extension Ry. Co., under the name of the Fort George & 11th Ave. R. R. Co.; capital stock, $3,000,000. Its directors are: John T. Little, Jr., Ambrose F. McCabe, Frederick C. Garrick, Frank F. Ogston and Sharon Graham, of New York; Clement M. Cumming, Yonkers, N. Y.; C. A. Gilbert, White Plains, N. Y.; W. A. Dibbs, of Brooklyn, N. Y., and D. C. Moorehead, of Jamaica (L. I.), N. Y.

ROCHESTER, N. Y.—It is reported that the Rochester & Lake Ontario Ry., leased by the Rochester & Irondequoit R. R. Co., will be double-tracked between Rochester and Lake Ontario and the motive power changed from steam to electricity. J. N. Beckley, Pres., Rochester.

SYRACUSE, N. Y.—The time for the completion of the Syracuse & Oneida Lake R. R. has been extended from Dec. 15, 1898, to Dec. 15, 1899, by resolution offered by Alderman Matty.

LODI, N. J.—Sandford & Stillman Co., Jersey City, N. J., were awarded the contract, Nov. 11, according to reports, for building a trolley line from Garfield to Lodi, at $48,000, and also for erecting a bridge, at $5,000; time, 60 days.

ERIE, PA.—It is reported that agreements have been made by the Erie Transit Co. and contractors looking to the construction of an electric line connecting Edenboro, Erie and Cambridge before June 1. All franchises are granted except in Erie City and Summit township. J. F. Downing, Pres., Erie.

IRWIN, PA.—The council has been petitioned by the McKeesport & Irwin St. Ry. Co. for a franchise to build through the town.

PITTSBURG, PA.—The Consolidated Traction Co. is said to be making extensive improvements on its Sharpsburg and Etna branches, and to be contemplating the building of several extensions up the Allegheny Valley. C. L. Magee, Pres., Times Bldg.

PITTSTON, PA.—Jas. A. Steese, Pres. Pittston & Scranton St. Ry. Co., Mount Holly Springs, Pa., informs us that this company, whose incorporation was noted in our last issue, expects to build a short line about 2½ miles in length. No surveys have yet been made.

SCRANTON, PA.—The Nay-Aug Park St. Ry. Co. was incorporated Nov. 17, with a capital stock of $50,000, to construct an electric street railway in this city. The incorporators are: Jas. L. Crawford, Pres.; Geo. F. Reynolds, Geo. E. Hill, Clarence E. Reynolds and Thos. F. Penman, all of Scranton.

CUMBERLAND, MD.—The commissioners of Allegany county have granted an extension of time to Dec. 1 for the commencement of surveys of the new line between this place and Westernport, projected by J. W. Burchinal, of Moundsville, W. Va.; Marx Wineland, of Frostburg, Md.; Hugh Scott and William Atkinson, of Lonaconing, Md. Engr., G. D. Howell, Philadelphia, Pa. Construction work will not begin until next spring.

WASHINGTON, D. C.—O. T. Crosby has bought the franchises and other property of the Belt Ry. Co., including about 16 miles of single track lines, at $350,000. The road has to be equipped with the underground electric system within one year.——The plant of the Potomac Electric Power Co. is being prepared to furnish power for the City & Suburban St. R. R. Co., formerly the Eckington & Soldiers' Home Ry. Co. O. Y. Crosby, Pres.

PETERSBURG, VA.—S. Kaufman, of Charlotteville, N. C., representing the bondholders, is reported to have bought the property of the Petersburg Electric Ry. Co., at public auction, Nov. 11, at $5,500. It is said that the system will be merged into that projected by the Piedmont Traction Co., of Charlotteville.

GADSDEN, ALA.—The Gadsden & Attala Union Ry. will soon be changed from a dummy line to an electric system, at a cost of about $10,000. The total length of the line is 11.25 miles. The power will be furnished by the Alabama Light & Power Co., W. S. McCall, Pres., which intends to begin at once the erection of a $25,000 electric light and power plant at Gadsden. J. M. Elliott, Jr., Pres., 123 North 4th St.

LOUISVILLE, KY.—Percival Moore and S. P. Myer, of this city, are interested in the proposed construction of an electric railway from Louisville to Pewee Valley, via Shelbyville Pike.

FAIR HAVEN, O.—Dr. Hugh F. Lorimer, of Fair Haven, informs us that the proposed electric railway from Hamilton, O., to Richmond, Ind., a distance of 36 miles, would run along the Richmond & Hamilton Pike lying about one-half way between the Cincinnati, Hamilton & Dayton and the Pittsburg, Cincinnati, Chicago & St. Louis Rys. The route is through a thrifty portion of the state, touching at the towns of Darrtown, Morning Sun and Fair Haven, O., and Beechy Mire and Boston, Ind., which are from three to eight miles distant from either of the above-named steam railways. Nothing has yet been done toward construction, but it is believed that the people would help capitalists with both money and a free right of way.

SANDUSKY, O.—Fred. Shumer, Norwalk, O., has been awarded the contract for the stone work, and G. A. Breckenridge, Huron, O., the contract for grading on the extension of the Sandusky Interurban Ry. through Huron. The projected route is from Sandusky to Lorain, via Huron and Vermillion, 30 miles. Thomas Wood, Gen. Mgr.; C. A. Judson, Ch. Engr., both of Sandusky.

XENIA, O.—The Dayton & Eastern Traction Co., by Henry B. Pruden, has applied to the council for a franchise to build in this city.

EVANSVILLE, IND.—Henning & Henning, of Dayton, O., are said to represent capitalists who contemplate the construction of a suburban line from Evansville to Rockport, Tell City and Cannelton. C. J. Murphy, of the Business Men's Association, Evansville, may be addressed.

CORUNNA, MICH.—The council has granted a 30-year franchise to W. E. Avery, of Detroit, and F. J. Northway, of Durand, Mich., who are promoting the projected Long Lake, Durand & Corunna St. Ry.

GRAND RAPIDS, MICH.—The Grand Rapids, Belding & Saginaw Ry. Co. has been incorporated, with a capital stock of $350,000, to build a line from Freeport, Barry county, to Greenville, Montcalm county. The incorporators are: Thomas Hefferan, George Hefferan and Charles Percell, of Grand Rapids; Samuel W. McCall and George N. Ferald, of Boston, Mass.

CHARLESTON, ILL.—The Charleston & Mattoon Electric R. R. Co., of Charleston, has been incorporated, with a capital stock of $25,000, to operate an electric or dummy line in Coles county. The incorporators are: Forbes Holton, M. R. Williams and W. R. Patton.

ALAMEDA, CAL.—Ben. F. Lamborn, Cy. Clk., informs us that he desires a full line of catalogues regarding electric railways, car construction, rolling stock, transmission plants and electric lighting. G. A. Wiese, Cy. Electrician.

LONDON, ONT.—U. A. Buchner has submitted a proposition to the council providing for the construction of seven miles of new street railway.

BEPPU, JAPAN.—Reports state that the construction work is steadily progressing on the proposed Hoshu Electric Ry. from Beppu to Oita, in Kyushu. The contract for all the materials was let to the Saiga Electric Co., of Kyoto.

SHANGHAI, CHINA.—Bids are asked until March 15 for a concession for constructing about 23 miles of electric tramways in this city, as stated in our advertising columns. Plans may be obtained from Blackall & Baldwin, 39 Cortlandt St., New York, upon a deposit of $500. J. O. P. Bland, Secy., Shanghai.

ELECTRIC LIGHT AND POWER.

EVERETT, MASS.—Perry D. Blackden has applied for a franchise to build and operate a plant in this place. It is stated that the plant will cost about $60,000. At present light is furnished by the Malden Electric Light Co. Alderman White, Chn. Com.

WOONSOCKET, R. I.—F. S. Pond, Supt. Woonsocket Electric Machine & Power Co., writes us that it is proposed to put in a new 400-HP. engine to take the place of one recently destroyed. L. C. Lincoln, Gen. Mgr.

PORT CHESTER, N. Y.—The Port Chester Electric Light Co. has purchased 100 acres of shore front from the William Purdy estate, and will locate its new plant there, according to reports.

HERKIMER, N. Y.—The Westinghouse Electric & Mfg. Co., Pittsburg, Pa., has been awarded the contract for furnishing the machinery for the plant, at about $10,500.

NIAGARA FALLS, N. Y.—The Niagara Falls Power Co., on Nov. 22, made a contract with a new company formed by the men interested in the Oldbury Electro-Chemical Co., under the provisions of which 800 HP. will be furnished the new company by March 1, for the operation of a new electro-chemical plant to be built at once on the power company's lands adjacent to the Oldbury Electro-Chemical Co.'s works. The buildings will be erected at once.

PARKERS, N. Y.—The Utica Electric Mfg. Co., Utica, N. Y., has been awarded the contract for furnishing a plant of 150 lights for the L. B. Parker Lumber Mills.

WATERTOWN, N. Y.—Plans are being considered by the Black River Power Association, of Watertown, for its plant on the Upper Black River, according to reports.

BAYONNE, N. J.—Press reports state that the electric light plant at this place belonging to the Central R. R. of N. J., was burned Nov. 20, causing a loss of $5,000.

TRENTON, N. J.—Press reports state as follows: Thos. C. Barr, Orange, and Col. A. R. Kuser, Trenton, have purchased the franchises, etc., of the Trenton Electric Light & Power Co. for $415,000. Burr and Kuser represent themselves and J. F. Dreyden, Pres. Prudential Insurance Co., Newark, and other capitalists, and it is understood that their plans look to a consolidation of the electric light company with the Trenton St. Ry. Co. and the Delaware River Improvement Co. The latter company owns a water-power franchise at Morrisville, Pa., across the river from Trenton, and is interested in the proposed damming of the Delaware River for the purpose of turning the water power into electricity to supply the Trenton Electric Co. and the railway company with power. The building of an electric railway to Philadelphia is also said to be one of the projects in view, and, if accomplished, will be one more link in the New York & Philadelphia Traction Co.'s line. The property sold Nov. 15 for $415,000 represents a money investment of $170,000 made by the People's Electric Light Co. In 1892 Frank A. Magowan organized the Trenton Light & Power Co.

BLOSSBURG, PA.—The Blossburg Electric Co. has been awarded a 5-year contract for lighting this town with 106 32-c. p. incandescent lights.

NEW HOLLAND, PA.—Eli Martin has submitted a proposition to light this place by electricity.

TIMMONSVILLE, S. C.—The light committee wishes to correspond with manufacturers of electrical machinery, pumps, etc., for a plant and water-works. D. H. Traxler, Chn. Com.

KISSIMMEE, FLA.—The council has called an election to vote on the question of granting a 10-year franchise for a plant to J. M. Bailey.

DONALDSONVILLE, LA.—A. Culberson, Supt. Electric Light Plant, has recommended the purchase of a 37½-K-W. machine, with a 60-HP. high speed engine. Paul Leche, Mayor.

MONROE, LA.—This place voted Nov. 8 to issue $60,000 in bonds for a plant and water-works, $30,000 for a sewerage system, etc.

HENDERSON, TENN.—We are informed that the contracts have been let by the Henderson Electric Light Co. for the machinery for the proposed plant, to have a capacity of 4 2,000-c. p. arc and 500 16-c. p. incandescent lights.

CLEVELAND, O.—Henry C. Eyman, Supt. State Hospital, writes us that the following bids were received Nov. 16 for furnishing machinery, etc., for extending the plant at the State Hospital: Dynamos and motors, Fort Wayne Electric Corporation, Fort Wayne, Ind., $2,070; General Electric Co., Schenectady, N. Y., $1,920; Ridgway Dynamo Co., Ridgway, Pa., dynamo and engine, $3,129; B. M. Barr & Co., Cleveland, $1,920; Triumph Electric Co., Cincinnati, $1,900; Eddy Electric Mfg. Co., Windsor, Conn., $2,056; Westinghouse Electric & Mfg. Co., Pittsburg, $1,675 (accepted); Tresher Electric Co., Dayton, O., $2,030. Engines—General Electric Co., $1,220; Buckeye Engine Co., Salem, O., $1,075; Watertown Steam Engine Co., Watertown, N. Y., $1,050; Russell & Co., Massillon, O., $950 (accepted). Wiring—A. E. Moses, Cleveland, $345, also supplementary wiring, $195, awarded contract for entire wiring. The machinery bid on was as follows: Two 50-K-W.—110 W. direct connected dynamos to operate about 300 R. P. M.—Change in present switchboard and addition thereto—connecting wires from dynamo to switchboard, and one 10-HP. motor, one 7½-HP. motor, one 4-HP. motor, or (an alternative bid) one 50-K-W. dynamo, and the balance as above. Two automatic high-speed engines, each to develop 75 HP. at ¼ cut off and 80 lbs. pressure at the throttle and foundations for same, or (an alternative bid) one engine of the above size. Wiring—From the present main to the location of motor in the serving room, laundry, and machine shop, and change in the existing wiring and wiring for two arc lamps and two 50-c. p. incandescent lamps. Engrs., E. P. Roberts & Co., Osborn Bldg., Cleveland.

NEW RICHMOND, O.—Bids are asked until Dec. 7 for furnishing the materials and for constructing a plant and water-works, as stated in our advertising columns. J. F. Witmer, Engr., Buffalo, N. Y.; L. F. White, Secy.

PAYNE, O.—H. H. Snyder, Village Clk., writes us that the contract for building the plant for the Payne Electric Light & Power Co. has been let to Rosedale & Williams.

READING, O.—Bids are asked until Nov. 28 for furnishing and erecting one alternating-current generator for incandescent lighting; exciter, switchboard, and machinery and appliances connected therewith. Henry Varleman, Clk.; F. H. Vorjohan, Chn. Com.

INDIANAPOLIS, IND.—The Chenoweth Electric Light & Power Co. has applied to the board of public works for permission to erect poles and string wires in the streets of the city.

BELLAIRE, MICH.—The council is reported to have purchased land on the Cedar River for an electric light and power plant.

NEWAYGO, MICH.—The Newaygo Transmission Co., recently incorporated, with a capital stock of $15,000, proposes to develop the water power at Newaygo, 30 miles north of Grand Rapids, and to transmit electric power to that city and others intermediate. The company has been granted a franchise to erect poles and string wires in Grand Rapids. A. C. Sekell, Elec. Engr., and Chas. F. Pike, of Grand Rapids, and John F. Barry, Civil Engr., 45 Cedar St., New York, and Allston Gerry, Contractor, 445 Produce Exchange Bldg., New York, are interested.

STURGIS, MICH.—This place has voted in favor of building a plant, according to reports.

LITCHFIELD, ILL.—The council has rejected the bids recently received for city lighting.

MILWAUKEE, WIS.—The Cassidy & Son Mfg. Co., 135 West 23d St., New York, has been awarded the contract for furnishing the lighting fixtures for the federal building in this city, at about $11,000.

STEVENS POINT, WIS.—Press reports state that J. Witter, Grand Rapids, and G. W. Paulus, of Chicago, are figuring on purchasing the plant of the Stevens Point Lighting Co., including gas and electric systems. If the deal is carried through a new water-power plant will be erected at the new dam to be built across the river in the spring by Witter, Paulus and others. The plant cost $60,000, and is now in the hands of Receiver V. P. Atwell.

EAST GRAND FORKS, MINN.—Bids are asked until Dec. 6 for constructing a combined plant and water-works to cost about $35,000. W. I. Gray & Co., Engrs., Sykes Bldg., Minneapolis; Henry Haren, Cy. Recdr.

COUNCIL BLUFFS, IA.—The J. C. Hubinger Co., Keokuk, Ia., has applied for a franchise for a plant in this city. It is stated that the contract between the city and the Council Bluffs Gas & Electric Light Co. expires Dec. 1, 1899. Under this contract the city pays the company $84 per annum for each arc light, on the Philadelphia schedule.

HUMBOLDT, IA.—A company has been organized to build a plant. T. G. White is interested.

ODESSA, MO.—A company is reported to have been organized to build a plant to cost $5,000.

NORTHPORT, WASH.—W. R. Lee and Montana capitalists are reported to have been granted a franchise. Work will be begun at once.

TILLAMOOK, ORE.—The city recorder writes us that the city is considering the question of purchasing the plant owned and operated by the Tillamook Lumber Co.

ALAMEDA, CAL.—Ben. F. Lamborn, Cy. Clk., writes us that the city wants to secure catalogues regarding electrical goods, lighting, transmission plants, etc. Bidders' blanks will be sent to those sending their names.

COLTON, CAL.—An election will be held Dec. 12 to vote on the question of issuing $20,000 in 6% bonds for a plant and water-works. G. E. Slaughter, Cy. Clk.

STOCKTON, CAL.—Bids are asked until Dec. 13 for the purchase of a 48-year franchise for building and operating a power plant in San Joaquin county. The Standard Electric Co. of California has applied for such a franchise. I. H. Robinson, Clk.

BARRIE, ONT.—The council is reported to have made an appropriation for a city plant.

LIVERPOOL, N. S.—The council has decided to build a plant and water-works, at a cost of about $31,000, according to reports. J. V. Dexter may be addressed.

HONOLULU, H. I.—It is stated that Fred. J. Cross, Elect. Engr., Buffalo, N. Y., has made a visit to the plant of the Hawaiian Fertilizer Works. Frank A. Cooke, Mgr., is figuring on the use of electricity at the place both for power and in disintegrating material brought for reduction and use. Mr. Cross will submit a report on cost, appliances, etc.

NUREMBERG, GERMANY.—Friedrich Tischendorfer, Ch. Engr. Electricaitats Aktiengesellschaft, formerly Schuckert & Co., manufacturers of electrical machinery, Nuremberg, is visiting the United States for the purpose of purchasing electrical material and machinery. His address while in New York is the Belvedere House.

NEW COMPANIES.—Washington Incandescent Light Co., Seattle, Wash.; $30,000.

Rossland Air Supply Co., Ltd., Rossland, B. C., and 183 St. James St., Montreal, Que.; $200,000; G. K. Milbouren, A. J. McMillan, Rossland; D. J. Fitzgerald, Trail, B. C.; F. Aug. Heiz, Butte, Mont.; to develop water power by the use of compressed air under what is known as the Taylor hydraulic system on Beaver Creek.

Sands Electric Co., Cleveland, O.; $10,000; L. Sands, Edward Velhagen, F. B. Skeels, C. R. Hunt, C. A. Bejcek.

Mitchell-Parsons Electric Co., Portland, Me.; electric car appliances; $150,000; Geo. A. Copeland, Revere, Mass.; Wm. E. Pearson, Winthrop, Mass.

Athens Electric Light & Power Co., Athens, N. Y.; $20,000; Jeremiah M. Shuman, Newburgh, N. Y.

Seymour Park Canal & Power Co., Omaha, Neb.; $100,000; the business of the association is to construct dams, waterways, develop water, electric or other power for private, public and municipal purposes, development of irrigating ditches and the holding and ownership of franchises for rights-of-way; Dr. Geo. L. Miller, Geo. N. Hicks, D. C. Patterson.

SKINNER'S EDDY, PA.—We are informed that on Nov. 12 a charter was granted to the Tuscarora Bridge Co., Traders' Bank Bldg., Scranton, Pa., capital stock, $40,000; to build a four-span iron bridge over the Susquehanna River at Skinner's Eddy; total length, 870 ft. Pres., Chas. S. Knapp, Skinner's Eddy; Secy. and Treas., W. R. Chapin, Wyoming, Pa.; directors, C. S. Knapp and James Rooney, Skinner's Eddy; R. S. Patterson, and W. S. Wilcox, Scranton, Pa.; E. G. La France, A. L. Lindsay and W. R. Chapin, of Wyoming, Pa. A. B. Dunning, Engr., 610 Mears Bldg., Scranton, Pa.

WILKES-BARRE, PA.—The Grand Jury in a report Nov. 12 appropriated $23,000 for the construction of 10 iron and 36 stone arch bridges.

ROME, GA.—Bids are asked until Dec. 3 for furnishing material and constructing a wooden or iron bridge across Bush Arbor Creek. E. P. Treadway, County Clk.

BROOKHAVEN, MISS.—Bids are asked by the county supervisors until Jan. 3 for constructing a steel bridge over the Homochitto River, according to reports. E. P. Ashbury & Son, Engrs., Houston, Tex.

CANTON, O.—The county commissioners received the lowest bids Nov. 15 for a bridge, 100 ft. long, over Nimshillen Creek, at Shack's mills, from the Wrought Iron Bridge Co., Canton, at $3,260, and for a bridge, 131 × 24 ft., at Canal Fulton, from the Penn Bridge Co., Beaver Falls, Pa., at $8,050.

COSHOCTON, O.—The Canton Bridge Co., Canton, O., has been awarded a contract, at $7,249, for the superstructure of the Denman bridge. Newton Speckman, County Audr.

MARIETTA, O.—The bridge committee has recommended the construction of a new bridge at Putnam St.

JACKSON, MICH.—Plans have been approved for a steel foot bridge to be constructed by the Michigan Central Ry. Co., between Van Dorn and Liberty Sts.; two spans 133 ft. and 88 ft., to cost about $2,700. W. S. Kinnear, Asst. Ch. Engr., Detroit.

CHICAGO, ILL.—Bids are asked until Dec. 28 for constructing the substructure and superstructure of an eight-track railway bridge, over the main drainage channel, as described in our advertising columns. James Reddick, Clk. Bd. Trustees, Sanitary Dist.

MINNEAPOLIS, MINN.—On Nov. 25 the council will decide when to ask bids for the structural iron work for the widening of the bridge from Nicollet Island to the East Side.

OLIVET, S. DAK.—J. J. Mueller, County Audr., informs us that the following bids were received Nov. 11 for constructing a 185-ft. span, with an 85-ft. approach and for 40 and 30-ft. span bridges, respectively:

Minneapolis (Minn.) Bridge and Iron Co.	$6,148
Canton (O.) Bridge Co.	6,850
Geo. C. Wise & Co., Council Bluffs, Ia.	6,678
Gillette-Herzog Mfg. Co., Minneapolis, Minn.	5,797
Starr Iron Works, Minneapolis, Minn.	6,582
L. H. Johnson, Minneapolis, Minn.	5,736
B. F. Parks & Co., Cedar Rapids, Ia.	6,426
Clinton Bridge & Iron Works, Clinton, Ia.	5,978
S. B. Howe, Sioux Falls, S. Dak.	5,890
J. B. Marsh & Co., Des Moines, Ia.	6,625
W. S. Hewett	6,920
S. M. Hewett & Co.	6,872
Joliett (Ill.) Bridge & Iron Co.	6,200
J. R. Sheeley & Co., Lincoln, Neb.	6,148
Kansas City (Mo.) Bridge Co.	6,112
Geo. E. King Bridge Co., Des Moines, Ia.	5,675

LEAVENWORTH, KAN.—Bids are asked until Dec. 5 for the construction of seven bridges. J. W. Niehaus, County Clk.

KANSAS CITY, MO.—The Northeast Electric Ry. Co. will construct a new steel bridge at Agnes Ave., to cost about $30,000, according to reports. R. R. Conklin, Vice-Pres.

OAKLAND, CAL.—The county supervisors received the two lowest bids Nov. 7 for constructing a new bridge at Webster St., from the Schmidt Construction Co., at $86,700, and Cotton Bros. & Co., at $92,500.

LEWISTON, IDAHO.—Reports state that the Pittsburg Bridge Co., Pittsburg, Pa., has been awarded a contract at $110,000 for constructing a bridge over the Snake River.

KAMLOOPS, B. C.—It is proposed to construct a bridge over the Thompson River, at the ferry.

CHIHUAHUA, MEX.—It is reported that the Chihuahua & Pacific R. R. Co., No. 80 Broadway, New York, N. Y., has awarded the Pencoyd Iron Works, Philadelphia, Pa., a contract for 36 single spans, one double span and four viaducts, in all about 1,200 tons of steel.

BUILDINGS.

AUGUSTA, ME.—Taber, Carey & Reid, of Augusta, and Alexander Duncan & Co., Boston, Mass., were awarded the contract Nov. 12 for heating the Augusta House, H. E. Capen, proprietor. Two 3,000 ft. sectional Magee steam boilers will be used, with 130 radiators.

BANGOR, ME.—It is reported that the Maine Central R. R. will soon erect a new 36-stall round house at High Head. T. L. Dunn, Ch. Engr., Portland, Me.

BOSTON, MASS.—Bids are asked until Nov. 25 for erecting a wooden school building at the Parental School in West Roxbury; bond, $4,000. H. A. Lamb, Chm., 32 Tremont St.

MIDDLETOWN, CONN.—Plans have been prepared, according to reports, for an addition and alterations to the Hospital for Insane, to cost about $75,000. Dr. C. W. Page, Supt.

BATH, N. Y.—Bids are asked until Nov. 26 for steam heating and ventilating, plumbing, electric light wiring and fixtures, at the New York State Soldiers' and Sailors' Home. O. H. Smith, Secy., Bath.

BROOKLYN, N. Y.—Reports state that George Crosby, 1140 40th St., will erect sixty-one 2-story frame dwellings, 20 × 49 ft., on 40th St., between 12th and 13th Aves.; estimated cost, $172,000. Arch., H. L. Spicer, 326 56th St.

BUFFALO, N. Y.—A new 7-story steel building will soon be erected at Main and Mohawk Sts., to cost about $70,000. Mayor & Weill, of Buffalo, are said to be interested.

EAST HAMPTON (L. I.), N. Y.—Plans are about prepared for erecting a new 3-story hotel at this place, to contain about 50 rooms, for the Maidstone Improvement Co.; estimated cost, $25,000. Rogers & Blyndenburgh, contractors, Babylon (L. I.), N. Y.; J. H. Green, Jr., Arch., Sayville (L. I.), N. Y.

LESTERSHIRE, N. Y.—A special election will be held in this village, Nov. 29, to consider the proposition of erecting a new fire station and municipal building, at a total cost of $24,000, and also of improving the waterworks system. M. S. Squires, Village Pres.

NEW BRIGHTON (S. I.), N. Y.—Bids are asked by the department of public buildings, at 346 Broadway, New York, until Dec. 6, for erecting an automatic low-pressure steam-heating apparatus in the village hall at New Brighton, Borough of Richmond.

NEW YORK, N. Y.—Sullivan & Clark, Binghamton, N. Y., have been awarded the contract for erecting a number of buildings on Ward's Island, for the Manhattan State Hospital, to cost about $110,000.——Plans have been filed by A. C. Hall, 265 West 73d St., for three 5-story brick flat buildings on 13th St., near 7th Ave., to cost $69,000. Archs., Neville & Bagge, 217 West 125th St.; by N. L. McCready, 15 Broad St., for a 12-story brick flat building at 145 and 147 5th Ave., to cost $275,000. Arch., H. Edwards Ficken, 10 West 22d St.; by the Metropolitan Investment Co., 160 Broadway, for a 7-story brick flat and store building at 103d St. and the Boulevard, to cost $150,000. Arch., David W. King, 111 5th Ave.; by Elizabeth Moore, Marmion Ave. and Fairmount Place, for three 7-story brick flat and store buildings on 116th St., near Morningside Ave., to cost $135,000. Arch., Lorenz F. J. Weiher, Jr., 125th St. and Park Ave.; by J. H. Styles, Jr., for four 5-story brick flat buildings on 163d St., near Amsterdam Ave., to cost $80,000. Arch., J. E. Styles; by Jos. & J. A. Pinchbeck, for a 7-story brick flat building at 94th St. and Central Park West, to cost $175,000. Archs., Neville & Bagge, 217 West 125th St.; by John P. Duncan, 9 East 64th St., for a 12-story brick store and loft building at Broadway and Waverley Place, to cost $175,000. Arch., C. P. Sefert, 322 West 31st St.

SYRACUSE, N. Y.—The penitentiary committee of the board of supervisors of Onondaga county has finally decided to recommend that the plans of M. D. Makepeace, of Syracuse, be accepted, having the cell construction work done by the Pauly Jail Building & Construction Co., St. Louis, Mo.; estimated cost, $156,000. Ray B. Smith, Chn. of Bldg. Com.

ATLANTIC CITY, N. J.—It is reported that John L. Young has decided to erect a 4-story brick, steel and concrete building at South Carolina Ave. and the beach. Arch., Harold Adams.

BOONTON, N. J.—David Henry, Paterson, N. J., has received the contract for remodeling the Lathrop Homestead, for aged firemen, at Boonton, for $19,776.

CAMDEN, N. J.—Charles McCaul, of Philadelphia, was awarded the contract, Nov. 15, for the construction of the new U. S. building at Camden, using Vermont marble, at $153,669. The work is to be completed within one year.

McKEESPORT, PA.—The school controllers of this city have asked ten architects to submit plans and specifications for a new 4-story high school building, to be erected on Shaw Ave.; and have also asked bids for $100,000 of bonds for the purchase of the ground and erection of the building, the latter to cost about $55,000.

PHILADELPHIA, PA.—Plans have been filed for a 7-story stone and terra cotta apartment building on 37th St., near Chestnut St., for C. H. S. Littleton, to cost about $60,000. Arch., Harry Peale, Jr., Harrison Bldg.——William R. Dougherty, 1604 Sansom St., has been awarded the contract, and has received a building permit, for the erection of a 4-story brick and iron store building at 1533 Chestnut St., for Herman E. Bonschier; to cost about $25,000. Addison Hutton, Arch.

BALTIMORE, MD.—Reports state that the directors of the Maryland Penitentiary have awarded the following contracts for work in the new penitentiary building. John F. Weyler, Warden: For steam and power plant, including four engines, four boilers, pump, feed water heater, etc., to Wallace Stebbins, $30,002; for electric equipment, including four dynamos, cables, etc., General Electric Co., $18,639; for wiring of interior, court yard, cells, etc., McKay Engineering Co., $14,789; for one Sprague passenger elevator, Morton, Reed & Co., $3,850; for heating of refectory building, Wallace Stebbins, $850; for finishing refectory, including kitchen, bake shop and dry room, J. Henry Miller, $28,824; plumbing, G. W. Walters & Co., $1,458; for interior finish of executive building and warden's residence, J. H. Miller, $9,617; for marble flooring, sills, etc., Evans Marble Co., $6,325; for extra iron work, Krug & Son, $682.

WASHINGTON, D. C.—It is reported that a 4-story building, 100 × 200 ft., will be built in this city before spring, for the Washington Milk Trust, to cost $150,000. Arch., N. T. Haller, 1216 F St., N. W.

SAVANNAH, GA.—The Sprague Elevator Co., 20 Broad St., New York, has been awarded the contract for installing one electric passenger elevator in the U. S. building in this city, at $3,735; time, 90 days.——W. F. May & Co., of Chattanooga, Tenn., has been awarded the contract for erecting the government hospital in Savannah, at $77,934; time, 60 days. For other bids see our last issue.

LA FAYETTE, ALA.—Plans and specifications are asked by the commissioners of Chambers county, until Dec. 1, for a new court house, to cost between $25,000 and $30,000. A. J. Driver, Jr., County Judge.

LEXINGTON, KY.—Fayette county has voted to issue $100,000 of 4% court house bonds.

LOUISVILLE, KY.—Reports state that a 6-story fireproof hotel building will be erected at 5th and Jefferson Sts., at a cost of about $300,000, for Louis and Otto Seelbach, 6th and Main Sts.——A fire in this city, Nov. 19, destroyed the building at 611 West Main St., occupied by the Renz-Bowles Co., wholesale druggists, causing a reported loss of about $80,000; insurance $72,000.

CINCINNATI, O.—We are informed that the University of Cincinnati has awarded the contract for erecting an additional building, to be known as Cunningham Hall, to Jas. Griffith **& Sons, at $36,525.**

LIMA, O.—The board of education has decided not to rebuild the high school building wrecked by the recent cyclone, but to erect a new 16-room building on modern designs, the work to commence at once, to cost about $30,000.

MARIETTA, O.—The people of this county have voted to issue $125,000 in bonds for the erection of a new court house and jail. L. E. McVay, Clk. of Court, informs us that no plans have yet been prepared, nor date fixed as to the receiving of the same. C. M. Grub, John Randolph and William Hadley, County Comrs.

OBERLIN, O.—James Devault, Columbus, O., has been awarded the contract for erecting the Lorain County Children's Home, at Oberlin, at $25,095, using pressed brick.

PORT HURON, MICH.—James O'Sullivan has been awarded the contract for the erection of the new Maccabee temple, to cost about $60,000.

CHICAGO, ILL.—A 3-story brick and stone office building is to be erected for the Goss Printing Press Co., at Paulina St. and 15th Place, to cost about $35,000.——The board of education has been granted a permit for the construction of a 2-story school building, 100 × 110 ft., to be erected at 4314 to 4320 North Ashland Ave., to cost $45,000.

ROCK ISLAND, ILL.—Reports state that the board of education has definitely decided to replace the old Hawthorne school building, on 8th St., with a modern 12-room building, to be erected next year. The cost will be $30,000, and F. Borgolte has been retained to prepare plans.

PEORIA, ILL.—Plans are being prepared for the new Lincoln school building, to cost $40,000. Richardson & Hotchkiss, Archs.

MINNEAPOLIS, MINN.—This city has voted to issue $200,000 in school bonds.

AUSTIN, MINN.—Bids are asked until Dec. 15 for the erection of a brick and stone court house for Hancock county; deposit, $800. H. B. Reed, County Audr.; F. W. Kinney, Arch., Austin.

DES MOINES, IA.—It is reported that the Chicago, Rock Island & Pacific R. R. Co. will erect a $200,000 station in this city.——The people of Polk county have voted to issue $400,000 in court house bonds.

MUSCATINE, IA.—The contract for erecting the new station of the Muscatine, North & South Ry. has been awarded to Magoon & Kincaid, of Muscatine, at $25,000.

PERRY, IA.—A fire here Nov. 20 destroyed a number of buildings in the business section of the city, causing a loss of about $400,000.

SHENANDOAH, IA.—The Chicago, Burlington & Quincy Ry. Co. is said to be planning the erection of a new depot, 24 × 116 ft., at this place.

WEBSTER CITY, IA.—Bids are asked until Dec. 15 for the erection of a church building for the Lutheran Church in this city. J. O. Lenning, Chn. Bldg. Com.; Omeyer & Thori, Archs., St. Paul, Minn.

NADEAU, KAN.—Bids are asked by the Office of Indian Affairs, Washington, D. C., until Dec. 13, for the materials and labor required in the erection of one frame dormitory and school building on the Kickapoo Reservation. Geo. W. James, U. S. Indian Agent, Nadeau, Kan.

YATES CENTER, KAN.—The citizens of Woodson county have voted to issue $30,000 in bonds for the erection of a new court house and jail building.

COLORADO SPRINGS, COLO.—It is reported that the Antlers Hotel, recently destroyed by fire, will be rebuilt, at a cost of about $250,000. E. Barnett, lessee, and Gen. W. J. Palmer may be addressed.

ALBUQUERQUE, N. MEX.—The people of this city are considering the erection of a $30,000 opera house.

SAN FRANCISCO, CAL.—W. H. Wilcox has completed plans for a military hospital to be erected at the Presidio by the government, to cost $170,000.——The following bids were received Nov. 12 by the bureau of yards and docks, Washington, D.C.,for the construction of 12 buildings at the Mare Island navy yard; (a) for work complete, (b) allowing for certain omissions: Dennis Jordan, San Francisco, (a) $169,000, (b) $155,000; Cameron & McDonald, Oakland, Cal., (a), $166,686, (b) $148,786; California Bridge & Construction Co., Oakland, (a) $152,890, (b) $134,370; Philip Sheridan, West Berkeley, Cal., (a) $147,232, (b) $130,708.

MONTREAL, QUE.—Plans are said to be completed for the erection of the new Grand Trunk office building on McGill St., to cost about $400,000.

PUEBLA, MEXICO.—The state legislature has appropriated $1,000,000 for the erection of a new government palace, and $500,000 for a general hospital. Plans have not yet been prepared for the former building.

WATER-WORKS.

BATH, ME.—It is reported that the New England Insurance Exchange, Boston, has recommended that the pumping machinery and that the water supply in general be improved.

ESSEX JUNCTION, VT.—E. E. Russell, Clk., writes us that nothing definite in regard to works has yet been decided upon. A bill is before the legislature to grant this village authority to build works. Population, 1,000.

ARLINGTON, MASS.—The citizens are considering the question of applying for admission to the Metropolitan water district.

BOSTON, MASS.—The council has voted to secure a loan of $200,000 for extending the water mains. John R. Murphy, Water Comr.

HOLYOKE, MASS.—Jas. L. Tighe, Engr. Water Dept., has been directed to complete plans and specifications for a filtration plant at the Whiting St. reservoir; estimated cost, $20,000.

BAINBRIDGE, N. Y.—There is a legal contest on between the Bainbridge Water-Works Co. and the city as to their respective rights. An injunction has been served on the city restraining it from building the proposed municipal works. The case will be argued at Oneonta, Dec. 3. The company claims the exclusive riparian rights to the only stream available, while the city thinks otherwise, and has commenced pipe laying. Thos. L. Randall, Afton, N. Y., has been making surveys for the company.

BINGHAMTON, N. Y.—It is proposed to lower each of the wells about 4 ft. below the present depth, at a cost of about $25,000. Darwin Felter, Supt.

IRVINGTON, N. Y.—Press reports state that the Mack Paving Co., 35 Nassau St., New York, submitted the lowest bid, Nov. 10, at $45,410, for constructing a reservoir for the water-works. The next lowest bidders were: Durkel & Jewell, Irvington, N. Y., at $49,637, and Jas. Duell, Tarrytown, N. Y., at $50,676. T. W. Crisfield. Clk.

LESTERSHIRE, N. Y.—An election will be held Nov. 29 to vote on the question of issuing $14,000 in bonds for a new pumping station. M. S. Squires, Pres. Bd. Trustees.

WATERVLIET, N. Y.—Elnathan Sweet, 13 Tenbroek St., Albany, and Chas. G. Whitbeck have submitted estimates, plans and recommendations for new works, to cost $234,493. The proposed supply will come from the Deepkill. An election will be held Dec. 12. The estimated cost in detail follows: Reservoir—Excavation, masonry, gatehouse, crib, land, $29,025. Conduit—45,400 ft. of 16-in. pipe and crossing Hudson and Mohawk rivers, $85,700. Distribution system—15,000 ft. 12-in. pipe, 25,000 ft. 8-in., 45,000 ft. 6-in., 5,000 ft. 4-in., 10,000 ft. smaller pipe, six canal crossings, rock in trenches, 80 tons of special castings, valves, hydrants, etc., $98,450; add 10% for emergencies, etc., $21,318.

WHITE PLAINS, N. Y.—We are informed that the village is making surveys for several storage reservoirs. No construction will be done before the spring. Improvements are being made in the pumping station by day labor, to render it more efficient. John M. Farley, Consult. Engr., White Plains; Fred Seymore, Supt.

ASBURY PARK, N. J.—The council by a tie vote has decided not to adopt water meters for the city. It is stated that the question may again be brought up at the next election. Councilmen Harvey and Kirkbride may be addressed.

ORANGE, N. J.—J. N. Travis, Supt. Water-Works, writes us that A. J. L. Loretz, 126 Liberty St., New York, will probably complete plans for a supply from Campbells Pond, Milburn township, in a few days. Local papers state that a new pumping station and reservoir will be built at a cost of $50,000, or about $100,000 less than by former plans.

BRADFORD, PA.—We are informed that W. Hanley,Bradford, Pa., has been awarded the contract for building a storage reservoir.

DUBOIS, PA.—Plans are being considered for increasing the water supply. Councilmen Reed, Chn. Com., and Casey may be addressed.

ROCK HILL, S. C.—Guild & Co., Chattanooga, Tenn., were awarded the contract Nov. 15 for building the works for the Rock Hill Water, Light & Power Co., as advertised in Engineering News. The contracts for the materials were let to the following: Cast iron pipe, the American Pipe & Foundry Co., Chattanooga, Tenn.; hydrants and gates, R. D. Wood & Co., Philadelphia, Pa.; stand-pipe, the Lombard Iron Works, Augusta, Ga.; pumps, Henry R. Worthington, Liberty St., New York; air lift, Bacon Air Lift Co., 100 Broadway, New York. J. L. Ludlow, Engr., Winston, N. C.

SPARTANBURG, S. C.—John B. Cleveland and John H. Montgomery are interested in the proposed new gravity works.

TIMMONSVILLE, S. C.—The committee wishes to correspond with manufacturers of machinery for electric light plants and water-works. D. H. Traxter, Chn. Com.

WALHALLA, S. C.—Capt. R. C. Strother, West Union, S. C., writes us that he has been granted a franchise for works for this place, also the privilege of securing water from the head of Cane Creek, four miles from here. The water will be furnished by gravity; only pipe and fixtures are wanted.

PRATT CITY, ALA.—W. G. Powell, Mayor, has called a public meeting to consider the question of building works.

MONROE, LA.—This place voted Nov. 8 to issue $155,000 in bonds for improvements to be used as follows: Water-works and electric light plant, $60,000; sewerage system, $13,000; streets, etc., $50,000.

ALLIANCE, O.—This city voted Nov. 8 to purchase the works of the Alliance Water-Works Co. Councilman Conger, Chn. Com.

CINCINNATI, O.—Chief Engineer G. Bouscaren has submitted to the commissioners plans and specifications for the construction of two settling reservoirs of the new works at California, and also for the laying of two lines of mains connecting the reservoirs with the pumping station. The reservoirs will have a combined capacity of about 345,000,000 gallons, affording periods of 72, 60 and 48 hours' sedimentation for daily outputs of 57,500,000, 69,000,000 and 86,250,000 gallons, respectively.

CUYAHOGA FALLS, O.—This place again voted on Nov. 8 against issuing $60,000 in bonds for works.

NEWARK, O.—The Newark Ohio Water Co. has been incorporated to operate the works of the Newark Water-Works Co., which for the last few years has been in the hands of a receiver. Capital stock, $73,500, with $50 paid in. The plant was built in 1885 by Moffett, Hodgkins & Clark, Syracuse, N. Y. Incorporators, H. C. Hodgkins, Syracuse, N. Y., and W. W. Rice, W. H. Hadcock and N. P. Wardwell, Watertown, N. Y.

NEW RICHMOND, O.—Bids are asked until Dec. 7 for furnishing the materials and for constructing works and a light plant, as stated in our advertising columns. J. F. Witmer, Engr., Buffalo, N. Y.; H. Buckley, Pres. Electric and Water-Works Trustees.

WELLSVILLE, O.—D. A. Davidson, Supt. Water-Works, writes us that the proposed extension to the works, for which $12,000 in bonds were voted Nov. 8, will consist of 6, 8, 10 and 12-in. pipe, to take the place of smaller mains.

MOUNT CLEMENS, MICH.—Henry R. Worthington, 86 Liberty St., New York, has been awarded the contract for furnishing a new pumping engine, at $6,800, according to reports.

MARKESAN, WIS.—The question of building works is being considered, according to reports.

WEST SUPERIOR, WIS.—Press reports state that the Superior Water, Light & Power Co. has decided to build a water filtration plant, etc., at a cost of about $100,000.

PERSIA, IA.—Dr. F. M. Hill writes us that the town will probably spend about $4,500 for a water tank and cast iron water mains. There will be wanted a gasoline engine of about 8 HP., 5,280 ft. of 4 and 6-in pipe, 10 or 12 hydrants, 8 valves, etc.

EAST GRAND FORKS, MINN.—Bids are asked until Dec. 6 for furnishing the materials and for building combined works and electric plant, to cost about $35,000. Population, 3,000. W. I. Gray & Co., Sykes Bldg., Minneapolis, and the Twin City Iron Works prepared the plans. Henry Haren, Cy. Recdr.

LINCOLN, NEB.—Ferdinand Bonstedt, Cy. Engr., has submitted a report and estimates for improving the water supply and replacing mains. Estimated cost, $48,000.

WAMEGO, KAN.—Bids are asked until Nov. 30 for furnishing the materials and for building works, for which $25,000 in bonds were voted Nov. 15. F. S. Haacke, Cy. Clk., writes us that the water supply will be secured from wells. H. V. Hinckley, Engr., P. O. Box 242, Topeka, Kan.

ALEXANDRIA, S. DAK.—The question of building works is being considered, according to reports.

TOPEKA, KAN.—This city voted Nov. 12 to issue $240,000 in bonds for municipal works. It is stated that the validity of the bond issue will be attacked in the courts.

GREAT FALLS, MONT.—Andrew Rinker, Secy. and Treas. Great Falls Water Power & Townsite Co., and Pres. Bd. Water Comrs., writes us that on Nov. 3 the city came into possession of the works by purchase from the Great Falls Water Co., the consideration being $375,000. The plant has a pumping capacity of 8,500,000 gallons a day, 26 miles of main and 265 hydrants. The city sold 5% bonds to the amount of the purchase price, at a premium of $10,105. The management of the works has been placed in the hands of a board of water commissioners, consisting of J. N. Bridges, Herbert Mattison and Mr. Rinker.

GUTHRIE, OKLA.—H. C. Barney, Water Comr., writes us that something will probably be done this winter in regard to a better water supply. A committee is now considering the question. Population, 10,000.

SHAWNEE, OKLA.—Chas. E. Brown, Coffeyville, Kan., is reported to have been awarded the contract for building the proposed works at $32,095. Benj. Dierker, Clk.

BOULDER, COLO.—Press reports state as follows: The plan to purchase the reservoir and rights up Boulder Canon, owned by Mr. Stephens and his associates, has been abandoned for the present, owing to the cost. Although the city recognizes the necessity of a greater water supply, it has been decided to conform to the present arrangements at least until the next municipal election, when, if necessary, bonds may be voted for the purpose.

DENVER, COLO.—J. B. Hunter, Cy. Engr., has submitted a report to Mayor McMurray that works, larger and better than that of the Denver Union Water Co., can be built for $3,700,000. The mayor has recommended the issuance of $6,000,000 in bonds for that purpose. The Denver Union Water Co. some months ago offered to sell its works to the city for $9,000,000.

GOLDEN, COLO.—The Standard Water & Power Co. has been incorporated with a capital stock of $50,000; it will take its water supply from Chicago and Echo lakes; directors, J. M. Walker, C. C. Welsh, F. W. Loveland, H. A. W. Tabor, Henry Lee, Hugh Butler and F. G. Pattison.

NEW WHATCOM, WASH.—Horne & Stone are reported to have submitted the lowest bid, Nov. 8, for building an extension to the works at $14,600.

INDEPENDENCE, ORE.—The question of building municipal works is again being considered, according to reports.

COLTON, CAL.—Another election will be held Dec. 12 to vote on the question of issuing $20,000 in 6% bonds for municipal works. G. E. Slaughter, Cy. Clk.

LAKEPORT, CAL.—An election will be held Dec. 20 to vote on the question of issuing $15,000 in bonds for works.

SACRAMENTO, CAL.—D. A. Lindsley, Pres. Chamber of Commerce, writes us that the chamber is testing the supply from wells with a view to getting the city to change from river water, if the supply from wells is demonstrated to be superior. J. W. Watt, Cy. Tapper, writes that the trustees propose to issue bonds for extending the works and sewerage system, erecting school buildings, etc. No definite plans have been made, but about $130,000 will be expended upon machinery and pipes for the water-works.

SAN FRANCISCO, CAL.—The Union Water Co. has been incorporated, with a capital stock of $390,000, by C. A. Hooper, Geo. W. Hooper, D. C. Henney, E. F. Burrell and W. G. Tibbetts.

JEROME, ARIZ.—This place is reported as considering the question of building works. John Burkes may be addressed.

PHOENIX, ARIZ.—The Arizona Water Co. was incorporated last week in Maine; capital stock, $1,500,000; incorporators, Arthur B. Leach, 2 Wall St., and Osborn W. Bright, 46 Wall St., both of New York.

BRIGHAM, UTAH.—The council is reported as considering a proposition for increasing the water supply from Bay Elder Creek.

SILVER CITY, UTAH.—The Silver City Water Co. has been incorporated, with a capital stock of $20,000. Levi E. Riter, Pres.; C. E. Loose, Vice-Pres.; C. V. Wheeler, Treas.; John W. Hatfield, Secy.

BARRIE, ONT.—This city voted Nov. 7 to issue $100,000 in bonds for the purchase of the works of the Barrie Water-Works Co., and to make certain extensions.

BRANTFORD, ONT.—It is stated that this city has approporiated $20,000 for extending the water mains.

TORONTO, ONT.—Bids are asked until Dec. 5 for furnishing for the coming year such valves, castings, pipe, lead, etc., as may be required. John Shaw, Mayor.

SANTIAGO, CUBA.—Press reports state that Gen. Leonard Wood has assigned Lieut. E. C. Brooks, of the Sixth Cavalry, and the Adjutant-General here, to make plans for new water-works. The construction will be commenced as soon as the plans are completed. The water supply of the city has always been bad, but under the present conditions the supply will be entirely inadequate for the dry season, which is just beginning, and therefore the work of procuring plenty of water will be pushed as rapidly as possible.

IRRIGATION.

SAN DIEGO, CAL.—Reports state that W. T. Gouder has filed on 10,000 cu. ft. of water of the Colorado River for irrigation and developing power in this county and lower California. A canal, 80 miles long and 200 ft. wide, will be constructed to convey water to the New River country.

PHOENIX, ARIZONA.—It is reported that L. V. Navarro, Consul of Mexico, Phoenix, states that the Hudson Reservoir & Canal Co., is arranging to construct a reservoir on Salt River about 60 miles northeast of Phoenix. Plans have been prepared for a dam about 200 ft. high and 600 ft. long at the head of the canyon. It is estimated that the reservoir will cover about 18 sq. miles at a depth of 100 to 200 ft.; estimated cost, about $2,500,000.

PROVO CITY, UTAH.—Reports state that the Telluria Power Co. is interested in an irrigation project to irrigate about 20,000 acres of land. Surveys are being made for a 30-mile ditch from American Fork Canyon to the lands west of Jordan River and north of Utah Lake.

NEW COMPANIES.—Omer Ditch Co., Fowler, Colo.; $10,000; to construct a ditch from Apishapa Creek for irrigation; C. A. Watson, C. B. Miller and G. L. Taylor.

Holbrook Land & Water Co., Provo City, Utah; $300,000; to construct canals, reservoirs, dams, etc., for irrigation, power, etc.; Lafayette Holbrook, Pres.; B. S. Hinckley, Secy. and Treas.; James A. Melville, Vice-Pres.; Joseph E. Ray, Emily A. Holbrook.

Arizona Water Co., Augusta, Me.; $1,500,000, with $500 paid in; to construct, operate and sell irrigating canals, water and water rights; Pres., Arthur B. Leach, and Treas., Osborn W. Bright, of New York.

SEWERAGE.

MIDDLEBORO, MASS.—Chas. C. Grinnell, counsellor-at-law, 30 Court St., Boston, writes us that it is expected that the state board of health will, on Dec. 1, decide the case of the alleged pollution of the Nemasket River by emptying into it the sewage of the town. Should the case be decided against the town it will have to make a number of changes in its system.

STOCKBRIDGE, MASS.—The town has appropriated $15,000, in addition to $7,500, for a system. The committee consists of Dr. Burnette, Marshall Heath, S. A. Cook and D. D. Fenn, according to reports.

BALLSTAN SPA, N. Y.—Bids are asked by the village trustees until 8 p. m., Nov. 25, for constructing the East North St. sewer.

BUFFALO, N. Y.—Bids are asked until Dec. 1 for constructing an 8-ft. 10 × 7½-ft., 7½-ft. and 5¼-ft. brick sewer in Van Rensselaer St. R. G. Parsons, Secy. Bd. Pub. Wks.

BUFFALO, N. Y.—Bids are asked until Nov. 29 for building a 12-in. pipe sewer in Moeller St. R. G. Parsons, Secy. Bd. Pub. Wks.

CATSKILL, N. Y.—Local papers state that arrangements are being made to construct the proposed Pasture Lot sewer, at a cost of about $10,000. Village Trustee Knoll may be addressed.

DEPEW, N. Y.—Press reports state that work on a second section of the proposed system, to cost about $300,000 will soon be begun. About two-thirds of the main sewer, to cost about $80,000, has been built.

JAMAICA (L. I.), N. Y.—The following were the only bids received by the sewer commissioner, 256 Broadway, Manhattan, for building certain sewers in Jamaica, now the 3d Ward of Queens: Jos. Caccavajo & Co., $6,748; Patterson Construction Co., $11,743.

WHITE PLAINS, N. Y.—Wm. B. Sutherland, Village Clk., writes us that the contract for building the addition to the sewerage disposal plant, has been awarded to Alex. S. Traub, New York, at $1,925. The contract for the boilers has been let to M. T. Davidson, 53 Keap St., Brooklyn, N. Y.

PITTSBURG, PA.—Bids are asked until 2 p. m., Nov. 25, for constructing pipe sewers in a number of streets. Edward M. Bigelow, Dir. Dept. Pub. Wks.

SOMERSET, PA.—This place voted Nov. 8 to issue $20,000 in bonds for a system.

YORK, PA.—The York Sewerage Co. has asked for a franchise to build and operate a system. D. H. Lafean and C. H. Dempwolf, of the company, and Councilman Fisher, Chn. Highway Com., may be addressed.

EAST LIVERPOOL, O.—F. H. Croxall, Secy., writes us that the city is about to ask for bids for furnishing eight miles of 12 to 4-in. sewer pipe, to be used in district No. 2. Work will be begun in the spring.

ELYRIA, O.—Bids are asked until Nov. 26 for building a sewer in West St. W. H. Park, Clk. Council.

PIQUA, O.—C. E. Martin, Piqua, has been awarded the contract for building a 4-ft. sewer in Swift St., at $4,124.

TOLEDO, O.—Bids are asked until Dec. 5 for constructing 15 and 12-in. pipe sewers in two streets. L. P. Harris, Cy. Clk.

LAKE LINDEN, MICH.—Press reports state that the citizens are in favor of a system, and it is probable that the question will be voted upon in the spring.

MILWAUKEE, WIS.—The council has been petitioned to build sewers for the Merrill Park district. Walter Stratton, Supt. Sewers; William Murphy, Chn. Com.

MASON CITY, IA.—Bids are asked until Dec. 2 for constructing 7,,060 ft. of 20 to 15-in. pipe sewers; as stated in our advertising columns. Geo. W. Brett, Mayor; W. P. Fitch, Cy. Clk.

NEWTON, KAN.—The South Side Sewer Co. has been granted a franchise to operate a system already built.

ST. LOUIS, MO.—Bids are asked until Dec. 6 for constructing 15 and 12-in. pipe sewers in several streets. Robt. E. McMath, Pres. Bd. Local Improvements.

SEATTLE, WASH.—The question of building sewers in certain streets will be considered by the council Dec. 5. Wm. H. Parry, Cy. Clk.

GRASS VALLEY, CAL.—This place voted Nov. 8 to issue $40,000 in bonds for a system. It is stated that arrangements will be made by the village trustees at once for building the system.

SANTA ANA, CAL.—Williams, Belcher & Co., San Francisco, have the contract for constructing the lateral system at about $37,000. The Los Angeles Sewer Pipe Co., Los Angeles, will furnish the pipe. Work will begin before Dec. 1.

WINNIPEG, MAN.—It is proposed to construct sewers in two streets, at a cost of about $3,500. G. J. Brown, Clk.

VANCOUVER, B. C.—The residents of the West End have petitioned the council to take immediate steps toward the construction of the proposed extension to the system in that part of the city. Aldermen Brown and McMorran may be addressed.

CALLAO, PERU, S. A.—Press reports state that the city authorities have asked the National Manufacturers' Association, Philadelphia, Pa., for specifications for a sewerage system and a drainage system.

GARBAGE DISPOSAL—STREET CLEANING

JERSEY CITY, N. J.—Bids were asked until Nov. 23 for sweeping and cleaning the streets and for removing the ashes and garbage for one year from Dec. 1. The estimate of quantities is as follows: About 1,692 miles of stone pavement swept and cleaned; about 545 miles of asphalt pavement. Jas. S. Nolan, Chn. St. Com.

PHILADELPHIA, PA.—Bids are asked until Dec. 5 for cleaning streets, inlets and public market houses, and the removal of ashes, sweepings, cut grass, household and store waste; for the removal and disposal of kitchen garbage, dead animals, etc.; also for furnishing teams and labor for removing snow from streets surrounding the city hall and the footways of highway bridges crossing the Schuylkill River during the year; and separate bids for the removal of snow from streets specified. Thos. M. Thompson, Dir. Dept. Pub. Wks.

CINCINNATI, O.—Judge Miller Outcalt has in preparation an ordinance to change the present system of handling garbage in Cincinnati. May 27, 1892, the B. of L. passed an ordinance granting to what is now known as the Cincinnati Sanitary Co. the right for ten years to dispose of all the city garbage delivered to the company. The average price per annum that the city, under the contract, is now paying the company is $21,000. The city records show that this contract was made on the recommendation of Dr. Prendergast, who at that time was Health Officer. In his ordinance, Judge Outcalt proposes to not only remove all of the vegetable garbage, but, at the same time, pay the city a sum of money for the same.

CLEVELAND, O.—Local papers state as follows: Health Officer Hess has completed specifications for the collection, removal and destruction of refuse other than garbage, in accordance with a resolution adopted by the citizens' garbage commission. There are 23 sections in the specifications, the most important being the following: Contractors may bid for the collection and removal or the reduction or destruction of the refuse separately or collectively, and no bid will be considered unless accompanied by a check for $10,000. It is estimated that the quantity of refuse to be handled annually is about 11,000 yards, and the bids must be on that basis; bidders must give a guarantee that they will build and put in working order a plant of ample capacity to dispose of the refuse each 24 hours, the work to be begun on the plant within 30 days of the execution of the contract, and to be completed within 120 days thereafter; all collections are to be made between 9 p. m. and 5 a. m.; the contractor shall not be permitted to dump any of the refuse in the lake, river, or any other stream of water within the city limits, nor shall it be disposed of by burying or used for fertilizing purposes until chemically reduced satisfactorily to the health officer; at the expiration of any contract entered into under the specifications the city shall have the right to purchase the plant for the collection, removal and destruction of the refuse.

ALAMEDA, CAL.—B. F. Lamborn, Cy. Clk., writes us that a San Francisco company has applied for a franchise for building and operating a garbage disposal plant. No action has yet been taken.

SAN FRANCISCO, CAL.—Superior Judge Cook has decided that the garbage franchise is only exclusive so far as the county is concerned, and that the scavenger men may move garbage from the county.

STREETS AND ROADS.

NEWTON, MASS.—The aldermen have appropriated $2,100 for the improvement of Walnut St., and are considering a general appropriation of $39,500 for highways.

BROOKHAVEN (L. I.), N. Y.—The county supervisors have appropriated $13,369 for highway work in this town.

HAMILTON, N.Y.—DeWitt C. Hadcock, Stockbridge, N.Y., writes us that the proposed road from Hamilton to Oneida, 18 miles long, will be covered with crushed stone 18 ins. thick and 50 ft. wide, to cost about $50,000.

ROCHESTER, N. Y.—Resolutions have been passed to pave portions of Alexander St., with asphalt; estimated cost, $8,000; Thrush St., asphalt, $26,000, and South Fitzhugh St., asphalt, $11,180. Peter Sheridan, Cy. Clk.

ELIZABETH, N.J.—The council passed an ordinance Nov. 15 for the paving of Magnolia Ave., between Spring and Division Sts., with asphalt, 20 ft. wide.

JERSEY CITY, N. J.—Reports state that Henry Byrne has been awarded a contract for the improvement of Greenville Ave., from the Old Bergen Road to the Boulevard.

JERSEY CITY, N. J.—Bids are asked until Nov. 29 for about 2,300 cu. yds. of earth excavation, 4,300 sq. yds. of asphalt, 3,060 lin. ft. of curbing, etc., on Prospect St. Geo. T. Bouton, Clk. St. Comrs.

MAYS LANDING, N. J.—We are informed that the county board of freeholders has accepted the new gravel road from Mays Landing to Egg Harbor City, a distance of 7 miles. The board, in company with State Comr. of Pub. Roads, H. I. Budd, inspected the site of a proposed new road from Atlantic City to Longport, and ordered J. J. Albertson, Magnolia, N. J., to make a survey and estimates, to be presented in January.

MORRISTOWN, N. J.—Bids are asked until Nov. 29 for macadamizing in Washington township, according to reports. M. B. Lum, Dir. Bd. Freeholders.

ALTOONA, PA.—It is reported that the question of issuing $229,000 in bonds for paving is being considered by the council.

READING, PA.—Bids are asked until 3 p. m., Nov. 24, for 1,700 sq. yds. of asphalt paving. Sam. S. Hoff, Cy. Engr.

WILKINSBURG, PA.—Bids are asked until Dec. 1 for the purchase of $30,000 of 4% street improvement bonds. Arthur Stuart, Chn. Finance Com.

SCOTTSBORO, ALA.—The county commissioners are considering the question of issuing $200,000 in bonds for new turnpike roads.

NEW ORLEANS, LA.—Bids are asked until Nov. 28 for improving Jordan Ave. W. S. Douglas, Comptroller.

LAWRENCEBURG, KY.—A contract to lay brick paving has been awarded to W. A. Newman, Lexington, Ky. J. W. Waterfill, Cy. Clk.

LOUISVILLE, KY.—Bids are asked until Nov. 29 for constructing a granolithic sidewalk on Hill St. Chas. F. Granger, Bd. Pub. Wks.——The board will soon readvertise the asphalt work on East Broadway, West Chestnut, Hepburn Ave. and Von Borries Ave., for which bids have been rejected.

WINCHESTER, KY.—Bids are asked by the county commissioners until Dec. 1 for the purchase of $50,000 of 4% turnpike bonds.

CAMBRIDGE, O.—A petition will be presented to the county commissioners Dec. 5 for the construction of a road. B. C. Johnson may be addressed.

HAMILTON, O.—New bids will be asked by the city clerk for paving on Second St., with asphalt.

SANDUSKY, O.—Reports state that it is proposed to lay 9,749 sq. yds. of paving and 5,200 lin. ft. of curb on Campbell St.; estimated cost, $17,939. I. C. Brewer, Cy. Engr.

TOLEDO, O.—Bids are asked until Dec. 5 for furnishing the material and paving Kenilworth Ave., from Fulton to Cherry St., with Buckeye blocks, etc. L. P. Harris, Clk.

CROWN POINT, IND.—Bids are asked until Dec. 17 for constructing about 20 miles of macadam roads, as stated in our advertising columns. Michael Grimmer, County Audr.

ELKHART, IND.—It is reported that a resolution is before the council for 40,000 sq. yds. of brick paving. D. F. Cordrey, Cy. Engr.

INDIANAPOLIS, IND.—Bids are asked until Nov. 28 for constructing cement sidewalks, grading, etc., on portions of ten streets. M. A. Downing, Bd. Pub. Wks.

TERRE HAUTE, IND.—At the election Nov. 8 Linton township voted to construct 14 miles of gravel roads, and Nevins township 17 miles of gravel roads; estimated cost, about $47,000.

KALAMAZOO, MICH.—The city engineer has estimated the cost of paving on certain streets, which it is desirable to have paved with brick: Main St., from Portage to Church St., $17,146; Main St., from Church to Park St., $4,533; Portage St., from East Main to South St., $5,036; West South St., from South Burdick to Rose St, $4,156, and $6,138 for asphalt. Address Alderman Westbrook.

OWOSSO, MICH.—A petition was presented to the council Nov. 14 for four blocks of asphalt paving.

MOLINE, ILL.—A petition is in circulation to pave all the streets and avenues from and including 5th Ave. to 12th Ave., and between 7th and 15th Sts.

PEORIA, ILL.—An ordinance will be presented to the council for brick paving on South Madison Ave., from Fulton to Franklin St., and Elizabeth St., from High to Main St. The board of local improvements has adopted a resolution to have the engineer submit estimates at the next meeting for brick paving on St. James St. and on 7th Ave.

ST. PAUL, MINN.—Bids are asked until Nov. 28 for grading Rondo St., from Western Ave. to St. Anthony Ave. C. H. Bronson, Clk. Bd. Pub. Wks.

TOPEKA, KAN.—A petition will be presented to the council for paving Huntoon St., 30 ft. wide, from Topeka Ave. to Fillmore St., with brick.

KANSAS CITY, MO.—Bids are asked until Nov. 28 for furnishing the material and for constructing sidewalks of brick, stone and plank, and grading, on certain streets. Henry A. Wise, Cy. Engr.

OMAHA, NEB.—Bids are asked until Dec. 2 for paving with sheet asphalt, brick or stone and curbing on 22d St. Andrew Rosewater, Chn. Bd. Pub. Wks.

HOUSTON, TEX.—Bids are asked until Jan. 9 for repairing about 2,700 lin. ft. of curbing, etc., on Main St. I. A. Miller, Cy. Engr.; P. S. Banner, Secy.

SEATTLE, WASH.—Bids are asked until Dec. 5 for grading Blanchard St., from 1st St. to Western Ave. W. H. Parry, Cy. Clk.

PERKINS, CAL.—The county surveyor will make a survey for the macadamizing of one mile of the road from Perkins to Walsh's Station.

MANUFACTURING PLANTS.

SOUTH HADLEY, MASS.—B. F. Perkins & Son, of Holyoke, Mass., contemplate improving its Stony Brook paper mill, to cost $20,000.

HARTFORD, CONN.—It is reported that a silk manufacturing concern of Lyons, France, contemplates establishing a branch factory in this vicinity, and wish to form a local company to erect a $40,000 building. Oppenheim & Co., of New York, are said to be interested.

BROOKLYN, N. Y.—A fire in this city Nov. 18 destroyed several buildings on Manhattan Ave. and Java St., Greenpoint; estimated loss, $102,900.

FALL RIVER, MASS.—It is reported that James Marshall will erect a one-story building, 165 × 85 ft., and a 4-story building, 210 × 86 ft., in this city for the manufacture of hats.

MIDDLETOWN, CONN.—The E. T. Burgess Cut Glass Co. has voted to increase its capital to $50,000, so as to enlarge its plant.

NEWBURGH, N. Y.—John P. Convery has the contract for the erection of a 2-story brick addition, 39 × 53 ft., to the factory of the Granite City Soap Co., on Liberty St.

SCHUYLERVILLE, N. Y.—The Liberty Wall Paper Co., Nov. 15, received the following bids for the erection of a 2-story building, 400 × 100 ft., with separate engine and boiler house; Archs., M. F. Cummings & Son, Troy, N. Y.:

Lee Bros., Glens Falls, N. Y.	$55,700
Acker & Sons, Glens Falls, N. Y.	55,500
T. W. Riley, Sandy Hill, N. Y.	54,900
Monty, Higley & Co., Sandy Hill, N. Y.	54,800
Ranger & Co., Holyoke, Mass.	54,790
J. H. Findley, Cleveland, O	54,850
J. C. Fuller, Mechanicsville, N. Y. (accepted)	50,600
Bulmer & Haynes, Troy, N. Y.	54,790
Chas. P. Roland, Troy, N. Y.	53,944

WEST BRIGHTON (S. I.), N. Y.—A fire on Nov. 19 destroyed the greater part of the Starin plant, which extends over 2,000 ft. on the water front of the Kill von Kull; loss on the buildings, about $30,000, and on machinery, $400,000.

NEW BRUNSWICK, N. J.—The factory of the P. Carter Bell Co., manufacturers of a rubber substitute, in Highland Park, was destroyed by fire Nov. 11.

BRADDOCK, PA.—The Braddock Wire Co., according to reports, will erect an addition to the plant, costing about $200,000.

CARBONDALE, PA.—Reports state that the Delaware & Hudson Canal Co. will erect a washery near the Racket Brook breaker culm pile.

FIRE HOSE.—Buffalo, N. Y.—Bids are asked until Dec. 9 for furnishing 3,500 ft. of 2½-in. and 1,000 ft. of 3½-in. cotton rubber-lined fire hose. W. S. Grattan, Fire Comr.

PARK.—Trenton, N. J.—A resolution was introduced in the council Nov. 15 providing for the laying out of a park on the ground in the rear of the State Capitol building.

PARK WORK.—Arlington, Mass.—The town voted Nov. 15 to appropriate $45,000 for the improvement of the shores of Spy Pond, and constructing a boulevard around the pond.

TELEPHONE SYSTEM.—Berea, O.—A franchise has been granted to Samuel Rawson and M. B. Brush, of the Rawson Electric Co., Elyria, O., to operate a telephnoe system.

TELEPHONE LINE.—Melbourne, Fla.—It is reported that Simmons Bros., Mountville, S. C., are securing subscribers for a telephone line to run between Ormond and Melbourne.

BOILERS.—Honolulu, H. I.—Bids are asked until Dec. 12 for furnishing two boilers for dredges. Jas. A. King, Minister of Interior. Hawaiian Consulate, 65 Wall St., New York.

PINE TIMBER.—New York, N. Y.—Bids are asked until Dec. 2 for furnishing about 1,683,872 ft. B. M., of sawed yellow pine timber. J. Sergeant Cram, Comr. Docks, Pier A, North River.

TUNNEL.—Point Edward, Ont.—Reports state that the Canadian Pacific Ry. Co. proposes to construct a tunnel under the St. Clair River, at this place. The right of way has been secured.

TELEPHONE.—Springfield, Ohio.—A 25-year franchise was granted F. R. Marsh, as trustee of a new telephone company in this city. It is stated that 256 subscribers have been secured.

DREDGING.—Buffalo, N. Y.—Jas. B. Donnelly, Buffalo, was awarded a contract Nov. 11, at $25,988, for dredging a portion of the Erie Basin. Geo. W. Aldridge, Supt. Bd. Pub. Wks., Albany.

FIREHOSE.—Seattle, Wash.—Bids are asked until 10 a. m., Nov. 25, for furnishing 4,000 ft. of 2½-in. rubber or cotton jacket fire hose, with couplings. Frank Oleson, Secy. Bd. Pub. Wks.

SUPPLIES.—Toronto, Ont.—Bids are asked until Dec. 5 for furnishing lumber, gravel, paving brick, sewer pipe, brass and bronze castings, lead pipe, iron pipe, iron and steel, etc. John Shaw, Mayor.

CONDUITS.—Newark, N. J.—A resolution has been presented to the street and water commission by Commissioner Van Duyne, to require all electric and telephone wires to be placed in underground conduits.

TELEPHONE FRANCHISE.—Duluth, Minn.—Alderman Crossweller has introduced a resolution to ask bids for a franchise for telephone service. The franchise of the Duluth Telephone Co. expires next spring.

WING DAM.—Winona, Minn.—The government has awarded a contract to John Pickley, Dubuque, Ia., at $36,000, for constructing a wing dam on the Mississippi River, below this place, according to reports.

TELEPHONE FRANCHISE.—York, Pa.—W. A. Myers, L. B. Wampler, Lionel Emdrie, R. Hawkins and John Dobbling, all of York, applied to the council Nov. 14 for a franchise to organize the York Underground Conduit Co.

CONDUITS.—Spokane, Wash.—Manager Hopkins, of the Inland Telephone & Telegraph Co., states that the company is contemplating the removal of its wires from the poles and placing them underground. It will cost about $100,000.

PARK WORK.—Chicago, Ill.—The Lincoln Park commissioners are considering the advisability of extending the park from Ohio St. to Diversey Ave., extend the shore line 1,200 ft. into the lake, build a permanent sea wall and to fill in the area between the new shore line and the present limits.

WALL.—Boston, Mass.—Bids are asked until Dec. 5 for building a wall of quarry-faced granite or seam-faced Roxbury stone at Jamaica Park; bond, $2,000. Address Chas. E. Stratton, Latan Pratt, Park Comrs., Jamaica Park, Boston.

BULKHEAD AND FILLING.—Boston, Mass.—Bids are asked for filling and building a bulkhead at the Fens, between Beacon St., and the Harbor Commissioners' line; bond, $4,000. Address Chas. E. Stratton and Laban Pratt, Park Comrs.

TELEPHONE WORK.—San Francisco, Cal.—The Peoples Mutual Telephone Co. has applied to the board of supervisors for an extension of one year's time, to expend $100,000 in improving the system, as provided in the franchise.

REVETMENTS.—Keweenaw Point, Mich.—Bids are asked until Dec. 20 for constructing pile and timber revetments for ship canals across Keweenaw Point, as stated in our advertising columns. Maj. Clinton B. Sears, U. S. Engr., Duluth, Minn.

BUOYS, ETC.—Ottawa, Ont.—Chief Engineer Anderson, Dept. Pub. Wks., has recommended that 25 additional spar buoys be placed in the St. Lawrence channel, between Montreal and Quebec, and also six range lights for which foundations are now being built.

GRANITE STONES.—New York, N. Y.—Bids are asked until Dec. 2 for furnishing about 542 headers and 543 stretchers, containing about 21,446 cu. ft., and 125 coping stones containing about 10,000 cu. ft. J. Sergeant Cram, Comr. Docks, Pier A, North River.

STONE HEADS.—Newark, N. J.—Bids are asked until Dec. 5 for furnishing and constructing stone heads to subways Nos. 1 and 2 under the driveway at Branch Brook park, as described in our advertising columns. A. Church, Secy., Essex County Park Comn., 800 Broad st.

TELEPHONE CONCESSION.—Shanghai, China.—Bids are asked by the council until March 31 for the purchase of a 30-yr. franchise to supply the community with telephone service, as described in our advertising columns. Address Blackall & Baldwin, 39 Cortlandt St., New York.

CANAL.—Lakes Superior and Michigan.—Reports state that a company has been organized by Chas. W. Parker and A. H. Parker, 58 State St., and D. C. Dennison, 78 State St., Chicago, Ill., with a capital stock of $50,000, to construct a ship canal from Lake Superior to Lake Michigan; estimated cost, about $7,000,000.

SHAFTING, PULLEYS, BRICK, ETC.—Yazoo City, Miss.—We are informed that the Yazoo Improvement Co. is putting in new boiler, Corliss engine, pump, etc. It is in the market for a line shaft, friction clutch, friction and fixed pulleys, stands, pillow blocks, belting, fire brick, cement, steam fittings, pipe covering, sewer pipe poles, etc.

PARK WORK.—Oakland, Cal.—A proposition was submitted to a vote Oct. 29 to issue bonds for park work as follows: For the purchase of Adam's Point, 62 acres, $240,000; for the improvement of the same, $50,000; for the improvement of West Oakland Park, $20,000; for the improvement of Independence Square, East Oakland, $10 000.

PARK WORK.—Detroit, Mich.—The park board has accepted plans for the improvement of Palmer Park and for constructing a new driveway leading to the park, from Woodward Ave., about one-half mile in length. ——Park Commissioner Moecker has been instructed to prepare plans for the improvement of the grounds around the pumping station, including the construction of stone bridges.

NAVAL SUPPLIES.—Washington, D. C.—Bids are asked until Nov. 29 for furnishing 10 doz. galvanized buckets, 14 qt.; 2,856 ft. of cast iron water pipe, cast iron bends, etc.; 16,400 ft. of galvanized wrought iron lap-welded water pipe, reducers, ells, tees, etc.; 38 brass globe valves; about 1,500,000 brick; 1,000 bbls. Portland cement; 100 bbls. rock lime; about 4,000 to 5,000 doz. files of various sizes, and for constructing one hydraulic glue press. Edwin Stewart, Paymaster Gen.

CANAL WORK, ETC.—Albany, N. Y.—Bids are asked until Nov. 28 for reconstructing the banks and channel of Glen Creek, at Watkins; improving the channel of Newtown Creek, Horseheads; building a dam across Saranac River, at Saranac Lake; constructing a lighthouse on Cayuga Lake, at State Pier, Cayuga; improving the Cayuga Branch of the Cayuga and Seneca Canal, from Lock No. 10 to Cayuga Lake, and for constructing vertical walls on the tow-path side, building crosswalks, pointing old masonry and building gas pipe railing at First and Oneida St. bridges, Fulton. Geo. W. Aldridge, Supt. Pub. Wks.

TELEGRAPH CABLES.—St. Louis, Mo.—Bids are asked until Nov. 28 for furnishing the materials and for installing fire alarm telegraph cables. The following are the approximate quantities of cables to be installed: 2 conductor, 48,200 ft.; 4 conductor, 3,600 ft.; 6 conductor, 4,200 ft.; 8 conductor, 2,300 ft.; 9 conductor, 1,000 ft.; 10 conductor, 2,200 ft.; 11 conductor, 500 ft.; 12 conductor, 1,200 ft.; 14 conductor, 2,000 ft.; 15 conductor, 900 ft.; 17 conductor, 2,100 ft.; 19 conductor, 2,800 ft.; 24 conductor, 1,200 ft.; 26 conductor, 1,700 ft.; 34 conductor, 1,100 ft.; 36 conductor, 1,700 ft. Silas Benedict, Supt. Fire and Police Telegraph; Isaac H. Sturgeon, Comptroller.

REMOVING WRECK.—Rockland Harbor, Me.—We are informed that the following bids were received Nov. 14 for removing the wreck of the schooner "William H. Jones," as advertised in Engineering News. Maj. R. L. Hoxie, U. S. Engr., Portland, Me.:

Enoch Townsend, Linwood, N. J.	$1,898
Wm. H. Virden & John C. Ross, Lewes, Del.	1,400
Chas. W. Johnston, Lewes, Del.	565
John F. Hamilton, Portland Me.	1,700
Solon S. Andrews, Gorham, Me.	749
Moore & Wright, Portland, Me.	1,450

CONTRACT PRICES.

WATER PIPE.—Pueblo, Colo.—The following bids were received by the north side water trustees Nov. 1, 1898, for furnishing 13,000 ft. of 12-in. and 2,600 ft. of 6-in. pipe, which will be used in constructing new water mains in the northwestern portion of the city: Colorado Fuel & Iron Co., $24 a ton; M. W. Strong, $26.75; R. D. Wood & Co., Philadelphia, $30,50; J. B. Clow & Sons, Chicago, $27.90. The bid of the C. F. & I. Co., at $24 a ton for 6 and 12-in. pipe, and $45 a ton for special pipe was accepted. The terms of payment being 25% cash and balance to be represented by the votes of the board in sums of $1,000 each due in two years.

ELECTRIC LIGHTING.—Rock Island, Ill.—The council received the following bid Nov. 17, 1898, for a combination system of high and low electric lights: People's Power Co., with 2,000-c. p. arc lights—Low lights, for a term of two years, every night and all night, $84 a year; Philadelphia schedule, $74; for three years, all night and every night, $79; Philadelphia schedule, $69; for five years, every night and all night, $75 a year; Philadelphia schedule, $64. Tower lights for a term of two years, every night and all night, $96 a year; Philadelphia schedule, $86; for three years, every night and all night, $91 a year; Philadelphia schedule, $81; for five years, all night and every night, $85; Philadelphia schedule, $74—$5 to be added to the above figures if less than 160 lights are ordered.

PUBLIC LIGHTING.—Seattle, Wash.—The board of public works received the following bids Oct. 31, 1898, for public lighting: Union Electric Co.—Arc lights, each, a month, $8.80; 15 c. p. incandescent, each, a month, $1.32; 30-c. p., each, a month, $1.95. This company, which at present has the city contract, stated in a note accompanying its bid that the reason for a slight advance in prices is caused, first, by the fact that the company raised its employees' wages from 10 to 15% during the past year, and, second, that the price of coal has advanced fully 25% since the last contract was let.

Consumers' Electric Co.—Arc lights, $9; 15-c. p. incandescents, $1.40; 30-c. p., $2.10, and for additional lights, arc, $8.75; 15-c. p., $1.30; 30-c. p., $1.90. The Seattle Gas & Electric Co. offered to put in 100 60-c. p. Welsbach lights at $2 a month. The Snoqualmie Falls Power Co. offered to furnish arc lights in the First, Fourth, Fifth and Sixth Wards, as now distributed, at $7 a month.

LEVEE WORK.—New Orleans, La.—The following contracts were let Nov. 10, 1898, by the U. S. engineers for levee work: St. Rosalie levee, 38,000 cu. yds., Wade Bros. Construction Co., St. Louis, 13½ cts. a cu. yd.; St. Ann levee, 9,900 yds., Michael Cullen, New Orleans, 13.25 cts. a cu. yd.; the Treadaway levee, 11,400 cu. yds., 11.88 cts., and the Butler levee, 1,900 cu. yds., 11.88 cts., were also awarded to Michael Cullen.

ELECTRIC LIGHTING.—Camden, N. J.—The following bids were received from the Citizens' Light, Heat & Power Co., recently incorporated, by the council, Nov. 16, 1898, for lighting the city with electricity from July 1, 1899: One year, arc and incandescent lights, according to plans and specifications; arc lights on poles or arms, 45 cts. a light a night; on underground cables, 60 cts. a night; incandescent lights on poles, 10 cts. a light; on underground cables, 12 cts. a light a night. Three years, arc lights on poles, 40 cts. a light a night; underground wires, 55 cts.; incandescent lights, overhead wires, 8½ cts. a light; incandescent lights, underground cables, 10 cts. a light. Five years, arc lights on arms, 34 cts. a night; arc lights on underground wires, 50 cts.; incandescent lights on posts or arms, 7 cts. a light a night; incandescent lights on underground wires, 9½ cts. The Camden Lighting & Heating Co. declined to put in a bid on account of an order of the court. The committee laid the bids over until after the action of the court. The bids of the Camden Lighting & Heating Co. were $138 a year for arc lights, and $20 a year, or 6 cts. a light a night, for incandescent lights. The bids of the new company, 7 cts. and 9½ cts. a light a night.

PAVING.—Dallas, Tex.—The following bids were received by the council, Nov. 14, 1898, for paving in certain streets: Gilsonite Roofing & Paving Co., St. Louis, excavating, 50 cts. a cu. yd.; remove the bois d'arc blocks, 7 cts. a sq. yd.; lay 6 ins. of concrete, 55 cts. a sq. yd.; 2 ins. of asphalt, $1.60 a sq. yd. C. W. Olcott, Dallas, vitrified brick pavement and furnish all materials, tools and labor, to remove bois d'arc blocks, 8 cts. a sq. yd.; excavation, 20 cts. a cu. yd.; lay No. 1 concrete, 63 cts. a sq. yd.; No. 2 concrete, 76 cts.; brick surface, 97 cts. Texas Construction Co., Galveston, lay 2 ins. No. 1 concrete, $1.89 a sq. yd.; No. 2 concrete, $2; No. 4 concrete, $1.74; grading, 10 cts. a cu. yd.; removing bois d'arc blocks, 8 cts. a sq. yd. Standard Light & Power Co., Dallas, grading, 35 cts.; remove bois d'arc blocks, 10 cts.; lay No. 1 concrete, 75 cts.; No. 2 concrete, 85 cts.; lay 6-in. hexagon bois d'arc blocks, $1.50 a sq. yd.; 7-in. hexagon bois d'arc blocks, $1.55, and 8-in. hexagon bois d'arc blocks, $1.60. Franklin Fireproofing Co., Dallas, asphalt pavement No. 3 on top of concrete foundations No. 1 or No. 2, $1.92. This company offered a 10 years' guarantee if paid $1.97 a sq. yd. Barber Asphalt Paving Co., New York, remove blocks, 5 cts. a sq. yd.; excavate, 5 cts. a cu. yd.; lay No. 1 concrete, 42 cts. a sq. yd.; No. 2 concrete, 50 cts.; lay No. 1 asphalt, $1.80; No. 4 asphalt mixture with No. 2 concrete, $2.12, the pavement to be 4 ins. of asphalt, 1 in. binder and 1½ ins. wearing surface. Brown & Dabney, Dallas, submitted bids on asphalt, vitrified brick and bois d'arc paving. For asphalt, grading, 30 cts. a cu. yd.; remove bois d'arc blocks, 6 cts. a sq. yd.; lay No. 1 concrete, 45 cts.; No. 2 concrete, 58 cts.; asphalt, $1.80 a sq. yd. For vitrified brick the bids for grading, removing blocks and laying concrete were the same, and to lay brick pavement, with No. 1 concrete surface, $1.82 a sq. yd.; with No. 2 concrete surface, $1.95. For bois d'arc pavement the bids for grading and removing blocks were the same. 6-in. hexagon bois d'arc blocks, $1.45; 7-in. hexagon bois d'arc blocks, $1.48, and 8-in. hexagon blocks, $1.51. They also offered to put in new bois d'arc at $1.17 and to resaw the old blocks to 6 ins. long and replace them at $1 a sq. yd. Ayers Asphalt Paving Co., Zanesville, O., excavating, 18 cts.; remove the old blocks, 10 cts. a cu. yd.; lay No. 1 concrete, 53 cts.; No. 2 concrete, 60 cts.; and No. 1 asphalt, $1.65. On pavement No. 4, being 4 ins. of concrete, 1-in. binder and 1¼ ins. top, concrete No. 1, 43 cts.; No. 2, 50 cts.; asphalt No. 4, $1.48 a sq. yd. All the bids are for a 5-year guarantee.

REPAIRING ASPHALT PAVEMENT.—Scranton, Pa.—We are informed that the following bids were received Nov. 17 in select council for repairing asphalt pavement: Jos. P. Phillips, Cy. Engr.; about 166,000 sq. yds. of asphalt pavement being out of bond at present:

	Repairing, etc., per annum, 10 yrs.	Resetting curb.	Redressing and resetting curb.	New curb.	Circular curb.	New pavement.
[1]‡Barber As. Pav. Co.	*$17,520	$0.10	$0.25	$0.53	$0.90	$2.50

---

[1]New York; [2]Philadelphia, Pa; [3]Newark, N. J.; *lump sums; ‡awarded contract by the select council but not yet by the common council.

BRICK PAVING, ETC.—Indianapolis, Ind.—The following bids were received by the board of public works, Nov. 12, 1898, for brick paving in Miami St., from Delaware to Alabama St: W. C. Allen, brick, $1.23 a sq. yd.; W. H. Abbott, Poston blocks, $1.27; Daniel Foley, brick, $1.29; and Joseph Cooper, blocks, $1.31.——The following bids were also received for laying cement sidewalks in College Ave.: W. A. Bruce, 69 3-5 cts. (accepted); J. C. Veney, 71 cts.; Julius Keller, 71 cts.; W. C. Allen, 76 9-10 cts.; Rogers & Dunlop, 78 cts.; C. M. Kirkpatrick, 78 cts.; R. B. Drake, 79 cts.

COUNTY BRIDGES.—Council Bluffs, Ia.—The county supervisors last week let the following contract for building county bridges from April 1, 1899, to April 1, 1900, to C. E. H. Campbell, Council Bluffs, who holds the contract for the present year: Wooden pile bridges, $4.75 a lin. ft.; steel spans, 40, 45, 50 ft., $9 a lin. ft.; 55, 60, 65 ft. spans, $10 a lin. ft.; 70, 75, 80 ft., $12 a lin. ft.; 85 to 100 ft., $13 a lin. ft.; for combination spans on pile piers, 40, 45, 50 ft. spans, $7.50 a lin. ft.; 55, 60, 65 ft. spans, $8.50 a lin. ft.; 70, 75, 80 ft. spans, $9.50 a lin. ft.; 85 to 100 ft. spans, $12 a lin. ft.; 36-in. wrought iron cylinders, price per four cylinders, 14 ft., $5.50; 16 ft., $6.50; 18 ft., $7; 20 ft., $7.50; 22 ft., $8; for 24-in. wrought iron cylinders piers, price per four cylinders, 14 ft., $3.50; 16 ft., $4; 18 ft., $4.20; 20 ft., $4.80; 22 ft., $5. Repairs, oak piling furnished and driven, ten miles or less from Council Bluffs, 40 cts. a lin. ft; over 10 and under 21 miles, 50 cts. a lin. ft.; 21 miles and over, 60 cts. a lin. ft. All piles 20 ft. and under are to be of red cedar.

LAYING WATER-PIPE.—Cincinnati, O.—We are informed that the following contract has been awarded to Geo. W. Murray, 531 Clinton St., Cincinnati: For laying water-pipe in Baltimore Ave, 3-in. pipe, 125 ft., 12½ cts. a ft.; 4-in. pipe, 200 ft., 12½ cts.; 6-in. pipe, 6,200 ft., 12½ cts.; total, $815.63. The highest bid was as follows, submitted by McCarren & Dowson, Hyde Park: 3 and 4-in., 24 cts.; 6-in., 25 cts.; total, $1,628. John D. Harris, Asst. Clk. Bd. Cy. Affairs; A. B. Rattermann, Pres.

CONDUIT EQUIPMENT.—Erie, Pa.—Bids were received by the council Nov. 18, 1898, for conduit equipment. The contract for underground work was awarded to Kraft & Walther, at 10½ cts., 9½ cts. and 8½ cts. a ft. of 3-in. ducts in 3, 5, and 8-in. conduits; 22 cts. for iron pipe; $34, $24, and $11 for manholes, A, B and C, and $5 for each service box. B. J. Murphy, Mayer Bros. and Geo. B. Kelley & Co., of Chicago, were the other bidders and the proposals were quite close. For poles and wires there were bids from G. B. Kelley & Co., and from Kraft & Walther. This portion of the work was awarded to Kelley & Co., at $20 for 60-ft. poles; $18 for 50-ft. poles, and $1.25 for ten-pin cross arms.

BRICK PAVING.—Sistersville, W. Va.—The following contract for 539 sq. yds. of brick in paving Hill St., was awarded to W. F. Rice, as follows: Excavation, 20 cts. a cu. yd.; curbing, 24 × 5 ins., 40 cts.; curbing, 16 × 6 ins., 30 cts.; curbing, 20 × 5 ins., 40 cts.; paving with Spilman No. 2 brick, 79 cts.

INDUSTRIAL NOTES.

THE DICKSON MFG. CO., Scranton, Pa., is reported to have an order for 10 locomotives for the Santa Fe Pacific R. R.

THE BELKNAP MOTOR CO., Portland, Me., has elected the following officers: Pres. and Gen. Mgr., Geo. W. Brown; Treas., Chas. L. Baxter; Clk., Seth L. Larrabee.

THE MORRIS MACHINE WORKS, Baldwinsville, N. Y., has an order, according to reports, for 14 double-suction, centrifugal pumps of large capacity to be used on the Siberian & Manchuria R. R.

THE SAFETY APPLIANCE CO., LTD., Wentworth Bldg., Boston, has an order from the Canadian Pacific Ry. to place on its cars the former's equalizer, which is intended to prevent the sliding of wheels, the tilting of the truck frame and the surging of the car body.

C. L. BERGER & SONS, 9 Province Court, Boston, Mass., have succeeded the former firm of Buff & Berger, manufacturers of engineering and surveying instruments, at that address. Mr. G. L. Buff, of the old firm, has withdrawn, and Mr. C. L. Berger has associated himself with his sons, Messrs. W. A. and L. H. Berger. The firm will continue the manufacture of mathematical and astronomical instruments.

THE STIRLING CO., Pullman Bldg., Chicago, has acquired all the patents, rights, etc., heretofore owned by the Cramp Co., Philadelphia, covering water-tube boilers for marine purposes, viz., the Niclausse, Yarrow and Mosher patents, and has entered into a contract with the latter company to manufacture all boilers that it may require for a period of years. The first order under the contract is for about 35,000 HP. for Russian warships, now under construction at the Cramp yards in Philadelphia. The company also proposes to introduce the boilers in merchant vessels. The manufacture and sale of marine boilers will not interfere with the regular business of the Stirling boiler, which will be made for stationary purposes as before. The officers of the company are: Pres., O. C. Barber; Vice-Pres., J. K. Robinson; Treas., E. R. Stettinius, and Supt., H. S. Pell.

THE HARRISBURG FOUNDRY & MACHINE CO., Harrisburg, Pa., is about ready to enlarge its plant. Five acres of land have been purchased between 7th and Emerald Sts., alongside of the Pennsylvania R. R., on which will be built a brick and steel building, 140 × 260 ft. Contracts for this work are about to be let, and it is expected to have a portion of the new plant occupied and in operation by March 1, 1899. The present plant, which has been occupied over 30 years, will be gradually abandoned. The new plant will contain two 200-HP. high-pressure boilers and a four-valve, tandem compound Harrisburg Standard engine of the company's manufacture, direct-connected to dynamos of 40 to 50 K-W. capacity each. The building will be arranged for the transmission of both electric and steam power, and will have two 20-ton electric cranes, one each in the machine shop and in the foundry. The foundry will be 90 × 100 ft., and the machine shop, 50 × 122 ft., adjoining a 45 × 45-ft. smithy. In the yard will be a 15-ton radial crane swinging in a 90-ft. circle. There will also be a 45 × 50-ft. pattern shop and a 30 × 75-ft. pattern storage room. The plant will be supplied with artesian wells and with a complete system of drainage. It is estimated that the plant will cost fully $200,000. The business of the company has increased 30% over 1897, the annual output aggregating about 230 engines. The company has orders at present for 40 or 50 engines, and has built since 1883 2,500 engines aggregating 300,000 HP. Mr. Wm. R. Fleming is the Vice-President and General Manager of the company.

NEW COMPANIES.—New York & New Jersey Land & Development Co., 243 Washington St., Jersey City., N. J.; $125,000, with all paid in; to improve, irrigate and reclaim lands, etc.; Chas. N. Conklin, Chas. N. King and Al McMahon, all of Jersey City.

Arion Mfg. Co., Boston, Mass.; $100,000, commencing with $200; to manufacture and sell brass, iron, nickel, etc.; A. W. Ottignon, Wm. P. Morse, Wm. S. Jones and Allen C. Goss, all of Boston; Jos. W. Green, Providence, R. I.

Supreme Stove & Furnace Co., 45 Stuben St., East Orange, N. J.; $300,000, commencing with $1,000; to manufacture furnaces, stoves, etc.; John E. Wheeler, East Orange; A. F. Denniston and Charles Warburton, of New York; Robert L. Braekett, Bensonhurst, Brooklyn, N. Y.

W. M. Pawley, 166 Main St., Asbury Park, N. J.; $25,000, commencing with $2,600; to manufacture hardware, plumbing material, etc.; Wm. M. Pawley and Elva F. Pawley, Asbury Park; Annabelle Kent, East Orange, N. J.

Columbia Filter Co., Camden, N. J.; $10,000; to manufacture water filtering apparatus; Thomas D. Finletter, Walter C. McAdoo and Thomas L. Mattson, 419 Market St., Camden, N. J.

PERSONAL.

Mr. E. O. F. Mahr, civil engineer and surveyor, has opened an office at 10 Bruen Ave., Irvington, N. J.

Mr. Fred. Metcalf, civil engineer, was married Nov. 16, to Mrs. Mary Thornton, of Nuhda, N. Y.

Mr. William Mahlon Davis has been appointed City Engineer and Superintendent of Water-Works of Berlin, Ont.

Mr. Edward M. Boggs, civil and hydraulic engineer, has been elected a member of the Chamber of Commerce of Los Angeles, Cal.

Mr. James A. Kelley, civil engineer, of Syracuse, N. Y., Assistant Engineer on the Delaware R. R., was married Oct. 26 to Miss Frances Kelley, of Andes, N. Y.

Mr. Elmer N. Gay, civil engineer on the Pittsburg & Western Ry., of Greensburg, Pa., was married at Youngstown, O., Nov. 8, to Miss Allie Jeannette Shannon, of Evans City, Pa.

Mr. A. G. Menocal, M. Am. Soc. C. E., Civil Engineer, U. S. N., retired, has been detached from duty with the Nicaraguan Canal Commission and ordered to the naval station at San Juan, Porto Rico.

Mr. W. H. Harris, Master Mechanic of the St. Louis Iron Mountain & Southern Ry., in charge of the shops at De Soto, Mo., has resigned on account of ill-health, after 20 years' service with that company.

Mr. Frank Harris, Chief Clerk to the Superintendent of the McCook Division of the Burlington & Missouri River R. R. in Nebraska, with headquarters at McCook, Neb., has been promoted to be Assistant Superintendent.

Mr. P. M. Serdobin, a machinery dealer, of St. Petersburg, Russia, is visiting the United States for the purpose of purchasing machinery and arranging to carry additional lines. He was in Philadelphia last week.

Mr. John C. Barclay has been appointed Electrician of the Western Division of the Western Union Telegraph Co., with headquarters at Chicago, Ill., to succeed Mr. Charles H. Summers, whose death was noted in our issue of Nov. 10.

Mr. William M. Greene, General Manager of the Baltimore & Ohio R. R., with headquarters at Baltimore, Md., has been appointed General Manager of the Baltimore & Ohio Southwestern Ry., with headquarters at Cincinnati, O., to succeed Mr. I. G. Rawn.

Mr. H. T. Porter, Engineer of Maintenance of Way of the Pittsburg, Bessemer & Lake Erie R. R., with headquarters at Pittsburg, Pa., on Dec. 1, will become Chief Engineer, and his present office will be abolished. His headquarters will remain at Pittsburg.

Mr. Bernard M. Shanley, President of the North Jersey Traction Co., with headquarters in Jersey City, N. J., has been elected President of the Essex & Hudson Gas Co., a new company which has been formed by the consolidation of the gas plants in Newark, N. J. The capital stock of the company is said to be $12,500,000.

Mr. Chas. Evan Fowler, M. Am. Soc. C. E., for the past six years Chief Engineer of the Youngstown Bridge Co., Youngstown, O., has resigned his position, and, accompanied by his family, will spend the winter in Los Angeles, Cal. His address will be 1023 West 36th St. He intends to return east in the spring to engage in professional work.

Mr. August C. Christensen, consulting and contracting engineer, has recently returned from Shanghai, China, where he has been engaged in arranging a water supply system for the inland city, involving two 2,000,000-gallon high duty pumping engines, a 50,000-gallon water tower, 100 ft. high, and 15 miles of mains, including hydrants, etc. He has removed his office from 120 Liberty St. to 141 Broadway, New York city.

Mr. John Galt, M. Can. Soc. C. E., for the past three years connected with the Department of Civil Engineering in the University of Toronto, Toronto, Ont., has been appointed City Engineer of Ottawa, Ont. He is a native of Scotland and a graduate of the Universities of Glasgow and of London. He came to the United States in 1878 and engaged in railway engineering. From 1881 to 1885 he was General Manager of the Boiler Inspection & Insurance Co. of Canada. Since then he has been practicing as a consulting engineer with offices in Toronto.

OBITUARY.

Mr. Gardner P. Morey, civil engineer, of Nassau, N. Y., died Nov. 15, aged 59.

Mr. Seabury Belden, of the firm of Seabury & E. S. Belden, Hartford, Conn., contractors on government breakwaters, died Nov. 28, aged 82.

Col. W. B. Mendenhall, President of the American Sewing Machine Co., for the past 30 years, died in Atlantic City, N. J., Nov. 27, aged 70. He was a veteran of the Civil War.

Col. Chalmers Scott, civil engineer, San Diego, Cal., died Nov. 16. He was born in New Orleans, La., May 9, 1845, and graduated from the University of New York, New York city. In 1872 he was Chief Engineer of the Texas Pacific R. R. survey and in 1880 he entered the employ of the California Southern Ry.

Mr. Philip Golay, M. Am. Soc. C. E., Assistant United States Engineer in charge of Locks and Dams on the Monongahela River, died of heart failure at his home in Morgantown, W. Va., Oct. 31, aged 71. He was born at Vevey, Ind., and was an immediate descendant of the Swiss colony that settled that place. For 26 years he was engaged in railway construction in Ohio, Missouri and Kansas, and during the winter of 1881-2, he was employed on the construction of the long trestle over Lake Ponchartrain for the New Orleans & North Eastern Ry. For the past 20 years he had been employed by the U. S. Government as an Assistant U. S. Engineer, at first on the Ohio River Improvement at Grand Chain and afterwards on the Monongahela River. He was elected a Member of the American Society of Civil Engineers, Sept. 5, 1877.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

BROOKLYN INSTITUTE OF ARTS AND SCIENCES.
Dec. 2. Secy., Henry I. Weed, Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.

CHICAGO ELECTRICAL ASSOCIATION.
Dec. 2. "Practical Points in Street Railway Engineering," W. A. Harding. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.

THE ENGINEERS' CLUB OF PHILADELPHIA.
Dec. 3. "Cement and Cement Testing Laboratories," R. W. Lesley. Secy., L. F. Rondinella, 1122 Grand St., Philadelphia, Pa.

ENGINEERS' CLUB OF COLUMBUS.
Dec. 3. Secy., H. M. Gates, 12½ North High St., Columbus, O.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Dec. 5. Secy., H. J. March, Library Bldg, Buffalo, N. Y.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Dec 5. Secy., C. L. Annan, City Engineer's Office, St Paul, Minn.

FRANKLIN INSTITUTE.
Dec. 6. "Reaction Velocity," Robert H. Bradbury; Dec. 13. "Commercial Photometers and Light Standards," Prof. A. J. Rowland; "The Kite as an Instrument in Meteorological Research," Prof. C. F. Marvin; Dec. 14. Fresh Studies of Pioneer Tools," Prof. H. C. Mercer. Secy., Wm. H. Wahl, 15 South Seventh St., Philadelphia, Pa.

ENGINEERS' CLUB OF ST. LOUIS.
Dec. 7. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

FOUNDRYMEN'S ASSOCIATION, PHILADELPHIA.
Dec. 7. Secy., Howard Evans, Pier 45, Delaware Ave., Philadelphia, Pa.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Dec. 7. "Some Experiments on Bridges Under Moving Train Loads," F. E. Turneaure. Secy., C. W. Hunt, 220 West 57th St., New York city.

WESTERN SOCIETY OF ENGINEERS.
Dec. 7. "Electrolytic Corrosion of Underground Structures," Prof. D. C. Jackson. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.

CANADIAN SOCIETY OF CIVIL ENGINEERS.
Dec. 8. Secy., C. A. McNab, 112 Mansfield St., Montreal, Canada.

ENGINEERING ASSOCIATION OF THE SOUTH.
Dec. 8. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.

ST. LOUIS RAILWAY CLUB.
Dec. 9. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.

MONTANA SOCIETY OF ENGINEERS.
Dec. 10. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

THE LOUISIANA ENGINEERING SOCIETY.
Dec. 12. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

ENGINEERS' CLUB OF KANSAS CITY.
Dec. 12. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.

DENVER SOCIETY OF CIVIL ENGINEERS.
Dec. 13. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Col.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Dec. 13. Secy., Wm. H. Searles, Case Library Bldg., Cleveland.

NORTHWEST RAILWAY CLUB.
Dec. 13. Secy, T. A. Foque, Soo Line, Minneapolis, Minn.

NEW ENGLAND RAILWAY CLUB.
Dec. 13. Secy., Edw. L Janes, P O Box 1158, Boston, Mass.

NEW YORK RAILROAD CLUB.
Dec. 15. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.

ENGINEERS' CLUB OF CINCINNATI.
Dec. 15. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.

SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Dec. 15. Secy., F. A. Charpiot, P O Box 13, Savannah, Ga.

AMERICAN INSTITUTE AND THE HENRY ELECTRICAL SOCIETY.
Dec. 16. "Light," William Hallock. Secy., D. R. Lovejoy, 111 W. 38th St., New York city.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Dec. 16. Secy., F. H. Olmsted, Byrne Bldg., Los Angeles, Cal.

ROCHESTER ENGINEERING SOCIETY.
Dec. 16. Secy., John F. Skinner, Reynolds Library Bldg., Rochester, N. Y.

NORTHWESTERN TRACK AND BRIDGE ASSOCIATION
Dec. 16. Secy., D. W. Meeker, St. Paul, Minn.

ENGINEERS' CLUB OF PHILADELPHIA.
Dec. 17. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Dec. 19. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

ENGINEERS' CLUB OF MINNEAPOLIS.
Dec. 19. Secy., H. E. Smith, 1620 S. E. 14th St., Minneapolis, Minn.

TECHNICAL CLUB OF OMAHA.
Dec. 19. Secy., J. Harry Lawrie, Omaha, Neb.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA
Dec. 20. Secy., R. A. Fessenden. 410 Penn Ave., Pittsburg, Pa.

WESTERN RAILWAY CLUB.
Dec. 20. Secy., F. M. Whyte, 225 Dearborn St., Chicago, Ill.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Dec. 21. Secy., Frank H. Olmsted, Los Angeles, Cal.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Dec. 21. Secy., S. E. Tinkham, City Hall, Boston, Mass.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Dec. 21. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
Dec. 28. Secy., Ralph W. Pope, 26 Cortlandt St., New York city.

AMERICAN INVENTORS' AND MANUFACTURERS' ASSOCIATION.
Jan. 15. Annual meeting, Washington, D. C. Secy., Arthur Steuart, Washington Loan and Trust Bldg., Washington, D. C.

NORTHWESTERN ELECTRICAL ASSOCIATION.
Jan. 19-21. Semi-annual meeting, Milwaukee, Wis. Secy., Thos. R. Mercein, 511 Montgomery Bldg., Milwaukee, Wis.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Jan. 20. Annual meeting. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

NATIONAL ASSOCIATION OF MANUFACTURERS.
Jan. 24-26. Annual convention, Cincinnati, O. Secy., E. P. Wilson, Room A, Chamber of Commerce, Cincinnati, O.

ENGINEERS' CLUB OF CINCINNATI.—A regular meeting of this Club was held Nov. 17. The evening was given up to a discussion of macadam road construction.

AMERICAN INSTITUTE, Electrical Section.—This Society, in conjunction with the Henry Electrical Society, held a meeting on Nov. 26, at Cooper Institute, New York city, at which Prof. Wm. A. Anthony presented a lecture on "Heat."

CONNECTICUT STREET RAILROAD ASSOCIATION.—The 4th annual meeting of this association was held Nov. 18, at New Haven, Conn. The following officers were elected for the ensuing year:

Pres., Henry S. Parmlee; Vice-Pres., E. J. Hill; Secy., B. W. Porter; Treas., E. S. Goodrich.

ENGINEERS' CLUB OF PHILADELPHIA.—The last regular meeting of this Club was held Nov. 19 with 95 members and visitors present. The paper of the evening, "Engine and Boiler Testing," by Prof. H.W. Spangler, described methods and apparatus that should be used, and precautions which must be taken, to obtain the greatest possible degree of accuracy in the results of engine and boiler tests.

ENGINEERS' CLUB OF COLUMBUS.—At the regular meeting of this Club, held on Nov. 19, Mr. E. Eysenbach read a paper, entitled "Fuel Gas." The following topics, postponed from Nov. 5, were discussed: "Mechanical vs. Natural Draft for Power Stations," "Protected Wooden Floors vs. Fireproof Steel Construction in Office Buildings," "Relative Merits of Dry and Leaded Joints in Wrought Iron Water Pipes."

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.—This Society held a meeting on Nov. 23, after inspecting a device for raising street cars up "Selby Avenue Hill." This is known as the Bronsdon counterbalance system, and in this case operates for a distance of 1,000 ft.; 500 ft. of which is on a 16% grade with 200 ft. on a curve and the remainder on a slight grade.

An invitation to visit the beet sugar plant at St. Louis Park, extended by the Engineering Society of Minneapolis, was accepted.
C. L. Annan, Secy.

ENGINEERS' CLUB OF ST. LOUIS.—The 479th meeting of this Society was held Nov. 16 with 45 members and visitors present. After a committee to nominate officers for the ensuing year had been appointed, Prof. J. B. Johnson presented a paper, entitled "The Engineer as the Guardian of Public Health." The paper dealt with the various means by which the injurious bacteria found their way into the human system, and stated that it is very largely the scope of the engineer to supply means of prevention of such infection, such as the proper building and cleaning of streets, removal of sewage and the supplying of pure drinking water. The author traced some of the unsanitary arrangements of St. Louis residences and criticised some defects of its sewer system. As St. Louis is provided with surface water from the Mississippi River, itself a great natural sewer, and as the sewage from Chicago will soon be turned into this river, it will be an absolute necessity to provide a filtration plant for the St. Louis water supply.
E. R. Fish, Secy. pro tem.

NEW PUBLICATIONS.

SLIDE-VALVE DIAGRAM CHART.—Diagram on Card 9¼ × 11 ins., and book 4 × 6 ins; pp. 24. By M. R. Conway, M. E. The Lunkenheimer Co., Cincinnati, O.

This chart is designed to provide a convenient means for following the movements of a slide-valve, with reference to the positions of the crank, and the eccentric, without the aid of formulas or drawings. It is a very ingenious contrivance, and will be appreciated by students of slide-valve motions. The chart and book may be obtained free on application.

AMERICAN STREET RAILWAY ASSOCIATION.—Report of the Annual Meeting, 1898. Secy., T. C. Penington, 2020 State St., Chicago. Paper, 8vo; pp. 255.

This volume contains a full report of the proceedings of the seventeenth annual meeting, held at Boston, Mass., in September, which were reported in our issue of Sept. 15. It includes the reports and papers presented, with the discussions thereon, and also the speeches, notes of the excursions, record of attendance and membership, etc.

NATIONAL SANITARY ASSOCIATION.—Proceedings of Meetings Held at Brooklyn, N. Y., in 1896, and Nashville, Tenn., in 1897. Capt. Thos. E. Veal, Secretary, Atlanta, Ga. Paper; 6 x 9 ins.; pp. 80.

This society was organized in 1895. The proceedings here given for 1896 occupy 65 pages and those for 1897 only 15 pages of the pamphlet. Two short papers on garbage disposal, relating principally to the experience at Atlanta, are the principal ones of possible value to engineers.

WATER SUPPLY AND IRRIGATION PAPERS OF THE U. S. GEOLOGICAL SURVEY. No. 17.—Irrigation near Bakersville, Cal., by Carl Edward Grunsky; No. 18.—Irrigation near Fresno, Cal., by Carl Edward Grunsky. Washington, D.C. Paper; 9x5¾ ins.; pp. 96 and pp. 94. Maps and views.

These two separate papers treat in detail of the hydrography, methods of irrigation adopted and the results achieved for the separate canals and ditches in the sections named. In the San Joaquin Valley the methods of irrigation cover flooding, irrigation by furrows, by saturation of subsoils and by subsurface conduits, and each is separately described. Soils and rainfall; cost of ditches and their appurtenances and maintenance; duty of water and average cost per acre irrigated; discharge of canals and loss of water, by evaporation and seepage, and effect of irrigation on the water table, are some of the subjects discussed in describing individual cases of irrigation.

BACTERIOLOGICAL EXAMINATION OF LONDON CRUDE SEWAGE. First Report. By Dr. Frank Clowes, Chemist to the London County Council. London: P. S. King & Son, Agents for the Publications of the London County Council. Paper; 8 x 13 ins.; pp. 11; table and folding plate. Price 6d. in England; 25 cts. in America.

This is a preliminary report on the bacteriological results obtained by filtering sewage through coke. It was begun before the filter was put in use and will be followed by reports on the results of examinations of the filtrate. The bacteriological work was done by Dr. A. C. Houston, at the Public Health Laboratory, St. Bartholomew's Hospital. The results here presented relate to the total number of bacteria and spores in the sewage and to similar determinations for a number of the most abundant species. The plate contains a number of photo-micographs of the bacteria found.

MEMORANDUM ON THE MINERAL RESOURCES OF THE PHILIPPINE ISLANDS.—By Geo. F. Becker. From the 19th Annual Report of the U. S. Geological Survey. Charles D. Walcott, Director. Paper, 11½ x 7¾ ins.; pp. 687 to 693.

The appearance of this memorandum as a final chapter in the last issue of the "Mineral Resources of the United States" is antedating events somewhat, but the information is timely. The memorandum is intended to cover the main discoveries of geological and economic interest, as obtained from many sources. Only about 20 of the many islands are known to contain valuable minerals. These include coal, gold, copper, lead, iron, sulphur, marble, kaoline, silver, mercury, and oil. The coal may be classed as highly carbonized lignite, and is apt to contain much sulphur. The finest known beds, in the Island of Batan, are from 2½ to 14½ ft. thick. The heating effect is about one-fourth that of Cardiff coal. Gold is found in a vast number of places, and is mostly detrital, or of the placer type; in Lepanto quartz veins are found, but these yield only from $6 to $7 per ton. Copper is also abundant in locality, and mean assays of the best mines opened show 16% of copper in the trachyte country rock. Lead is found in Cebu, with 96 grammes of silver, 6 grammes of gold, and 565.5 kilos of lead to the metric ton. Iron is abundant in many of the islands, but the lignite is unsuitable for smelting it. Sulphur deposits abound about active and extinct volcanoes in the Philippines. There is only a rumor as to the existence of mercury.

STATE BOARD OF HEALTH OF MAINE.—Report for the Two Years Ending Dec. 31, 1897. A. G. Young, M. D., Secretary, Augusta, Me. Paper; 6 x 9 ins.; pp. 395; illustrations and tables.

The bulk of this report is taken up with two exceptionally valuable papers, one being a "Bacteriological Report Upon Formaldehyde," by F. C. Robinson and B. L Bryant, of Bowdoin College, Brunswick, Me.; and the other being "Notes on Disinfectants and Disinfection," by the secretary of the board. These two papers occupy about about 250 pages. The first one is mainly devoted to an account of experiments on formaldehyde conducted by Professor Robinson, which confirm previous views, both as to the value of this new disinfectant and its limitations in the present state of the development of means for applying it. The paper on disinfectants reviews the whole subject, by agents employed and by the purposes for which disinfection is required. Ozone and electrolysis as means of purifying water and sewage are among the agents reviewed. Some German experiments with ozone appear to give promising results, but with serious limitations, while no figures bearing on the economy of the agent are given. All the so-called electrical processes are set down as being only a means of producing chemical agents, most of the evidence regarding them being unsatisfactory as to results or cost. These "Notes" form a valuable supplement, and in some measure supersede the exhaustive Report of the Committee on Disinfectants Appointed by the American Public Health Association, whose investigations extended over three years and were published in 1888.

STATE BOARD OF HEALTH OF MASSACHUSETTS.—Report for 1897. Samuel W. Abbott, M. D., Secretary; X. H. Goodnough, C. E., Engineer; State House, Boston. Cloth; 6 x 9 ins.; pp. LX. + 714; many tables.

This volume contains the usual reviews of the work of the board, including advice to cities and towns regarding water supply, sewerage and sewage disposal; analyses of the water from public supplies; studies of stream pollution; the Lawrence experiments on sewage and water purification; and results obtained at the sewage purification plants of the state. In addition there is a special report on the restoration of Green Harbor. A new line of work in the experiments on sewage purification was the study of some of the so-called English bacterial filters, the results of which seem promising if the filters continue to show the efficiency thus far maintained. Some experiments on straining sewage through coke and then passing it through two sand beds, one above the other, on a plan like that in use at Reading, Pa., were carried on. The results were poor. Information regarding these tests has been abstracted for separate publication.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

STEAM REGULATING DEVICES.—The Mason Regulator Co., 6 Oliver St., Boston. Pamph.; 3¾ x 6 ins.; pp. 40.

This catalogue describes pump governors, reducing valves, pressure and rheostat regulators, etc.

CAST-IRON PIPE, PIPE FITTINGS, ETC.—M. J. Drummond & Co., 192 Broadway, New York city. Pamph.; 9 x 6 ins.; pp. 38.

This is an illustrated catalogue of cast-iron pipe, angles, bends, valves, and other gas and water-works supplies.

"HELPS IN BRAZING."—Joseph Dixon Crucible Co., Jersey City, N. J. Pamph.; 6¾ x 5½ ins.; pp. 12.

This pamphlet describes a crucible and furnace used for liquid metal brazing, and the use of graphite as an anti-flux.

VALVES, EXPANSION JOINTS, ETC.—Coldwell-Wilcox Co., Newburg, N. Y. Pamph.; 8¾ x 5 ins.; pp. 20.

This catalogue illustrates valves for water and steam, expansion joints of various forms, water-catchers, flexible joints, etc.

INJECTORS, INSPIRATORS, ETC.—The Hancock Inspirator Co., Boston, Mass. Pamph.; 3½ x 6 ins.; pp. 32.

This is an illustrated catalogue of the various forms of the well-known Hancock "inspirator," and of the Loftus restarting injector.

ENGINES AND BOILERS.—James Leffel & Co., Springfield, O. Pamphlet "F"; 8 x 5 ins.; pp. 32.

The engines illustrated in this catalogue are of the center-crank type, sizes up to 10½ x 12 ins., with either automatic cut-off or throttling governor. The boilers are tubular, horizontal or vertical, in sizes up to 50 HP.

"MOGUL" DRAUGHT SPRINGS.—Wilson Mfg. Co., 147 Cedar St., New York city. Pamph.; 5½ x 8 ins.; pp. 24.

An illustrated catalogue of springs for use on the traces for drawing heavy vehicles by horse or other animal power, in order to avoid shocks due to starting heavy loads or to encountering rough places in the road.

STEAM SEPARATORS AND OIL ELIMINATORS.—Hoppes Mfg. Co., Springfield, O. Pamph.; 9 x 6 ins.; pp. 16.

The Hoppes Mfg. Co. is well known as the manufacturer of feed water heaters and purifiers. It has recently put on the market a steam separator and oil eliminator in two forms for horizontal and vertical pipes, which are illustrated in this catalogue.

CONCRETE MIXER.—Ransome & Smith Co., Monadnock Block, Chicago, Ill. Paper; 6½ x 5¼ ins.; pp. 16.

This little pamphlet illustrates a drum or rotary mixer, in which the concrete is fed in at the center on one side, and discharged from the center at the other side. The machine has been used on several works, and is now in use for mixing concrete for the bridge abutments on the track elevation work of the Chicago, Milwaukee & St. Paul Ry. at Chicago.

PNEUMATIC PUMPING MACHINERY.—The Merrill Pneumatic Pump Co., Bound Brook, N. J. Pamph.; 6 x 9 ins.; pp. 8.

In the pneumatic system of pumping, air is compressed at any convenient location and led by pipes to the pumps. The method of using the air varies according to depth of well or other circumstances. Several forms of apparatus are shown, including single and duplex displacement chambers, a differential piston pump, and an "inductor," which is a modification of the "air-lift" pump.

LOCOMOTIVES.—Dickson Locomotive Works, Scranton, Pa. Cloth; 6 x 9 ins.; pp. 72.

This handsome and compact volume shows a great variety of locomotives built by this firm, with lists of dimensions of the same, and there are also a few pages of information respecting hauling capacity, dimensions, HP. exerted, etc. The engines range from little four-wheel tank engines for industrial plants, and compressed air locomotives (with cylindrical reservoirs or a group of "bottles"), to ordinary passenger and freight engines, including the ten-wheel express engines for the Atchison, Topeka & Santa Fe Ry., illustrated in our issue of March 3, 1898. Engines built for Japan and Honduras are also shown. The firm also builds two-cylinder compound locomotives, under the patents of Mr. F. W. Dean, these engines having either an automatic starting valve or one which can be operated at will by the engineman, according to the preferences of the purchasers.

GATE VALVES AND HIGH-PRESSURE FITTINGS.—The Kennedy Valve Mfg. Co., 75 John St., New York. Pamph.; 7 x 10½ ins.; pp. 32.

This is an illustrated catalogue and price-list of a variety of gate-valves and other fittings for high steam pressures.

DUMP CARTS FOR GARBAGE AND ASHES.—U. S. Sanitary Co., 618 Pennsylvania Ave., N. W., Washington, D. C. Paper; 7 x 5 ins.; pp. 19; illustrated.

This catalogue describes not only the semi-cylindrical carts made by the company for some years past, but also a new style of carts with a flat bottom and inclined ends.

TRAPS.—National Sanitary Supply Co., 273 Pearl St., New York city. Paper; 6 x 3 ins.; pp. 19; illustrated.

Under the trade name of Sanos, this company is manufacturing back pressure traps of various sorts, to be used alone or in combination with U-shaped traps to guard against sewer air or water. The device is simply a flap valve, seated on a knife edge to guard against leakages by fouling.

HYDRAULIC TOOLS.—The Watson-Stillman Co., 210 East 43d St., New York. Catalogue No. 50. Pamph.; 6 x 9 ins.; pp. 70.

This is an "assortment of illustrated sheets" selected from a large catalogue issued by the same company. It contains descriptions and price lists of hydraulic machinery especially adapted for railroad work, including a great variety of jacks, punches, etc.

CORLISS ENGINES, ETC.—The Rarig Engineering Co., Columbus, O. Pamph.; 8 x 5¼ ins.; pp 56.

The Rarig-Corliss engine seems to be especially designed for the heaviest class of work, such as rolling mills, street railways, etc. The pamphlet also illustrates blowing engines, hoisting engines, condensers, etc. So far as may be judged from the illustrations in the catalogue, the engines built by this company are of excellent design, but we cannot say as much for the catalogue itself. The engravings are poor, the page is too small, and even the spelling is bad.

STEAM ENGINES.—Chandler & Taylor Co., Indianapolis, Ind. Pamph.; 9 x 6 ins.; pp. 24.

This is an illustrated catalogue of single cylinder automatic cut-off horizontal engines. The Rites inertia governor is used in this engine. An interesting feature of one of the styles shown is a self-contained side-crank engine, the "out-board" bearing being cast in the bed plate and the governor wheel, of unusually small diameter, being between it and the main bearing. The catalogue is a fine example of the printer's and engraver's art, and gives the reader a favorable impression of the engine, which is enhanced by the fair and modest claims made in the text.

WATER-WHEEL GOVERNORS.—Lombard Water-Wheel Governor Co., 61 Hampshire St., Boston, Mass. Pamph.; 9 x 5¾ ins.; pp. 32.

The Lombard water-wheel governor consists essentially of a hydraulic piston which applies its thrust in either direction, through a rack, to the water-wheel gates. The travel of the hydraulic piston is controlled by a very sensitive balanced valve, which in turn is controlled by the position of centrifugal balls driven from the water-wheel shaft. The pamphlet contains photographic illustrations of several styles of the governor, and also of automatic records of speed recorders, showing the close regulation obtained by the governor.

PUNCHING AND PRESSING MACHINERY.—The Works of E. W. Bliss Co., Brooklyn, N. Y. Pamph.; 12 x 9 ins.; not paged; 20 full-page photographic views, with numerous advertisements.

This bulky pamphlet contains two pages of an introduction giving the history of the E. W. Bliss Co. since the business was started in 1866, and a long list of articles for the making of which its machinery is adapted. Then follows three pages of small cuts of presses, 20 full-page half-tone cuts of views of different portions of the works interleaved with advertisements of fifty or more manufactures of various specialties. The pamphlet seems to have been gotten up by some advertising solicitor. It is handsomely printed on heavy plate paper and some of the photographic views are interesting, but it has no other merit, and no good reason for existence. It has no index, and its size and shape are such that few would care to keep it, even if it were worth keeping.

BOILER TUBE CLEANERS.—The Lagonda Mfg. Co., Springfield, O. Pamph.; 9 x 6 ins.; pp. 8.

This circular describes the "Weinland" tube cleaners for removing scale from the inside of water-tubes. Several varieties are shown, one of which is a power cleaner, driven by a small turbine wheel, forming part of the tool itself. The circular contains, as do nearly all circulars of scale cleaners, the false statement that "it has been proved" that a tube with 1-16-in. of scale requires 15% more fuel than a clean tube; ¼-in., 66% more; ½-in., 150% more, etc. No one has ever proved it, but the old "fake" will probably continue in print for the next century.

OCTOPUS ANTI-INCRUSTATOR.—American Octopus Co., 120 Liberty St., New York city. Pamph.; 4½ x 6¾ ins.; pp. 32.

The "octopus" is a disk-shaped brush of some sort of fibers, enclosed between washers and rings of different metals. It is claimed that when the octopus is placed inside of a steam boiler containing scale-forming water, an electric action is set up, and the impurities of the water are deposited upon the fibers. The claim may be true, but if so, it is likely that an old scrubbing brush, to which is attached wires of copper and a plate of zinc would be quite as effective. We find here also the time-worn statements os to the loss of fuel due to scale, but the figures are different from those in the case previously noticed, viz.: 1-16-in. causes a loss of 13%, ¼-in. of 38%, and ½-in. of 60%.

THE TROPENAS STEEL PROCESS.—Powell & Colne, Agents for the United States, 111 Broadway, New York city. Pamph.; 6 × 9 ins.; pp. 21.

This pamphlet is a reprint of a paper read by Mr. Alexander Tropenas at the Cincinnati meeting of the American Foundrymen's Association, in June. The Tropenas process is the most recent of the so-called "little Bessemer" processes, with surface blow. The converters are usually of 2 tons capacity. Several of them are in use in Europe.

RAILWAYS.

BISMARK & POTOMAC VALLEY.—Surveys are being made for this new line, according to reports, to run from Davis through Tucker, Grant and Hardy counties to a point on the state line in Hampshire county, W. Va.; the route is through a coal and lumber region. F. M. Howard, Forest Bldg., Philadelphia, is said to be interested.

CALIFORNIA.—Bids are asked by A. S. Kenagy, Clk. of Ventura county, until Dec. 17, for the purchase of a franchise to construct a standard gage line of steam railway along the public highways from Montalvo to Oxnard.

CAPE FEAR & YADKIN VALLEY.—Notice is given that the property of this company will be sold on foreclosure, at Fayetteville, N. C., Dec. 29, by E. S. Martin and Clement Manly, Master Comrs. The length of the system is 342 miles. John Gill, Recvr., Baltimore, Md.

CHICAGO & NORTHWESTERN.—Reports state that McDougall & Duffy have left Kent, O., for Wall Park, Ia., where they have a contract for 70,000 cu. yds. of grading for this company. J. E. Blunt, Ch. Engr., Chicago, Ill.

CHOCTAW & MEMPHIS.—We are informed that Johnson Bros. & Faught, St. Elmo, Ill., and J. H. McCarthy & Reichardt, Little Rock, Ark., have been awarded the contract for constructing this company's line from Little Rock to Howe, Ind. Ter. Work is to begin at once and be completed before next fall. F. A. Moliter, Ch. Engr., Little Rock, Ark.

CLEARWATER SHORT LINE.—This company was incorporated in Montana, Nov. 9, with a capital stock of $10,000, to build a line for the Northern Pacific Ry. Co. from the main line at Ainsworth, Wash., up Snake and Clearwater rivers over the Bitter Root Range and connecting with the main line near Missoula.

COLORADO & NORTHWESTERN.—Reports from Boulder, Colo., state that Day & Ryan have been awarded the contract for building a branch line to the B. & M. mine, and that work would be commenced at once. Work on the Bloomerville branch is also being actively pushed. J. S. Frankeberger, Ch. Engr., of Boulder.

COLUMBIA & KLICKITAT.—This company was incorporated in Oregon, Nov. 16, with a capital stock of $300,000, to construct a railway from Lyle to Goldendale. The incorporators are: E. E. Lyttle, D. C. O'Reilly and A. E. Hammond; principal office, Wasco, Ore.

COLUMBUS, LIMA & MILWAUKEE.—Andrew Bruon, Ottawa, Ohio (not A. Brown), informs us that he is the principal contractor for the construction of 40 miles of railway for this company between Lima and Defiance, via Gomer, Kalida and Continental, O. This piece of work will be completed this fall, but extensions are contemplated to bring the total mileage up to 314 miles. Between Lima and Defiance the rights of way have all been obtained and paid for and the grading practically completed; bridges and telegraph lines are also erected. A 70-lb. rail of 60-ft. length, furnished by the Lorain Steel Co., Lorain, O., is now being laid. The only work that Mr. Bruon wishes to sub-let is the loading of 50,000 to 60,000 yds. of gravel on cars with steam shovels, at his gravel pit, four miles east of Ottawa; proposals for doing this work are solicited. J. G. W. Cowles, Pres., Cleveland, O.; C. T. Hobart, Ch. Engr., Defiance, O.

DETROIT & LIMA NORTHERN.—The receivers of this company are said to have asked the U. S. Court for authority to spend $500,000 for the purchase of new rolling stock and the building of terminal and other improvements around Detroit. C. H. Roser, Ch. Engr. and Purchasing Agt., Detroit, Mich.

ESCANABA & LAKE SUPERIOR.—This company is reported to have been incorporated in Michigan, Nov. 17, to construct 60 miles of railway. Isaac Stephenson, Pres.; J. A. Van Cleve, Vice-Pres., both of Marinette, Wis.; W. E. Wells, Supt., Wells, Mich. This is apparently the same project as that promoted by the Escanaba River Ry. Co., which is at work building from Escanaba, Mich., to Republic, Minn., 60 miles, through a hard-wood and farming district.

GREAT NORTHERN.—Work has been commenced by Foley Bros., St. Paul, Minn., on the new cut-off from Coon Creek to Brook Park, thus shortening the distance between St. Paul and Duluth by 30 miles. The new line will be about 55 miles in length, and is expected to be completed by June 1.

GULF & SHIP ISLAND.—Reports state that construction work will begin on the extension of this road north of Hattiesburg, Miss., as soon as locations have been made. S. S. Bullis, Gen. Mgr.; J. B. Hatch, Ch. Engr., both of Gulfport, Miss.

INDO-CHINESE.—Press reports state that the French government has decided to authorize a loan of 27,000,000 francs for the purpose of establishing an Indo-Chinese railway system in connection with the Chinese systems.

IOWA CENTRAL & WESTERN.—L. M. Martin, Pres., Marshalltown, Ia., has stated that this branch company of the Iowa Central will construct a new line from Oskaloosa to Cordova, via Pella, Ia., and also a branch from Belmont to Algona, via Cornwith, Ia. Surveys have been begun.

MINNESOTA & IOWA VALLEY.—This company was incorporated in Minnesota, Nov. 14, with a capital stock of $50,000, to build from a connection with the Winona & Western Ry. at Sanborn, Minn., through Brown, Cottonwood, Watonwan and Martin counties, to the southern state line, a distance of about 70 miles. The incorporators are: J. M. Whitman, J. B. Redfield, Chicago; Edward C. Carter, Evanston, Ill.; W. A. Scott, John C. Stuart, St. Paul, Minn.

MINNESOTA & SOUTHERN.—This company was incorporated in Iowa, Nov. 19, to build a line from Sauk Center, Minn., south through Iowa, to connect the Great Northern with the Kansas City, Pittsburg & Gulf Ry. Pres., John S. Thompson, New York; Vice-Pres., William T. Smith, Des Moines; Treas., Robert M. Snyder, New York.

NEW YORK.—Bids are asked until Dec. 15 for work on the extension of the old Kinderhook & Hudson Ry., including 220,000 cu. yds. of earth excavation, 11,800 cu. yds. of rock excavation, 40 miles of track laying, 9 steel plate girder bridges, one steel viaduct, 1,900 ft. long, etc., as described in our advertising columns. Wm. G. Smith, Ch. Engr., Valatie, N. Y.

NEW YORK, WYOMING & WESTERN.—The Lackawanna Iron & Steel Co., of Scranton, is reported to have received a contract to furnish 7,000 tons of 95-lb. rails to be laid on this new line between Wimmers and the Delaware River. From Wimmers to Scranton, 12 miles, the tracks of the Erie & Wyoming Valley R. R. will be used. E. B. Sturges, Pres.; Edw. L. Jenks, Ch. Engr., both of Scranton, Pa.

RUTLAND-CANADIAN.—The directors of this company organized Nov. 21 by electing Frank R. Wells, of Burlington, Vt., president, and H. G. Smith, of Rutland, Vt., treasurer. Official action was taken authorizing the president to obtain surveys of different routes from some point in or near Burlington to the Canadian line, and report such surveys to the board for further action.

OREGON R. R. & NAVIGATION.—Reports from Portland, Ore., state that Seims & Coykendahl are the contractors for a 140-mile extension of this line from Wallula Junction up Snake River to Lewiston, Idaho. The Great Northern Ry. and the Northern Pacific Ry. Cos. are also said to contemplate new extensions in this locality as a result of competition. W. H. Kennedy, Ch. Engr., Portland.

ST. LAWRENCE & ADIRONDACK.—This new company proposes to build a line from the St. Lawrence River to North Creek, N. Y., following the Raquette River to its source, 100 miles. Dr. L. S. Putney, Pres.; H. G. Atwater, Secy.; J. G. McLeod, Treas., all of Norfolk, N. Y.

ST. LOUIS & OKLAHOMA CITY.—J. F. Hinckley, Ch. Engr., Sapulpa, Ind. Ter., informs us that this company has now completed its line between Sapulpa and Oklahoma City, a distance of 103.23 miles, and that regular train service is in operation between Oklahoma City and St. Louis, Mo., via St. Louis & San Francisco Ry.

SOUTHERN.—This company has had a survey made for an extension from Stevenson, Ala., to Chattanooga, Tenn., a distance of 28 miles. The latest survey contemplates a tunnel under Lookout Mountain to gain an entrance to Chattanooga without bridging the Tennessee River. It is said that the extension will be built at once. This will give the Southern an unbroken line between Chattanooga and Memphis.

WASHINGTON RUN.—Bennett & Talbott, Greensburg, Pa., are stated to have been awarded the contract for the construction of this railway, from Dayton station to Washington Run, Fayette county, Pa., 5½ miles, for the Washington Coal & Coke Co. The contract price is about $400,000, which includes the completion of the road ready for the rolling stock. Work will be commenced at once. W. H. Brown, Pres., Conestoga Bldg., Pittsburg.; E. J. Taylor, Ch. Engr., McKeesport, Pa.

WEST BRANCH VALLEY.—A. E. Patton, Pres., Curwensville, Pa., informs us that locations have been made for this proposed line of railway, from Clearfield to Williamsport, Pa., 111 miles. Contracts have not yet been let and will not be ready for some time. The incorporation of this company was noted in our last issue. A. V. Hoyt, Ch. Engr., Philipsburg, Pa.

WHITE PASS & YUKON.—John Hislop, Box A, Skagway, Alaska, informs us that this company, operating the lines of the Pacific & Arctic Ry. & Navigation Co. and of the British Columbia, Yukon & British Yukon Ry. Transportation & Navigation Co., has completed the final location for the first 50 miles from Skagway and has made a preliminary survey from Skagway to Fort Selkirk. Most of the rights of way have been obtained, and the necessary capital for construction secured. The company does the grading under the supervision of the Pacific Contract Co., Ltd., and the employment agent is J. Heney, Seattle, Wash. Track is laid for 14 miles and will be at the summit of White Pass, 20 miles, by Dec. 1. The proposed route will be 312 miles in length. S. H. Graves, Pres., 1016 Chamber of Commerce Bldg., Chicago, Ill.; E. C. Hawkins, Ch. Engr., Dexter-Horton Bank Bldg., Seattle, Wash.

WISCONSIN, MICHIGAN & NORTHERN.—This company was incorporated in Michigan Nov. 17, with a capital stock of $130,000 and headquarters at Menominee, Wis. It is proposed to operate that portion of the Wisconsin & Michigan Ry. in Michigan, and to extend the line 16 miles through Menominee and Dickinson counties, the Wisconsin & Michigan not being able to take advantage of the Michigan law for the condemnation of property for its right of way. A map of the proposed extension has been filed with Railroad Commissioner Wesselius.

STREET AND ELECTRIC RAILWAYS.

RUTLAND, VT.—E. D. Blackwell, Montpelier, Vt., informs us that a charter has just been granted to the Lake Durand Power & Traction Co., but that the organization has not yet been completed. It is proposed to construct 25 miles of railway from Lake Durand to Brandon, Pittsford, Proctor and Rutland. Plans and specifications will be ready about Dec. 5.

HOLBROOK, MASS.—E. E. Chapman and others have petitioned this town for a franchise to construct a railway between Holbrook and South Weymouth, a distance of three miles.

QUINCY, MASS.—The council has passed an ordinance granting a franchise to the Boynton Bicycle Ry. Co. to build to West Quincy. Councilman Badger may be addressed.

LOCKPORT, N. Y.—It is reported that surveys have been completed for the proposed electric railway from Lockport to Olcott, and that some construction work will be done this winter if the weather permits.

MAMARONECK, N. Y.—The highway commissioners of Harrison, Nov. 23, granted to the Port Chester Electric Ry. Co. a franchise through that part of the town lying between Rye and Mamaroneck. The question of a franchise in Mamaroneck will be discussed at a public meeting held by the trustees on Dec. 7.

NEW YORK, N. Y.—Applications have been made to the city councils by the Third Ave. R. R. Co., 1119 3d Ave., and the Metropolitan St. Ry. Co., 621 Broadway, for franchises to build on the Boulevard, from Manhattan St. to 182d St., both companies using the same tracks but different slots. The Third Ave. R. R. Co. also applies for a line from 181st St. and Amsterdam Ave., east over Washington Bridge to Boscobel Ave., to Jerome Ave., there to connect with the Union R. R. Co.'s trolley, and for a line from 135th St. to Amsterdam Ave., also east over the viaduct to McComb's Dam Bridge, across the bridge to Jerome Ave., to connect with the Union Ry. Co.'s line. The Metropolitan St. Ry. Co. asks for extensions in the Boulevard from Manhattan St. to 182d St., and in 135th St., from Madison Ave. to 8th Ave.; also in 145th St., from the Harlem River to the Boulevard.—— The Union Ry. Co. asks for extensions over the Southern Boulevard and Boston Road to 200th St., to Jerome Ave.; also from 230th St. and Bailley Ave., to 231st St., to McComb's St.; also over Cedar Ave. and Sedgwick Ave. to Fordham Landing Road. A public hearing will be given on Dec. 2.

OSWEGO, N. Y.—Reports state that George B. Leonard and others are interested in the construction of a trolley line between Oswego and Syracuse.

ROME, N. Y.—Grading is reported to have been commenced on the proposed Utica Suburban St. Ry., a branch of the Utica Belt Line St. R. R. Co., which is to be built from Oriskany to Rome, about seven miles. Frank K. Baxter, Ch. Engr.

TROY, N. Y.—A public hearing will be given Dec. 12 to consider the application of the Troy City Ry. Co. for a franchise to extend its tracks on Mill St. C. Cleminshaw, Pres., 361 River St.

CAMDEN, N. J.—Press reports state that Walter N. Boyer, representing the promoters of the projected elevated electric railway to run from Atlantic City into Camden, has requested the council to withdraw the application for a franchise, and that the request has been granted.

IRVINGTON, N. J.—The North Jersey St. Ry. Co. proposes to extend its line from the present terminus in this place to the Hilton & Maplewood line. Extensions to Millburn are also projected. J. K. Corbiere, Pres., Newark, N. J.

LODI, N. J.—We are informed that the Sandford & Stillman Co., 26 Exchange Place, Jersey City, N. J., will commence work at once on the construction of the proposed line of the Saddle River Traction Co. from Passaic to Lodi, via Garfield, a distance of 2½ miles. Gilbert D. Bogart, Pres.; Wise & Watson, Engrs., both of Passaic.

PLAINFIELD, N. J.—The Plainfield St. Ry. Co. has petitioned the council for a franchise to extend its lines to Scotch Plains. T. Nevins, Pres.

JOHNSTOWN, PA.—The councils have granted a franchise to the Johnstown & Somerset Traction Co. to build through this city. The proposed route is from Johnstown to Geistown, Scalp Level and Windber, a distance of about eight miles. Morris Wolf, Pres., Johnstown.

WASHINGTON, D. C.—The Columbia R. R. Co. is now considering propositions for grading and equipment of a new section of overhead trolley line along Benning Road to the District line. The underground electric system will also be substituted for the cable on that portion of the road within the city. R. F. Baker, Pres., 1509 Florida Ave., N. E.

BIRMINGHAM, ALA.—Bids are being received by the Birmingham Traction Co., according to reports, for rails, cross-ties and other material for its proposed extension from Woodlawn to East Lake. A. T. London, Pres., 1st Ave. and 21st St.

VICKSBURG, MISS.—It is reported that S. R. Hughes, of Vicksburg, and J. C. Schaffer, of Chicago, have bought the electric plant in this city and that improvements to the same will be made, and an electric railway built, to cost about $100,000.

CARROLLTON, KY.—Press reports from this place state that a company has been incorporated, with $50,000 capital, to build an electric line from Warsaw to Milton and from Carrollton to English Station. Myron O. Baxter, Pres.; Jas. M. Gaumt, Vice-Pres.; Jas. S. Jett, Treas.

RICHMOND, KY.—Frank Adair and D. J. Hauss, Cincinnati, O., are said to be negotiating with the city for the privilege of constructing a system of electric street railways.

ZANESVILLE, O.—Press reports state that William Christy, Special Master, will sell this company's property in this city on Jan. 3.

DAYTON, O.—J. M. Wilson, Ch. Engr., Dayton, informs us that the surveys have been completed for the Dayton & Xenia Traction Co.'s proposed line from Dayton to Xenia, via Alpha and Trebeins, a distance of 16 miles, 3½ miles of which will be double tracked. Levi Weiskopf, Cincinnati, O.

EVANSVILLE, IND.—C. J. Murphy, of the Business Men's Association, informs us that nothing definite has yet been done towards the construction of the proposed line from Evansville to Tell City, etc., referred to in our last issue.

GREENFIELD, IND.—Chas. L. Henry, Anderson, Ind., and Nathaniel N. Morris have petitioned the commissioners of Hancock county for a franchise to build an electric line from Greenfield west to the county line, and thence to Indianapolis, to be known as the Indianapolis, Greenfield & Eastern Ry.——It is reported that the county commissioners have granted to Wm. C. Dudding and F. G. Banker, of Greenfield, a franchise to construct and operate an electric railway through the county. The promoters of the enterprise are said to contemplate running a line from Anderson to Indianapolis by way of this place.

JACKSON, MICH.—W. B. Joslyn, Supt., 223 River St., Ypsilanti, Mich., informs us that the Jackson, Clarks Lake & Brooklyn Ry. Co. has been incorporated, with a capital stock of $200,000, to construct an electric railway from Jackson to Brooklyn, via Vandercooks Lake, Eldred Station and Clarks Lake, a distance of 21 miles. Surveys have been made as far as Vandercooks Lake, 4½ miles, and the capital has been partly secured. Contracts will be let in the spring or before. Clark Cornwell, Pres., Jackson, Mich.

OWOSSO, MICH.—The Long Lake, Durand & Corunna St. Ry. Co. was incorporated Nov. 17, with a capital stock of $50,000, with $12,000 paid in; the main offices and large power station will be located in this city. F. J. Northway, of Durand; I. D. H. Ralph, of Owosso, and M. P. Nickels, of Corunna, Mich., are the stockholders.

CHARLESTON, ILL.—Henry Rawie, Ch. Engr., Anderson, Ind., informs us that the preliminary survey has been made and the right of way is now being secured for the proposed Charleston & Mattoon Electric R. R., from Charleston to Mattoon, via Loxa, 12½ miles. Forbes Holton, Pres., Anderson, Ind.

CHICAGO, ILL.—The proposition to make permanent the trolley system now in operation in the business district of the city was defeated in the council, Nov. 28.

KENOSHA, WIS.—J. M. Blatt, Supt. of Milwaukee, Racine & Kenosha Elec. Ry., Racine, informs us that this company intended to extend its line through this city, but as the franchise was vetoed the tracks now extend only to the north city limits, awaiting a franchise.

WICHITA, KAN.—The Wichita Ry. & Illuminating Co. was incorporated Nov. 19, with a capital stock of $500,000. The directors are: Ernest Rambeck, E. L. Martling, H. G. Landis, W. O. Church and George E. Spalton.

DENVER, COLO.—Reports state that the Denver City Cable and West End electric lines will be sold by United States Commissioner Hinsdale on Dec. 15.

KANSAS CITY, MO.—It is reported that the Central Electric Ry. Co., owned by the North American Trust Co. of New York, has surveyed a route for an underground trolley system to be operated in connection with the Northeast electric line. Roland R. Conklin is interested.

LOS ANGELES, CAL.—The Los Angeles Traction Co. has petitioned the council for a franchise to build a new line of street railway on 11th, Georgia, Sentous and Hoover Sts. W. S. Hook, Gen. Mgr.

SAN FRANCISCO, CAL.—Reports state that the San Francisco & San Mateo Electric Ry. Co. contemplates the construction of its 30th St. line, and also of extensive improvements to the power house. R. Baxter, Ch. Engr.

CUTNARA, VENEZUELA.—Press reports state that a French company has secured a concession from the Venezuelan Government to construct an electric railway 43½ miles in length between Cutnara and Cumanacad. This line is projected to open up Venezuela and British Guiana to commerce.

AUCKLAND, NEW ZEALAND.—W. Gentry Bingham, an English engineer, is reported to have received a concession to build an electric railway in the city of Auckland.

ELECTRIC LIGHT AND POWER.

BEVERLY, MASS.—Press reports state as follows: The committee, to whom was referred the matter of a change of electric-light contract and the matter of a municipal plant, will recommend the abrogation of the present contract, which has three years to run, and the adoption of a new contract for five years, which has been offered by the Beverly Gas & Electric Co., providing for 175 arc 1,200-c. p. lights to burn all night and every night, at 30 cts. a night. For lights over 175 a discount of 5% is to be allowed.

NEWPORT, R. I.—The Newport Illuminating Co. has applied for permission to furnish light, heat and power for seven years. The plant has been in operation for some time.

AKRON, N. Y.—Surveys have been made for a plant to cost about $5,000, inclusive of arc lights.

ONONDAGA VALLEY, N. Y.—The question of electric lighting is being considered by the Village Improvement Society. Elmer Clark, Pres.

ROMULUS, N. Y.—It is proposed to organize a company to build a plant for this place.

ST. REGIS, N. Y.—J. W. Webb writes us that H. E. O'Neil is to put in a plant. It is thought that the materials have not yet been purchased.

SEABRIGHT, N.J.—The Seabright Electric Light Co. has purchased a lot near the South Shrewsbury River upon which it will build the new power house.

MILL HALL, PA.—Arrangements are reported as about completed for a plant in this place. S. T. Henderson, Houtzdale, Pa., and Councilman Aaron Kyler may be addressed.

NEW HOLLAND, PA.—Eli M. Martin writes us that nothing will be definitely settled upon with regard to a plant before spring.

FREDERICKSBURG, VA.—T. McCracken, Chn. Com., writes us that the following bids were received Nov. 22 for furnishing and installing a plant of 80 2,000-c. p. arc and 75 double carbon arc lights, and 75 HP. water-wheel: Fort Wayne Electric Corporation, Fort Wayne, Ind., $11,649, and Samuel Kingsbury & Co., Baltimore, $11,944. No award will be made until the question of building a plant is voted upon by the people.

GAINESVILLE, GA.—James P. Edwards, Elec. Engr., Augusta, Ga., proposes to build a plant in this place. The plant will have a capacity for 1,000 incandescent lights. Arrangements for the construction will be begun as soon as 500 lights are subscribed for.

LAKE PROVIDENCE, LA.—An election will be held Dec. 15 to vote on the question of issuing $17,500 in 5% bonds for a plant and water-works.

SOMERVILLE, TENN.—Bids are asked until Dec. 15 for furnishing the materials and for constructing works and an electric light plant as stated in our advertising columns. Geo. C. Morgan, Royal Insurance Bldg., Chicago; E. R. Scruggs, Recdr.

OWENTON, KY.—J. M. Riley, of Bracken county, Ky., and W. E. Arnold, of Dayton, O., are reported as making arrangements for a plant.

RICHMOND, KY.—Frank Adams and D. J. Hamss, of Cincinnati, have been granted a franchise. Work will be begun at once, the plant to be completed in 90 days.

BRADFORD, O.—The electric light plant here, which has been shut down for some time, has been purchased and will be put in immediate operation by L. A. Dyer, of Bellefontaine, O., according to reports.

CLEVELAND, O.—Bids are asked until Dec. 21 for furnishing glass, etc., for 878 electric lamps for one year. Geo. R. Warden, Dir. Pub. Wks.

DRESDEN, O.—Thos. McGovern, of Sarahsville, O., it is stated, has received the contract for lighting the streets with arc lights.

NEW RICHMOND, O.—Bids are asked until Dec. 7 for furnishing the materials and for constructing a plant and water-works, as stated in our advertising columns. The plans and specifications are on file at the office of the Engineering News Publishing Co., 220 Broadway, New York. J. F. Witmer, Engr., Buffalo, N. Y.; L. F. White, Secy. Trustees.

GREENFIELD, IND.—The council has purchased the plant of the Greenfield Electric Light & Power Co. for $16,000.

FLINT, MICH.—It is stated that the People's Electric Light Co. will increase the capacity of its plant from 3,000 to 8,000 lights, at a cost of about $25,000.

MOUNT PLEASANT, MICH.—Bids are asked until Dec. 20 for furnishing and installing a plant at the Indian Industrial School here. R. S. Graham, Supt., Mount Pleasant; W. A. Jones, Comr. Indian Affairs, Washington.

ROYAL OAK, MICH.—Wm. Hilzinger, of Royal Oak, has submitted a proposition to light this town.

LITCHFIELD, ILL.—Bids are asked until 10 a. m., Dec. 8, for electric lighting or for furnishing the material and for constructing a municipal plant; population, 5,900. O. D. W. Gooch, Clk.

WINNETKA, ILL.—It is stated that the question of building a plant is being considered.

SAUK RAPIDS, MINN.—The question of granting a franchise for a water power plant to C. M. Hertig, St. Cloud, Minn., is being considered by the committee, according to reports. E. Cross, Chn. Com.

ST. PAUL, MINN.—Bids for lighting the streets and public places with 395 arc, 2,600 gas, and about 3,500 gasoline lights will be considered by the assembly Dec. 1 and by the aldermen Dec. 6. Matt. Jensen, Cy. Clk.

OCONTO, WIS.—The plant and planing mills of the Citizens' Water, Light & Fuel Co., were destroyed by fire Nov. 24 causing a reported loss of about $50,000. T. A. Pamperin, Mgr.

PIERRE, S. DAK.—The council is reported to have decided to put in a plant.

CARTHAGE, MO.—Chas. O. Harrington, Mayor, writes us that this place voted Nov. 22 in favor of issuing $25,000 in bonds for a plant. Bids will be asked as soon as plans and specifications are completed. The plant will have a capacity of 50 2,000-c. p. arc and 150 50-c. p. and 2,000 16-c. p. incandescent lights. Owen Ford, 710 Security Bldg., St. Louis.

LINCOLN, WASH.—The question of building a plant and water-works is being ronsidered.

RITZVILLE, WASH.—The council is reported to have granted a franchise for a plant and water-works.

COLTON, CAL.—Bids are asked until Dec. 19 for furnishing and installing lighting fixtures at the new court house. J. B. Parazette, County Clk.

PASADENA, CAL.—Bids are asked by the city trustees until Jan. 1 for furnishing the machines, etc., for installing a plant. The city will want to use about 105, 2,000 and 1,200 c. p. arc lights, etc.

SAN FRANCISCO, CAL.—Superior Judge Seawell has handed down a decision granting the Mutual Electric Co. permission to erect poles and to extend its lines upon the same terms granted to the San Francisco Gas & Electric Co.

HULL, QUE.—The committee has recommended the council to direct the city engineer to prepare plans for a water power plant.

ACTON, ONT.—This place has voted to build a plant at a cost of $6,000. The council will at once arrange for building the plant.

ST. THOMAS, ONT.—Percy Domville, Hamilton, Ont., it is stated, has been engaged to prepare plans, etc., for a municipal plant.

LINDSAY, ONT.—J. Alex. Culverwell and A. E. Ames, stock broker, Toronto, are interested in the proposed power plant at Fenelon Falls. Power will be furnished to this town, which has a population of about 7,000.

TORONTO, ONT.—C. H. Rust, Cy. Engr., writes us that no contract has yet been awarded for the proposed power plant, bids for which were opened Nov. 9. It is likely that the matter will remain in abeyance for some time.

WINNIPEG, MAN.—The aldermen are considering an ordinance authorizing the submission to the voters of the question of issuing $50,000 in bonds for a municipal plant.

CASCADE CITY, B. C.—We are informed that plans are not sufficiently advanced to give information regarding the proposed water power plant at this place. The head of water will be 150 ft.; available HP., 10,000. Wm. Anderson, Engr., P. O. Box 81, Cascade City.

SANTIAGO, CHILI, S. AM.—Press reports state that a syndicate composed of English and German capitalists is to take charge of the electric lighting of Santiago and of the electric railways in that city. Power is to be taken from the River Maipo. About $6,200,000 is invested in the enterprise, and work has already been commenced. The purchases for the undertaking are to be made in England, Germany and the United States at an early date.

BRIDGES.

RENSSELAER, N. Y.—Bids are asked until Dec. 6 for extending and laying out Washington St. and constructing an iron bridge over Mill Creek. C. A. Ryan, Cy. Clk.

BROOKLYN, N. Y.—Bridge Commissioner Shea was authorized Nov. 23 to advertise for bids for building two stone abutments for the Hamilton Ave. bridge, at a cost of $30,000. He has also been authorized to prepare plans, etc., for the construction of a bridge over the East River between the boroughs of Manhattan and Bronx.

OWEGO, N. Y.—The town board voted Nov. 19 in favor of constructing an iron bridge across Owego Creek to cost about $10,000. It is proposed to have an engineer prepare plans and to ask bids. The contract will probably not be let before spring.

STONY POINT, N. Y.—Geo. W. Aldridge, Supt. Pub. Wks., Albany, will soon ask bids for a new bridge across Minisceongo Creek, according to reports.

VALATIE, N. Y.—Bids are asked by Wm. G. Smith, Ch. Engr., Valatie, until Dec. 15 for the construction of nine plate girder bridges and one viaduct 1,900 ft. long, on the extension of the Kinderhook & Hudson Ry., as stated in our advertising columns.

CAPE MAY, N. J.—Wildwood, Anglesea and Holly Beach have subscribed $4,500 toward the building of a new bridge and turnpike from Five-Mile Beach to the mainland, according to reports.

BUTLER, PA.—Reports state that the grand jury has recommended the construction of a bridge over the Counoquenessing Creek. F. E. McQuistion, County Surv.

HARRISBURG, PA.—We are informed that a subway at Market St. is most likely to be constructed. The plans are yet in the hands of the committee. John E. Bickel, Chn. Citizens' Com.

PHILADELPHIA, PA.—Bids are asked until Dec. 13 for certain bridge work. Thos. M. Thompson, Dir. Dept.

WILKESBARRE, PA.—We are informed that the Grand Jury granted 46 bridges in various parts of the county: eight iron, and 38 stone arch, the cost varying from $2,000 to $90 and aggregating $23,235. The commissioners of Luzerne county have charge of the advertising. The contracts will probably be let about May or June of next year. H. S. Smith, Engr., 70 Coal Exchange Bldg., Wilkesbarre.

BALTIMORE, MD.—An ordinance is before the council to authorize the Old Bay Line to construct a bridge over Light St. from the wharf. John W. Sherwood, Mgr.

NORFOLK, VA.—Bids are asked until Dec. 28 for building the sub and superstructure for a steel highway and draw bridge over Smith's Creek, as stated in our advertising columns. W. T. Brooke, Cy. Engr.; J. D. Hofheimer, Chn.

DECATUR, ALA.—The county commissioners have awarded a contract to the Canton Bridge Co., of Canton, O., to erect a steel bridge over Town Creek, near Somerville, to cost $5,000.

CINCINNATI, O.—The county commissioners have received the lowest bids for a bridge over the Big Miami River from the King Bridge Co., Cleveland, O., at $49,900 for the superstructure, 465 ft. long, and from A. J. Wellman, at $34,798, for the substructure. Frank S. Krug, Engr.

CLEVELAND, O.—Steps will soon be taken for the construction of a bridge across the hollow between Kinsman and Holton Sts., to cost about $10,000; also necessary culverts to cost $3,000. Geo. R. Warden, Dir. Pub. Wks.

MUSKEGON, MICH.—The plans for the bridges over the Chicago & West Michigan Ry., at Myrtle and Amity Sts., submitted by the railway company, have been adopted by the council.

CHICAGO, ILL.—The sanitary district trustees have decided to build two bascule bridges to take the places of the Taylor St. city swing bridge an dthe Northern Pacific Ry. swing bridge between Taylor and 12th Sts. The estimated cost of replacing the old bridges with the bascule structures is $314,000. The moving of the tracks and equipment, with the interlocking switches, will cost $78,000, and of this the sanitary district will pay $60,000. The Scherzer Rolling Bridge Co. will sell the designs for the two bridges and will agree to superintend their construction for $38,000. When the designs are completed bids for the structures will be advertised for. The trustees propose to issue bonds up to the 1898 limit. They have authority to issue $190,000 more in bonds this year and it has been practically agreed by the committee to make the issue, according to reports.

MINNEAPOLIS, MINN.—Bids are asked until Dec. 9 for furnishing iron and steel work f. o. b. cars Minneapolis, for widening the stone arch bridge over the East channel of the Mississippi River; surety $1,000. F. W. Cappelen, Cy. Engr.; L. A. Lydiard, Cy. Clk.

ONSLOW, IA.—Bids are asked until Dec. 6 for constructing a steel bridge over the Maquoketa River in Washington township, according to reports. F. J. Sokol, Chn. Com.

GRAND ISLAND, NEB.—The county surveyor has measured the distance across the Platte River south of this city with a view to constructing a bridge between Hall and Hamilton counties. The bridges over the four streams will have to be about 300, 400, 600 and 700 ft. long, respectively.

FORT SCOTT, KAN.—Bids are asked until Dec. 9 for furnishing and constructing the stone work, excavation and fill for a bridge in Osage township. H. Frankenburg, County Clk.

MILAN, MO.—Bids are asked until Dec. 6 for constructing a combination bridge over Yellow Creek, Morris township, and for a combination township line, according to reports. Chas. W. Reeves, County Surveyor.

SARCOXIE, MO.—Bids are asked until Dec. 5 for furnishing the material and constructing a stone bridge on Center St. A. T. Houghton, Cy. Clk.

FOLSOM, CAL.—We are informed that plans have been prepared for repair of three bridges on the county road near this place, Sacramento county, and the construction of an alternate roadway, hillside work, at the same locality; estimated cost, $3,000. J. C. Boyd, Engr., Sacramento, Cal.

OAKLAND, CAL.—The board of supervisors awarded a contract Nov. 17 to Cotton Bros., at $92,500, for constructing the Webster St. bridge.

REDBLUFF, CAL.—We are informed that a contract has been awarded to the Pacific Construction Co., at about $20,488, for the construction of three bridges. Wm. F. Luning, County Surveyor.

WALNUT GROVE, CAL.—We are informed that J. C. Boyd, Sacramento, Cal., has been instructed to prepare plans for a draw bridge near this place.

CHATHAM, ONT.—Owen McKay, Ch. Engr., Lake Erie & Detroit River Ry Co., Walkerville, Ont., writes us that a contract for the substructure of the new bridge on the Erie & Huron Ry. Division, over the Thames River, has been awarded to the Engineering Contract Co., New York, N. Y. It will consist of two abutments and three piers built of concrete masonry on pile foundation. The superstructure will consist of two girder spans each 75 ft. in length and a draw span of 278 ft.; estimated cost, $25,000. Benjamin Douglass, Engr., Detroit, Mich.

PORTAGE DU FORT, QUE.—Reports state that the span between the piers of the Ontario end of the bridge crossing the Ottawa River at this place has been destroyed.

NEW WESTMINSTER, B. C.—Reports state that the Great Northern will bridge the Frazer River at this place on the extension of a line to Vancouver.

BUILDINGS.

BOSTON, MASS.—Bids are asked until Dec. 9 for furnishing laundry machinery for the Boston City Hospital; bond, $2,000. A. Shuman, Pres.

MANCHESTER, CONN.—A fire in this city, Nov. 29, destroyed the Cheney block causing an estimated loss of $50,000. W. B. Cheney and Harry Cheney are interested.

AUBURN, N.Y.—J. C. Stout and D. W. Barnes & Son, of Auburn, are reported to have been awarded the contract for the erection of a new 2-story freight house, 180 × 67 ft., at Clark and Washington Sts., for the Lehigh Valley R. R. Co.

BROOKLYN, N. Y.—The following contractors bid for the erection of an idiot pavilion, a nurse's home, two new wings, and alterations to the central top story of the King's County Hospital, Nov. 22; total cost about $150,000: L. A. Burke & Co., 401 West 59th St., New York; P. S. Carlin & Co., 289 4th Ave., New York; B. Gallagher & Son, New York; M. Gibbons & Sons, Brooklyn; F. J. Kelly & Sons, 220 Broadway, New York; Leonard Bros., Brooklyn; Wm. P. McGarry; Newman & Co., 355 Adams St., Brooklyn; Wm. H. Port, Brooklyn; Ryan & McFerran, 106 East 23d St., New York; T. B. Rutan; J. Wagner, New York.

Burnham & Co., Archs., The Rookery.——Bids will soon be asked for erecting a new building, 115 × 90 ft., for the Second Congregational Church at Oak Park, to cost about $30,000. Patton, Fisher & Miller, Archs.——Four apartment buildings will be erected on Congress St., near Albany Ave., to cost about $45,000. Chas. W. Van Keuren, Arch., 84 La Salle St.——The Chicago Canal & Dock Co. expects to erect a 6-story building on Illinois St., near St. Clair St., to cost about $50,000.

EVANSTON, ILL.—Volney W. Foster is said to contemplate the erection of a 3-story building at Evanston, to cost $40,000. Harvey L. Page, Arch., 918 La Salle St.

PEORIA, ILL.—Bids are asked until about Feb. 1 for erecting a 12-room school building, 130 × 82 ft., in the 4th Ward; estimated cost, $40,000. Richardson & Hotchkiss, Archs., Dime Savings Bank Bldg.

SPRINGFIELD, ILL.—Sangamon county has voted to appropriate $100,000 towards remodeling the court house in this city. County Clerk Piper may be addressed.

JANESVILLE, WIS.—The Rock county board of supervisors has voted to erect a new jail building, at a cost of about $25,000. Plans and specifications will be ready in January.

GARNER, IA.—Bids are asked until Dec. 15 for the erection of a brick and stone court house for Hancock county; deposit, $800. H. B. Reed, County Audr., Garner; F. W. Kinney, Arch., Austin, Minn.

FLANDREAU, S. DAK.—Bids are asked until Dec. 15 for the construction of a steam heating plant at the Flandreau Indian Industrial School. W. A. Jones, Comr. of Indian Affairs, Washington, D. C.

KANSAS CITY, MO.—A fire in this city, Nov. 28, damaged the furniture establishment of Robert Keith & Co., at 11th and Grand Aves. Reported loss, $150,000 on the stock and $40,000 on the building.

ST. LOUIS, MO.—Building permits have been granted to the board of education for a 3-story school building at Hogan and Madison Sts., to cost about $69,000; a 2-story building at 4234 St. Louis Ave., to cost about $30,000; and for a building at Billon St. and New Manchester Road, to cost $15,000.

MENA, ARK.—Jos. P. Landes, Chn. of Comrs., informs us that bids are asked until Dec. 1 for the erection of a new court house for Polk county, to cost $8,000. Joseph Heidrick, Arch., Mena.

SEARCY, ARK.—The Galloway Female College building, at this place, was destroyed by fire, Nov. 27; estimated loss, $60,000; insurance, $30,000.

SAN FRANCISCO, CAL.—A fire in this city, Nov. 23, destroyed the Baldwin Hotel, at Market and Powell Sts., owned by E. J. Baldwin; reported loss, about $1,500,000; insurance, $50,000. The formation of a company to rebuild the block is contemplated.

PHOENIX, ARIZ.—We are informed that bids are asked until Jan. 10 for the erection of a capitol building for Arizona, to cost about $100,000; deposit, $5,000. F. H. Parker, Secy. of Bldg. Comn.; Jas. Reily Gordon, Arch., San Antonio, Tex.

BROCKVILLE, ONT.—Reports state that Geo. T. Fulford, of the Pink Pill Co., has let the contract for erecting a new residence, to cost about $75,000.

ST. THOMAS, ONT.—The following bids have been let in connection with the new city hall building: For metal work, A. B. Ormsby & Co., Toronto, $990; for heating, Charles Buell, $2,394; for plumbing, K. J. Allison, Toronto, $1,097. Arch., N. R. Darragh.

TORONTO, ONT.—It is announced that improvements will be made to the Rossin Hotel, to cost about $150,000. J. H. Chewitt, Pres. of Rossin Hotel Co.

WATER-WORKS.

HAMPTON, N. H.—Wm. T. Ross, Engr. Hampton Water-Works Co., it is stated, will make surveys for works at once.

AMESBURY, MASS.—The Powow Hill Water Co. proposes to build a new reservoir. A report states that there is some discussion of the town buying the works, the present contract for supplying water expiring in a few years.

GRANVILLE, MASS.—The question of building works is again being considered.

CHURCHVILLE, N. Y.—The election called for Nov. 23 to issue bonds for works was declared illegal.

DOBB'S FERRY, N. Y.—The question of calling an election to vote on the proposition to build a reservoir at a cost of about $50,000 is being considered.

MONTGOMERY, N. Y.—The Greene County Water Co. has been incorporated with a capital stock of $20,000, by W. H. Cowan and Geo. Keesler, of Montgomery; W. R. Brook, of Almeda, N. Y., and C. A. Crowell, of Stamford, N. Y.

HEMPSTEAD (L. I.), N. Y.—A. R. Hart, W. S. Work and J. N. Williamson have applied for a charter for the Nassau Water Co

JAVA, N. Y.—It is proposed to build works here, according to reports.

STRYKERSVILLE, N. Y.—Tests for a water supply, it is stated, are being made.

NEW YORK, N. Y.—Bids are asked until Dec. 8 for furnishing for Brooklyn cast-iron water pipe, branches and special castings, and for Manhattan two new boilers at the 97th St. boiler house and for taking out four old boilers. Wm. Dalton, Comr. Water Supply, 150 Nassau St.

NORTH TONAWANDA, N. Y.—The aldermen have been petitioned to extend the water mains to the Ironton district.

ORANGE, N. J.—Bids are asked until Dec. 12 for constructing a dam, reservoir, engine, boilers, building, etc., in Millburn township, as described in our advertising columns. John J. Cuddy, Chn. Com.

CONNELLSVILLE, PA.—Press reports state that the question of purchasing the works at this place, owned by the American Water-Works & Guarantee Co., Pittsburg, Pa., will probably soon be voted upon by the people. The opportunity to purchase the works expires this year.

DARBY, PA.—The contest between this place and the Spring Water Co., Swarthmore, Pa., in regard to whether the town may build works will be called in the court in January. Population (1890), 2,972.

PITTSBURG, PA.—The Harman Water Co. and the Springdale Water Co. were incorporated Nov. 28, each with a capital stock of $1,000 of which $100 is paid in. The former company will operate in Harman township and the latter in Springdale township, Allegheny County. Incorporators, John F. Miller, Treas., East Pittsburg, Pa.; C. W. Michael, Pittsburg; J. S. McGinley, Springdale, and C. A. Rowan, Parnassus, Pa.

WEST UNION, W. VA.—Press reports state as follows: On Nov. 17, J. V. Blair, attorney for the town in the water-works case, received notice from J. A. Holley, clerk Supreme Court of Appeals, that the decision of the lower court had been confirmed in that case. This is a victory for those who favor water-works. Bids for building the works to cost about $6,000, were asked for a year ago, at which time G. W. Bland was Mayor. Population, 600.

SPARTANBURG, S. C.—J. M. Connor, it is stated, has been appointed receiver for the Spartanburg Water-Works Co.

GAFFNEY, S. C.—Bids are asked until Jan 3 for building the proposed works, according to reports. Frederick Minshall, Engr., 150 Nassau St., New York. In June, 1897, the Mountain View Land & Water Co. was incorporated to build works; capital stock, $4,500. Chas. M. Smith was interested. A. N. Wood may be addressed.

M'COMB CITY, MISS.—J. Dock Harrell, Cy. Clk., writes us that the Ruemmeli & Seibert Refrigerating Machine Co., St. Louis, Mo., was awarded the contract for building the works at $88,929.

LAKE PROVIDENCE, LA.—An election will be held Dec. 15 to vote on the question of issuing $17,500 in 5% bonds for works and an electric light plant. R. L. Hill may be addressed.

HILL CITY, TENN.—It is stated that the Chattanooga Co., Ltd., Chattanooga, Tenn., is reconsidering the feasibility of building works, the construction to be begun in a short time. It is proposed to bring the water from Stringer's Ridge. The stand pipe will be built on a hill near Vallombrosa. Estimated cost, $25,000. H. C. Beck, of the company, Chattanooga, may be addressed.

GALLATIN, TENN.—Walter G. Fitzpatrick, Jackson, has been engaged to prepare plans for works. The water supply will be from the Cumberland River, with filter, elevated tank and distribution system. J. W. Blackmore, Chn.

FAYETTEVILLE, TENN.—It is reported that W. G. Fitzpatrick, Jackson, Miss., has been awarded the contract for building the proposed works. The supply will be received from Wells Hill four miles distant. Pipe laying, etc., will not begin before next year.

SOMERVILLE, TENN.—Bids are asked until Dec. 15 for furnishing the materials and for constructing the proposed works and electric plant, as stated in our advertising columns. G. C. Morgan, Engr., Chicago; T. B. Yancey, Mayor; E. R. Scruggs, Recdr.

LOUISVILLE, KY.—Bids are asked until Dec. 7 for placing six 6-in. hydrants. T. P. Craig, Secy. Bd. Pub. Wks.

GALLIPOLIS, O.—The trustees of the State Hospital have awarded the following contracts for works at the hospital here: Pumps, Henry R. Worthington, New York, $4,864; air compressors, Ingersoll-Sergeant Drill Co., New York, $785; air lifts, the same, $940; reservoir of 800,000 gallons, Geo. M. Snyder, Columbus, O., $7,998. Dr. H. C. Rutter, Gallipolis, and Geo. McCook, Steubenville, O., are trustees.

YOUNGSTOWN, O.—Press reports state as follows: The trustees on Nov. 22 took the initial steps in a project that will, if indorsed by the people, cost about $250,000 within the next year in securing purer water. The present source of supply is the Mahoning River, into which is drained the sewage of a number of towns together with a considerable portion of the sewage of this city. It is now proposed to acquire certain territory constituting the water shed of Mill Creek, and by a series of connecting storage reservoirs utilize its water hereafter. The proposition for the issuance of bonds for the purpose will be submitted to the voters in April. D. N. Simpkins, Sec., writes us that it is not known when anything will be done. W. S. Hamilton, Supt.

CHEBOYGAN, MICH.—At the election Nov. 8 this place voted to issue $7,000 in bonds for a 3,000,000 gallon air compressor, sinking a 10-in. well, etc., for a better water supply. Estimates, etc., for these improvements are wanted at once. Geo. N. Case, Cy. Clk.

SAGINAW, MICH.—Local papers state that the aldermen have voted to put in five miles of cast-iron water pipe in place of the wooden pipe in the West Side. Alderman Auschutz and Superintendent Weale may be addressed.

BOWEN, ILL.—The question of building works is being considered, according to reports.

ELKHART LAKE, WIS.—At the election Nov. 16 this place voted in favor of issuing $5,000 in bonds for works.

SHEBOYGAN, WIS.—W. D. Cockburn, Supt. City Water Co., writes us that the Nordberg Mfg. Co., Milwaukee, Wis., is building the new 8,000,000 gallon pump.

MARKESAN, WIS.—H. P. Friday writes us that no steps have yet been taken toward securing works, reported last week. Population, 550.

OSAGE, IA.—G. H. Merridith, Cedar Rapids, Ia., has completed plans for works at Osage, to cost $28,000. The works, it is stated, will have a 1,000,000-gallon pump, operated by gasoline, a 250,000-gallon reservoir and an 80,000-gallon tank, set on a steel tower 110 ft. high. There will be $16,000 worth of piping, of which 1,420 ft. will be 10-in., 4,320 ft. 8-in., 17,290 ft. 6-in. and 6,000 ft. 4-in.

DUBUQUE, IA.—C. N. Berg, Mayor, writes us that nothing has been done towards purchasing the works, except to give the Dubuque Water Co. the required six months notice of intention to purchase.

BERMIDJI, MINN.—An election will be held Dec. 6 to vote on the question of issuing $7,000 in bonds for works, according to reports.

CHILLICOTHE, MO.—The pumping station of the Chillicothe Water, Gas & Electric Light Co., it is stated, was partly destroyed by fire Nov. 18.

STANBERRY, MO.—W. A. Erwin, Mayor, writes us that this place has voted to issue $3,000 in bonds for a wooden tank and steel tower for the works.

DENVER, COLO.—We are informed that J. B. Hunter, Cy. Engr., has made a report to the council on the feasibility of constructing new works. The report is now in the hands of the board of public works, whose duty it is to take the initiatory in recommending the issuance of bonds.

LINCOLN, WASH.—The question of building works and an electric light plant is being considered.

NEW WHATCOM, WASH.—J. H. Thomas is reported to have been awarded the contract for constructing a supply main from Lake Whatcom to this city at $19,881.

RITZVILLE, WASH.—The council is reported to have granted a franchise for works and a light plant. The city already has municipal works.

SEATTLE, WASH.—The council on Nov. 23 accepted the bid of Gahan & Byrne, 4209 South Halsted St., Chicago, Ill., for the construction of the Cedar River water-works addition at $1,238,622, according to reports. The following comprise the bid: Certified check, $62,000; constructing headworks on Cedar River, $31,692; constructing pressure pipe from headworks, $812,292; High service reservoir at city park, $113,913; Low service reservoir, Nagle's Addition, $122,656; Metal work for 30 × 60 ft. stand-pipe on Queen Anne Hill, $7,867; concrete work for Queen Anne standpipe, $13,007; pumping main, $34,874; wooden stave and steel pipe line to reservoirs, $16,249; waste pipe from high service reservoir to Lake Union, $5,437; connections of low service reservoir distribution system and Tenth Ave. sewer, $33,161; changing Cedar River channel and connecting with Swan Lake, $47,476.

TACOMA, WASH.—The question of securing an increased water supply from the Maplewood Springs is being considered.

WALLA WALLA, WASH.—The supreme court, Washington, D. C., has affirmed the decision of the district court in Walla Walla against the city's building municipal works. The case has been in the courts since 1893, in which year the city voted to issue $160,000 in bonds for works.

SANTA BARBARA, CAL.—The committee has recommended that the city postpone issuing $50,000 in bonds for extending the works. N. B. Smith and J. B. Wentling are on the committee.

SAUSALITO, CAL.—It is stated that a new water supply will be secured for this city by a company, now being organized, from Lake Lagunitas, belonging to the Marin County Water Co. A. Borel and A. W. Foster, Pres. Marin County Water Co., are interested. John H. Dickinson and A. Sylva, Town Trustees.

WHITTIER, CAL.—Walter E. Butler, Cy. Clk., informs us that bonds were carried at the election on Nov. 22 by a vote of 235 to 33. About $20,875 will be used to buy the wells and the old system, and $19,225 to construct new works. Preliminary plans have been made by Burr Bassell, Los Angeles, Cal.

RENO, NEV.—Bids are asked until Dec. 12 for the purchase of $130,000 of 6% bonds for the proposed works. (Postponement from Nov. 12). F. B. Porter, Clk.

LIVERPOOL, N. S.—The council has decided to build works and an electric light plant at a cost of about $31,000, according to reports. I. V. Dexter may be addressed.

BRANTFORD, ONT.—Fred. W. Frank, Secy. Bd. Water Comrs., writes us that the city may want to purchase in the near future a new 5,000,000-gallon pump and extend the galleries for collecting water from springs. T. Harry Jones, Cy. Engr.

WINNIPEG, MAN.—Mayor Andrews is reported to have received a cablegram from the London owners of the Winnipeg water-works accepting the offer of the city to purchase the works for $237,500.

VANCOUVER, B. C.—Bids are asked until Dec. 14 for furnishing cast-iron water pipe, steel riveted pipe, hydrants, valves, etc., for extending the works, according to reports; estimated cost, about $75,000. Thos. McGuigan and T. H. Tracy, Cy. Engr., may be addressed.

VICTORIA, B. C.—The council is reported to have appropriated $12,000 for extending the water mains in Pandora St.

HAVANA, CUBA.—Jas. B. Clow & Son, Lake and Franklin Sts., Chicago, Ill., have been awarded the contract for furnishing the materials and for extending the water-works in this city at $29,523.

BELEM (PARA), BRAZIL.—Bids are asked until March 15 for the transfer by the government of the state of Para of the exclusive right for 60 years (to be extended under certain conditions for further term of 10 years) to supply Belem, the capital, with potable water. The transfer will include certain lands, machinery, plant and other material in use in the present works or in stock. (Postponement from Nov. 10.) Population, 60,000. Further information may be had on application to the Brazilian Consulates and Vice-Consulates at London, Eng.; at Berlin, Germany; and at Washington, D. C., and 22 State St., New York.

SEWERAGE.

NEW BRITAIN, CONN.—Samuel M. Gray, Providence, R. I., has submitted a report for improving the system of this city. Aug. Voigt, S. H. Stearns and Edgar H. Beach, Comrs.

ALBANY, N. Y.—Bids are asked until Dec. 5 for constructing 15 and 10-in. pipe sewers in two streets. T. J. Lanahan, Clk. Bd. of Contract.

JAMAICA (L. I.), N. Y.—The department of arrears and assessments is to prepare a map for the assessment of this district for the purpose of building a sewage disposal plant to cost about $50,000. About 26 miles of sewers have been built but they cannot be used until the disposal plant is constructed.

SYRACUSE, N. Y.—Bids are asked until Dec. 5 for constructing a 15-inch pipe sewer in Renwick Place from Almond St. to Renwick Ave., a 15-inch pipe sewer in Ulster St. from Avery Ave. to Myrtle St., and a 12-inch pipe sewer in Avery Ave. from Ulster St. to Schuyler St. M. Z. Haven, City Clerk.

PHILADELPHIA, PA.—Bids are asked until Dec. 13 for constructing main and branch sewers, etc. Thos. M. Thompson, Dir.

SCRANTON, PA.—Bids are asked until 7:30 p. m., Dec. 1, for constructing sewers in Section C, Fifth District. M. T. Lavelle, Cy. Clk.

STEELTON, PA.—The construction of a system is proposed, according to reports. H. H. Campbell, Pres. Council, and Councilman Freeland may be addressed.

WILLIAMSPORT, PA.—The committee to which was referred the ordinance for the relief of Grafius Run has decided to report negatively to councils the project to build a 5-ft. sewer in Laurel St. to the river, at a cost of $20,000. Instead it was decided to recommend to build a 10-ft. sewer in Locust St. to the river.

ALEXANDRIA, VA.—The council has directed the mayor to appoint a committee to investigate the question of making changes in the sewers emptying into Hunting Creek, near which the water supply is received.

NEWNAN, GA.—This place is reported to have asked the legislature for permission to build a system.

NEW ORLEANS, LA.—An election will be held to vote on the question of a tax of 2½ mills for a system and other permanent improvements. The system, it is estimated, will cost about $6,000,000. Councilmen Sidney Story, Brittin and Dreyfous may be addressed.

INDEPENDENCE, IA.—It is stated that the council has voted to have plans for a system prepared. A. D. Gurnsey, Cy. Engr.

TOLEDO, O.—The sewer committee of this city is arranging for the construction of a sewer in several streets. L. P. Harris, Cy. Clk.

NEWTON, KAN.—The Newton Improvement Co. is making surveys for extending the system.

ST. LOUIS, MO.—An ordinance authorizing the Rocky Branch Sewer District No. 1 was approved by the Board of Public Improvements Nov. 22. The district is bounded by Natural Bridge Road, Kossuth, Fair and Taylor Aves., and is estimated to cost $37,000.

BISMARCK, N. DAK.—Press reports state that a system will be built in the spring.

INDEPENDENCE, MO.—Bids are asked until Dec. 13 for the purchase of $75,000 in bonds for the proposed system. Population, 8,000. S. H. Woodson, Mayor; S. A. Sullivan, Cy. Clk.; H. H. Pendleton, Cy. Engr.

MACON, MO.—An election will be held Dec. 6 to vote on the question of issuing bonds for a system to cost about $23,000.

LITTLE ROCK, ARK.—Bids are asked until Dec. 12 for the construction of 8,400 ft. of sewers in this city. W. R. Griffith, Secy. of Sewer District No. 25.

CLEBURNE, TEX.—Jack Steele, of Williamson county has been awarded the contract for constructing and maintaining for 50 years, a system for the court house, jail and market place at $5,000.

DENVER, COLO.—Bids are asked by the board of public works until 1 a. m., Dec. 2, for constructing the North Denver sewer; check, $500.——H. C. Lowrie, Engr. Bd. Pub. Wks., writes us that a bill for an ordinance ordering Capitol Hill Storm Sewer District No. 1, to cost about $1,000,000, on plans, etc., previously adopted by the board of public works, was unanimously passed by the Supervisors Nov. 8, and now goes to the Board of Aldermen requiring 12 out of 15 votes. It then must be advertised (for bids) at least 10 days locally. The first letting will be for about $400,000 worth of the work.

SEATTLE, WASH.—The City Engineer is preparing plans and specifications for two sewers. The first is known as the East Republican sewer and is estimated to cost $29,000. The second is known as the East Denny Way system and is to cost about $44,000.

SPOKANE, WASH.—Councilman A. W. McMorrain, of the 4th Ward, is urging the construction of sewers in that ward.

BAKERSFIELD, CAL.—It is proposed to construct a system at a cost of about $100,000.

GRASS VALLEY, CAL.—Bids are asked by the clerk of the board of trustees until Jan. 10 for the purchase of $50,000 of bonds for the proposed system. Mayor Parsons and Trustee Pattison may be addressed.

NEVADA CITY, CAL.—T. H. Carr, Cy. Clk., writes us that the city is taking the first steps towards submitting to the voters the question of issuing bonds for a system.

SAN FRANCISCO, CAL.—The Sunset District Improvement Club has asked the supervisors to build certain sewers in Sunset District at a cost of $35,000.

HULL, QUE.—Press reports state as follows: The Stadacona Water, Light & Power Co., of Montreal, has submitted to the council the following propositions with regard to the construction, maintenance and working of a system for the city: The company asks for a franchise to maintain such a system for 40 years and an exemption of taxation; after 40 years the system to belong to the city. If Hull should desire to purchase the system before that time the company would be willing to turn it over provided the city pay an additional cost of 20%. If the corporation is willing to adopt the proposition the work can be completed before Dec. 1, 1899.

HONOLULU, H. I.—It is stated that bids for $500,000 of Hawaiian Government bonds, authorized by the last legislature for the purpose of making public improvements, were recently opened. It was expected that the amount would be subscribed for, but the event proved otherwise. There were bids for less than $200,000 worth. All of these were at par or higher, however, and it is believed that the whole amount can be yet disposed of. W. G. Irwin bought $100,000 worth. The government is anxious to proceed with the sewerage and drainage systems of Honolulu, which was authorized by the last legislature. Plans for it have already been made. The entire cost will be about $250,000.

CALLAO, PERU, S. AM.—Bids are asked by the municipal council until Jan. 15 for furnishing the materials and for constructing the proposed system. The system will consist of 4,819 ft. of main sewer, 5,945 ft. of secondary sewers, and 35,642 ft. of drains; also a cast-iron outlet pipe into the sea and a number of inspection wells, etc. The estimated cost is $126,042. It must be completed within three years. A bonus will be given for earlier completion, and a fine incurred if the stipulated period be exceeded. Materials for construction will be admitted into the country duty free. We are informed that the work is to be paid for in three annual instalments, secured secondary upon the whole revenue of the city, and primarily upon the proceeds from the new sewerage tax, which is estimated as producing about $30,000. Plans and specifications, in Spanish, may be seen at the office of the National Association of Manufacturers, The Bourse, Philadelphia, Pa.

GARBAGE DISPOSAL—STREET CLEANING

NEW YORK, N. Y.—Bids are asked until Dec. 9 for the removal of snow and ice from the streets, avenues and public places in Manhattan and Bronx and the unloading and discharge of same at the several dumps or other places, designated by the commissioner of street cleaning, during the period between the date of execution and April 15. F. M. Gibson, Deputy Comr. of Street Cleaning, 346 Broadway, Manhattan.

CAMDEN, N. J.—M. V. Blackwell has contracted to haul all garbage from the crematory here to a place in Pensanken township at $6.00 per week.

ERIE, PA.—The American Reduction Co. has made a proposition to this city for the erection and equipment of a garbage plant. Kraft & Walther also submitted one in regard to entering into an extensive contract for the collection of its garbage.

SAVANNAH, GA.—Commissioner of Public Works Wilink, it is stated, has asked that an appropriation of $46,248 for a new crematory, $63,714 for the street department, $26,873 for the scavenger department and $8,420 for an odorless excavating machine, be made for next year.

CLEVELAND, O.—Bids are asked until Dec. 7 for clearing the catchbasins in the city for one year. Geo. R. Warden, Dir. Pub. Wks.——No bids were received by the board of control Nov. 21 for street cleaning. New specifications are to be received at once and new bids asked.

SAN FRANCISCO, CAL.—Reports state that the garbage from this city will be taken into San Mateo county and consumed by the California Reduction Works.

STREETS AND ROADS

CHATHAM, MASS.—At the town meeting, Nov. 21, it was voted to appropriate $20,000 for the improvement of roads and for the purchase of a stone crushing plant.

SHARON, MASS.—The town board has voted to appropriate $2,000 for road work.

ROCHESTER, N. Y.—Edwin A. Fisher has about completed plans for the paving and sewering of South Fitzhugh St. from West Main to Spring St., estimated cost, $11,000. Bids will be asked some time next week, according to reports.

BUFFALO, N. Y.—Bids are asked by the park commissioners until Dec. 1 for repairing and maintaining about 132,347 sq. yds. of asphalt pavement, for five years.

SYRACUSE, N. Y.—A contract for paving Seymour St., from Oswego to South Geddes Sts., has been awarded to the Asphaltina Construction Co. at $19,459.

ONEIDA, N. Y.—A proposition is before the village trustees to pave Main St., from Lenox Ave. to Seneca Ave., to have a 42-ft. roadway, to cost about $60,000.

HOBOKEN, N. J.—The council has awarded a contract to the Utica Asphalt Co., at $13,008, for paving on Fifth St. and Park Ave., and to the New Jersey Mexican Asphalt Co., at $10,262, for paving on three streets.

HOBOKEN, N. J.—Bids are asked until Dec. 21 for the improvement of Court St. between Ferry and Seventh Sts. M. V. McDermott, Cy. Clk.

OAKLAND, N. J.—A special election will be held Dec. 6 in Franklin township to vote upon the question of bonding the township for $75,000 for the construction of macadam roads.

ANNAPOLIS, MD.—Bids are asked until Dec. 3 for building shell roads. Alton R. Arnold, Road Comr.

BALTIMORE, MD.—Chas. E. Wright, Councilman, has introduced an ordinance to pave O'Donnell St. with sheet asphalt, between Boston and Pautuxent Sts., at a cost of $22,000, and from Pautuxent St. to the eastern city limits, to cost $25,000.——An ordinance to pave Bush St. and appropriate $20,000 for the work has been approved by the board of estimate.

BALTIMORE, MD.—The council committee on highways has favorably reported the measure for paving with sheet asphalt and binder, Gough St. from Broadway to Patterson Park; the present cobblestone surface to be used as a base instead of concrete; estimated cost, $20,000.

JACKSONVILLE, FLA.—Bids are asked by the board of public works until Dec. 15 for furnishing and constructing about 22,000 sq. yds. of brick paving or about 1,250,000 brick, curbing and constructing sidewalks on Main St., for a distance of 4,290 ft.

NEW ORLEANS, LA.—The Belden & Seely Asphalt Paving Co. has been awarded a contract for paving Canal St. The itemized bids were given in our issue of Oct. 20.

CARLISLE, KY.—Geo. R. Martin, County Surveyor, writes us that no steps have yet been taken to award contracts for constructing pike roads, for which $40,000 was authorized Nov. 8. John W. Henry, County Road Comr.

LOUISVILLE, KY.—Bids are asked until noon Dec. 2 for grading, curbing and asphalt paving on portions of 11 streets. Chas F. Grainger, Bd. Pub. Wks.

BOWLING GREEN, KY.—The Warren County fiscal court has adopted a resolution providing for the purchase of the pikes of the county, from the stockholders, by Dec. 10. The roads will cost about $80.000.

BRIDGEPORT, O.—John A. Fawcett, Village Clk., writes us that the village will in the spring lay about $60,000 worth of paving. There will be about two miles of paving to be laid on old macadam. The necessary curbing including about three miles of old curb to be reset, will be put down this winter. Engrs., Hoge & Hicks, Wheeling.

CINCINNATI, O.—Bids are asked until Dec. 6 for brick paving on Marquis Ave. and until Dec. 20 for macadamizing on Paradrome St. Geo. H. Spellmire, Clk. Bd.

TOLEDO, O.—The council has awarded a contract to Geo. H. Bodette, at $4,740, for paving on Eastern Ave. with Nelsonville blocks and to W. J. & J. J. McMahon, at $2,832, for paving 21st St. with Buckeye blocks.

DECATUR, IND.—Bids are asked until Jan. 5 for constructing about 17½ miles of macadam roads in Washington township. We are informed that the work will be let in three separate contracts. W. E. Fulk, County Surveyor.

HAMILTON, O.—Bids are asked until Dec. 19 for paving Second St., from Central Ave. to Black St., with asphalt or brick. M. O. Burns, Cy. Clk.

ST. JOSEPH, MO.—The question of paving Clinton Ave. for three blocks, at a cost of about $10,000, is being considered by the council. F. A. Travis, Mayor.

BRAZIL, IND.—Bids are asked until Dec. 14 for constructing about 19 miles of gravel roads in Brazil, Jackson and Posey townships. Geo. Siegelin, County Comr.; Thos. Philips, Audr.

QUINCY, ILL. — The bids received Nov. 22 for constructing the proposed Missouri Road; estimated cost, $12,000, have been rejected on account of being too high. F. A. Grover, County Engr.—The board of local improvements has decided to construct about eight miles of paving next year, on portions of 20 streets.

TERRE HAUTE, IND.—The county commissioners awarded a contract Nov. 22 to W. C. Dorsey, Terre Haute, at $37,555, for constructing 16 miles of gravel roads in Nevins township and to Joseph E. Hart, Vevay, Ind., at $29,000 for 14 miles of gravel roads in Linton township.

GRINNELL, IA.—The question of paving the principal business streets is being considered.

BEAUMONT, TEX.—Bids are asked until Dec. 15 for paving portions of Travis, Crockett and Pearl Sts., about 12,000 sq. yds., with brick, asphalt and creosoted blocks, on 6-in. concrete foundation. D. P. Wheat, Mayor. L. E. Beadle, Engr.

AUBURN, CAL.—County Supervisors Hayford and Mariner have been appointed a committee to investigate the cost of purchasing a traction engine and rock crusher.

SACRAMENTO, CAL.—J. C. Boyd, County Surv., writes us that he has prepared plans for the macadamizing of 15,000 sq. yds. at an estimated cost of $7,000; including the grading of a roadway 50 ft. wide, constructing drains, and macadamizing a central strip 16 ft. wide by 8 ins. deep.

SAN RAFAEL, CAL.—Bids are asked until Dec. 5 for macadamizing. Geo. L. Richardson, St. Supt.

MANUFACTURING PLANTS.

EAST CAMBRIDGE, MASS.—A fire, Nov. 21, destroyed the pork packing establishment of John P. Squire & Co.: loss, $80,000.

NORWICH, CONN.—It is reported that J. B. Martin & Co., silk manufacturers, Lyons, France, will establish a branch factory at this place.

BROOKLYN, N. Y.—Reports state that the Kings County Refrigerating Co. will erect a 7-story cold storage warehouse and refrigerating plant, costing about $200,000, on Hall St., near Flushing Ave. Robert Hewitt, Ethan Allen Doty, Jas. J. Phelan, Allen F. Cook and Edward L. Nicoll are said to be interested.

COXSACKIE, N. Y.—It is reported that a new collar and shirt manufacturing company will erect a factory here; capital, $25,000. Edward J. Miller and William P. Hall, of Troy, and E. W. Williams and Thos. F. Gary, of Hoosick Falls, N. Y., are interested.

TROY, N. Y.—Enigh & Lobdell, of this city, according to reports, will erect a 5-story stone factory building, 90 x 110 ft., on Center Island, Green Island, to cost from $40,000 to $50,000.

UTICA, N. Y.—The Capron Knitting Mill Co., of New Hartford, N. Y., contemplates erecting a 4-story brick mill on Whitesboro St.

HOBOKEN, N. J.—Lehmann & Raudnitz will erect a large factory building at Ferry St. and Willow Ave., according to reports.

ELWOOD CITY, PA.—Reports state that L. F. Smith and S. H. Marks, Beaver, Pa., will erect a glass factory here. ——The American Weldless Tube Co. contemplates the erection of a billet piercing plant at this place or Greenville, Pa.

PHILADELPHIA, PA.—The Baldwin Locomotive Works, at 15th and Hamilton Sts., are said to be receiving bids for a 2-story brick and iron building, 100 × 170 ft.

PITTSBURG, PA.—Jones & Laughlins, according to report, will make extensive improvements to their plant at Brownstown. Willis L. King, Gen. Mgr.

READING, PA.—The Cold Storage Co., according to reports, will erect a plant on 9th St., near South St.

BALTIMORE, MD.—The Carr-Lowrey Glass Co., of Baltimore, informs us that it is receiving bids for the construction of a new plant, but have done nothing as yet towards awarding contracts. Jackson C. Scott, Arch., Baltimore.

CLARKSBURG, W. VA.—The Consumers' Ice Co. will erect a refrigerating plant, costing about $15,000, at this place. F. M. Staunton, Charleston, W. Va., and Camden Thompson, Huntington, W. Va., are interested.

FLORENCE, ALA.—Eugene Zimmerman, Cincinnati, O., and B. F. Nichols, Bessemer, Ala., are reported to have purchased the Philadelphia furnace at this place; work will begin soon.

COLUMBUS, O.—The Wolfe Bros. Shoe Co., of this city, has increased its capital stock from $150,000 to $200,000, in order to enlarge its factory. R. F. Wolfe, Pres.; H. P. Wolfe, Secy.

SALEM, O.—Plans have been completed for a $40,000 pottery. Morris French, Cy. Engr., may be addressed.

NILES, O.—The Thomas Furnace Co. has been reorganized with a capital of $100,000 by J. M. Thomas, Patrick Sheehan and others. It is said that the old Thomas plant will be enlarged.

ANDERSON, IND.—Reports state that the American Plate Glass Co. has appropriated $100,000 for erecting additions to its plant.

INDIANAPOLIS, IND.—T. B. Laycock has let the contract for the erection of a 5-story brick and stone building, 135 × 195 ft., on St. Clair St., to cost between $30,000 and $35,000. Thos. A. Winterwood, Arch.

NEW ALBANY, IND.—Reports state that the New Albany Mfg. Co. contemplates enlarging its plant.

MONROE, MICH.—It is reported that a $500,000 beet-sugar plant will be erected here. Prof. E. Salick, of Chicago, is interested.

ODESSA, MICH.—A. C. Hager will erect a 4-story cold storage building, 36 × 60 ft., a 1-story machine and boiler house, 36 × 44 ft., to cost about $15,000. Fred. W. Wolf Co., Archs., Chicago, Ill.

CHICAGO, ILL.—Reports state that Armour & Co. are about to erect a 7-story brick warehouse, to cost $100,000, and a fertilizing plant, to cost $35,000.——Fire here Nov. 24, destroyed the 6-story soap factory building of the Allen B. Wrisley Co., at 479-485 Fourth Ave.

ASHLAND, WIS.—O'Keefe & Orbison, of Appleton, Wis., have been awarded the contract for the erection of a paper mill at this place.

MILWAUKEE, WIS.—Reports state that the Kieckhefer Bros. Co. will erect a series of 5-story buildings, on St. Paul Ave., to cost about $150,000. Ferdinand Kieckhefer, Pres.

OCONTO, WIS.—A fire here Nov. 24, destroyed the planing mills of the Citizens' Electric Light & Fuel Co.; loss, $50,000; insurance, $18,000.

RACINE, WIS.—The plant of the Belle City Malleable Iron Works was destroyed by fire Nov. 22; loss, $100,000; insurance, $40,000.

WAUKESHA, WIS.—W. M. Gleeson, according to reports, states that $15,000 of the $25,000 necessary for the location of a threshing machine factory has been subscribed.

DES MOINES, IA.—It is stated that William Tarkington, of Chicago, Ill., contemplates the organization of a company at this place for the purpose of rolling steel and wrought iron.

DUBUQUE, IA.—The Scriber & Couchar Co., according to reports, will erect a foundry at this place.

COLORADO SPRINGS, COLO.—A fire Nov. 20 destroyed the boiler-house and erection-house of the Colorado Midland R. R.; loss, $25,000.

ROCKLAND, TEX.—William Cameron & Co., whose plant was destroyed by fire, will erect a new building, 240 × 120 ft.

TACOMA, WASH.—Reports state that the London Exploration Co. will invest $300,000 in enlarging the Tacoma smelter. D. O. Mills, of New York, is interested.

PINOLE, CAL.—A fire, Nov. 29, destroyed several buildings of the California Powder Co., causing a reported loss of $25,000. They will probably be rebuilt.

SACRAMENTO, CAL.—The shops of the Southern Pacific Co., recently destroyed by fire, will be rebuilt, according to reports.

WOODSTOCK, N. B.—H. P. Baird, of this city, informs us that the company has not yet been organized for erecting the new pulp mill. Capital is being sought principally from among the owners of paper mills. Experts say that this is a good location for the manufacture of pulp at a low cost.

TORONTO, ONT.—Reports state that a company with a capital of $400,000 is being organized by the Roger Brown Co., of Tonawanda, N. Y., to erect a plant at this place. J. G. Miller, Mgr., of Buffalo, N. Y.

ST. PETERSBURG, RUSSIA.—Bids are asked by the Naval Attache, Imperial Russian Embassy, D. T. Mertvago, 818 18th St., N. W., Washington, D. C., until Dec. 12, for furnishing the set of machinery, and putting it in place complete, for rolling the armor plates, near St. Petersburg. Steam pressure of 7½ atmospheres is ready, and the engine to be used should be of the reversing type. The length of the rolling cylinders should be 4,000 mm., and the maximum weight of ingot to be rolled, 60 tons, with maximum thickness of 900 mm. The rolling machinery must be provided with two regenerative furnaces, each with movable bottoms, but the furnaces themselves are proposed to be built by local means, as stated in our advertising columns.

GAS PLANTS.

BAYONNE, N. J.—It is stated that the United Gas & Improvement Co., of Jersey City, will lay a new pipe line from Lafayette, N. J., to this place.

TOLEDO, O.—Reports state that Thacher & Shirey will lay the 24-in. pipe under the Maumee River for the Toledo Gas Light & Coke Co.

CONVERSE, IND.—Reports state that the Converse Natural Gas & Pipe Line Co. has sold its system to S. S. Murdock, Gen. Mgr. Logansport & Wabash Valley Gas Co.

SPRINGFIELD, ILL.—The Provident Gas Co., according to reports, will erect a plant here. F. W. Tracy, R. D. Lawrence and Stuart Brown may be addressed.

NEW COMPANIES.—Elmira Light, Heat & Power Co., Elmira, N. Y.; $10,000; to produce natural gas. John B. Rathbone, Howard H. Hallock, John A. Reynolds, Thomas S. Flood and Chas. B. Swartwood, Elmira.

Toledo Co-operative Oil Co., Toledo, O.; $12,500.

MISCELLANEOUS CONTRACTS.

TELEPHONE FRANCHISE.—Janesville, Wis.—The council granted a franchise to the Rock County Telephone Co. Nov. 21.

FIRE ALARM SYSTEM.—Philadelphia, Pa.—The council has appropriated $8,000 for the extension of the fire alarm system.

TELEPHONE FRANCHISE.—Doylestown, Pa.—The Standard Telephone Co. has been granted a franchise in this town, according to reports.

REVETMENT.—Toledo, O.—The harbormaster has been authorized to advertise for bids for the revetment work on Ash St., according to reports.

STONE.—Toronto, Ont.—Bids are asked until Dec. 5 for furnishing 75 to 100 toise of stone, at the house of industry. John Shaw, Chn. Bd. Control.

TELEPHONE FRANCHISE.—Plymouth, O.—The Norwalk Telephone Co. has been granted a franchise and will construct an independent exchange.

ELECTRIC HOISTS.—Cripple Creek, Colo.—It is stated that the demand for electric hoists in the Cripple Creek mining district exceeds the supply.

DOCK SALE.—Havana, Cuba.—Bids are asked by the Spanish Admiralty until Dec. 8 for the purchase or lease of the floating dry-dock at this place.

TIMBER BULKHEADS.—Boston, Mass.—Bids are asked until Dec. 7 for constructing timber bulkheads on Summer St. extension. Wm. Jackson, Cy. Engr.

TELEPHONE FRANCHISE.—Long Branch, N. J.—The New York & New Jersey Telephone Co. obtained a franchise Nov. 21 and will lay underground conduits.

BREAKWATER.—London, Ont.—At a meeting of the council Nov. 22 a proposition to construct a breakwater at London West, to cost $75,000, resulted in a tie vote.

SULPHATE OF COPPER.—La Rochelle, France.—Information is wanted by C. Lefort, 10 Cours des Dames, La Rochelle, for furnishing sulphate of copper, according to reports.

DRAIN.—Burlington, Ia.—Bids will soon be asked for the construction of a drain about 8,300 ft. long in Louisa and Des Moines counties. M. P. Sharts, County Audr., Burlington.

CONDUIT.—Syracuse, N. Y.—Manager Nicholson of the Central New York Telephone Co. is reported as arranging for the removal of the telephone wires from the poles to the subway.

TELEPHONE SYSTEM.—Peoria, Ill.—Reports state that the Citizens' Telephone Co. was receiving bids Nov. 18 for the construction of a system. Manager Farwell may be addressed.

REPAIRING STEAMBOAT.—New York, N. Y.—Bids are asked until Dec. 7 for repairs of the steamboat "Franklin Edson." M. C. Murphy, Comr. Dept. of Health, Criminal Court Bldg.

STERILIZING APPARATUS.—New Haven, Conn.—Bids are asked until Dec. 10 for constructing a sterilizing apparatus. Ward Bailey, Clk. Bd. Health, 12 Police Bldg.

CANAL SALE.—Annapolis, Md.—Bids are asked until Feb. 7 for the purchase of the state's interest in the Chesapeake & Ohio Canal; bond for $100,000. Richard Dallam, Secy. of State, Annapolis.

CANAL.—Port Arthur, Tex.—The supreme court has granted the Kansas City, Pittsburg & Gulf R. R. Co. the right to complete the Port Arthur ship canal between Port Arthur and Sabine Pass.

TELEPHONE WORK.—Moline, Ill.—The Central Union Telephone Co. proposes to expend from $35,000 to $40,000 in reconstructing its lines, switchboards, etc., in Moline, Rock Island, Ill., and Davenport, Ia.

SUBWAY.—Harrisburg, Pa.—The council is considering a proposition to construct a subway under the Pennsylvania R. R. and Philadelphia & Reading Ry. at Market St., to cost about $100,000. M. B. Cowden, Cy. Engr.

TELEPHONE SYSTEM.—Snow Hill, Md.—Reports state that Dr. Geo. W. Bishop, Clayton J. Purnell, John P. Moore, Thos. M. Purnell, W. S. Powell and others, are organizing the Worcester County Telephone Co.

TELEPHONE FRANCHISE.—Ludington, Mich.—Fuller & Perkins have applied to the council for a franchise to operate in this place. They also propose to extend the system throughout Mason, Oceana and Manistee counties.

TELEPHONE LINE.—Shamokin, Pa.—The North & West Branch Telephone Co. awarded a contract Nov. 22 for the construction of a line between Williamsport, Montoursville and Montgomery, to cost about $100,000. M. H. Kulp, Pres.

PIER AND TUNNEL.—Philadelphia, Pa.—Bids are asked until Dec. 13 for constructing the superstructure of the Chestnut St. pier, and for constructing the Pennsylvania Ave. subway and tunnel. Thos. M. Thompson, Dir. Dept. Pub. Wks.

TUNNEL.—Los Angeles, Cal.—Plans for the proposed Third St. tunnel, 1,059 ft. long and 32 × 20 ft., of brick and cement; estimated cost, $100,000; were submitted to the council Nov. 21, according to reports. J. H. Dockweiler, Cy. Engr.

CEMENT AND GRAVEL.—Fort Morgan, Ala.—Bids are asked until Dec. 23 for furnishing hydraulic Portland cement and gravel at Fort Morgan, as stated in our advertising columns. Maj. Wm. T. Rossell, U. S. Engr., Mobile, Ala.

PARK WORK.—Buena Vista Springs, Md.—Reports state that W. W. Patterson, Philadelphia, Pa., and the Western Maryland R. R. Co. propose to expend about $25,000 for the construction of a lake and drives near this place for a summer resort.

TUNNEL.—Boston, Mass.—Bids are asked until Dec. 13 for constructing section A of the East Boston tunnel, consisting of about 139 ft. of open incline and 233 ft. of two-track subway. Geo. G. Crocker, Chn.; H. A. Carson, Ch. Engr., Boston Transit Comn.

PIER WORK.—New York, N. Y.—A hearing will be given by the New York Harbor Line Board Dec. 7 for the proposed modification of the pier head line between 31st and 54th Sts., East River, as stated in our advertising columns. Col. Henry M. Robert, U. S. Engr., Pres.

TELEPHONE WORK.—Springfield, O.—The Central Union Telephone Co. will construct a system of underground conduits in the fire district, bounded by Spring, Columbia, Mechanic and Washington Sts. L. G. Richardson, Gen. Solicitor; E. M. Jackson, Engr.

STEEL WORK.—Pago Pago, Samoa.—Reports state that the Carnegie Steel Co., Pittsburg, Pa., has been awarded a contract to furnish the steel work for the U. S. coaling station, to be 150 × 100 ft., for which the contract for the construction was awarded Sept. 13 to Healy, Tibbits & Co., San Francisco, Cal.

PARK WORK.—New York, N. Y.—Bids are asked until Dec. 8 for furnishing 500 cu. yds. of blue limestone screenings, 12,000 cu. yds. of top soil, 800 cu. yds. of gravel screenings and for constructing an iron fence 4,100 ft. long, at Prospect Park, Brooklyn. Geo. C. Clausen, Comr. Parks, Arsenal, Central Park.

LEVEE.—East St. Louis, Ill.—A levee is to be constructed along the banks of the Mississippi River in the northern portion of Prairie du Pont township. A dike will be built 30 ft. high, beginning at Forest Lawn, 4 miles from East St. Louis, to cost about $75,000. Edward Kehr, Julius Pitzman, Adam Karr and others, of St. Louis, Mo., are interested.

PARK SYSTEM.—Chicago, Ill.—A resolution has been presented to the West Park board by S. D. Attridge, of Cicero, and C. W. Juergens and W. F. Quick, of Riverforest, authorizing the committee on public grounds to confer with the West Park board and the village boards of River forest, Harlem, Maywood and Riverside, for the laying out of a combined park system.

CRANE.—Port Royal, S. C.—The following bids were received by the navy department, Washington, D. C., Nov. 26 for furnishing a crane for the naval station:

E. M. Bailey & Co., Charleston, S. C.	$12,500
Wm. Sellers & Co., Philadelphia, Pa.	42,368
Morgan Engineering Co., Alliance, O.	49,687
American Hoist & Derrick Co., St. Paul, Minn.	39,950
Brown Hoisting & Conveying Co., Cleveland, O.	44,500

MACHINERY AND TOOLS.—Washington, D. C.—Bids are asked until Dec. 6 for the following machinery and tools at the navy yard: One combination hand and power feed surfacing machine; one pedestal tenoning machine; two wood-turning lathes, each to swing about 24 ins.; one universal horizontal drilling and boring machine; one 24-in. screw-cutting engine lathe, with 8-ft. bed; one 18-in. screw-cutting engine lathe, 20-ft. bed. Edwin Stewart, Paymaster-General.

RAILWAY EQUIPMENT.—New York, N. Y.—Reports state that the New York Central R. R. Co. is about to award a contract for 5,000 freight cars and proposes to purchase from 30 to 50 new locomotives.——The Seaboard Air Line is considering the question of purchasing new equipment.——The Northern Pacific Ry. Co. will order new passenger cars.——The Oregon Short Line R. R. Co. will order about 10 passenger cars.——The Chicago & West Michigan Ry. Co. is in the market for 100 flat cars.

REMOVING WRECK.—Portchester, N. Y.—The following bids for removing wreck were received Nov. 28 by Maj. H. M. Adams, U. S. Engr., Army Bldg., New York:—

C. W. Johnston, Lewes, Del.	$359
Lynton S. McNeal, Brooklyn, N. Y.	450
Virden & Ross, Lewes, Del.	395
Enoch Townsend, Linwood, N. J.	700
John F. Baxter, New York	185
Merritt & Chapman Derrick & Wrckg Co., New York	150
R. G. & J. S. Packard, New York	500
William Weil, New York	640
H. D. Pausch, Port Chester	425

MACHINERY AND TOOLS.—Portsmouth, N. H.—Bids are asked until Dec. 6 for furnishing the following machinery and tools, at the navy yard: One bolt cutter; one shaping machine, with planes 16 ins. long and 17 ins. wide; one universal brass lathe, Fox type; one 4-in. pipe machine; one engine lathe, 24 ft. long; one full universal radial drill; two 21-in. manufacturer's wheel and lever drills; six combination chucks; one self-acting planing machine; one No. 6a universal trimmer; one universal trimmer, bed 40 ins. long, 21 ins. wide, with one extra set of knives; one No. 3 combined rip and cross-cut saw. Edwin Stewart, Paymaster-General, Washington, D. C.

MACHINERY AND TOOLS.—Brooklyn, N. Y.—Bids are asked until Dec. 6 for furnishing the following machinery and tools at the navy yard: One horizontal boring and drilling machine, 10 ft. long; one 15-in. pillar shaper; one 16-in. screw-cutting engine lathe; one screw machine; one wet tool grinder; one 72-in. universal radial drill machine; one 24-in. swing wood turning lathe; one twist drill grinder; one hydraulic copper pipe bender; 20 dudgeon hydraulic jacks, from 4 to 30 tons; one vertical milling machine; one combined cutting-off lathe and nut and bolt head facing machine; one vertical wood-boring machine; one machine for threading and cutting off steam and gas pipes with lever; one pipe threading and cutting machine. Edwin Stewart, Paymaster-General, Washington, D. C.

BOILERS, MACHINERY, ETC.—Detroit, Mich.—We are informed that the following bids were received Nov. 21 for furnishing the boilers, machinery, etc., for four complete steam fog signals, advertised in Engineering News, Nov. 24; bid of Optenberg & Sonneman recommended for acceptance; Thomson Kingsford put in an alternative bid of $1,603; Lieut.-Col. M. B. Adams, U. S. Engr., Detroit:

Bidder.	Boilers with engines complete.	Boilers with attachments for use With Crosby machine.	Boilers with attachments for use With siren machin'ry
Optenberg & Sonneman, Sheboygan	$2,266	$1,816	$1,726
Fulton Iron & Eng. Works, Detroit	2,398	1,705	1,603
John P. McGuire, Cleveland, O.	2,500	2,100	1,950
D. Connelly, Cleveland, O.	2,596	1,910	1,795
Thomson Kingsford, Oswego, N. Y.	.....	.....	1,813

CONTRACT PRICES.

WATER PIPE, VALVES, ETC.—Niagara Falls, N. Y.—Our correspondent informs us that the following contracts were let Nov. 22, 1898, for valves, pipes, etc.; the amounts are the lump sums for the work: Lake Shore Foundry Co., Cleveland O.—Pipe, 6-in., 92 tons, $1,460; special castings, 4,828 lbs., $84.49. R. D. Wood & Co., Philadelphia—Valves, ⅝-in., $52.50; valve boxes, ⅝-in., $12.50; hydrants, 13, $551. Labor—W. W. Read & Co., Niagara Falls, laying 5,600 ft. 6-in. pipe, $952; setting ⅝-in., valves and boxes, . . . setting 13 hydrants, $13; rock excavation, 20 cu. yds., $50.

FORTIFICATION SUPPLIES.—St. Augustine, Fla.—We are informed that the following bids were received Nov. 21, 1898, for furnishing materials on (A) Mullet and Egmont Keys, and (B) at Tampa, Fla.; as advertised in Engineering News: (1) Portland cement, (2) rock, (3) I-beams, etc., (4) trolley systems, (5) anchor bolts, (6) ammunition hoists, (7) ammunition cranes: New Jersey Foundry & Machine Co., Havemeyer Bldg., New York, (A—3) 1.96 cts.; (4) Egmont Key, $953; Mullet Key, $1,736; (A—5) 3.54 cts., (6) $1,024, (7) $94.50; Dallett & Co., 201 Walnut Place, Philadelphia (B—3) 2.53 cts., (B—5) 7.88 cts.; Stewart Contracting Co., Columbia, S. C. (A—2) flagstone, $2.55; granite, $2.99. Southern Lumber & Supply Co., Tampa (B—1) $2.75; T. C. Gill & Co., Philadelphia (A—5) 3.22 cts., (B) 2.95 cts.; Carnegie Steel Co., Pittsburg (A—3) 1.78 cts., (B) 1.73 cts.; Phillips & Fuller, Tampa, Fla. (A—1) $2.59; Wm. F. Bowe, Augusta, Ga. (B—2) $4.96; George Wolff, New York (A—1) $2.79, (B) $2.79; Southeastern Lime & Cement Co., Charleston, S. C. (A—1) $2.62, (B) $2.32; Atlas Cement Co., 143 Liberty St., New York (A—1) $2.70, (B) $2.50; E. M. Bailey Co., Charleston, S. C. (A—1) $1.00 (B) 99 cts., (A—2) 26½ cts., (B) 25 cts; (A and B—3) $1.85 each, (A and B—4) $4.75 each; (A and B—5) $1.85 each; (6) $5.21, (7) $240; Brown Hoisting & Conveying Machine Co., Cleveland, O. (A—4) $1,200, (B) $1,876; Commercial Wood & Cement Co., 156 5th Ave., New York (A—1) $2.85; Alpha Portland Cement Co., The Bourse, Philadelphia (A—1) $2.34, (B) $2.44; W. C. Spotswood (A—2) $4.95.

BRIDGE FOUNDATION.—Washington, D. C.—A. J. Lakenaw, Ch. Clk., writes us that the following bids were received Nov. 22, 1898, for constructing foundations for bridges across Rock Creek at two avenue extensions; as advertised in Engineering News:

Bidder.	Connecticut Ave. Excavation, 6,500 cu.yds.	Connecticut Ave. Conc'te foundation, 3,000 cu.yds.	Massachusetts Ave. Excavation, 6,000 cu.yds.	Massachusetts Ave. Conc'te masonry, 2,500 c.yds.
J. F. McCabe, Baltimore	$0.65	$6.50	$0.65	$6.50
T. B. Jones & Co., Baltimore.	.85	6.90	.70	6.20
Engineering Con. Co., N. Y.	.45	7.35	.45	7.35
D. F. Mockaber, Washington	.65	7.70	.50	6.60
Cranford Pvg Co., Washington	.55	5.75	.60	5.65
John Jacoby, Wilmington, Del.	.50	6.00	.50	6.00
Lyons Bros., Washington, D.C.	.72	6.50	.67	6.25

BRICK PAVING.—Lancaster, O.—The following bids were received Nov. 16, 1898, for brick paving in West Union St.: C. W. Parido—Curbs, material, 14 cts.; labor, 5 cts.; excavation, 12 cts.; Fultonham block, 40 cts., labor, 17 cts.; Bolen's brown granite, 50 cts., labor, 17 cts.; Buckeye block, 51 cts., labor, 17 cts.; Nelsonville block, 50 cts., labor, 17 cts.; Hallwood block, 50 cts., labor 17 cts.; resetting old curb, a ft., 8 cts.; limestone backing, a ft., 15 cts., labor, 5 cts.; catchbasins, each $20.00, labor, $7; two elbows, $2.50, labor, 25 cts.; sewer pipe, 18 cts., labor, 2 cts. Fricker & Clovert—Curbs, a ft., 10 cts., labor, 10 cts.; excavation, 20 cts., a cu. yd.; Logan block—material 39 cts., labor, 10 cts.; Fultonham block, 43 cts., labor, 10 cts.; Nelsonville block, 50 cts., labor, 10 cts.; resetting old curb, a ft., 10 cts; sewer pipe, 7 cts., labor, 6 cts.; limestone backing, a ft., 30 cts.; 2 catchbasins, $30.00 each, labor, $6.50. James Whissel—Curbs, 10 cts., labor, 15 cts.; excavation, 15 cts.; Nelsonville S. P. Co. block, 44 cts., labor 22½ cts.; resetting old curb, 10 cts.; limestone backing, 15 cts., labor, 10 cts.; catchbasins, each, $17.50; sewer pipe, 15 cts., labor, 20 cts.

STREET CLEANING.—Jersey City, N. J.—The street and water board received bids Nov. 23, 1898, for cleaning streets and removing ashes and garbage. The standard fixed by the chief engineer was for sweeping streets, $11 a mile; sweeping asphalt streets, $8 a mile, and for removing ashes and garbage for the year, $17,000. Thomas Harrington's offer was 91½% of the standard prices, and Henry Byrne, who will get the contract, bid 83% of the standard figures.

DREDGING.—Coos Bay, Ore.—Maj. W. L. Fisk, U. S. Engrs., Portland, Ore., writes us that the following bids were received Nov. 15, 1898, for dredging in Coos Bay, as advertised in Engineering News: Wakefield & Jacobson, Portland, Ore., 29 cts. a cu. yd.; W. N. Concanon, 40 New Montgomery St., San Francisco, Cal., 19⅞ cts.; San Francisco Bridge Co., San Francisco, Cal., 23½ cts.

CONDUITS.—Erie, Pa.—F. Hanlon, Cy. Clk., writes us that the following bids were received Nov. 17, 1898, for extending the conduit system:

Quantities.		B. J. Murphy, Erie.	*Kraft & Walther, Erie.	Mayer Bros., Erie.	G. B. Kelly & Co., Chicago.
Conduit:					
2 or 3 duct	500 lin. ft.	$0.15	$0.105	$0.135	$0.09
4 " 5 "	1,600 "	.135	.095	.09	.09
6 " 8 "	1,200 "	.12	.085	.08	.09

ENGINEERING MATERIAL PRICES.

TRACK MATERIALS—

New York—Angle bars, 1.05 cts. to 1.10 cts.; spikes, 1.40 cts. to 1.50 cts.; track bolts, hexagonal, 1.80 cts. to 1.85 cts.; square, 1.60 cts. to 1.70 cts.

Chicago—Angle bars, 1.10 cts.; spikes, 1.55 cts. to 1.60 cts.; track bolts, hexagonal, 1.90 cts. to 2.00 cts.; square, 1.80 cts. to 1.90 cts.

RAILS, STEEL—

New York, new, $17.50 to $19.00.

Chicago, new, $20.00 to $24.00; old iron, $12.75 to $13.00; steel, $8.00 to $11.00.

Pittsburg, new $17.50 to $20.00.

STRUCTURAL STEEL—

New York—Beams, 1.35 cts. to 1.45 cts.; channels, 1.35 cts. to 1.45 cts.; tees, 1.45 cts. to 1.50 cts.; angles, 1.20 cts. to 1.25 cts.; rivets, 1.75 to 1.85 cts.

Chicago—Beams, 1.35 cts. to 1.50 cts.; channels, 1.35 cts. to 1.50 cts.; tees, 1.40 cts. to 1.50 cts.; angles, 1.30 cts. to 1.35 cts.

Pittsburg—Beams, 1.20 cts. to 1.30 cts.; channels, 1.20 cts. to 1.30 cts.; tees, 1.20 cts. to 1.25 cts.; angles, 1.10 cts. to 1.15 cts.

PLATES AND SHEETS—

New York—Universal mill plates, 1.30 cts.; tank, 1.35 cts. to 1.40 cts.; shell, 1.40 cts. to 1.45 cts.; flange, 1.60 cts. to 1.70 cts.; firebox, 2.25 to 2.50 cts.

Chicago—Universal mill plates, 1.30 cts. to 1.35 cts.; tank, 1.12 cts. to 1.15 cts.; shell, 1.30 cts. to 1.35 cts.; flange, 1.25 cts. to 1.45 cts.; firebox, 1.75 cts. to 4.00 cts.; sheets, 2.00 cts. to 2.10 cts.

Pittsburg—Universal mill plates, 1.10 cts. to 1.15 cts.; tank, 1.125 cts. to 1.15 cts.; shell, 1.30 cts. to 1.35 cts.; flange, 1.20 cts. to 1.25 cts.; firebox, 1.50 cts. upwards; sheets, 1.85 cts. to 1.95 cts..

MERCHANT STEEL—

Machinery, per lb., 1.60 cts. to 1.70 cts.

Tool, per lb., 5.50 cts. to 7 cts.

IRON—

Pig iron:

New York—No. 1, $11.25 to $11.50; No. 2, $10.50 to $10.75.

Chicago—No. 1, $11.50 to $12.50; No. 2, $11.00 to $12.00.

Pittsburg—No. 1, $10.50 to $10.75; No. 2, $10.00 to $10.10.

Bar iron:

New York, common, 1.10 cts. to 1.15 cts.; refined 1.50 cts. to 1.60 cts.

Chicago, common, 1.05 cts. to 1.10 cts.; refined, 1.15 cts. to 1.20 cts.

Sheets:

Common, American, per lb., 2.15 cts. to 2.85 cts.

Russia, per lb., 10½ cts. to 11.00 cts.

LUMBER—

New York:

Hemlock timber, 20 ft. and under, per M, $12.00 to $12.50.

Piling, Eastern spruce, 35 to 40 ft., 30 to 40% 12-in. butts, 4.25 cts.

Spruce, special cargoes, per M, $15.00 to $17.50.

Yellow pine, random cargoes, $15.50 to $17.00.

North Carolina pine, $2.25 to $2.40 advance over Norfolk rates.

San Francisco:

Oregon pine, per M, $15.50 to $17.50.

Redwood, per M, $18.20 to $20.00.

Redwood tank stock, up to 10 ft., $24.00 to $25.00.

GENERAL MATERIALS—

Lead, New York, $3.67 cts. to $3.72 cts.

Nails, Pittsburg, 1.40 cts.

Solder, per lb., 8¼ cts. to 11½ cts.

Spelter, per lb., 3.90 cts. to 4.00 cts.

Copper ingots, 12.85 cts. to 13.00 cts.

Granite, rough, New York, cu. ft., 40 cts. to 50 cts.

Limestone, New York, cu. ft., 70 cts. to 80 cts.

Ohio freestone, New York, cu. ft., 85 cts. to 90 cts.

Slate, Penn., block, per square, $4.00 to $5.00.

White lead, American, per lb., 5½ cts. to 6 cts.

Lime, common state, per bbl., 70 cts.

◆

INDUSTRIAL NOTES.

THE PITTSBURG LOCOMOTIVE & CAR WORKS, Pittsburg, has an order for 50 consolidated locomotives, with 22 × 28-in. cylinders, for the Baltimore & Ohio R. R.

THE CHATTANOOGA CAR & FOUNDRY CO., Chattanooga, Tenn., asks us to contradict the statement that has appeared in several other papers that the plant of the company has been or is to be sold.

THE RITER-CONLEY MFG. Co., Pittsburg, has a contract, according to report, from the Boston Gas Co., Boston, for a steel gas purifier house, 100 × 275 ft., containing two 35-ton traveling cranes.

THE SCHOEN PRESSED STEEL CO., Pittsburg, has an order for 1,000 steel coal cars of 100,000 lbs. capacity each, for the Baltimore & Ohio R. R., to be used in the seaboard trade. They are expected to be placed in service during the early part of 1899.

REESE, HAMMOND & CO., Bolivar, Pa., have opened an office in the Bissell Block, Pittsburg, with Mr. Thomas McConville in charge of the paving brick department. This company was established in 1867 to manufacture fire brick, and its annual capacity is now 30,000,000. It also manufactures paving brick and blocks. It reports its works as being operated to full capacity, with prospects for an unusually good trade in paving brick next year.

THE WESTINGHOUSE ELECTRIC & MFG. CO., Pittsburg, is reported to have the following orders from England for electric railway apparatus: Hull Tramway Corporation, 92 motors to equip 45 cars and one track sweeper; Halifax Tramway Corporation, 12 motors to equip six cars; Bradford Tramway Co., 48 motors to equip 24 cars; Norwich City Corporation, 80 motors to equip 40 cars, and four dynamos to be installed in the power house of the Norwich Tramway Corporation; City of Coventry, 20 motors to equip 10 cars and two power dynamos; City of Plymouth, 10 motors and two power dynamos for electric railways.

HEALY, TIBBITTS & CO., San Francisco, Cal., are reported to have the contract for the construction of a coal shed and wharf at the U. S. Coaling Station at Pago Pago, Tutuila, Samoa. The coal shed will be 100 × 150 ft., of structural steel, covered with corrugated galvanized iron, resting on steel piles, 6 and 8¾ ins. in diam., made in sections 24 ft. long, weighing about 5,000 lbs. The piles rest on a coral formation from 50 to 70 ft. below water. About 2,800,000 lbs. of steel will be required for the coal shed. The approach will be 256 ft. long and the wharf 336 ft. long, and about 350,000 lbs. of iron will be used. The total cost of the work is estimated at $200,000. Mr. John. B. Leonard, of San Francisco, is the Chief Engineer for Healy, Tibbitts & Co.

NEW COMPANIES.—Noble Water Clarifying Co., St. Louis, Mo.; $20,000; Jay Noble, Charles Mullikin and L. E. Davison.

Baltimore Filter Co., Baltimore, Md.; $1,000; to manufacture filters for filtering waters and all kinds of oils; Robert M. Spedden, Robert H. Smith, Joseph E. Henderson, Lucien B. Carpenter and Z. Franklin Potter.

Clinton Boiler Works, Clinton, Ia.; $10,000; J. T. Cullen and D. J. Murphy.

American Reduction Co., of Jersey City, N. J.; $1,000,000, commencing with $500; to reduce, manufacture and deal in aluminum and other metals, etc.; F. C. Truslow, Henry Austin Adams, James A. MacElhinney, Charles B. Hobbs and Anson McCook Beard, of New York.

Porto Rico Prospecting & Development Co., New York; $400,000, commencing with $500; to lease and otherwise acquire real estate; to prospect for minerals and to do a general mining business; James A. Pearce, Edward A. Corder, D. George Thompson, M. Grose and J. Harvey Jones, all of New York.

Healy Construction Co., 60 Grand St., Jersey City, N. J.; $100,000, commencing with $20,000; to construct, equip and improve public or private works; Wm. M. Laws, of Jersey City; Austin S. Healy, 64 5th Ave., New York; Daniel W. Beach, Washington, D. C.

Kilbourn Construction Co., 211½ Market St., Camden, N. J.; $10,000, commencing with $1,000; to construct ice-making machinery, engines, etc.; Hannibal W. Rappleye, Philadelphia, Pa.; Walter C. McCurdy, Riverton, N. J.; John T. Woodhull, Camden.

Sand Filter & Construction Co., 35 North 2d St., Camden, N. J.; $100,000, commencing with $1,000; to construct all kinds of filters; Jesse S. White, Merchantville, N. J.; Augustine T. Lynch, Philadelphia, Pa.; John O. White, Camden.

Lincoln Foundry Co., 1 Railroad Ave., Lincoln, N. J.; $2,000, commencing with $1,000; to conduct a foundry business; Wm. H. Kenyon, Howard B. Tapscott and Daniel J. Pierce, of Lincoln.

Mohawk Construction Co., 167 Main Ave., Passaic, N. J.; $30,000, commencing with $1,000; to construct and repair railways, etc.; C. Walter Artz, Roselle, N. J.; Geo. D. Patten, Plainfield, N. J.; Fred. H. Mollenhauer, Jersey City, N. J.; Thos. E. O'Shea, New York.

American Motor Co., Augusta, Me.; $250,000, all paid in; to do a general manufacturing business; Pres., Alexander Fischer, New York; Treas., Frederick R. Blount, New York.

E. R. Patteson Construction Co., New York; $10,000; to do a general contracting business; E. R. Patteson, James F. O'Rourke and George E. Robinson, of New York.

Automatic Trip Railroad Gate Co., 234 Union St., Elizabeth, N. J.; $100,000, commencing with $10,000; August D. Turner, 63 5th Ave., and F. C. Von Heydebrand, 17 West 99th St., of New York; Thos. H. Smith, 234 Union St., Elizabeth.

Empire Rail Co., 60 Grand St., Jersey City, N. J.; $1,000,000, commencing with $3,000; to mine and manufacture iron and steel goods; Wm. Fillingham, Kenneth R. McLaren and Harry W. Meen, Jersey City.

Manufacturers and Producers Supply Co., Pittsburg, Pa.; $50,000, commencing with $50; to manufacture and deal in oil wells, railway and other supplies; Henry G. Wasson, Geo. M. Cote and Burt C. Wasson, Pittsburg, Pa.; J. P. Brownlee, Allegheny, Pa.; H. H. Patterson, Beaver Falls, Pa.

Pridham Fertilizer & Chemical Commercial Co., 781 Broad St., Newark, N. J.; $100,000, commencing with $1,000; to manufacture fertilizers, collect, sterilize and dispose of sewerage, water and other liquids; Paul Buchanan, Marshall Pridham, Samuel S. Pridham, L. D. H. Gilmour, of Newark.

Manning Signal Lamp Co., Des Moines, Ia.; $100,000; L. D. Rood, W. D. Sheehan, E. S. Manning, S. Compton and H. T. Mills.

Automatic Machine Mfg. Co., Baltimore, Md.; $300,000, commencing with $50; to carry on a general manufacturing business; J. I. A. Haughton, Dover, Del.; Geo. W. Smith, Chas. B. Penrose, Geo. C. Morrison, and F. D. Morrison, of Baltimore.

Tyler Hydrant & Valve Co., New York; $1,000,000, commencing with $100; to manufacture and sell all kinds of machinery; E. Ellery and H. L. Jouffrion, Brooklyn; J. A. Simmons and Wm. H. Llewellyn, New York; Wm. P. Ellery, Hackensack, N. J.

Standard Gas Machine Co., New Haven, Conn.; $15,000; Jas. Graham, Israel A. Kelsey and Chas. E. Graham, of New Haven.

Mail Delivery Notice.

Special efforts are made to deliver our paper to its readers each week at the earliest possible moment. The largest binding and mailing establishment in New York begins work on Engineering News early each Wednesday evening, and all papers for Boston, Philadelphia and Washington are usually in the New York post-office by midnight; all Brooklyn and New York city papers by 3 o'clock—in ample time for the first delivery Thursday morning. The entire edition, including foreign copies, is in the mail soon after 6 o'clock Thursday morning. If your paper is not received promptly we advise that you make a complaint to your local post-office officials.

PERSONAL.

Mr. Gillett Gordon has been appointed Superintendent of the water-works at Connersville, Ind., to succeed Mr. Daniel Castleman, who has resigned.

Lieut. Arthur S. Carswell, Second Regiment, U. S. Volunteer Engineers, at present stationed at Willet's Point, N. Y., has been ordered to duty at Huntsville, Ala.

Mr. Andrew Bryson, M. Am. Soc. C. E., of 29 Broadway, New York, has gone to Central America to report upon an enterprise for a syndicate of capitalists of that city.

Mr. William Murdock has been appointed Assistant Engineer of Maintenance of Way of the Toledo Division of the Pennsylvania Lines west of Pittsburg, with headquarters at Toledo, O.

Capt. Archibald O. Powell, Second Regiment of U. S. Volunteer Engineers, has been ordered to duty at St. Paul, Minn., under Maj. Frederick V. Abbot, Corps of Engineers, U. S. Army.

Mr. M. Roberts, Master Mechanic of the St. Louis, Iron Mountain & Southern Ry., has been appointed Master Mechanic of the whole system in Arkansas and Missouri, with headquarters at Argenta, Ark.

Mr. Albert S. Cheever, M. Am. Soc. C. E., of Cleveland, O., has been appointed Chief Engineer of the Fitchburg R. R., with headquarters at Fitchburg, Mass., to succeed Mr. Frank O. Melcher, M. Am. Soc. C. E., promoted.

Mr. James P. Nelson, civil and mechanical engineer, recently Professor of Civil Engineering in the Kentucky State College, has entered upon his duties as office assistant to the Chief Engineer of the Choctaw & Memphis R. R., with headquarters at Little Rock, Ark.

Mr. Willis S. Jones, formerly Chief Engineer of the Chicago & Northern Pacific Ry., has been appointed General Manager of the Q. & W. Co., with headquarters in the Owings Building, Chicago. This company is introducing a new form of tie-plate.

Mr. Charles B. Price, Division Superintendent of the Allegheny Valley Ry., with headquarters at Pittsburg, Pa., has been promoted to be Acting General Superintendent, to succeed Mr. David McCargo, who has been incapacitated on account of an attack of paralysis several months ago.

Mr. L. L. Dawson, Master Mechanic of the Illinois Central R. R., with headquarters at Memphis, Tenn., has been appointed Master Mechanic of the New Orleans Division, with headquarters at McComb City, Miss., to succeed Mr. W. B. Baldwin, who was recently killed by jumping from an engine.

Mr. C. H. Doebler, Division Master Mechanic of the Wabash R. R., with headquarters at Fort Wayne, Ind., has been transferred in that capacity to Springfield, Ill., to succeed Mr. G. W. Mudd. Mr. Geo. W. McKee, Master Mechanic of the Shops at Moberly, Mo., will succeed Mr. Doebler at Fort Wayne.

Mr. William R. Greene, of Baltimore, Md., has been elected Vice-President of the Baltimore & Ohio Southwestern Ry., with headquarters in Cincinnati, O., to succeed Mr. W. W. Peabody. He was formerly General Manager of the Cleveland, Cincinnati, Chicago & St. Louis Ry., and later of the Cincinnati, Hamilton & Dayton Ry.

Messrs. A. Dutrex, P. Mossot, T. Ballryder and F. Lurmann, mechanical engineers, of Mont Lucon, France, are visiting the United States for the purpose of studying American methods of manufacturing steel and iron. They are connected with the large iron works at Mont Lucon, and will return there in about three weeks. They were in Cleveland, O., on Dec. 4.

Mr. P. J. Harrigan, General Foreman of Car and Locomotive Repairs, with headquarters at Connellsville, Pa., has been promoted to be Master Mechanic of the Middle Division of the Baltimore & Ohio R. R., with headquarters at Cumberland, Md., to succeed Mr. D. C. Courtney. Mr. David Witherspoon has been appointed to succeed Mr. Harrigan, at Connellsville.

Mr. J. H. Payne, formerly in the office of the Division Engineer of the Union Pacific R. R., with headquarters in Denver, Colo., has been appointed Assistant Engineer on the Denver & Gulf system, succeeding Mr. H. A. Woods, who has resigned to accept the appointment of Assistant Chief Engineer of the Grand Trunk Ry., with headquarters at Detroit, Mich.

Mr. De Clermont Dunlap, M. Am. Soc. C. E., civil and consulting engineer, of Chicago, Ill., has been appointed Engineer of Location and Construction of the new lines of the Chicago & Northwestern Ry., with headquarters at Wall Lake, Ia. Mr. C. A. Lichty, Assistant Engineer of the Madison Division, with headquarters at Baraboo, Wis., has been transferred to Wall Lake as assistant to Mr. Dunlap.

Mr. Austin A. Lister, of the firm of R. A. Lister & Co., Ltd., of Dursley, Gloucestershire, England, dairy and agricultural engineers and manufacturers, is at the Gibson House, Cincinnati, O. He is visiting the United States for the purpose of studying the manufacture of malleable castings, and upon his return his firm will establish a foundry in England for the manufacture of malleable castings according to American methods.

OBITUARY.

Mr. James Nolan, civil engineer, of Plainfield, N. J., died Dec. 4, of pneumonia.

Mr. Edward Kilpatrick, contractor and builder, of New York city, died Dec. 5, aged 69.

Mr. George D. Inks, Street Commissioner, of McKeesport, Pa., died Nov. 24, aged 78.

Mr. Morris P. Janney, mechanical engineer, of Pottstown, Pa., died Nov. 30, aged 49.

Mr. David Campbell, builder and contractor, of Mount Vernon, N. Y., died Nov. 27, aged 73.

Major Joseph H. Francis, for many years Manager of the Metropolitan Telephone Co., of New York city, died at his home in Passaic, N. J., Nov. 28.

Mr. P. J. Carr, a civil engineer on the surveying corps of the Illinois Central R. R., which has been locating a new line to Omaha, Neb., was killed in an accident, Nov. 29, at Sioux City, Ia. He was an Englishman, and had only been in this country a short time.

Mr. R. B. F. Pearce, General Manager of the Indiana, Decatur & Western Ry., with offices in Indianapolis, Ind., died Dec. 5, aged 55. He was also the Receiver of the Toledo, St. Louis & Kansas City R. R., with offices in Toledo, O., until a few days ago, when he resigned on account of ill-health.

Mr. James G. Lindsley, Superintendent of the Newark Lime & Cement Mfg. Co., Newark, N. J., died at his home in Kingston, N. Y., Dec. 4. He was born in Orange, N. J., March 19, 1819. Mr. Lindsley was elected the first Mayor of Kingston, in 1872, serving several years, and was a Member of Congress in 1884, representing Ulster, Greene and Delaware counties. He was well known as a geologist.

Col. James Francis, M. Am. Soc. C. E., Consulting Engineer of the Locks & Canals Co., on the Merrimac River, Mass., and son of the late James Bicheno Francis, Hon. M. Am. Soc. C. E., who was President of the society in 1881, died Dec. 1, aged 58. He was a veteran of the Civil War and in 1866 was appointed Assistant Engineer for the Locks & Canals Co., in 1885 becoming its Agent and Engineer. He was appointed General Agent in 1896.

Mr. John Taylor Gause, President of the Harlan & Hollingsworth Co., Wilmington, Del., ship and car builders, died of pneumonia, Dec. 1, aged 75. He was born in Chester, Pa., and went to Wilmington in 1843, entering the office of the above company as an errand boy. In 1858 he was admitted to the firm as an equal partner with Mr. Samuel Harlan. In 1867 the firm became a company, and Mr. Harlan its President. Mr. Gause succeeded him as President in 1883, holding the office until 1896, when Mr. Henry G. Morse succeeded him. In August last Mr. Morse retired, and Mr. Gause again became the President of the company.

Mr. Freeman Godfrey, formerly a railway contractor and later a manufacturer of plaster, of Grand Rapids, Mich., died Nov. 25. He was born in Varshire, Vt., Sept. 5, 1825, and in 1845 went to Lowell, Mass. In 1851 he was a contractor on the Terre Haute & Alton R. R., and in the following years built a portion of the Illinois Central R. R. In 1856 he began the construction of the Detroit & Milwaukee R. R., which was completed two years later. He built a considerable portion of the Grand Rapids & Indiana R. R. in 1859-60, and was also interested in the construction of the Grand River Valley R. R., now a part of the Michigan Central R. R. He was also prominent in the organization of the Grand Rapids & Holland R. R. Co., of which he was elected President.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

ST. LOUIS RAILWAY CLUB.
Dec. 9. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.
NEW JERSEY SANITARY ASSOCIATION.
Dec. 9-10. Annual meeting, Lakewood, N. J. Secy., James A. Exton, Arlington, N. J.
MONTANA SOCIETY OF ENGINEERS.
Dec. 10. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.
THE LOUISIANA ENGINEERING SOCIETY.
Dec. 12. Secy., J. F. Coleman, 712 Union St., New Orleans, La.
ENGINEERS' CLUB OF KANSAS CITY.
Dec. 12. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.
DENVER SOCIETY OF CIVIL ENGINEERS.
Dec. 13. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Col.
CIVIL ENGINEERS' CLUB OF CLEVELAND.
Dec. 13. Secy., Wm. H. Searles, Case Library Bldg., Cleveland.
NORTHWEST RAILWAY CLUB.
Dec. 13. Secy, T. A. Foque, Soo Line, Minneapolis, Minn.
NEW ENGLAND RAILWAY CLUB.
Dec. 13. Secy., Edw. L Janes, P O Box 1158, Boston, Mass.
FRANKLIN INSTITUTE.
Dec. 13. "Commercial Photometers and Light Standards," Prof. A. J. Rowland; "The Kite as an Instrument in Meteorological Research," Prof. C. F. Marvin; Dec. 14. Fresh Studies of Pioneer Tools," Prof. H. C. Mercer. Secy., Wm. H. Wahl, 15 South Seventh St., Philadelphia, Pa.
NEW ENGLAND WATER WORKS ASSOCIATION.
Dec. 14. Quarterly meeting, Boston, Mass. Secy., J. C. Whitney, Newton, Mass.
NEW YORK RAILROAD CLUB.
Dec. 15. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.
ENGINEERS' CLUB OF CINCINNATI.
Dec. 15. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.
SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Dec. 15. Secy., F. A. Charpiot, P. O Box 13, Savannah, Ga.
AMERICAN INSTITUTE AND THE HENRY ELECTRICAL SOCIETY.
Dec. 16. "Light," William Hallock. Secy., D. R. Lovejoy, 111 W. 38th St., New York city.
ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Dec. 16. Secy., F. H. Olmsted, Byrne Bldg., Los Angeles, Cal.
ROCHESTER ENGINEERING SOCIETY.
Dec. 16. Secy., John F. Skinner, Reynolds Library Bldg., Rochester. N. Y.
NORTHWESTERN TRACK AND BRIDGE ASSOCIATION
Dec. 16. Secy., D. W. Meeker, St. Paul, Minn.
CHICAGO ELECTRICAL ASSOCIATION.
Dec. 16. "Wireless Telegraphy," Arthur V. Abbott. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.
THE ENGINEERS' CLUB OF PHILADELPHIA.
Dec. 17. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.
ENGINEERS' CLUB OF COLUMBUS.
Dec. 17. Secy., H. M. Gates, 12½ North High St., Columbus, O.
ENGINEERS' CLUB OF PHILADELPHIA.
Dec. 17. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.
ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Dec. 19. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.
ENGINEERS' CLUB OF MINNEAPOLIS.
Dec. 19. Secy., H. E. Smith, 1620 S. E. 14th St., Minneapolis, Minn.
TECHNICAL CLUB OF OMAHA.
Dec. 19. Secy., J. Harry Lawrie, Omaha, Neb.
ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA
Dec. 20. Secy., R. A. Fessenden. 410 Penn Ave., Pittsburg, Pa.
WESTERN RAILWAY CLUB.
Dec. 20. Secy., F. M. Whyte, 225 Dearborn St., Chicago, Ill.
ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Dec. 21. Secy., Frank H. Olmsted, Los Angeles, Cal.
BOSTON SOCIETY OF CIVIL ENGINEERS.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Dec. 21. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.
ENGINEERS' CLUB OF ST. LOUIS.
Dec. 21. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.
AMERICAN SOCIETY OF CIVIL ENGINEERS.
Dec. 21. "Building Laws" Discussion. Secy., C. W. Hunt, 220 West 57th St., New York City.
WESTERN SOCIETY OF ENGINEERS.
Dec. 21. "Foundations for Railroad Bridge Across the St. Lawrence River at Cornwall, Ont.," George E. Thomas. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.
CANADIAN SOCIETY OF CIVIL ENGINEERS.
Dec. 22. Secy., C. A. McNab, 112 Mansfield St., Montreal, Canada.
ENGINEERING ASSOCIATION OF THE SOUTH.
Dec. 22. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.
AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
Dec. 28. Secy., Ralph W. Pope, 26 Cortlandt St., New York city.
ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Jan. 2. Secy., H. J. March, Library Bldg., Buffalo, N. Y.
CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Jan. 2. Secy., C. L. Annan, City Engineer's Office, St. Paul, Minn.
FOUNDRYMEN'S ASSOCIATION, PHILADELPHIA.
Jan. 4. Secy., Howard Evans, Pier 45, Delaware Ave., Philadelphia, Pa.
BROOKLYN INSTITUTE OF ARTS AND SCIENCES.
Jan. 6. "The Electro-Metallurgy of Copper," John B.F. Hereschoff. Secy., Henry I. Weed, Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.
AMERICAN INVENTORS' AND MANUFACTURERS' ASSOCIATION.
Jan. 15. Annual meeting, Washington, D. C. Secy., Arthur Steuart, Washington Loan and Trust Bldg., Washington, D. C.
NORTHWESTERN ELECTRICAL ASSOCIATION.
Jan. 19-21. Semi-annual meeting, Milwaukee, Wis. Secy., Thos. R. Mercein, 511 Montgomery Bldg., Milwaukee, Wis.
TECHNICAL SOCIETY OF THE PACIFIC COAST.
Jan. 20. Annual meeting. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.
NATIONAL ASSOCIATION OF MANUFACTURERS.
Jan. 24-26. Annual convention, Cincinnati, O. Secy., E. P. Wilson, Room A, Chamber of Commerce, Cincinnati, O.
INDIANA ENGINEERING SOCIETY.
Jan. 24-26. Annual meeting, Indianapolis, Ind. Secy., J. B. Nelson, 61 Baldwin Block, Indianapolis, Ind.
MICHIGAN ENGINEERING SOCIETY.
Jan. 24-26. Annual meeting, Lansing, Mich. Secy., F. Hodgman, Climax, Mich.
ILLINOIS SOCIETY OF ENGINEERS AND SURVEYORS.
Jan. 25-27. Annual meeting, Champaign, Ill. Secy., Jacob A. Harman, Peoria, Ill.

ENGINEERS' CLUB OF PHILADELPHIA.—At the special meeting of this club, held Dec. 3, officers were nominated for the ensuing year as follows: Pres., Francis Schumann; Vice-Presidents, Dr. Henry Leffmann and William C. L. Eglin; Secy., L. F. Rondinella; Treas., George T. Gwilliam; Directors, Harrison Souder. W T.

Webb, Charles Riez, Dr. H. M. Chance, Wilfred Lewis, William P. Evans, Clark Dillenback, Richard L. Humphrey, C. H. Ott and Edwin L. Smith. The annual election will occur on the third Saturday in January. Mr. R. W. Lesley read an interesting paper on "Cement and Cement Testing Laboratories."

THE AMERICAN SOCIETY OF CIVIL ENGINEERS.—This society will hold its 46th annual meeting at the House of the Society, 220 West 57th St., New York city, on Jan. 18 and 19.

ROCHESTER ENGINEERING SOCIETY.—A special meeting of this society was held on Dec. 1 to consider the proceedings of the recent Washington Convention of the Society of Municipal Improvements.

NEW ENGLAND WATER WORKS ASSOCIATION.—The quarterly meeting of this association will be held at Tremont Temple, Boston, Mass., on Dec. 14. The following papers will be read:

"Possibilities of Economy in Pumping Engines, as based on the latest accomplishments," George H. Barrus, Boston, Mass.; "The Advantages of Triple Expansion Pumping Engines," J. M. Betton, Brooklyn, N. Y.; "The Latest Designs in Pumping Machinery, comparing same with practice of Twenty Years Ago," representative of the E. P. Allis Co., Milwaukee, Wis.; "The Latest Designs in Pumping Machinery, comparing same with practice of Twenty Years ago," representative of Henry R. Worthington, Brooklyn, N. Y.; "The Application of Oil and Gasoline Engines to Pumping Machinery," Freeman C. Coffin, Boston, Mass.; "Comparison between Low and High Duty Pumping Engines on a Small Water Works Plant," John E. Smith, Andover, Mass.

In addition an excursion will be made to the Chestnut Hill Pumping station.

ROADMASTERS' ASSOCIATION OF AMERICA.—At a meeting of the Executive Committee, held in Chicago on Nov. 22, subjects were selected and committees appointed to report thereon at the next annual convention. The subjects, and the chairmen of the several committees, are as follows:

1. "Advisability of Increasing the Length of Rails and Using Miter Joints; and the Difference in Expansion of Light and Heavy Rails," V. T. Douglas, Chesapeake & Ohio R. R., Richmond, Va.

2. "Track Joints; the Results Obtained from the Use of Various Devices," P. Rockwell, Missouri, Kansas & Texas Ry., Sedalia, Mo.

3. "Standard Fences for Right of Way," J. A. Prentice, Lake Shore & Michigan Southern Ry., Toledo, O.

4. "Best Method of Tamping Ties in Various Kinds of Ballast" (A, tamping all ties with shovels; B, tamping joint ties with picks and all others with shovels; C, tamping all ties with picks; D, tamping all ties with bars); W. H. Courtney, Keokuk & Western R. R., Osceola, Ia.

5. "Embellishment of Station Grounds." M. Sullivan, Michigan Central R. R., Miles, Mich.

There will also be a paper by F. R. Coates, New York, New Haven & Hartford R. R., Stamford, Conn., and a paper on "Standard and Compromise Cars, in Relation to Their Effect upon the Track," by C. C. Dunn, Supervisor Atlantic Coast Line, Wilmington, Del.

J. B. Dickson, Sterling, Ill., Secy.

THE NATIONAL MUNICIPAL LEAGUE.—The 6th national conference for good city government was held, beginning Nov. 30 and continuing until Dec. 2, at Indianapolis, Ind., with fully 250 persons present. Mr. Clinton R. Woodruff presided at the opening meeting and delivered an address on "The Advance of Municipal Reform in the United States." This was followed by the "Report of the Committee on Municipal Program," which was reviewed editorially in our last issue. In the evening addresses by Mr. Samuel B. Capen, "The Final Work of the Nineteenth Century," and Mr. Wm. D. Foulke, were presented, the latter confining his remarks chiefly to a review of the report of the Committee on Municipal Reform. A large part of the two convention days was devoted to the consideration and discussion of the subject of model municipal system based upon a careful study of actual conditions. At the second day's session Mr. Horace E. Deming read a paper entitled "The Municipal Problem in the United States," which met with general approval in the discussion that followed.

The afternoon session opened with a paper entitled "The Place of the Council and of the Mayor in the Organization of Municipal Government—The Necessity of Distinguishing Legislation from Administration," by Dr. Frank J. Goodnow. This paper was also fully discussed.

The paper of the forenoon of the last day on "The City in the United States—The Proper Scope of its Activities," was read by Dr. Albert Shaw. In the afternoon Mr. Charles Richardson read a paper entitled "Municipal Franchises."

◆

NEW PUBLICATIONS.

METEOROLOGICAL OBSERVATIONS IN COLORADO IN 1897. Bulletin No. 49, The Agricultural Experiment Station of the State Agricultural College, Ft. Collins, Col. By L. G. Carpenter and R. E. Trimble. Paper; 6 x 9 ins.; pp. 71; illustrations and tables. Address Director of the Experiment Station, Ft. Collins, Col.

The various instruments used at the station are described in this report, and the records for 1897 are presented in tabular and graphical form. One of the most interesting diagrams is a sunshine chart, showing by black lines the amount of sunshine for each day of the year and the part or parts of the day during which sunshine occurred.

HISTORY OF THE SPANISH-AMERICAN WAR.—With handy atlas, maps and full descriptions of recently acquired United States territory. Published by the Lawrenceville Cement Co., makers of Beach's Rosendale Cement. 26 Cortlandt St., New York city. Paper, 14 x 11 ins. Maps and portraits.

This useful publication, issued with the compliments of the company to its patrons, contains very good maps of the Philippine Islands, Hawaii, Cuba, Porto Rico, and Alaska, and also portraits of the President, and the chief military and naval commanders. The events of the war are briefly recorded in chronological order, and the new possessions of the United States are statistically described.

SOME EXPERIENCE WITH AN INTERNAL COMBUSTION MOTOR.—By W. L. Garrels, 4531 West Pine Boulevard, St. Louis, Mo. Pamph.; 6 x 9 ins.; pp. 11.

Mr. Garrels recently bought a 14-HP. oil engine, of a make which was extensively advertised a few years ago and was highly recommended by many well-known engineers. "It proved to be afflicted with almost every disease that such an engine can be afflicted with." He experimented with it for about five months, and succeeded in getting it to run a few hours. The makers "sent on a man" who did not succeed any better. "They stopped answering our letters altogether and finally sent us an impertinent answer to a registered letter."

Instead of bringing suit against the makers, as any ordinary man would have done, Mr. Garrels, who is an extraordinary man, spent a great deal of time and money in hunting up other people who had had similar difficulties with the same make of engine and then wrote up the whole story and sent it to a "well-known Eastern technical paper" (name not given), which after a while returned it with the following statement:

> The case is extremely interesting, to put it very mildly, but we feel here that in publishing it we should run a decided risk of a libel suit.

Mr. Garrels therefore publishes the article, together with his reflections on the "snobbishness" of newspapers and their failure to "follow Truth though she leads to Hades," in pamphlet form. We know of no end which he attains by this that he might not have better secured by suing the company for damages. Whether or not his pamphlet is libelous, it would take a judge and twelve jurors to decide, but it is certainly of too little interest to permit any reputable technical journal to publish it, as its author desired.

ASSESSMENT, TAXATION AND MUNICIPAL FRANCHISES IN KANSAS.—Extract from the Annual Report of the Kansas Bureau of Labor and Industrial Statistics for 1897. Paper; 6 x 9 ins.; pp. 115; folding plates and tables.

The portion of this pamphlet which relates to taxation shows most forcibly the gross inequalities in assessed valuations prevailing in Kansas, as all over the United States. The statutes of Kansas provide that all property shall be assessed at its full value; it also authorizes the local assessors in each county to "agree upon an equal basis of valuation of such property as they may be called upon to assess." This clause is interpreted to mean not only values for specific objects, as wheat or cows, but the percentage of the true value to be used by the assessors. The detailed results of these agreements show the evident variations in specific values and percentages of actual values, while records of real estate transfers and the taxes levied on the property involved show that the local assessors do not live up to their agreements. Thus the assessors collectively may be said to conspire to disobey the law, and individually to vie with each other in reducing the actual percentages of valuation still lower, both lines of action being prompted largely by the desire to evade state taxes. Figures are also presented which, it is claimed, show discrimination on the part of the assessors in favor of large property owners.

The second part of the pamphlet gives the results of an investigation of the "private and municipal ownership of water, gas and electric-light plants," agreed upon by the National Association of Officials of Bureaus of Labor Statistics at Albany, in 1896. While there are many interesting and valuable facts and figures in this section, they are hardly conclusive, so far as they relate to the relative advantages of the two kinds of ownership. The reason for this is very largely the fact that the attempt to present the comparative cost of service under the two plans ignores most of the local conditions affecting cost. For instance, the cost of water-works plants and the meter charges for water are each given per 1,000 gallons of water consumed, without reference to the factors governing cost of construction and operation in the several localities. Undoubtedly the bureau would have done more and better work had it had an ample appropriation and staff, but money was lacking and the staff is hardly large enough to conduct the ordinary routine of a small office, to say nothing of elaborate investigations. The bureau therefore deserves praise for its courage in attempting the work and credit for its results. The schedules of inquiries for the second part of the pamphlet, it should be said, were not prepared by the Kansas bureau and were elaborated by it because they were considered inadequate.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

LAWN SPRINKLERS.—Pleuger & Henger Mfg. Co., St. Louis, Mo. Pamph., 6 x 9¼ ins.; pp. 20.

ENCLOSED ARC LAMPS.—General Electric Co., Schenectady, N. Y. Pamph., 5¼ x 7¾ ins.; pp. 58.

This neat pamphlet describes the various types of enclosed arc lamps put upon the market by the General Electric Co. The pamphlet contains excellent half tone illustrations of the interior and exterior of several forms of these lamps.

STOW-FLEXIBLE SHAFT.—Stow Flexible Shaft Co., 26th and Callohill St., Philadelphia, Pa. Pamph.; 6 x 9 ins.; pp. 55.

This pamphlet contains a series of illustrations and descriptions of drills, boring machines, countershafts, transfer pulleys, and various other apparatus and parts manufactured by this company for use in connection with the well-known Stow Flexible shaft, which it also manufactures.

WIRE ROPE.—A. Leschen & Sons' Rope Co., St. Louis, Mo. Paper, 6 x 9¼ ins.; pp. 72.

This is a catalogue and price list of ordinary and special makes of wire rope, including those having flattened and triangular strands, as used for elevators and hoisting purposes. There are also rope clamps, thimbles, hooks, hoisting and power transmission sheaves, lamp ropes, etc. The company also handles Carr's grip for endless rope haulage in wires and builds cableways, wire rope tramways (Finlayson's patent), and logging machinery.

RAILWAYS.

BELLAIRE, ZANESVILLE & CINCINNATI.—J. K. Geddes, Receiver and Gen. Mgr., Zanesville, O., informs us that no arrangements have yet been completed for the standard gaging of this line between Woodsfield and Bellaire, O. There has been a project on foot for some time for making the whole line a standard gage system and for the building of some additional track for the purpose of developing the coal fields of southeastern Ohio, but probably nothing will be done in the matter until the coal situation in Ohio is considerably improved.

BLACK DIAMOND.—Sir Thomas Tancred, an engineer sent to this country by English capitalists, has completed his reconoissance of the route for this proposed railway from Columbus, O., to Port Royal, S. C., penetrating the coal fields of east Tennessee and Kentucky, and it is said that he will recommend that the line be built. We are further informed that Col. Albert E. Boone, Zanesville, O., the promoter of the project, will let contracts next January for the construction of the branch between Vincennes, Ind., and Cynthiana, Ky. A map of the proposed route, 822 miles in length, may be seen in the office of Engineering News, 220 Broadway, New York.

CHICAGO, IOWA & DAKOTA.—Reports state that this company will probably extend its lines in the spring. The route now contemplated is northwest from Alden, the present terminus, through Britt to Elmore, Minn., where the road taps the Chicago & Northwestern, which now operates the Chicago, Iowa & Dakota. This would give the Northwestern a shorter line to its main track at Tama by 30 or 40 miles than by the present route via Eagle Grove, Webster City and Jewell.

CHICAGO & NORTHEASTERN.—We are informed that this company has at present two lines under construction in western Iowa; one from Denison to Wall Lake, 26 miles, and the other from Moundamin to Odebolt, 55 miles. Surveys are also about completed for a line from Sac City to Rolfe, Ia. D. C. Dunlap, Engr. of Location and Construction; C. A. Lichty, Asst. Engr., both of Wall Lake, Ia.

COCHITI & RIO GRANDE.—This company is stated to have been organized for the purpose of building a line from Thornton, Colo., on the Atchison, Topeka & Santa Fe Ry., to the head of the Cochiti district. The establishment of refining and smelting works at Bland is also projected. H. Claussen is said to be interested.

COLOMBIA.—This company was incorporated in West Virginia, Nov. 28, with a capital stock of $6,000,000, of which $50 is paid in, to construct and operate a railway from Puerto Llevano to Bogota, Colombia. Principal place of business, Philadelphia, Pa. The inorporators are: Ed. M. Heermans, J. M. Caldwell, T. C. Hall, Wm. C. Leonard and H. H. Martin, all of Charleston, W. Va.

CUBA.—We are informed officially that the American Indies Co., associated with the Drake & Stratton Co., both of 100 Broadway, New York, has received a contract from the U. S. government for the construction of a wharf at Triscornio, on Havana Harbor, and of a line of railway from that place to a connection with a branch of the United Rys. of Cuba, at Matanzas, Cuba. The length of the line will be about 7 miles; near Havana it will be double-tracked, with a single track towards the eastern end. It is said that the work will be prosecuted as rapidly as possible. E. Sherman Gould, of Yonkers, N. Y., Engr. of American Indies Co.; Col. Frank J. Hecker, Ch. Bureau of Transportation, Washington.——Secretary of War Alger, in his annual report, recommends that a substantial railway, practically the whole length of Cuba, with branches, be built by the U. S. government; estimated cost, $20,000,000.

FARMINGTON & IRONDALE.—This company was incorporated in Missouri, Nov. 26, with a capital stock of $200,000, to build and operate a line of standard gage railway from Irondale, Washington county, to Farmington, St. Francois county, a distance of 20 miles. The incorporators are: H. J. Cantwell, William Carter, J. W. Evans, A. N. Sager and E. H. Wagner.

GULF, LOUISIANA & GREAT NORTHERN.—We are informed that a contract for the construction and equipment of this railway, in Louisiana, has been awarded to Wheeler & Boody, Westmoreland Bldg., 222 South Third Street, Philadelphia, Pa. The total length of line will be 270 miles, and it has been arranged by the contractors to commence work within the next three weeks. A force of at least 400 Italians will be put on the work, and this number increased from time to time, as required. Certain portions of the work will be sub-let upon a cash basis, all financial arrangements having been perfected. Joseph J. Waitz, Pres., Alexandria, La.

GULF & SHIP ISLAND.—The promoters of this railway are considering the advisability of putting 200 convicts to work during the winter months in order to assist in grading the gap on this line between Hattiesburg and Pontotoc, Miss. S. S. Bullis, Gen. Mgr., Gulfport, Miss.

IDAHO NORTHERN.—This company has been incorporated in Idaho, with a capital stock of $2,500,000, to build a railway from the mouth of Coeur d'Alene River, in Idaho, to the headwaters of Bear Gulch. The incorporators are, W. Thos. Hart, Weiser, Idaho; B. Robb, Portland, Ore.; J. Perrault and A. Eoff, of Boise, Idaho.

KENTUCKY.—The Southern Construction Co., of St. Louis, Mo., is reported to have made a proposition to the people of Bath county providing for the construction of a railway from Owingsville to Olympia, Ky., if $20,000 bonus be granted.——The construction of other lines is also said to be projected from Carrollton and from Cadiz, Ky., in which J. A. Donaldson, of Carrollton, and J. G. Terry, of Cadiz, are said to be interested, respectively.

MINNEAPOLIS RY. TERMINAL.—This company has been incorporated, with a capital stock of $100,000, to construct a railway starting from 10th Ave. and Camden Place. The incorporators are: John S. Pillsbury, Pres. of Minneapolis Eastern Ry. Co.; Mart B. Koon, of Minneapolis, St. Paul & Sault Ste. Marie Ry. Co., both of Minneapolis, Minn.; W. D. Washburn, Curtis H. Pettit and Wm. D. Hale.

MOORE COUNTY & WESTERN.—W. B. Eekhout, Supt. of Construction, Aberdeen, N. C., informs us that the surveys have been completed and location made for 40 miles on this proposed line from Aberdeen to Concord, N. C., a distance of 85 miles. Part of the necessary capital has been secured, and part of the work let to J. R. Erwin & Co. and W. F. Neal Co. About 14 miles have been built and 9 miles graded. George M. Clarke, Vice-Pres., P. O. Box 836, Providence, R. I.; H. L. Thurston, Ch. Engr., Aberdeen, N. C.

NELSON & BEDLINGTON.—Press reports state that Foley Bros., Larson & Halverson, have received the contract for the construction of this proposed railway from Bonner's Ferry, Idaho, to Bedlington, on Lake Kootenay, B. C., a distance of about 53 miles. P. Foley, Pres., of St. Paul, Minn., is quoted as saying that surveys have all been made, and that a camp will be established at Bonner's Ferry and another near Kushanook, and work be commenced at once; there is considerable heavy rock work on the line.

NEW YORK & PENNSYLVANIA.—Reports state that Theodore Cobb, Spring Mills, N. Y., has been awarded the contract to build the 6-mile extension of this line from Oswayo to Millport, N. Y., at the rate of $10,000 a mile, the road to be built before Jan. 1. More than one-half of the work had been done before the signing of the contract.

NICARAGUA.—Press reports state that the Atlas Steamship Co., of Liverpool, has withdrawn its negotiations for the purchase of the control of this country's railway and steamboat line.

NORTH SHORE TERMINAL.—This company was incorporated in Pennsylvania, Nov. 30, with a capital stock of $100,000, to construct five miles of steam railway in Allegheny, Pa., to a connection with the Pittsburg, Fort Wayne & Chicago R. R. and the Pittsburg & Western R. R. Chas. T. Schoen, Pres., Bryn Mawr, Pa.; F. N. Hoffstat, Allegheny, Pa.; E. A. Schoen, Sewickley, Pa.; W. H. Schoen, Jr., and Geo. T. Hildebrand, both of Pittsburg, Pa.

OGDENSBURG & LAKE CHAMPLAIN.—This company was incorporated in New York, Dec. 1, with a capital stock of $4,400,000. It is a reorganization of the old Ogdensburg & Lake Champlain R. R. Co., whose line runs from Ogdensburg to Rouse's Point, N. Y. The directors are: Frank R. Becker, Ogdensburg; William A. Heady, Elmsford, N. Y.; William H. Platt, Brooklyn, N. Y., and Charles Parsons, George Parsons, George Sherman, Clarence S. Day, Charles G. Burnham and others, of 15 Broad St., New York.

PECOS VALLEY & NORTHEASTERN.—Work is now said to be proceeding slowly on the extension of this line from Roswell, N. Mex., to Amarillo, near Texline, on the Texas line of the Colorado & Southern, as the Union Pacific, Denver & Gulf Ry. will be called. The total distance is 208 miles, and track has been laid about to the boundary line between New Mexico and Texas. It is expected that all the work will be completed by Jan. 1.

PENNSYLVANIA.—Press reports state that Drake & Stratton, Pittsburg, Pa., have received the contract for building an additional track and removing a curve east of Kinzers, near Harrisburg, Pa., at $212,000. Also that contracts have been let for laying a new track from half a mile west of Elizabethtown and extending 4½ miles east of the place, and for building a new track and roadbed from Johnstown bridge to Sheridan, and relaying track and removing curves between Sang Hollow and Conemaugh. Work will be commenced at once. W. H. Brown, Ch. Engr., Philadelphia, Pa.

PENSACOLA & NORTHWESTERN.—The city council of Pensacola, Fla., has granted a franchise to this company to construct a railway over certain streets of Pensacola. Mayor Northrup may be addressed.

RUTLAND-CANADIAN.—H. G. Smith, Treas., Rutland, Vt., informs us that the surveys have not yet been completed for this proposed line from Burlington, Vt., to the Canadian line; nor has the route been positively decided upon. Frank R. Wilk, Pres., Burlington; John W. Burke, Ch. Engr., Rutland, Vt. The Champlain Construction Co. has been incorporated to build the line, the incorporators being W. Seward Webb, Shelburne, Vt.; Edgar Harding and G. H. Bull, of Boston; P. W. Clement and H. G. Smith, of Rutland.

ST. LAWRENCE RIVER & ADIRONDACK.—H. G. Atwater, Secy., Norfolk, N. Y., informs us that the organization of this company has not been perfected, and that there is no certainty about the matter as yet.

TERRE HAUTE & LOGANSPORT.—This company was incorporated in Indiana, Nov. 30, with a capital stock of $2,000,000, to operate the lines formerly in the hands of a receiver. James McCrea and J. T. Brooks, of the Pennsylvania Co., Pittsburg, Pa., are among the directors of the new company.

WASHINGTON RUN.—Bennett & Talbott, Greensburg, Pa., inform us that they expected to start work Dec. 6 on this 5½-mile line from Perryopolis to Layton, Pa., for the Washington Coal & Coke Co. The contract includes grading, tunneling, bridging, track laying, ballasting and furnishing of ties. P. J. Cochran, Pres., Dawson, Pa.; E. J. Taylor, Ch. Engr., McKeesport, Pa.

WISCONSIN CENTRAL.—H. F. Whitcomb, Gen. Mgr., Milwaukee, Wis., informs us that this company has recently purchased 1,000 box, 250 flat and 100 furniture cars.

STREET AND ELECTRIC RAILWAYS.

BELLOWS FALLS, VT.—Surveys are being made, according to reports, for the proposed Bellows Falls & Saxton's River Electric Ry., from Bellows Falls to Rockingham, via Westminster, a distance of six miles. J. H. Holton, Pres., Burlington, Vt.; V. K. Nash, Ch. Engr., Woonsocket, R. I.

SWANTON, VT.—An act has passed the state legislature incorporating the Swanton Electric Ry. Co.

COHASSET, MASS.—Reports state that it has been decided to extend the third-rail electric system on the New York, New Haven & Hartford R. R. as far as Cohasset on the Plymouth Division. Chas. P. Clark, Pres., New Haven, Conn.

WARE, MASS.—The selectmen have granted a franchise to the Palmer & Monson St. Ry. Co., which provides for the construction of the line from Palmer before Jan. 1.

WINTHROP, MASS.—The Winthrop & Revere St. R. R. Co. has been organized to operate about eight miles of lines in Revere, Winthrop and East Boston. The directors are: J. O. Wetherbee, S. B. Pearmain and S. B. Hinckley, Jr., of Boston; S. B. Hinckley, Newton; W. M. Bacon, Winthrop; Geo. S. Forbush, Brookline, Mass.; Thomas Martin, Chelsea, Mass.

BUFFALO, N. Y.—The Buffalo & Lockport Electric Ry. Co., which recently acquired the Buffalo, Kenmore & Tonawanda line, is said to be negotiating to secure a franchise which will enable it to build another track along Delaware St., Tonawanda, from the North Tonawanda city line to the Buffalo city line. As it is the expressed intention of the company to run the Lockport cars over this line, a double-track system will be a necessity.

LOWVILLE, N. Y.—The people of this place contemplate the construction of an electric railway to nearby villages, taking power from the Wetmore Electric Co., and also the erection of a new opera house.

NEW ROCHELLE, N. Y.—The village trustees, Dec. 5, granted franchises to the Westchester Electric Ry. Co. to build on Main St. and Winyah Ave., work to be completed by May 15.

OSWEGO, N. Y.—Press reports state that the Oswego Electric St. Ry. will be sold on foreclosure about Jan. 11.

PARIS, N. Y.—It is announced that Michael Gaffney, Comr. of Highways, Town of Paris, has granted a franchise to the Sauquoit Valley Electric St. Ry. Co.

ROME, N. Y.—We are informed that the right of way has been obtained for the Utica Suburban branch of the Utica Belt Line St. R. R., from Rome to Oriskany, nine miles, and that a start was made to grade when work was stopped by an injunction. As soon as injunction has been decided, work will be continued. John W. Boyle, Pres., of Utica, should be addressed; F. K. Baxter, Ch. Engr., Utica.

HAMMONTON, N. J.—The council is considering the petition of W. I. Garrison, Smith Conover and Samuel Riley and others, of Atlantic City, N. J., for a franchise to build through this town in connection with the proposed line between Camden and Atlantic City.

ALLENTOWN, PA.—The Allentown & Slatington St. Ry. Co. was incorporated in Pennsylvania, Dec. 2, with a capital stock of $200,000, to construct an electric street railway between Allentown and Slatington, a distance of 17 miles. The incorporators are: Francis J. Crilly, Pres.; John L. Schwartz, P. F. Cannon and Walter J. Saeger, all of Allentown; Francis A. Krutz, of Slatington.

EAST PITTSBURG, PA.—The Wilkinsburg & East Pittsburg St. Ry. Co.'s ordinance, asking for right of way over certain streets of East Pittsburg borough, was passed at a special meeting of the council Dec. 3.

ERIE, PA.—The select council has recently passed four ordinances providing for street railway extensions in this city.

PHILADELPHIA, PA.—Reports state that the Central Electric Ry. Co., of Philadelphia and Delaware county, has filed a resolution of the company in Media, providing for an extension of its line to Philadelphia, via Yeadon, Cardington, Lansdowne, Media, etc.

WILMINGTON, DEL.—Work is said to be progressing on the Wilmington & Chester Traction Co.'s new line between Wilmington and Chester, Pa., which, when completed, will connect with the line from Darby to Chester, and thus provide a continuous route between Wilmington and Philadelphia. Operations will probably begin about Jan. 1. C. M. Clark, Pres., Philadelphia.

BALTIMORE, MD.—The Baltimore Consolidated Ry. Co. has had ordinances introduced into the council asking for a franchise to build a double-track line on Chase and Bond Sts. and Hopkins and Ashland Aves. W. A. House, Mgr.

HAMPTON, VA.—This town has granted a franchise to the Peninsula Ry. Co. John G. Livezy, of Newport News, Va.; and Francis F. Causey, of Hampton, are interested.

DAHLONEGA, GA.—J. W. Adams, Pres. of Dahlonega Gold Mining Co., and J. H. Smith, Findlay, O., are said to be interested in the construction of an electric line from the company's mines to the Southern Ry.

KEY WEST, FLA.—The board of aldermen has granted a franchise to the Messrs. Laflin, according to reports, for the construction of an electric railway and electric light plant.

GADSDEN, TENN.—J. M. Elliott, Jr., Pres., Gadsden, informs us that complete arrangements have been made to convert the Gadsden & Attala Union Ry. into an electric line, 11 miles in length. Work will be done by W. S. McCall, Chattanooga, Tenn.

CARROLLTON, KY.—It is reported that the Carrollton Electric Ry. and Bridge Co. has been organized, and has had surveys made for the construction of an electric railway from Carrollton to Warsaw requiring a new bridge over the Kentucky River. M. J. Barker, Pres.

CLEVELAND, O.—J. J. Stanley, Mgr. of Cleveland Electric Ry., is said to have stated that this company contemplates the erection of an addition to its power house on Cedar St., and the installation of a new 3,800 HP. generator.

BATTLE CREEK, MICH.—George W. Bullis, Ann Arbor, Mich., is promoting a project to build an electric line between this city and Hastings next spring. Mr. Bullis is said to represent Boston capitalists.

BIRMINGHAM, MICH.—Almeron Whitehead, Frank Hagerman, George E. Daines, of this place; George T. Hendrie, of Detroit, and Michael F. Lillis, of Pontiac, were granted a franchise, Nov. 26, by the township board to build and operate an electric railway from Circle, 2¼ miles north of Birmingham, through the township of Bloomfield. The route, when finished, will reach Orchard Lake, and cars are to be running within 18 months from the time the franchise was granted.

FLINT, MICH.—R. M. Luton, Grand Rapids, Mich., is interested in the construction of an electric line between Flint and Long Lake.

LAKE BLUFF, ILL.—The Chicago & Fox Lake Electric Ry. Co., which contemplates building a cross-country line from Fox Lake to the lake shore, was granted a 20-year franchise for a right of way into Lake Bluff by the village board, Nov. 28. The company wanted a 50-year franchise in Scranton Ave., but this was not granted.

OREGON, ILL.—Fred S. Jones, of Oregon, contemplates the construction of an electric railway between Oregon and Rockford. Preliminary surveys have been made.

BARABOO, WIS.—The council, Nov. 25, granted a franchise to the Baraboo, Kilbourn & Devil's Lake Electric Ry. Co. Construction work is expected to begin next spring.

LONGVIEW, TEX.—It is reported that the Longview St. Ry. Co. contemplates the extension of its line. O. H. Methrin, Mgr.

ST. LOUIS, MO.—Chas. E. Carroll, Pres. of Mississippi Valley R. R. Co., St. Louis, informs us that this company is now having its prospectus written up, and expects to be ready for action about Feb. 1. Much work has been done in securing rights of way, and in making surveys. August Holthans, 1449 North 6th St., St. Louis.

ST. LOUIS, MO.—Press reports state that C. H. Spencer and others, of the Southern Electric Ry. Co., 4041 South Broadway, will become owners of the lines of the National Ry. Co., including 80.37 miles of electric and 14.67 miles of cable street railway.——It is also announced that the entire Lindell Ry. system, E. Whitager, Pres., has been sold to a syndicate at $8,500,000. The company operates 60 miles of electric lines.

EUREKA SPRINGS, ARK.—The council is reported to have granted a franchise for the construction of an electric line in this city.

ASTORIA, ORE.—A 75-year street railway franchise is reported to have been awarded to Mr. Knettner.

REDLANDS, CAL.—It is reported that the horse car system in this city will soon be converted into an electric line. The railway is three miles in length, and the estimated cost is $35,000.

AURORA, ONT.—The Metropolitan St. Ry. Co., of Toronto, address Deer Park, Ont., has made arrangements with the York county council for the construction of an extension of the company's lines through Aurora.

HAMILTON, ONT.—It is reported that the Cataract Power Co. has asked Engineer Hillman to survey two direct lines to Guelph and Berlin for a fast electric railway service. The proposed line will run from a point on James St., to and along Burlington Heights, thence over the old canal, and will follow in some respects the original radial railway survey to the top of the Flamboro escarpment. No bonuses will be asked for, and the most direct lines will be used.

PARRY SOUND, ONT.—The board of trade is said to be interested in the construction of a line of electric railway, to connect Parry Sound and Depot Harbor.

VANCOUVER, B. C.—Press reports state that the British Columbia Electric Ry. Co. has decided to erect a new power house, with a 3,000-HP. generator. The construction of a branch along Davie St. to English Bay is also said to be projected. J. Buntzen, Mgr.

ELECTRIC LIGHT AND POWER.

BOSTON, MASS.—Bids are asked until Dec. 13 for a power plant for rope manufactory, two horizontal tubular boilers; also a quantity of iron pipe and specials, machine-set screws, files, leather belting, pipe fittings and valves. Edwin Stewart, Paymaster-General, U. S. N., Washington, D. C.

EVERETT, MASS.—P. D. Blackden, Mech. Engr., 170 Summer St., Boston, writes us that he has not yet received the franchise for a plant recently asked for, the matter still being in the hands of the city government. The plant will be operated by steam.

SOUTHBRIDGE, MASS.—Reports state that it is proposed to form a company to buy C. W. Weld's water privilege below Sandersdale, and utilize it for transmitting power to the center of the town. There is a fall of about 10 ft.

SPRINGFIELD, MASS.—The committee has instructed the United Electric Light Co. to replace 100 of the present open arc lights with enclosed ones. H. S. Anderson, Supt.

WINTHROP HEAD, MASS.—The Walworth Construction & Supply Co., 100 Pearl St., Boston, Mass., has been awarded the contract for the electric plant at the mortar battery at this place at $1,424.

EAST HARTFORD, CONN.—Jos. O. Goodwin, Town Clk., writes us that the town will probably let a contract for electric lighting to either a Hartford or a Manchester company. About 300 incandescent lights will be wanted by the fire district.

BROOKLYN, N. Y.—Bids are asked until Dec. 17 for building a new plant and for extending the old one at the New York navy yard, and also for enlarging the wiring system. M. T. Endicott, Ch. Bureau Yards and Docks, Navy Dept., Washington, D. C.

MIDDLEPORT, N. Y.—Bids are asked until Dec. 13 for furnishing about 25 arc lights of 2,000 c. p. each, for five years, as stated in our advertising columns. Thos. P. Hammond, Village Clk.

ROCHESTER, N. Y.—Mayor Warner is urging the council to consider the question of a municipal plant. The lights for this year cost the city about $230,000.

TUPPER LAKE, N. Y.—Press reports state that parties from Utica, N. Y., are considering the advisability of building a plant in this place.

WATERLOO, N. Y.—Bids are asked until Dec. 26 for electric lighting of the streets, for five years, as stated in our advertising columns. W. A. Gibson, Clk.; I. G. Gregory, Pres.

WILDWOOD, N. J.—Abraham Anderson, Camden, N. J., writes us that he purchased last November the property of the Seacoast Electric Light & Power Co. under foreclosure of mortgage. Mr. Anderson wishes to resell the plant for $10,000.

COATESVILLE, PA.—It is stated that the council has asked for bids for lighting the town with electricity for next year. If the contract is satisfactory a 5-year contract will be let.

LEBANON, PA.—Councils have rejected the bids received for a 5-year contract. New bids for a shorter term will probably be asked.

PHILADELPHIA, PA.—The Southern Electric Light & Power Co. has increased its capital stock from $400,000 to $2,000,000 for the proposed extension to its plant. In addition to the company's contract with the city for the lighting of that section of the city lying south of South St., between the Delaware and Schuylkill rivers, it furnishes current to many large business and manufacturing enterprises for incandescent lights and power. At present the main power house, which was erected in 1895, is 204 × 174 ft., and is so constructed that it can be almost indefinitely extended without alteration of the work already done. The structure is of steel throughout, and the walls and chimney are of brick. The plant is located near the Schuylkill River. The supply of water, of which the company uses 12,000 gallons a minute for condensing purposes, is obtained through a round brick-and-stone conduit 48 ins. in diameter, which extends from the plant to the bottom of the river, a distance of 1,300 ft.

PITTSBURG, PA.—Local papers state that Capt. W. B. Rodgers, of the Tide Coal Co., has let the contract for a complete electric haulage plant to be put in his mines. The machinery will cost about $10,000.

CHESAPEAKE BEACH, MD.—We are informed that plans and specifications for a plant, water-works, sewers and an ice plant are being prepared by Geo. Cadogan Morgan, 808 Royal Insurance Bldg., Chicago, for the Chesapeake Beach Ry. Co. It is not known when the contracts will be let. Otto Mears, Pres., Washington, D. C.

HAGERSTOWN, MD.—The council has passed an ordinance providing for the construction of a municipal plant, to cost about $60,000.

LONACONING, MD.—The Lonaconing Electric Light & Power Co. has decided to extend its plant. Local papers state that there shall be required two 120-HP. engines, a boiler, two alternating dynamos of 2,000 voltage each, with the numerous fixings necessary to operate them. These will be purchased at once. Supt., H. Scott.

HINTON, W. VA.—Arrangements have been completed for the development of the water power of the Kanawha Falls, near Hinton, and the work is now progressing rapidly under the direction of John W. Hayes, of Petersburg, Va., who prepared the plans. The power is being developed by the Wilson Aluminum Co., 97 Cedar St., New York. Buildings will be erected and plants established for the manufacture of calcium carbide, for the making of acetylene gas. The falls have about 6,000 to 12,000 HP.

BRUNSWICK, GA.—W. F. Greene, Civil Engr. and Receiver, Brunswick Light & Water Co., writes us that all contracts for furnishing machinery for a new plant have been let. Estimated cost, $18,000. E. F. Baker, Des. Engr., 1601 North Calvert St., Baltimore, Md.

FORSYTH, GA.—W. A. Pye, Cy. Clk., writes us that it is not yet decided whether to have a plant or not.——A report states that this place voted Nov. 26 to issue bonds for electric lights.

GAINESVILLE, GA.—Jas. P. Edwards, Elec. Engr., Augusta, Ga., and Gainesville, writes us that the proposed plant will be as follows: Plant operated by water power, water-wheel 150-HP., under 9 ft. head wanted to furnish power to the municipal arc lighting plant at the shaft (without transmission); one generator, two-phase alternating 2,400 volts, 100 K-W. wanted; about 16 miles No. 5 B and S. weatherproof line wire wanted (probably part used bare instead of insulated); plant will supply light and power, and generator is expected to run 24 hours a day. Probability of using a storage battery for lighting purposes; in addition the present horse-car line wishes to use electricity if it can be secured cheaply enough.

SPARTANBURG, S. C.—J. T. Johnson and others, of Spartanburg, propose to build a water-power plant and several mills at Ware Shoals. The plant will furnish about 10,000 HP.

KEY WEST, FLA.—Messrs. Laflin have been granted a franchise to operate a plant and street railway.

RICHMOND, KY.—We are informed that a plant will be built for the Richmond Electric Light Co. at a cost of $15,000. The plant will have a Warren-Medbery alternator, 50 arc lamps, etc. The engines and boilers have not yet been purchased. D. J. Hauss, Elec. Engr., Pike Bldg., Cincinnati, O., and Frank Adair may be addressed.

CLEVELAND, O.—Director of Law Norton is reported to have stated that ordinances are being prepared to authorize the construction of underground conduits for the electric wires, etc.

ROCKFORD, O.—A. G. Stewart, one of the incorporators of the new electric company, writes us that bids will probably be asked in about two weeks for building the plant to have 800 incandescent lights. It is expected that the plant will be operated in connection with the water-works. There will be required an engine and dynamo, overhead wires, etc.

SPRINGFIELD, O.—It is stated that the Springfield Light & Power Co. will extend its plant at a cost of about $10,000. J. N. Waterman, Pres., Boston, Mass.

WOODSFIELD, O.—Bids are asked until Dec. 27 for constructing a plant, according to reports; estimated cost, $7,000. T. A. Way, Mayor.

GREENFIELD, IND.—John F. Egan, Mayor, writes us that the council has purchased the plant for $16,000.

FLAT ROCK, MICH.—This city is to have a plant, according to reports.

GROSSE POINTE, MICH.—The village of Grosse Pointe Farms, it is stated, has voted against issuing bonds for a plant.

ROYAL OAK, MICH.—Bids are asked until Dec. 20 for constructing a plant to cost $3,000. Gas engines will be used. It will have a capacity for furnishing 16 1,500-c. p. arc and 250 incandescent lights. Address Wm. Hilzinger, Main and First Sts., Royal Oak.

STURGIS, MICH.—Chas. A. Sturgis, Mayor, writes us that plans and specifications for a plant are not yet prepared. The plant will have a capacity for 100 to 125 arc and 1,500 16-c. p. incandescent lights. C. L. Hauer, Supt.

LINCOLN, ILL.—Arrangements are reported as being made for the construction of the plant for the Logan County Electric Light Co. The company has a capital stock of $10,000. John St. Cerny and Henry G. Harget, Pekin, Ill., and Adam Denger, Lincoln, are interested.

FOUNTAIN CITY, WIS.—H. & F. Roettiger have engaged A. M. Palitz, Milwaukee, Wis., as consulting engineer for the proposed plant. He will have charge of receiving bids. The city will be lighted by four arcs and 25 32 c. p. incandescent lights.

COUNCIL BLUFFS, IA.—The council has been asked to call an election to vote on the question of granting a 25-year franchise for a plant to the J. C. Hubinger Co., Keokuk, Ia.

WILLIAMSBURG, IA.—The council proposes to put in a plant, according to reports.

LITTLE FALLS, MINN.—Bids are asked until Dec. 16 for the purchase of $60,000 of 5% 20-year bonds for the proposed plant and water-works; population, 6,000. F. E. Hall, Cy. Clk.

INDEPENDENCE, MO.—H. B. Speechter, of Louisiana, Mo., is reported to have applied for a franchise to construct a $30,000 plant, and to operate it.

NORTHPORT, WASH.—W. R. Lee writes us that he has been granted a franchise. He was also awarded a 5-year contract for 10 arc lights. The plant will be operated by water power. No contracts will be let for some time.

ELGIN, ORE.—Reports state that a contract for a plant and water-works, to cost about $12,000, has been let.

INDEPENDENCE, ORE.—The committee has been instructed to purchase the L. C. Gilmore water power. It was also instructed to purchase the Independence electric light plant.

SAN PEDRO, CAL.—The city trustees have been asked to call an election to vote on the question of issuing $40,000 in bonds for a plant and water-works, and $20,000 for sewers.

PROVO, UTAH.—It is stated that the plant will be purchased by the council, and that it will be extended.

SHERBROOKE, QUE.—Bids are asked until Dec. 15 for lighting the streets with arc and incandescent lights. C.W. Cate, Chn. Com.

HAMILTON, ONT.—The Cataract Power Co. has submitted a proposition to furnish this city with electric lights. H. R. Leyden, Gen. Mgr.

INGERSOLL, ONT.—The council, it is stated, has appointed a committee to negotiate for the purchase of the plant of the Ingersoll Electric Power & Light Co.

VICTORIA, B. C.—Application will be made to the legislative assembly of the Province for an act to incorporate a company to construct, equip and operate a plant for the lighting by electricity of the townsites of Teslin Lake, Glenora, Telegraph Creek, and Atlin City, and also to erect and maintain telephone and telegraph lines, with all the necessary powers and privileges. Robert Cassidy is the solicitor for applicants.

NEW COMPANIES.—Huntingburg Light & Power Co., Huntingburg, Ind.; $4,500; C. S. Knight, M. L. Pohlamus.

Newaygo Transmission Co., Newaygo, Mich.; $15,000; to furnish electric light and power; Alston Gerry, Jas. F. Barry, of New York city; J. E. More, Chas. F. Peke, Grand Rapids, Mich.

Corona Light & Water Co., Klamath Falls, Ore.; $100,000; S. C. Ttayner, A. L. Leavitt, C. L. Parish.

Chemical Battery Light, Heat & Power Co., Pierre, S. Dak.; $5,000,000; Frank W. Lowery, E. O. L. Apel, E. L. Squire.

La Cigale Water & Power Co., Mercur, Utah; Martin Mahnken, Mercur.

East Chicago Light & Power Co., East Chicago, Ind.; $15,000; George W. Wilson, H. N. Haley, M. L. Pike.

Valley Electric Light Co., Valley Falls, N. Y.; $10,000; to furnish light in Lansingburgh, Melrose, Schagnticoke, Stillwater, Valley Falls, Johnsonville, Buskirk's Bridge and Eagle Bridge; Edward O'Neil, Hiland Carpenter, Augusta Carpenter, Valley Falls; Jonathan N. Carpenter, Hoosick Falls, N. Y.

Groton Electric Co., Groton, Conn.; $2,000.

Elmira Light, Heat & Power Co., Elmira, N. Y.; $10,000; James B. Rathbone, Elmira.

Sheridan Light & Water Co., Sheridan, Ind.; $9,500; H. C. Knight, M. L. Polhamus.

American Sun Light Co., New York; $10,000; J. L. Nisbet, Yonkers, N. Y.; R. H. Jaeger, R. H. Stearn, New York.

Clarendon Light & Heat Co., Clarendon, Ark.; $6,000; J. W. B. Robinson, Pres.; H. B. Bateman, Vice-Pres.; J. T. Jones, Secy. and Treas.

Red Lake Falls Electric Light Co., Red Lake Falls, Minn.; $8,000; Marcus Johnson, Atwater, Minn.; Anna B. Marshall, L. R. Smith, Red Lake Falls, Minn.

Rockford Electric Lighting Co., Rockford, O.; $6,000; C. S. Mauk, A. G. Stewart, D. C. Kuder, F. M. Kirby, J. D. Wagers, W. T. Palmer.

Carter-Hays Electric Co., Louisville, Ky.; $5,000; to manufacture and repair electric appliances and construct electric plants, etc.; E. W. Hays, Hugh Hays, L. D. Carter.

Bath Light & Power Co., Bath, Me.; $100,000, with $400 paid in; Pres., E. W. Hyde, Bath, Me.; Treas., H. H. McCarty, Bath, Me.

Millbrook Gas & Electric Co., Washington, N. Y.; $15,000; Wm. E. Smith, Millbrook; Rich'd J. Scoles, Samuel Thorn, New York.

Delaware Electric Light & Power Co., New York; $250,000; P. G. Stappens, D. McM. Niven, C. W. Phillips, New York.

Natchez Light, Power & Transit Co.; Natchez, Miss.; $200,000; Maurice Moses, Abram Moses, Natchez.

Eldora Resort & Power Co., Eldora, Colo.; $100,000; to build a summer resort, a power plant, etc., on the Paterson Lake property, Boulder county; T. B. Stuart, C. A. Murray, E. L. Alexander.

Crescent City Electric Co., New Orleans, La.; to build and operate a plant, the wires to be underground; Pres., Jos. H. DeGrange, Pres. Canal & Claiborne R. R. Co.; Secy. and Treas., Sidney H. March, of the Dock Comn.; Gen. Mgr., J. B. Craven.

Williamsport Water & Light Co., Williamsport, Ind.; $10,000; Jno. H. Brown, B. O. Mayer.

Citizens Electric Light & Water Co., Smithfield, Va.; $20,000; J. W. Holloway.

Hamburg Mining, Milling & Power Co., Washington, D. C.; $5,000,000, with $1,000 paid in; to develop the manufacturing, chemical, mining, milling interest of Huilota, Mex.; J. M. Wiley, H. O. Baker, W. T. Fitzgerald, D. Lester, H. Wasmuth, Washington.

Greenup Light Co., Greenup, Ky.; $5,000.

BRIDGES.

PLYMOUTH, MASS.—The board of selectmen is considering the question of replacing certain bridges destroyed by storms. Plans for a new iron bridge over Eel River, on Warren Ave., have been presented by Ernest Nickerson.

ALBANY, N. Y.—The Hudson River Bridge Co., New York, proposes to construct a new bridge to replace the present structure between Maiden Lane and East Albany, to cost about $500,000.

BINGHAMTON, N. Y.—Jerome De Witt, Mayor, informs us that no official action has been taken to construct the proposed bridge over the Susquehanna River.

BUFFALO, N. Y.—The grade crossing commission has in contemplation the construction of eight viaducts and ten subways. About two years will be required to complete these improvements, which will cost about $1,000,000.

SYRACUSE, N. Y.—Henry B. Seaman, New York, has been engaged to prepare plans and estimates for abolishing the grade crossings. Jas. K. McGuire, Mayor.

WATERVLIET, N. Y.—Reports state that the Hilton Bridge Co. has been awarded a contract for a new bridge over the canal on Broadway, near 23d St., to be constructed next spring.

ROSSIE, N. Y.—A bill has been introduced in the board of county supervisors, Ballston Spa, N. Y., to authorize this town to borrow $4,800 for the construction of an iron bridge.

LE ROY, N. Y.—A meeting of the town board and railway commissioners will be held Dec. 13, at the Buffalo, Rochester & Pittsburg Ry. station, to consider the question of constructing a highway bridge over the tracks at Haskin's Crossing.

HOOSICK FALLS, N. Y.—Reports state that plans and specifications for the abutments for the new bridge to be built at North Hoosick are on file with the town clerk.

CLIFTON, KY.—W. L. Cannon, Midway, Ky., writes us that a steel bridge will be constructed of one span, 100 or 110 ft. long, and 14 ft. wide; capacity, 100 lbs, per sq. ft. E. Thacker, Engr., 16 Savings Institute, Paterson, N. J.

INDEPENDENCE, KY.—Bids are asked until Dec. 10 for furnishing plans and constructing a bridge of two spans, 48 ft. each, capacity 150 lbs. per sq. ft., over Cruises Creek. Address Eugene Mann, Piner, Ky., or W. T. Loomis, Staffordsburg, Ky.

HARRISON, O.—It is proposed to construct a new bridge between Hamilton county, O., and Dearborn county, Ind.

MOLINE, ILL.—J. G. Wagner Co., of the Milwaukee Bridge & Iron Works, Milwaukee, Wis., was awarded a contract, Nov. 30, by Maj. W. L. Marshall, U. S. Engr., Chicago, for the construction of a high bridge over Rock Creek, to cost about $25,000.

EAST GRAND FORKS, MINN.—Bids are asked until 8 p. m., Dec. 9, for widening the approach to the De Mers Ave. bridge. Henry Harm, Cy. Recorder.

CORSICANA, TEX.—The county commissioners have awarded a contract to Mr. Flynn, Weatherford, Tex., at $1,500, for two iron bridges over Post Oak Creek.

SPOKANE, WASH.—The Washington St. bridge has been condemned by the board of public works. A new structure will probably have to be constructed.

YUMA, ARIZ.—The citizens are considering the question of having an addition to the new Southern Pacific Ry. bridge, for wagons, to cost from $10,000 to $15,000.

FRESNO, CAL.—The county supervisors have awarded a contract to the California Bridge & Construction Co., at $8,770, for the construction of a bridge over Kings River, near Sanger.

NAPA, CAL.—Newman & Wing have been awarded a contract, at $2,600, for the construction of a stone bridge across Fagan Creek. N. W. Collins, Clk. Bd. Supervisors.

CHARLOTTETOWN, P. E. I.—Bids are asked until Dec. 21 for constructing a bridge at Alberry Plains, according to reports. Richard Smith, Secy. Bd. Pub. Wks.

BUILDINGS.

BOSTON, MASS.—Bids are asked until Dec. 9 for erecting a grammar school building on Quincy and Perth Sts., Dorchester, for the city of Boston; bond, $20,000. Wm. T. Eaton, Chn. of Com.; A. Warren Gould, Arch., 2A Beacon St.

BOSTON, MASS.—Bids are asked until Dec. 12 for a feed-water heater, meters, etc., for the pumping station, Calf Pasture, Dorchester District. Benj. W. Wells, Supt. Sts.

CAMBRIDGE, MASS.—A new $50,000 infirmary building is to be erected here for Harvard University. James Stillman, 7 East 40th St., New York, is the donor.

PAWTUCKET, R. I.—Cram, Goodhue & Ferguson, of Boston, are stated to have been chosen as architects for the new public library building to be erected in this city; cost, between $100,000 and $200,000.

DANBURY, CONN.—D'Esope Bros., Hartford, Conn., were the lowest bidders, Nov. 30, for erecting a court house for Fairfield county in this city, at $35,649. Other bidders were: Tracy Bros., Waterbury, Conn.; Casey & Hurley, Bridgeport, Conn.; C. C. Crossley, Danbury; J. L. Bunnell, Danbury; Dowling & Bottomley, Bridgeport; Foster Bros., Danbury; Norcross Bros., Worcester, Mass.

MIDDLETOWN, CONN.—C. W. Page, Supt. of Hospital for the Insane, informs us that reports were premature stating that plans have been completed for additions to the buildings, to cost about $75,000. Recommendations have been made regarding the same, but no steps can be taken without the sanction of the state legislature.

ALBANY, N. Y.—Norcross Bros., Worcester, Mass., are reported to have been awarded the contract for erecting the new union station in this city, on the site of the old Delavan House, to cost about $400,000.

ALBANY, N. Y.—Plans are asked until Jan. 3 for a public bath house in this city. Horace Andrews, Cy. Engr.

BUFFALO, N. Y.—Reports state that Mayer & Weil, who recently bought the Manhattan Hotel, at Main and Mohawk Sts., and who will replace it with a 7-story brick fireproof building of steel construction, have closed a contract with Charles Mosier to tear down the present building and to build the new structure.

NEW YORK, N. Y.—A fire in this city, Dec. 4, destroyed the 5-story building at Warren St. and Broadway, occupied by Rogers, Peet & Co., Clothiers. The loss to this and the Home Life Building, which is adjacent, is estimated at about $800,000.——The St. Agnes Roman Catholic Church, 43d St., near 3d Ave., was damaged by fire, Dec. 4, causing a reported loss of $75,000.——Reports state that Andrew Carnegie, of Pittsburg, will erect a large dwelling at 91st St. and 92d St. and 5th Ave.——The 2-story brick car-house, 150 × 250 ft., of the Union Ry. Co., at 173d St. and Boston Road, was damaged by fire, Nov. 30. Estimated loss, $150,000; insurance, $100,000.——Plans have been filed by Paul B. Pugh & Co., 674 Columbus Ave., for a 7-story brick flat building at 92d St. and Central Park West, to cost $120,000. G. A. Schellenger, Arch., 128 Broadway; by Friedman & Feinberg, for four 6-story brick flat and store buildings, at 287 to 297 Elizabeth St., to cost $99,000; by C. B. Drew, 306 East 123d St., for a 7-story brick tenement building on 123d St., near 2d Ave., to cost $70,000. G. S. Drew, Jr., Arch.; by the New York Second Church of Christ Scientists, for a 4-story granite, marble and brick church building at Central Park West and 68th St., to cost $200,000. Frederic R. Comstock, Arch., 98 5th Ave.; by Mrs. Lottie Ratner, for eight 4-story brick flat buildings at 139th St. and St Ann's Ave., to cost $120,000. M. Bernstein, Arch., 145 Centre St.; by Lanrowitz & Fine, 307 East 74th St., for three 6-story brick flat buildings on Houston St., near Hancack St., to cost $84,000. G. Fred. Pelham, Arch., 503 5th Ave.; by Charles Wahlig, 678 East 134th St., for six 4-story brick buildings on 135th St., near Brook Ave., to cost $150,000. E. Wenz, Arch. and Owner, 2577 3d Ave.; by L. F. J. Weiher, Jr., for three 5-story brick flat buildings on Washington Ave., near 164th St., to cost $68,000; by Bernheimer & Schmid, for a 4-story brick storage house on 107th St., near Columbus Ave., to cost $60,000. Louis Oberlin, Arch., 15 Whitehall St.——John Weber & Son are reported to have the general contract for erecting a 3-story brick warehouse and stable at 613 and 615 West 48th St. for the Pabst Brewing Co. Lyndon P. Smith, Arch., 258 Broadway.——The following bids were received by the supervising architect, Washington, D. C., Nov. 24, for taking down and rebuilding the west end wall of rear building of the Assay Office: John F. Johnson, New York, $11,700, time, 90 working days; Michael Moore, New York, $5,750, 50 working days; Joseph H. Cuttey, New York, $5,639, 30 working days; Quincy & Crawford, New York, $6,660, 9 weeks; Hartman & Hogan, New York, $4,887, 33 days.——The following bids were received, Nov. 28, by the supervising architect, for the extension of the mailing platform and shed of the post office building in this city:

		Time.
Cooper & Wigand, 1133 Broadway, N. Y.	$13,896	3½ mos.
Kenny & Kenny, Syracuse, N. Y.	12,304	4 "
Post & McCord, ft. Clay St., B'klyn, N.Y.	14,270	4 "
[1]Prince & Kinkel Iron Wks., New York..	16,637	4 "
Stacy B. Opdyke, Jr., Philadelphia, Pa..	12,235	4 "
Ryan & McFerran, 106 E. 23d St., N. Y.	14,949	4 "
W. G. Triest, 39 Cortlandt St., N. Y.....	12,237	3 "
Kelley & Kelley, 220 Broadway, N. Y...	12,296	4 "
J. B. & J. M. Cornell, 143 Centre St., N.Y.	14,735	90 days.

LESTERSHIRE, N. Y.—This village, Nov. 29, voted to erect a new fire station and municipal building, to cost $24,000. M. S. Squires, Village Pres., informs us that architects are now submitting plans, but that no plan will probably be accepted before Dec. 10.

PORT CHESTER, N. Y.—It is reported that the board of education is arranging to submit to the voters at an early date a proposition to issue bonds for erecting a new high school building.

ROCHESTER, N. Y.—A fire in this city, Dec. 2, destroyed the Academy of Music; estimated loss, $80,000.

Each building will be about 80 ft. long, and the total cost about $35,000; work to be completed within 60 days.

LINCOLN, NEB.—A fire, Dec. 1, destroyed the main building of the Lincoln Normal University, a 4-story brick and stone structure, three miles from here. Reported loss, $100,000; insurance, $25,000.

THERESA, WIS.—John J. Fayel, late Supt. of the Holy Terror Mining Co., in his will gives $75,000 for a public library at this place, according to reports.

ST. LOUIS, MO.—The Second Presbyterian Church will erect a new structure, to cost $100,000, on Taylor Ave.——Isaac S. Taytor is preparing plans for a 7-story building, at Washington Ave. and 10th St., to cost $150,000.

SANTA BARBARA, CAL.—The citizens will vote Dec. 17 on the question of issuing $50,000 in school bonds.

DENVER, COLO.—The Walter Orpheum Co., of San Francisco, Cal., has been awarded the contract for erecting the new 5-story theatre building, at Arapahoe and 15th Sts. It will probably cost about $250,000.

ALBANY, ORE.—Bids are asked until Jan. 6 for labor and materials required in remodeling and improving a brick courthouse for Linn county, Albany. Frank Crabtree, County Clk.

SAN FRANCISCO, CAL.—The following bids were received at the Bureau of Yards and Docks, Navy Dept., Washington, for the construction of a shelter roof for boats at the Mare Island Navy Yard:

Ralston Iron Works, San Francisco	$13,490
Miller & Beck, San Francisco	13,939
Anderson & Grieg, San Francisco..............	11,825
James A. McMahon, San Francisco	13,250
Thomas Thompson, San Francisco	13,527
J. S. Van Winkle & Co., San Francisco	13,999
California Br. & Construction Co., Oakland, Cal.	14,790
Wm. P. Healy, San Francisco	11,997
New York Dredging Co., New York, N. Y.	12,142
Penn Bridge Co., Beaver Falls, Pa.	14,189

Also the following bids for the construction of a saw-mill, boiler house and steel chimney at the same yard were received: Z. O. Field, San Francisco, $70,655; Penn Bridge Co., Beaver Falls, Pa., $71,764; New York Dredging Co., New York, $65,942; Wm. H. Healy, 97 Stewart St., San Francisco, $59,997; J. H. McKay, San Francisco, $72,308, $2,100 deducted by telegram; Anderson & Greig, 48 New Montgomery St., San Francisco, $68,625; F. A. Williams, San Francisco, $68,918; California Bridge & Construction Co., Oakland, Cal., $55,939; James A. McMahon, San Francisco, $66,450; W. H. Wickersham, San Francisco, $68,900.

TORONTO, ONT.—Bids are asked until Dec. 8 for the office fittings for the new city buildings. E. J. Lennox, Arch., King and Yonge Sts.; John Shaw (Mayor), Chn. Bd. Control.

WATER-WORKS.

AMESBURY, MASS.—E. R. Sibley, Treas. Power Hill Water Co., writes us that plans for a new reservoir involve the relocation of a portion of one of the streets, the company, therefore, will have to wait until the annual town meeting in March before arrangements can be completed.

HOLYOKE, MASS.—The commissioners have instructed Jas. L. Tighe, Engr. Water-Works, to prepare plans for a sand bed filtration plant for purifying the water of the Whiting St. reservoir. This reservoir has a capacity of 450,000,000 gallons. The greater part of the material, such as sand, gravel and stone, is in the immediate vicinity. Work will probably be begun in the early spring. Estimated cost, $25,000.

SPENCER, MASS.—The question of building a standpipe at a cost of $5,000 is being considered.

WATERTOWN, CONN.—B. H. Mattoon, Dir., writes us that the Watertown Water Co. was organized Nov. 26. It is probable that arrangements to let contracts will be completed to begin the construction in the spring. Population, 3,000. C. B. Mattoon, Pres.; E. W. Wheeler, Secy.

CLAYTON, N. Y.—An election was held Dec. 6 to vote again on the question of building works and a sewerage system. Plans for works were prepared in 1896 by Hinds & Bond, of Watertown, N. Y.; estimated cost, $50,000. Population (1890), 1,748. F. L. Hall, Pres. Village.

DUNKIRK, N. Y.—Bids are asked until Dec. 20 for furnishing and installing a pump of about 6,000,000 gallons capacity daily, as described in our advertising columns. Chas. E. Hequembourg, Comr.; Lucius Thompson, Supt.

LESTERSHIRE, N. Y.—This place voted Nov. 29 to issue $14,000 in bonds for a new pumping station; $24,000 for a city hall, etc. Bids for making these improvements will be asked in a short time. M. S. Squires, Village Pres.

---

[1] 553 West 33d St.

NORTH TARRYTOWN, N. Y.—The Pocantico Waterworks Co. has been incorporated with a capital stock of $250,000, by Ralph Olmsted Ives, Henry R. Winthrop, Henry F. Miller and others, of New York. This is a reorganization of the old company, which has supplied this place with water since 1888.

STRYKERSVILLE, N. Y.—The Crystal Springs Water Co., of Buffalo, has been incorporated, with a capital stock of $5,000, by Dr. Frank P. Vandenbergh, Erie County Bank Bldg., Buffalo, N. Y., and others.

CHESTERTOWN, MD.—The commissioners are again considering the question of purchasing the works of the Chestertown Water Co., for $23,000.

CONNEAUTVILLE, PA.—An election will be held in February to vote on the question of issuing $10,000 in bonds for granting a franchise for works.

NORFOLK, VA.—J. Thomas Peelle, Registrar, writes us that the contract for a Jewell gravity filtration plant has been let to the New York Filter Mfg. Co., 26 Cortlandt St., New York, at $55,000, exclusive of building. The plant will have a capacity of 60,000,000 gallons a day.

SMITHFIELD, VA.—The Citizens' Electric Light & Water Co. has been incorporated, with a capital stock of $20,000, to build works and a plant at once. J. W. Holloway is interested.

PARKERSBURG, W. VA.—It is proposed to purchase 13,500 ft. of 4 and 6-in. water-pipe for the outer portion of the city. The cost, with laying, will be about $8,000.

GAFFNEY, S. C.—Bids are asked until Jan. 3 for the purchase of $18,000 of 40-year bonds, with privilege of redemption in 20 years. A. N. Wood writes us that the water supply will be taken from wells. At present no further information can be given. Population, 5,000. Frederick Minshall, Engr., Pocomoke, Md., and 150 Nassau St., New York.

BRUNSWICK, GA.—The works and light plant of the Brunswick Light & Water Co. will be extended, the contracts for furnishing the additional machinery having been let. W. F. Greene, Civil Engr. and Receiver.

MONTGOMERY, ALA.—Geo. A. Ellis, Consult. Engr., Springfield, Mass., writes us that the city has nearly completed about nine miles of extension on its distribution system; is proposing to add about four miles of large force main for the reinforcement of its present system; to add 12 new artesian wells with conduit lines to the present basins, which are to be covered; to replace the present pumping plant with two new 5,000,000-gallon pumps, together with almost entire reconstruction of its pumping station; the whole work is expected to cost about $175,000. Except the work on the extensions, which was contracted for last July, none of this work is yet under contract. J. W. Persons, Cy. Engr.; Fred Crosby, Supt.

COLUMBUS, MISS.—This city is reported to have voted Nov. 29 to issue $70,000 in bonds for improving the works and for building a sewerage system.

ALLIANCE, O.—Bids will soon be asked for the purchase of $80,000 of water bonds. Joe. McConnell, Cy. Clk.; O. W. Pfouts, Cy. Engr.

CLEVELAND, O.—The following bids were received by the board of control Nov. 25 for furnishing a new portable boiler and a pulsometer pump and carriage for the Division St. pumping station: Wm. Pattison Supply Co., $1,237; Erie City Iron Works, $775; River Machine & Boiler Co., $1,025; Kaltenback & Dress Co., $1,200. Bids were also opened for repairing and rebuilding No. 4 Worthington pumping engine at the Division St. station: Henry R. Worthington, $10,000, and the Snider-Hughes Co., $16,800. The bids on the latter work were about $10,000 lower than expected.

WILLIAMSPORT, IND.—The Williamsport Water & Light Co. has been incorporated, with a capital stock of $10,000, by John H. Brown, B. O. Mayer and Geo. Mayer.

BELLEVILLE, ILL.—We are informed that the Belleville Deep Well Water Co. is laying a few miles of small water pipe. The materials have been purchased for the extensions.

BOWEN, ILL.—W. C. McClure, Clk., writes us that this place voted a few months ago against building works. The only thing wanted is some hose for the hand engine. Population, 1,000.

WEST SUPERIOR, WIS.—W. H. Winslow, Secy. Superior Water, Light & Power Co., writes us that the company is carrying on several experiments in filtration, and has had Allen Hazen, 220 Broadway, New York, here to look over the ground for the purpose of making a report and recommendations.

ALLISON, IA.—A committee has been appointed to investigate the question of building works.

DUBUQUE, IA.—The Dubuque Water-Works Co. is enlarging its works by the addition of another artesian well, which is to be about 1,500 ft. in depth, and 10 ins. in diameter at the bottom. The contract has been let to L. Wilson, 53 Dearborn St., Chicago, Ill., who has already begun work on it.——Alderman P. W. Crawford writes us that no steps have yet been taken toward securing municipal works, except to serve notice on the company that after the expiration of six months from date of notice the city will proceed to purchase the works, and calling on the company to propose terms. The time expires in February.

LITTLE FALLS, MINN.—Bids are asked until Dec. 16 for the purchase of $60,000 of 5% bonds for the proposed works and electric light plant, plans and specifications for which will be prepared at once. F. E. Hall, Cy. Clk.

WAMEGO, KAN.—We are informed that the following bids were received Nov. 30 for the construction of waterworks, including 15,900 ft. of 4-in. mains, 6,168 ft. of 6-in. mains and 864 ft. of 8-in. mains; stand-pipe, 12 × 80 ft.; tubular well system; one compound duplex million-gallon pump; one simple duplex million-gallon pump; power house; stack; two 60-HP. boilers, etc.:

		Expense outside of contract
Fairbanks, Morse & Co., Kansas City, Mo.*	$23,968	....
Moses & Heaton, Junction City, Kan.	26,010	$1,710
Cauldwell & Turner, Clyde, Kan.	25,117	1,710
W. W. Cook, Junction City, Kan.	23,925	1,710

---

*Irregular bid; bond issue, $25,000; all bids rejected; engineer's estimate, $26,200. H. V. Hinckley, Engr., P. O. Box 242, Topeka, Kan.; F. S. Haacke, Cy. Clk.

ENID, OKLA.—The question of building works is being considered. Jos. Meibergen, Mayor; R. Millard and H. C. Henry, are on the committee.

LINCOLN, NEB.—Ferdinand Bonstedt, Cy. Engr., writes us that the council was considering the question of replacing in the heart of the city several larger mains. Nothing will be done at present, the question having been indefinitely postponed.

McKINNEY, TEX.—J. M. Pierson, Mayor, writes us that the contract for building the works, complete, was let Nov. 30 to Kelley & Steele, Georgetown and Gainesville, Tex., at $26,235. The following are the other bids for the work, complete: C. W. Olcott, Dallas, Tex., $26,899, and P. J. German, Dallas, $26,544. There were other bids for portions of the work.

BONHAM, TEX.—The council has voted to spend $5,000 for extending the works, according to reports.

DENVER, COLO.—The aldermen have passed Supervisor Drake's resolution authorizing an election in April to vote on the question of municipal works.

FLORENCE, COLO.—Mitchell Bros., Denver, Colo., are reported to have submitted the lowest bids Nov. 28 for constructing works, at $120,000. The highest bidders were Holme & Allen, Denver, at $172,000. Hiram Philips, Engr., Oriel Bldg., St. Louis, Mo.; P. T. McGuire, Mayor.

ALBUQUERQUE, N. MEX.—Bids are asked by E. A. Allen, Supt., U. S. Indian Service, Albuquerque, for furnishing a pump, tower, building, etc.

KETTLE FALLS, WASH.—An election will be held Dec. 28 to issue bonds for completing the works.

ELGIN, ORE.—Press reports state that this place has let contracts for building works and an electric light plant, to cost $12,000.

INDEPENDENCE, ORE.—The committee has been directed to purchase the works and electric plant owned by L. E. Gilmore.

SACRAMENTO, CAL.—The question of securing an increased water supply from the north fork of the American River at Auburn, is being considered. Estimated cost, $400,000. Mayor Land, Trustee McKay and City Surveyor Mulleney may be addressed.

SAN PEDRO, CAL.—The Chamber of Commerce has asked the town trustees to call an election to vote on the question of issuing $40,000 in bonds for works and a light plant.

HINTONBURG, ONT.—The council has adopted plans, estimates, etc., for works, to cost about $55,000. Chas. H. Keefer, Engr., The Rockliffe, Ottawa, Ont.; Reeve McLean and Councilman Merrill may be addressed.

INGERSOLL, ONT.—The council is reported to have appointed a committee to negotiate for the purchase of the works and electric light plant, owned by the Ingersoll Water-Works Co.

WATERLOO, ONT.—This place voted Nov. 21 against issuing $50,000 in bonds for the purchase of the works owned by Moffett, Hodgkins & Clarke, Syracuse, N. Y.

OSHAWA, ONT.—F. L. Fowke, Mayor, writes us that a by-law to issue $110,000 in bonds for works and a sewerage system will be voted upon about Jan. 20. The supply of water from a spring, eight miles distant, will be furnished by gravitation. Population, 4,300. John Galt, Des. Engr., Canada Life Bldg., Toronto, Ont.

IRRIGATION.

MONROE, LA.—J. C. Terry and L. P. Alexander contemplate the introduction of irrigation into Ouachita county.

BOZEMAN, MONT.—The West Gallatin Canal Co. has awarded a contract to Dean & Marlor for the construction of about 10 miles of irrigation canal.

HELENA, MONT.—A. Wormser, of Sweet Grass county, has been awarded the contract for the construction of two canals, one about 45 miles long, the other about 18 miles long to irrigate 52,600 acres of land at $12.50 an acre.

DENVER, COLO.—A plan is under consideration for the location of a reservoir on the south branch of the South Platte River, about 20 miles from Buffalo, Colo., to irrigate about 50,000 acres. John E. Field, State Engr., Denver, may be addressed.

CHEYENNE, WYO.—Ex-Senator Carey, Pres. Wyoming Developing Co., states that the company is arranging to build a reservoir to cost about $100,000, on the Laramie Plains, which will be used as a reserve water supply for the company's Wheatland colony lands. It is said that it will require the construction of 1,700 cu. yds. of masonry and concrete work, 100,000 yds. of rip-rap, 20,000 yds. of excavation and the placing of considerable piling.

FALL BROOK, CAL.—Reports state that the receiver of the Red Mountain ranch is preparing to construct dams and tunnels, to increase the water supply for irrigation, next season, to cost about $12,000.

SALINAS, CAL.—The Spreckels Sugar Co. has awarded a contract to W. W. Montague, San Francisco, for furnishing and constructing about 21,000 ft. of iron pipe line from 28 to 32 ins., for an irrigation system to cost about $150,000.

FILLMORE, UTAH.—Reports state that the state has awarded a contract to the Lake Bonneville Co. for the irrigation of about 217,000 acres. Work will probably not begin until about May 1.

KAMLOOPS, B. C.—The Thompson Valley Power Co. proposes to construct a dam, 450 ft. long and 25 ft. high, on Jamieson Creek, and a ditch 16 miles long and 4 ft. wide, from Jamieson Creek to Rogers Meadows, for irrigation, according to reports.

NEW COMPANIES.—Jennings Irrigation Co., Ltd., Crowley, La.; D. E. Sweet, Pres.; W. H. Simmons, Vice-Pres.; I. N. Pardee, Secy.; C. L. Pardee, Treas.; U. S. Phillips and P. B. Jones.

Cibola Canal Co., Yuma county, Arizona; to build a canal to irrigate 20,000 acres of land; C. O. McCarroll, M. Morris and E. G. Morris.

The Pine Ridge Ditch Co., Denver, Colo.; $1,600; to operate in La Plata county; Owen F. Boyle, S. W. McGuire, Joseph Coppinger.

SEWERAGE.

SOUTHBRIDGE, MASS.—M. S. Heath, of the committee, writes us that the town has appropriated the money for the proposed sewers. Nothing further has been done.

BUFFALO, N. Y.—The following bids were received by the Commissioners of public works Dec. 1, for constructing the proposed sewer in Van Rensselaer and Ainslie Sts.: Thomas F. Moore, $96,872; Brown, Stabell & Griffiths, $109,920; Henry Harter, $85,978; W. G. Smith, $96,898; Christopher Smith, $134,334; William Franklin, $101,614; Andrew Beaser, $74,974; John Harrer, $79,700; Ritzmann & Miller, $115,522; John Mumm, $93,657; George Dark and Thomas Dark, $120,500.

CLAYTON, N. Y.—The question of building a system and water-works was voted upon Dec. 6; estimated cost, $50,000. F. L. Hall, Pres., writes us that it will probably carry by a large majority.

NIAGARA FALLS, N. Y.—The board of public works has been petitioned to build certain sewers at a cost of about $42,000.

ROCHESTER, N. Y.—William Fuller has been awarded the contract for constructing 2,770 ft. of sewer on North St., at $10,555, and Thomas Holahan the contract for 1,110 ft. of sewer on Pearl and Meigs Sts., at $3,790.

STAPLETON (S. I.), N. Y.—The Richmond Borough Board has recommended to the New York city board of public improvements that $280,000 in bonds be issued for new sewers for that borough. H. P. Morrison, Deputy Comr. of Sewers, Richmond.

TUCKAHOE, N. Y.—The question of building sewers in this place is being considered.

WILKINSBURG, PA.—Bids are asked until 3 p. m., Dec. 8, for laying 1,200 ft. of 20 and 8-in. pipe sewers, and 4,600 sq. ft. of flagstone sidewalk. Frease & Spealing, Borough Engrs.

YORK, PA.—It is probable that councils will reject the proposition of the York Sewerage Co. to build a system, and will submit to the voters the question of issuing $250,000 in bonds for a municipal system.

CHESAPEAKE BEACH, MD.—George C. Morgan, 808 Royal Insurance Bldg., Chicago, is preparing plans and specifications for a system, water-works, etc., at this place, for the Chesapeake Beach Ry. Co. Otto Mears, Pres., Washington, D. C.

COLUMBUS, MISS.—This place voted Nov. 29 to issue $70,000 in bonds for a system and for new water-works.

CHATTANOOGA, TENN.—The city has been asked by the board of trustees of the Erlanger Hospital to build a sewer for the hospital, at a cost of $1,500.

LOUISVILLE, KY.—The board of public works has decided to build a new sewer in 34th St., to cost about $200,000. Bids will probably soon be asked.

ALLIANCE, O.—O. W. Pfouts, Cy. Engr., is preparing plans for sewers in Ward No. 6. Jos. McConnell, Cy. Clk.

EAST CLEVELAND, O.—Bids are asked until Dec. 30 for constructing sewers in a number of streets. Walter P. Rice Engineering Co., Engrs., Society for Savings Bldg., Cleveland; H. B. Chapman, Clk.

HAMILTON, O.—The following submitted bids Nov. 25 for constructing sewers in 3d and 2d Sts., to cost about $7,000: S. E. Irwin, W. H. Louthan, of Hamilton; Sam Van Zant, Meder and Louis Drach, Cincinnati; Railing & Cronin, Richmond, Ind.; Monger & Son, Dayton, O.

HAMILTON, O.—Bids are asked until Jan. 2 for constructing a storm sewer in 3d St., and also for the purchase of $8,200 in 4% bonds. L. A. Dillon, Cy. Engr.; M. O. Burns, Cy. Clk.

TOLEDO, O.—Plans for the construction of a sewer in the 31st district have been completed. Bids will probably soon be asked.

ELKHART, IND.—We are informed that D. F. Cordrey, Cy. Engr., has been directed to prepare plans for five miles of 24 to 12-in. pipe sewers. About $50,000 worth of brick paving will also be laid.

SOUTH BEND, IND.—Bids are asked until Dec. 26 for constructing pipe sewers in two streets. L. A. Hull, Cy. Clk.

DETROIT, MICH.—Bids are asked until Dec. 9 for furnishing labor and material, except cement and manhole covers, and building the vitrified pipe sewers in certain alleys, etc., D. W. H. Moreland, Pres. Bd. Pub. Wks.

MARSHALL, MICH.—H. E. Riggs, The Nasby, Toledo, O., has completed plans for a system for this place. Emil C. Sanchy, Cy. Recdr., informs us that nothing will be done until next year.

EAST ST. LOUIS, ILL.—Bids are asked until 12 o'clock noon, Dec. 9, for about 6,000 ft. of 24 to 6-in. pipe sewers, 25,000 brick in catchbasins and manholes, etc. M. M. Stephens, Mayor.

ST. PETER, MINN.—M. B. Haynes, Mankato, Minn., is preparing plans for a system for this place, to cost about $8,000. H. N. Benson, Cy. Clk.

MASON CITY, IA.—We are informed that the following bids were received Dec. 2 for constructing a main sewer: J. H. Killmer, Des Moines, Ia. (accepted), $23,900, sub drain, 68 cts. a foot; J. W. Gardiner, Mason City, Ia., $25,797, sub drain, $1.00; E. T. Webster, Dubuque, Ia., $29,200, sub drain, 75 cts., and O'Neil & Sons, Fairbault, Minn., $26,350, sub drain, 65 cts.

SIOUX CITY, IA.—It is proposed to lay about 2¼ miles of 8-in. pipe sewer from the manufacturing plants to the Missouri River, at a cost of $5,000.

ST. JOSEPH, MO.—The contracts with Gibson & Dunn for sewer work in two districts have been annulled, and the council, it is stated by local papers, will soon ask for new bids. Aldermen Hall and Finch may be addressed.

ST. LOUIS, MO.—B. H. Colby, Sewer Comr., has prepared plans for a brick sewer for North St. Louis. Local papers state that it will be over a mile long. The inside dimensions will be 24×18 ft. The side walls will be 6 ft. thick and the arch 2½ ft. The base will be 3 ft. thick, built of Portland cement and concrete brick. It will drain seven square miles of territory.

LONG BEACH, CAL.—Plans for a system, it is stated, are about completed; estimated cost, $25,000. Mayor Johnson may be addressed.

OAKLAND, CAL.—It is proposed to build sewers in that portion of the city known as Temescal.

OSHAWA, ONT.—F. L. Fowke, Mayor, writes us that this city will vote about Jan. 20 on the question of issuing $110,000 in bonds for a system and water-works. Population, 4,300. Plans and specifications were prepared by John Galt, Canada Life Bldg., Toronto, Ont.

VANCOUVER, B. C.—Alderman R. A. McMorvan writes us that Keene & Mowat, of Vancouver, have been awarded the contract for guilding 1,300 ft. of 10-in., and 9,590 ft. of 8-in. pipe sewers; 17 manholes, 5 flushtanks, and 21 lampholes, at $7,597. Col. Thos. A. Tracy, Cy. Engr.

MERIDA, YUCATAN, MEX.—Press reports state as follows: The municipality will be able to set aside annually about $260,000 to meet the cost of the proposed drainage of the city, which is estimated at about $2,500,000. It has not yet been decided whether the proposition of Charles Vezin, contractor for the Mexican sewers, or that of Preston & Son, will be accepted.

GARBAGE DISPOSAL—STREET CLEANING

NEW BEDFORD, MASS.—The garbage disposal plant owned by Edgar H. Gammons was destroyed by fire Dec. 2, causing a reported loss of about $30,000.

PHILADELPHIA, PA.—Local papers state that the following bids were received by the director of public works Dec. 5 for the cleaning of city streets and removal of garbage and snow during the ensuing year: Street cleaning—R. J. & David Peoples, 1st district, $91,000; 2d district, $148,880; 3d district, $52,000; 4th district, $138,400; 5th district, $88,000; 6th district, $28,000. Oliver Wilson, 1st district, $87,297; 2d district, $163,999. Daniel Dooley, 1st district, $87,700; 2d district, $160,000; 3d district, $43,900. Michael F. Gallagher, 6th district, $19,990. Richard P. Bemmis, 6th district, $21,800. R. W. Ellicott, 1st district, $84,777; 2d district, $159,899. Thos. Parker, 1st district, $90,000; 2d district, $149,900; 3d district, $53,000; 4th district, $139,444; 5th district, $84,900; 6th district, $26,000. Robt. Higgins, 3d district, $47,400. Jas. Curran, 4th district, $139,970; Geo. W. Ruch, 1st district, $85,339; 2d district, $147,225; 3d district, $134,980; 5th district, $83,864; 6th district, $21,700. He also put in a bid for removing ashes and cleaning the streets in the city for $519,000. Daniel McMahon, 1st district, $83,950; 2d district, $147,750; 3d district, $43,950; 4th district, $134,750; 5th district, $84,993; 6th district, $23,000. Edwin H. Vare, 1st district, $83,700; 2d district, $144,898; 3d district, $47,000; 4th district, $159,000; 5th district, $94,987; 6th district, $30,000. John Loughlin, 2d district, $148,944; 4th district, $138,690. Removal of garbage—Thos. Parker, 1st, 2d and 3d districts, $225,000. W. McClintock, 4th district, $139,000; 5th district, $129,000. American Product Co., entire city, $358,000. Removal of snow from central part of the city—R. J. & David Peoples, 90 cts. for single loads and $1.30 for double loads. D. J. McMeehall, 95 cts. a single load; $1.30 a double load.

RICHMOND, VA.—The council proposes to purchase several new street sweeping machines, etc. Julius Hobson, Chn. Com.

YOUNGSTOWN, O.—The board of health and the committee of the council are considering plans for the collection and disposal of the garbage of this city.

ST. PAUL, MINN.—The following bids were received by the assembly Dec. 1 for collecting and removing garbage and dead animals from the streets for the coming year; the bids for this year are also given for comparison:

	1899.	1898.
District 1—R. Langan	$749	$900
District 2—W. H. Burns	845	900
District 3—R. Langan	1,000	1,200
District 4—R. Langan	1,449	2,000
District 5—P. O'Donnell	1,320	1,285
District 6—F. Peters	820	850
District 7—R. Langan	1,698	2,341
District 8—W. J. Preston	1,690	1,329
District 9—Peterson & Anderson	1,212	1,212
District 10—R. Langan	480	740
District 11—R. Langan	480	699

LITTLE ROCK, ARK.—The question of constructing a garbage disposal plant is under consideration, according to reports.

HAVANA, CUBA.—President McKinley has authorized, from available funds, the expenditure of $50,000 for cleaning the streets, etc., of the city, so as to make it as healthful as possible for the residence of soldiers and citizens. Marquis Esteban, Mayor of Havana, and General Greene, U. S. A., may be addressed.

STREETS AND ROADS

ORLEANS, MASS.—The town voted Nov. 21 to appropriate $20,000 for the purchase of a stone crusher and the improvement of roads.

BUFFALO, N. Y.—Bids are asked until Dec. 13 for paving Park View Ave., between Winchester Ave. and Duerstein St. R. G. Parsons, Secy. Bd. Pub. Wks.

NEWARK, N. J.—The Essex County Park Commissioners are considering a proposition to construct a boulevard along the east bank of the Passaic River, from Woodside to the Passaic county line, according to reports.

ROCHESTER, N. Y.—The board of county supervisors has passed a resolution to improve East Ave. and Little Ridge Road, at an estimated cost of $42,000. Chairman Wellington may be addressed.

TROY, N. Y.—Reports state that plans and estimates for the macadamizing of the Hoosick Road, to cost about $20,000, will soon be submitted by the state engineer to the county supervisors.

YONKERS, N. Y.—Bids are asked by the council until Feb. 27 for the grading of Riverdale Ave., from Culver St. to the city line, according to reports.

ATLANTIC CITY, N. J.—The council has decided to ask bids for paving several cross streets with macadam. It has been decided to submit a proposition to the Pennsylvania R. R. Co. to pave Atlantic Ave., between Massachusetts and Florida Aves., with brick, the city to pay 60% of the original cost and the railroad company to pay the balance and keep the avenue in repair.

LOCK HAVEN, PA.—Reports state the county commissioners propose to construct a road about 20 miles long, to cost about $8,000 per mile.

MEADVILLE, PA.—Bids are asked until Dec. 15 for about 3,320 lin. ft. of curbing, 6 × 22 ins., including corners; 3,120 sq. yds. of brick paving on concrete foundation, including grading, and 300 ft. of sewer, etc., as described in our advertising columns. W. A. Doane, Cy. Engr.; D. F. McKay, Jr., Cy. Clk.

PITTSBURG, PA.—Bids are asked until Dec. 15 for grading, paving and curbing on Shakespeare St., and grading portions of Calvary, Graphic and Harlem Sts. E. M. Bigelow, Dir. Dept. Pub. Wks.

BALTIMORE, MD.—Reports state that the county commissioners will purchase a stone crusher to be used at Kingsville, Md.

JACKSONVILLE, FLA.—Bids are asked until Dec. 22 for grading an area of about 20,350 sq. yds., and furnishing and constructing about 15,454 lin. ft. of stone curbing and 21,000 sq. yds. of brick paving on Main St., as stated in our advertising columns. Philip Prioleau, Cy. Engr.

GEORGETOWN, KY.—Bids are asked until Dec. 29 for the purchase of $46,000 of turnpike bonds, according to reports. J. J. Yates, County Judge.

ALLIANCE, O.—This city is considering the question of paving Union Ave. with asphalt and South, West and Freedom Sts. with brick. J. McConnell, Cy. Clk.

LIMA, O.—Bids are asked until Dec. 19 for the purchase of $40,000 of 5% paving bonds. C. E. Lynch, Cy. Clk.

SANDUSKY, O.—A. W. Miller, Cy. Clk., informs us that nothing has been done as yet toward paving Campbell St. J. C. Brewer, Engr., Sandusky.

ELKHART, IND.—We are informed that the resolution to pave 40,000 sq. yds. with brick, at an estimated cost of $50,600 has been favored unanimously by the council. Payment will be made under Barrett law. Property owners will have choice of cash 30 days after acceptance or 10-year bonds at 6% interest. D. F. Cordrey, Engr.

VALPARAISO, IND.—Bids are asked until Jan. 7 for constructing the Valparaiso-Chesterton gravel road. Jas. S. Fulton, County Comr.; M. J. Stinchfield, Audr.

ST. LOUIS, MO.—The board of public improvements will hold a meeting Dec. 20, to consider the question of improving about 36 streets. Robt. E. McMath, Pres.; Emory S. Foster, Secy.

SAN DIEGO, CAL.—City Engineer Capps has reported to the council that 7,340 cu. yds. of excavation and 6,600 cu. yds. of fill is necessary for the grading of B St., between 21st and 25th Sts.

SAN PEDRO, CAL.—The chamber of commerce has asked the board of trustees to call an election to vote on the question of issuing $20,000 in bonds for street and sewer work.

MONTREAL, QUE.—The roads committee received estimates Nov. 29 from City Surveyor St. George, for work for the coming year, including $249,649 for macadamizing, $5,000 for pavement repairs and $75,332 for wooden sidewalks.

QUEBEC, QUE.—The road committee has resolved to ask the committee on amendments for authority to issue $250,000 in bonds for street paving and other improvements. The mayor has suggested paving with asphalt, portions of Grande Allee, St. John, Desfosses, St. Peter, St. Andrew, St. Paul and Crown Sts., and repairs for Mountain Hill.

AMHERSTBURG, ONT.—The council proposes to pave several streets at a cost of about $5,000, according to reports. J. H. C. Leggatt, Town Clk.

MANUFACTURING PLANTS.

GREAT WORKS, ME.—Merrill & Hartwell, of Oldtown, are reported to have been awarded the contract for the erection of an addition to the Penobscot Chemical Fibre Co.'s mill at this place.

OLDTOWN, ME.—Reports state that the Ounegan Woolen Mill Co. will erect a new woolen mill at this place. Lockwood, Green & Co., Archs., Boston, Mass.

FALL RIVER, MASS.—Chauncy H. Sears, of this city, has been awarded the contract for the erection of a hat factory building for Marshall Bros.

ALBANY, N. Y.—The shirt factory of Wallerstein & Co., at Broadway and North Ferry St., was damaged by fire Dec. 2; loss, about $61,000.

CANAJOHARIE, N. Y.—A fire here Dec. 1 destroyed the plant of the Pettit Candy Mfg. Co.; reported loss, about $35,000.

DURHAMVILLE, N. Y.—Reports state that a new glass factory will be erected at this place.

JOHNSTOWN, N. Y.—Styer & Behlen contemplate the erection of a 4-story addition to their mill on West State St.

NEW YORK, N. Y.—The 7-story brick building, 44 to 48 West 3d St., occupied by Heil & Fox, hat manufacturers, and others, was destroyed by fire Dec. 1; loss, about $175,000.

NEW YORK, N. Y.—It is reported that a 1-000-ton ice plant will be erected on 133d St., near Alexander Ave. Jacob Ruppert is said to be interested.

NIAGARA FALLS, N. Y.—The Union Carbide Co., of this place, will, according to reports, erect an addition to its plant, 500 × 100 ft.

NEWARK, N. J.—Reports state that the Otis Elevator Co., 38 Park Row, New York, will erect a factory in this city. James B. Dill, East Orange, N. J., is interested.

ATHENS, PA.—Fire here destroyed the Athens Car & Coach Works; loss, $12,000. C. F. Daly, Proprietor.

BLOOMSBURG, PA.—A fire Dec. 2 destroyed the Bloomsburg Novelty Works. Reported loss, $50,000; insurance, $25,000. It will probably be rebuilt.

BRIDGEWATER, PA.—Reports state that a new steel billet plant will be located here.

CANONSBURG, PA.—It is reported that the Canonsburg Iron & Steel Co. has awarded the contract for the erection of additional buildings to its plant to the Riter & Conley Mfg. Co., of Pittsburg, Pa.; also a contract for the erection of a keg factory to Schaff & Co., of Pittsburg.

GROVE CITY, PA.—Reports state that George Anderson, Greenville, Pa., will erect a spoke, rim and handle factory at this place.

KANE, PA.—The McCloy Glass Co., of this place, according to reports, will increase its capital stock from $125,000 to $250,000, in order to enlarge its plant.

MILTON, PA.—The nail plant of the F. A. Godcharles Co. was destroyed by fire Dec. 3. Estimated loss, $80,000; insurance, $25,000.

PHILADELPHIA, PA.—Bids are being received, according to reports, for a new 5-story factory building for Feis & Co., to replace the one recently burned on Tinicum Island Road. Hales & Ballinger, 102 South 12th St.

READING, PA.—The Reading Iron Co., according to reports, will erect two buildings for its rolling mill plant at this place.

SEWICKLEY, PA.—Reports state that the Berwind-White Co. will establish an extensive coal plant here.

SHARON, PA.—Reports state that the Aschman Steel Castings Co. will soon award contracts for erecting a 10-ton furnace, two electric traveling cranes, one gas producer, two annealing ovens, and a 100-HP. boiler.

BALTIMORE, MD.—The National Brewing Co. expects to erect a storage house, 57 × 65 ft., a warehouse, 35 × 65 ft., cooperage and additional underground cellars, two 200-HP. boilers, 35-ton ice machines, artesian well, and five iron water tanks, to cost about $100,000. Otto C. Wolf, Arch., 1345 Arch St., Philadelphia, Pa.

BALTIMORE, MD.—Reports state that Henry Ripple has been awarded the contract for erecting a new factory building for the Carr-Lowrey Glass Co., at Westport. J. C. Scott, Arch., Baltimore.

SALEM, VA.—The Salem Fertilizer Co. has been granted a permit to erect a plant here for the manufacture of bone meal and fertilizer.

WESTON, W. VA.—The West Virginia & Pittsburg R. R. Co. has awarded the contract for the erection of four new shops to McBride, Arnold & Co., at $17,732.

ROCKMART, GA.—The New York Mills Co., of New York Mills, N. Y., contemplates the erection of a plant at this place, the main building of which will be 275 × 128 ft.; reported cost, about $400,000. S. R. Campbell, Treas.

PADUCAH, KY.—J. R. Bennett, Wm. Roch, and L. W. Johnson, of St. Louis, Mo., will erect a brewery, having a capacity of 40,000 bbls. a year. Reported cost, $100,000.

IRONTON, O.—William Banfield, of Wallace, Banfield & Co., it is reported, will soon erect a sheet mill.——The Kelly Nail & Iron Co. will spend about $40,000 on improvements to its plants.

WEST BAY CITY, MICH.—A fire here Nov. 28 destroyed the hardwood factory of W. D. Young & Co. Loss, $100,000; insurance, $75,350. It will probably be rebuilt.

ESSEXVILLE, MICH.—It is reported that a new sugar factory will be erected here. Worthy L. Churchill, Alpena, Mich.; E. N. Salling, Manistee, Mich.; Thos. Pitts, Detroit, Mich., and others are interested.

HOUGHTON, MICH.—A fire in this city Nov. 28 destroyed the Franklin Stamp Mill. Loss, about $50,000; insurance, $30,000.

MONROE, MICH.—It is reported that a 3-story beet sugar factory, 150 × 40 ft., will be erected here. Col. Francis, of Chicago, Ill., is said to be interested.

JOLIET, ILL.—A fire Nov. 27 destroyed the Lakeside mill, owned by David Oliver, of Chicago. Reported loss, $40,000; insurance, $23,500.

JANESVILLE, WIS.—Mayor Thoroughgood, of this place, has asked for a loan of $20,000, so as to permit the Janesville Furniture Co. to increase the capacity of its plant.

MILWAUKEE, WIS.—The Schitz Brewing Co. is said to contemplate the erection of a $70,000 building. Kirchhoff & Rose, Archs., 201 Grand Ave.

QUINNESEC, WIS.—The Kimberley & Clark Co. contemplates the erection of a paper and a ground wood mill at this place.

PRICE, UTAH.—The Tait Milling Co. contemplates the erection of a flouring mill at this place. S. K. Strausmider, Business Mgr., Chickasha, Ind. Ter.

SHANGHAI, CHINA.—T. C. Yen, representing a Chinese syndicate, reports that the erection of a 500-bbl. flour mill in this city is projected.

GAS PLANTS.

BUFFALO, N. Y.—Wm. H. Pearson, Jr., Vice-Pres. Economical Gas Apparatus Co., Toronto, Ont., has been engaged by the commissioners of public works to prepare plans for the proposed municipal gas plant.

PHILADELPHIA, PA.—A contract has been awarded to Chas. E. Day, Camden, N. J., for the erection of a storehouse, 50 × 80 ft., of galvanized iron, for the Pittsburg & Philadelphia Oil Refining Co.——The United Gas Improvement Co. will construct a two-story brick and iron testing station, 22 × 44 ft. Wilson Bros. & Co., Archs.

WILLIAMSPORT, PA.—Reports state that the Williamsport Gas Co. proposes to erect a brick and iron building, estimated to cost $50,000; also to extend the mains through South Williamsport.

HILLSDALE, MICH.—The Hillsdale Gas Co. will expend $2,500 for new pipes, retorts, purifying boxes, scrubber, etc. F. H. Stone, Receiver.

JOLIET, ILL.—The Joliet Gaslight Co. has filed a trust deed for $300,000 with the American Trust & Savings Bank of Chicago. The money secured will be used to take up an old issue of bonds, amounting to $225,000, and for improvements in the local plant, according to reports.

OAK GROVE, IND.—Reports state that a gas company has been organized to sink wells and furnish gas for a portion of the city. John T. Ellis, Monroe Huntzinger, Frank P. Foster, J. Kirkham, Dr. Lail and others are interested.

GALT, ONT.—A by-law will be submitted to a vote Dec. 17 to issue $67,750 for the purchase of the gas and electric light plants, according to reports.

NEW COMPANIES.—The Great Eastern Oil & Gas Co. of Pennsylvania, Towanda, Pa.; to bore for oil and gas in Bradford county; Pres., S. D. Sterigere; Vice-Pres., Joseph Ochs; Treas., L. R. Frost; Secy., M. M. Spaulding.

Deka Oil Co., Cleveland, O.; $250,000; to operate oil and gas wells; S. J. Kerrnish, W. D. Kerrnish, M. R. Boals, George T. Chapman, F. M. Skinner.

Hamilton Natural Gas Co., Greensburg, Ind.; $10,000; G. L. Hamilton and others.

Kansas Gas Co., Topeka, Kan.; $25,000; to pipe gas from Iola, Kan., to Kansas City; Perry C. Phillips, Kansas City, and F. H. Hersch, A. P. Charles, J. H. Hufford and C. E. Birdsall, of Iola.

The Lone Star Acetylene Gas Co., Tyler, Tex.; $50,000; D. P. Ewing, A. W. Palmer, Thomas Henderson, W. A. Stapp.

New Cumberland Gas Co., Pittsburg, Pa.; $50,000, with $500 paid in; to deal in natural gas; M. C. Egbert, V. E. Egbert, F. M. Bullock, C. S. James, C. A. Dally, Pittsburg, Pa.

Essex & Hudson Gas Co., 575 Broad St., Newark, N. J.; $6,500,000; to manufacture, etc., illuminating and fuel gas; Thomas N. McCarter, Jr., 765 Broad St., Newark; George S. Philler and Elmer Smaling, Drexel Bldg., Philadelphia, Pa.

Millbrook Gas & Electric Co., Millbrook, N. Y.; $15,000; Wm. E. Smith, Millbrook; Richard Scoles, Samuel Thorn, New York city.

Menzie Oil & Gas Co., Peru, Ind.; $10,000; to drill and operate oil and gas wells; Julius Falk, Joseph Andrus, Jos. M. Bergman, Geo. R. Chamberlain, Chas. T. Clark, Jos. S. Young, Clarence Henzie.

Lawrence Gas, Oil & Mining Co., Lawrence, Kan.; $500; O. W. Murphy, J. H. Glathart, S. D. Bishop, Louis C. Poehler and Albert Glathart, all of Lawrence.

Connotton Oil & Gas Co., Scio, O.; $10,000; J. H. Beal, J. M. Spiker, W. G. Compher, J. M. Adams and S. W. Canagan.

MISCELLANEOUS CONTRACTS.

CONDUITS.—Atlantic City, N. J.—Chief Engineer Wiesenthal has advised the council to construct underground conduits for the placing of city electric wires.

FIRE ALARM SYSTEM.—Mobile, Ala.—The council has awarded a contract to the Gamewell Fire Alarm Telegraph Co., at $12,630, for installing a fire alarm system.

FIRE ALARM SYSTEM.—Lancaster, O.—The Gamewell Fire Alarm Telegraph Co., New York, N. Y., has a contract, at $5,400, to install a fire-alarm system of 35 alarm boxes.

DIKES, ETC.—Portland, Ore.—Bids are asked until Dec. 15 for constructing dikes, etc., in the Columbia River and Hayden Slough, Ore. Maj. W. L. Fisk, U. S. Engr., Portland.

FIRE ALARM SYSTEM.—South Orange, N. J.—The board of village trustees has awarded a contract to the Gamewell Fire Alarm Telegraph Co. to construct a system, to cost $2,700.

SALE OF TELEPHONE FRANCHISE.—Duluth, Minn.—Bids are asked until Jan. 16 for the purchase of a telephone franchise, as stated in our advertising columns. H. W. Cheadle, Cy. Clk.

CHANNEL WORK.—Sioux City, Ia.—Alderman Hermann, Chn. Health Com., recommends a proposition to straighten the channel of the Floyd River at the southern end, to cost about $4,000.

PIERS.—Brooklyn, N. Y.—Reports state that bids will be asked by the dock board in about two weeks for the construction of two piers on the Wallabout Basin, to cost $75,000. Ch. Engr., John A. Bensel.

TELEPHONE WORK.—Chattanooga, Tenn.—The Postal Telegraph Co. awarded a contract Nov. 26 to the East Telephone Co. for the construction of a line between this city and Knoxville on the existing poles.

PILES AND PLANK.—New York, N. Y.—Bids are asked until Dec. 16 for furnishing about 4,000 piles, from 60 to 85 ft. long, and about 500,000 ft. B. M. of sawed spruce plank. J. S. Cram, Comr. Docks, Pier A, North River.

POLICE TELEGRAPH SYSTEM.—St. Paul, Minn.—The council is considering the question of installing a new police patrol telegraph system. Comptroller McCardy, Assemblyman Kirke and Gustave Willus, Jr, Com.

TUNNEL WORK POSTPONED.—Boston, Mass.—In consequence of an injunction, served upon the Boston transit commission, the date of receiving bids for the construction of the East Boston tunnel has been postponed until further notice, as stated in our advertising columns. B. Leighton Beal, Secy.

DOCKS.—St. Lawrence River, N. Y.—Reports state that a contract has been awarded to Capt. E. W. Visger, Alexandria Bay, N. Y., for the construction of docks along the St. Lawrence River, comprising the international park.

HARBOR WORK.—Toronto, Ont.—The board of control and the harbor commissioners are considering a proposition to improve the eastern entrance of the harbor at a cost of about $260,000, and the western channel, at $403,500.

TELEPHONE LINE.—Joplin, Mo.—The Missouri & Kansas Telephone Co. is preparing to construct a long-distance line between Joplin and Fort Smith, and will also soon commence work on a line from Carthage to Springfield.

DIRT FILL.—Edgemont, S. Dak.—Reports state that the railway bridge over Sheep Canon north of this place is to be taken down and the gulch to be filled with dirt, requiring about 300,000 cu. yds. of material, at a cost of about $130,000.

CONDUIT SYSTEM.—St. Louis, Mo.—Superintendent Benedict received bids Nov. 28 for the construction of a conduit system for the city wires, from the Southern Electric Supply Co., at $13,618, and the Western Electric Supply Co., at $14,190.

LEVEE WORK.—New Orleans, La.—Bids are asked by the state board until Dec. 12 for constructing the Salem levee, East Carroll parish, to contain about 100,000 cu. yds. of earth, from 14 to 17 ft. high and about 2,500 ft. long. Sidney F. Lewis, Engr.

WHARF.—Havana, Cuba.—We are informed that the American Indies Co., 100 Broadway, New York, has received a contract from the U. S. government to build a wharf at Triscornio, on the harbor of Havana, and of 7 miles of railway, as stated under Railways.

TELEPHONE LINE.—Newtown, Pa.—Bids will be asked by the Standard Telephone Co. for the extension of their line from Newtown to Doylestown and from Eden to Bristol. It is proposed to later extend the line from Newtown to Trenton, via Yardley and Morrisville.

ENGINES AND BOILERS.—La Rochelle, France.—Reports state that several steam engines of 35 HP. and boilers to supply these engines, of American make, are desired in the consular district, the cost, including transportation, not to exceed $2,000. Address Grenfel Stewart, 13 Rue du Palais, La Rochelle.

TELEPHONE FRANCHISE.—Springfield, O.—I. Ward Freye, Charles H. Pierce, E. C. Guin, Robert Gotwald and Robert Mills, of this city, and others applied to the board of public affairs Nov. 30 for a franchise to organize the Springfield Telephone Co., with a capital stick of $50,000. E. D. Juvenal, representing a Chicago company, has also applied for a franchise, according to reports.

DRAIN TILE.—Philo, Ill.—J. L. Ray, Atty., Imbarras River Drainage District, Champaign, Ill., informs us that the following bids were received Nov. 29 for furnishing 8,870 ft. of drain tile from 6 to 16 ins.: James M. Waugh, Crawfordsville, Ind., $970; John R. Stanton, White Hall, Ill., $1,205; Geo. E. Zimminsky, Paris, Ill., $940, S. C. Cowgill, Summitville, Ind. (accepted), $749.

FIRE APPARATUS.—New York, N. Y.—Bids are asked until Dec. 14 for furnishing 12,000 ft. of 1½ and 2½-in. circular knit jacket cotton, rubber lined fire hose; three fourth size steam fire engines with La France pumps, and one fourth size steam fire engine with Fox sectional water-tube boilers; two first size steam fire engines with Fox sectional water-tube boilers and one first size La France steam fire engine. John J. Scannell, Fire Comr., 157 East 67th St.

REMOVING WRECK.—Philadelphia, Pa.—We are informed that the following bids were received Dec. 5 for removing the wreck of the schooner "Joseph R. Ellis," in the Delaware River, near Finicum Island. Lieut.-Col. C. W. Raymond, U. S. Engr., P. O. box 812, Philadelphia: Wm. H. Keates, Atlantic City, N. J. (recommended for acceptance), $395; River & Harbor Improvement Co., Camden, N. J., $600; Chas. W. Johnson, Lewes, Del., $845; Jas. J. Cowgill, Paulsboro, N. J., $844.

TELEPHONE SYSTEM.—Chicago, Ill.—Reports state that a company in which Messrs. Armour, Swift and Nelson Morris are interested has been incorporated to construct an independent telegraph and telephone line to connect the packing houses in the west with the Chicago houses. The proposed line is to connect East St. Louis, Omaha, Sioux City, St. Joseph and Kansas City. The company is offering for sale $500,000 of gold bonds. It will transact a general telegraph and telephone business.

FLOATING AND GRAVING DOCK.—Algiers, La.—We are informed that the navy department received bids Nov. 30 for constructing a combined floating and graving steel dock, from Charles R. Bradbury, New York, N. Y., at $850,000, and the Maryland Steel Co., Sparrow's Point, Md., at $810,000, to build the dock according to the plans of the bureau, and at $837,000, including additional equipment not provided. M. T. Endicott, Ch. Bureau Yards and Docks, Washington, D. C.

BOILERS, MACHINERY, ETC.—Detroit, Mich.—The following bids were received Nov. 28 for furnishing two sets of boilers, machinery, etc., for four complete steam fog signals, advertised in Engineering News, Nov. 24. Lieut.-Col. M. B. Adams, U. S. Engr., Detroit:

Fulton Iron & Engine Works, Detroit	$4,496
D. Connelly, Cleveland, O.	4,634
John P. McGuire, Cleveland, O.	4,950
*Thomson Kingsford, Oswego, N. Y.	9,299
James Clark Co., Baltimore, Md.	11,966

*Alternative bid, $9,275.

CONTRACT PRICES.

FACE OF SEAWALL.—Tompkinsville (S. I.), N. Y.—The following bids were received by Lt.-Col. D. P. Heap, U. S. Engr., Dec. 1, 1898, for constructing the east face of the north seawall at the lighthouse depot, S. I., as advertised in Engineering News:

Michael Flaherty & Co., 135 Broadway, N. Y.	$170.00
Johnston & Reynolds, Girard Bldg., Philadelphia	177.95
Weil & Raynor, 258 Broadway, New York	197.00
Central Contracting Co., 99 Cedar St., New York	197.80
International Contracting Co., Syracuse, N. Y.	200.00
Frank Rinschler, Stapleton, S. I., N. Y.	212.00
Brown & Lowe, 99 Cedar St., New York	212.50
Frank Pidgeon, Saugerties, N. Y	214.00
Wm. H. Masterton, 231 East 86th St., New York.	239.00
Wm. H. Flaherty & Co., 80-82 Reade St., N. Y.	245.50
S. W. Frescoln & Co., Reading, Pa.	257.79
R. P. & J. H. Staats, 29 Broadway, New York	260.00
W. H. Jenks, 130-2 Pearl St., New York	285.87
P. Sanford Ross, 277 Washington St., Jersey City	290.50
John T. Rowland & Sons, 197 1st St., Jersey City.	294.60
Andrew McMillan, 894 East 135th St., New York	297.70
Spearing & Preston, 11 Broadway, New York	336.84

GUN FORGINGS.—Washington, D. C.—We are informed that the following bids were received Nov. 26, 1898, for 12 sets of 12-in. gun forgings: Bethlehem Iron Co., South Bethlehem, Pa., 18 cts. a lb.; and Midvale Steel Co., Philadelphia, Pa., 19 cts. a lb.

BRICK SEWER.—Toledo, O.—Thomas Kelly submitted the lowest bid Nov. 21, 1898, as follows, for building a brick sewer in Paine Ave.: 84-in. brick sewer with 13-in. shell, $7.64 a ft; 60-in., with 19-in. shell, $6,25.

STREET CLEANING.—Jersey City, N. J.—Henry Byrne has been awarded the contract for street cleaning as follows: Sweeping streets, a mile, $9.13; sweeping asphalt-paved streets, $6.64 a mile; removing ashes and garbage during the entire year, $14,110. The total appropriation for street cleaning and garbage removal is $40,000. With the $14,110 for garbage collecting deducted there will be $25,890 left to pay for street cleaning at $9.13 and $6.64 a mile for Belgian block and asphalt paved streets, respectively.

SEWERS.—Scranton, Pa.—The following bids were received by councils Dec. 1, 1898, for constructing sewers in Section C of the 5th district: Donohoe & O'Boyle, Scranton, $2.27 a ft., complete; extra basins, $97.00; extra manholes, $37.00. V. H. O'Hara, Scranton, $2.24 a ft., complete; extra basins, $90.00; extra manholes, $35.00; extra house connections, 60 cts. a ft. Length of sewer, 4,000 ft. of 8, 10, 12, 15, 18, and 24-in. pipe. Average depth, 10 ft. The price per ft. includes the building of 23 manholes, 16 basins, and 140 house connections (about 2,800 ft.). Jos. P. Phillips, Cy. Engr.

SIDEWALK.—Louisville, Ky.—The board of public works received the following bids Dec. 1, 1898, for constructing granitoid sidewalks in Hill St.: L. R. Figg, $1.60 a sq. yd.; L. D. Robertson, $1.71; Louisville Artificial Stone Co., $1.89; Charles Fitch, $1.94; National Roofing & Supply Co., $1.80.

ASPHALT PAVING.—Jersey City, N. J.—The New Jersey Mexican Asphalt Co. submitted the lowest bid Nov. 29, 1898, for asphalt paving in Prospect St., at $1.74 a sq. yd.

SAND.—New York, N. Y.—The U. S. Engineers, Army Bldg., received the following bids Nov. 28, 1898, for furnishing 3,000 cu. yds. of fine sand: Phoenix Towing & Transporting Co., 39½ cts. a cu. yd.; Murry & Reid, 36 cts.; H. Godwin, 38 cts.; W. J. McGuire, 31 9-10 cts.

RAILWAY SUPPLIES.—Havana, Cuba.—Col. A. S. Kimball, Q. M., U. S. A., Army Bldg., New York, received the following bids Nov. 30, 1898, for furnishing supplies for a small government railway in Cuba:

Bids Received at Havana, Cuba, Nov. 30, 1898, for Furnishing Railway Supplies.

BRIDGE ABUTMENTS.—Charlemont, Mass.—A. B. Fletcher, Secy. Massachusetts State Highway Comn., Boston, informs us that the following bids were received Nov. 17, 1898, for building the abutments of a bridge over Mill Brook in this town: Cement masonry, 300 cu. yds.—W. N. Flynt Granite Co., Monson, Mass., $10.90; Jarvis Engineering Co., Boston, $8.67 (accepted); Wm. D. Carr, Boston, $9.97; M. A. Culbert, Boston, $11.75; Tuttle & Edgerly, Swampscott, $10.00.

◆

INDUSTRIAL NOTES.

THE NEW YORK DREDGING CO., World Bldg., New York, has the contract to dredge the Christiana River, at Wilmington, Del.

THE VULCAN IRON WORKS CO., Toledo, O., reports a good business during the past season, having run its plant day and night all summer.

W. G. NAGEL & CO., Toledo, O., has been organized for the purpose of conducting a general business in electrical machinery, supplies and construction, in Toledo.

THE OTTO GAS ENGINE WORKS, Philadelphia, has received the gold medal for gas and gasoline engines, exhibited at the Trans-Mississippi Exposition at Omaha, Neb.

THE PITTSBURG TERRA COTTA LUMBER CO., Pittsburg, has an order for 1,000 tons of dense fireproofing tile for the power-house of the Dublin Tramway Co., Dublin, Ireland. The company has also an order for fireproofing a new municipal building now being erected in the City of Mexico.

A. A. TALMADGE & CO., St. Paul Bldg., New York, have an order for switches and general track equipment, including tools, etc., and for bridge and dock timbers for the Government R. R., which is being built in Cuba. A similar order has also been received from the Clearfield Southern R. R. Co., Clearfield, Pa.

THE CONSOLIDATED PNEUMATIC TOOL CO., 11 Broadway, New York, has been placed in charge of Mr. John H. Hull, as Receiver, on application of Mr. Horace D. Gove, who holds a judgment for $11,198 against the company, according to report. The assets are said to consist only of the patents which, were originally valued at $50,000.

MR. EARL C. BACON, Havemeyer Bldg., New York, has recently shipped to Japan and China a number of winding engines for use in the coal and other mines of those countries. They were specified by the engineers of the Chinese and Japanese imperial governments. This concern has also sent considerable machinery to Siberia within the past 30 days.

THE MANHATTAN CONCRETE CO., 156 Fifth Ave., New York, is reported to have made an assignment to Mr. Henry L. Fridenberg, with liabilities of $60,000 and actual assets of about the same amount. The assignment is said to have been precipitated by liens being filed on the company's contracts in favor of the Standard Silica Cement Co., 66 Maiden Lane, New York.

THE COMMON-SENSE RAIL-JOINT CO., 304 Tacoma Bldg., Chicago, has succeeded the firm of Hill & Jennings, which for some time has controlled the patents and manufactured the Heath rail-joint. The new company has a form of rail-joint, to be known as the "New Common-Sense Rail-Joint," which was illustrated and described in Engineering News of Nov. 24. Mr. J. V. Ayer is secretary and president of the company, and Col. W. E. Dorwin is the manager.

THE GILLETTE-HERZOG MFG. CO., Minneapolis, Minn., is pushing the addition to the plant of the Minneapolis Rolling Mill Co., Minneapolis, and expects to have it completed and ready for the production of steel in January. The latter company has manufactured over 10,000 tons of bar iron in the 10 months it has been running, and with the addition of the open-hearth furnace plant, it expects to turn out 20,000 tons of iron and steel next year. Mr. E. R. Dutton is the Structural Engineer.

THE BETHLEHEM IRON CO., South Bethlehem, Pa., furnished the engine forgings and shafting for the new U. S. torpedo boat "Davis," constructed at the Wolf & Zwicker Iron Works, Portland, Ore. This boat on her trial trip made an average speed of 23½ knots an hour, which was a knot more than the contract speed, the shaft making on an average 382 revolutions a minute. The company also furnished the engine forgings and shafting for the U. S. torpedo-boat destroyer "Farragut," which made over 30 knots on her trial trip.

THE SPRINGFIELD GAS ENGINE CO., Springfield, O., has leased the first and second floors of a building on West Columbia St., in that city, in order to secure additional accommodations, and will increase its force of workmen as soon as the shop can be fitted up. The company recently furnished a gas engine to the Sun Publishing Co., Springfield, for use in running a large Cox duplex printing press. The officers of the company are: Pres., R. H. Rodgers; Vice-Pres., Chas. H. Paxton; Secy. and Gen. Mgr., Addison S. Rodgers.

THE BERLIN IRON BRIDGE CO., East Berlin, Conn., is erecting a fireproof blacksmith shop, about 40 ft. square and two stories high for the Waterbury Mfg. Co., Waterbury, Conn. The floor consists of concrete on corrugated iron arches, supported by steel beams and columns, and the roof is of steel trusses carrying a covering of corrugated iron lined with patent anti-condensation lining.——The company is also erecting a riveted latticed girder bridge of about 70 ft. span, with steel floor beams, for the town of Whitehall, N. Y., designed to carry the weight of a steel road roller, besides ordinary traffic.

THE MESTA MACHINE CO., Pittsburg, has been formed by the consolidation of the Robinson-Rea Mfg. Co., Pittsburg, and the Leechburg Foundry & Machine Co., Leechburg, Pa., and has purchased a tract of about 10 acres of land near Homestead, Pa., on which, reports state, it will erect a plant to cost about $500,000. The new company will manufacture sand, chilled and steel rolls, general rolling mill, steel works and tin-plate machinery; machine-molded steel gears and steel castings. The officers of the company are: Pres., Geo. Mesta; Treas., W. H. Rea; Secy., J. O. Horning; Auditor, W. D. Rowan.

FRASER & CHALMERS, of Chicago, Ill., makers of the Huntington mill, inform us that in the U. S. Circuit Court, of the District of New Jersey, Judge Kirkpatrick has granted an injunction against the Whitaker Cement Co., as a user of the Griffin mill, which is declared to be an infringement upon the mill patented by F. A. Huntington, May 8, 1883. The same firm reports that the 156 Bruckner roasting furnaces furnished to the Anaconda Copper Mining Co. ten years ago are still in use. The furnaces are 8 ft. 6 ins. diameter and 18 ft. 6 ins. long inside, but larger ones have since been built. Some of the fireboxes are stationary and others are mounted on wheels.

THE PITTSBURG BRIDGE CO., Pittsburg, reports good business, having averaged about 1,000 tons for the year. The larger contracts now on hand include: Library and assembly rooms for Leland Stanford Jr. University, Cal.; Forest St. bridge and viaduct, St. Paul, Minn., 235 ft. long; boiler house and engine room, Evansville, Ind., water-works; parochial school, Pittsfield, Mass.; three buildings for the Brandon Italian Marble Co., Middlebury, Vt.; 700 tons of structural material, Mexican Central Ry.; Bruekner roaster building, Pueblo Smelting & Refining Co.; trolley railway bridges over the Youghiogheny River, at Connersville, Pa., and shaker at Lewiston, Idaho.

RANDOLPH & CLOWES, Waterbury, Conn., report that the storm on Sunday morning, Nov. 27, caused the roof of their brass and copper rolling mill to cave in, on account of which they have been somewhat delayed in filling orders for this class of material. The debris of the wreck has been removed, and temporary roofs have been erected over the machinery. The crane mill was to be in running order Dec. 5. The entire brass and copper mill, it is hoped, will be in operation Dec. 12. No damage or interruption occurred in any other department of the works, and the damage to the machinery was less than $1,000, and the cost of a roof will not exceed $12,000, which expenditure will put the mill in better condition than before the accident.

NEW COMPANIES.—The Alabama Steel & Wire Co., Birmingham, Ala.; $2,000,000; Pres., E. T. Shuler, Chicago; Secy., G. H. Shuler, Cleveland, O.

Santiago Mining Co., New York; $200,000, commencing with $1,000; to do a general mining business; James McCallum, Charles R. Lee, H. C. Lum Suden, Charles F. Simes and Job W. Lord.

Federal Mfg. Co., Portland, Me.; $100,000, commencing with $220; to manufacture and sell gas appliances; Pres., George M. Butterick, Boston, Mass.; Treas., Freeman Emmons, Wakefield, Mass.

Contract Work Should Always be Advertised in a Paper Read by Contractors.

Nearly Every Prominent Contractor and Manufacturer of Contractors' Supplies in North America Reads Engineering News.

PERSONAL.

Mr. John H. Mabbett has been appointed Water Commissioner of Saratoga, N. Y., to succeed Mr. Mark M. Cohn, deceased.

Mr. C. D. McKelvey, General Superintendent of the New York, Susquehanna & Western R. R., with headquarters in Jersey City, N. J., has resigned.

Prof. Sidney H. Short, Second Vice-President of the Walker Co., Cleveland, O., electrical manufacturers, has resigned, and will make a trip to Europe, it is stated.

Mr. Chas. L. Kesling, C. E., sailed Dec. 14 for Havana as Engineer for Drake & Stratton, who have a government contract for building a pier and a steam railway at Havana.

Mr. Chas. E. Webster, Chief Engineer of the Lehigh Valley R. R., with headquarters at South Bethlehem, Pa., has resigned his position, which he has held for the past 15 years.

Mr. Chas. P. Costello, of Portland, Me., has been appointed Superintendent and General Manager of the Water-Works of Springfield, Mo., which are controlled by eastern capitalists.

Mr. Willard A. Smith, of Chicago, Ill., has been appointed Director of the Department of Transportation and Civil Engineering of the U. S. Commission to the Paris Exposition of 1900.

Mr. Julius Le Roy Adams, Jun. Am. Soc. C. E., of Brooklyn, N. Y., son of Col. Julius W. Adams, Past President Am. Soc. C. E., was married Dec. 6, at Yonkers, N. Y., to Miss Georgiana Heermance.

The firm of Wilson Bros. & Co., architects, civil and consulting engineers, Drexel Building, Philadelphia, after Feb. 1, 1899, will be made up of the following members: Messrs. Joseph M. Wilson, Henry W. Wilson, John McArthur Harris and Howard S. Richards.

Mr. J. C. Patterson, Resident Engineer of the Great Northern Ry. Line, with headquarters at Great Falls, Mont., has resigned to accept the position of Chief Engineer of the Butte, Anaconda & Pacific Ry., with headquarters at Anaconda, Mont.

Mr. J. C. Howard, Assistant Superintendent of the Chicago, Burlington & Northern Ry., with headquarters in Minneapolis, Minn., has been appointed General Manager of the Brainerd & Northern Minnesota Ry., with headquarters at Brainerd, Minn., to succeed Mr. E. H. Hoar.

Mr. J. H. Manning, Master Mechanic of the shops of the Union Pacific R. R., Omaha, Neb., has been transferred to Cheyenne, Wyo., to succeed Mr. T. A. Davies, assigned to other duties. Mr. M. K. Barnum, of North Platte, Neb., has been appointed to succeed Mr. Manning at Omaha.

Mr. Gustav R. Tuska, Assoc. M. Am. Soc. C. E., Chief Engineer of the Panama R. R., with headquarters in New York city, arrived here Dec. 12, on the steamer "Finance" from Colon, where he has been acting as an expert in adjusting matters between the railway and the Panama Canal Co.

Mr. Samuel M. Gray, M. Am. Soc. C. E., of Providence, R. I., has been engaged as Consulting Engineer, to advise the city of Petersburg, Va., as to the best kind of street pavement to be laid, and to prepare specifications for the same. The city expects to expend upwards of $100,000 on this improvement.

Mr. Edward H. Lee, Assistant Engineer, in charge of the track elevation on the Chicago & Western Indiana R. R. and the Belt Ry. Co., of Chicago, has been appointed Chief Engineer and General Roadmaster, to succeed Mr. F. C. Doran, deceased. Mr. Lee was formerly for several years Chief Engineer of the Elgin, Joliet & Eastern Ry.

Lieut. Richmond P. Hobson, Assistant Naval Constructor, U. S. Navy, the chief hero of the "Merrimac" incident, of the Spanish War, has been promoted by President McKinley to be Naval Constructor, and has been ordered to the Asiatic station for duty in connection with the raising and repairing of vessels captured at Manila.

Mr. Edward C. Shankland, M. Am. Soc. C. E., has withdrawn from the firm of D. H. Burnham & Co., architects, of Chicago, Ill., and has formed a partnership with his brother, Mr. R. M. Shankland, mechanical engineer, under the firm name of E. C. & R. M. Shankland, civil engineers, with offices at 816 The Rookery, Chicago. The firm will make a specialty of building construction and foundations, especially of office buildings, warehouses and factories.

Col. Wm. Ludlow, M. Am. Soc. C. E., Corps of Engineers, U. S. Army, and Major-General of Volunteers, has been appointed by President McKinley, Military and Civil Governor of Havana, Cuba, to report there before Jan. 1 next. General Ludlow's civil engineering experience, as well as his tried administrative ability acquired as Engineer Commissioner of the District of Columbia, especially fits him for this important post.

The following have been nominated as commissioners to codify the building laws of New York city: Wm. J. Fryer, Robt. A. McCafferty and Cornelius O'Reilly and Geo. A. Just, M. Am. Soc. C. E., of Manhattan Borough; Randolph L. Daus and Bernard Gallagher, of Brooklyn Borough; Daniel Callahan, of Queens; Assistant Corporation Council Rollin M. Morgan and Building Commissioners Thos. J. Brady, John Guilfoyle and Daniel Campbell.

OBITUARY.

Mr. Barnard Feeney, contractor, of Union Hill, N. J., died Dec. 4, aged 49.

Mr. Richard C. Anderson, mining engineer, of Deadwood, S. Dak., died Dec. 2.

Mr. James McCloud, of the firm of Jas. McCloud & Co., contractors, of Williamsport, Pa., and Columbus, O., died Dec. 2, in the latter city, aged 58.

Mr. Geo. Richardson, for many years Superintendent of the private water-works plant at Bridgeport, Conn., died in that city on Dec. 12, at the age of 51 years.

Mr. Andrew Hallen, Chief Engineer of the Pennsylvania Coal Co., Pittsburg, Pa., died Dec. 9, as the result of injuries received in a mine explosion Dec. 6. He was 36 years of age.

Mr. Geo. Tisdale Clark, a member of the board of arbitration to determine the price to be paid by the village of Fulton, N. Y., for the water-works of the private water company there, died at Oswego, N. Y., on Dec. 9.

Mr. George Richardson, Superintendent of the Bridgeport Hydraulic Co., Bridgeport, Conn., which supplies that city with water, died at his home, Dec. 11, aged 52. He was the son of the late Joseph Richardson, contractor and builder, of New York.

Mr. James McGee, Manager of the Devoe Works of the Standard Oil Co., died at his home in Plainfield, N. J., Dec. 6, aged 72. He was a member of the American Geographical Society, and of the American Museum of Natural History, as well as several other societies.

Mr. Geo. H. Parish, President of the Red Ash Coal Co., died at his home in Wilkesbarre, Pa., Dec. 11, aged 79. He built a large portion of the Louisville & Nashville R. R., and was interested in a number of other railways. He organized a number of coal companies and was the founder of the Vulcan Iron Works, of Scranton, Pa.

Lieut. Charles D. Kennedy, Manager of the Judson Powder Co., Berkeley, Cal., was killed, Dec. 7, by an explosion in the works. He was born in New Bedford, Mass., and graduated from service as cadet on the U. S. revenue cutter "Salmon P. Chase" in 1882. He was appointed to the U. S. revenue cutter "Dexter" and later distinguished himself in the Arctic service on the "Bear," "Rush" and "'Corwin." He resigned in 1888 to accept the position he held at the time of his death.

Sir William Anderson, M. Inst. C. E., of London, England, died Dec. 11. He was born in St. Petersburg, Russia, Jan. 5, 1835, of British parentage. In 1849 he went to King's College, London, where he studied applied sciences. He lived in Dublin, Ireland, from 1855 to 1864, engaged in engineering practice and was elected President of the Institution of Civil Engineers of Ireland in 1863. In 1864, he entered the firm of Easton & Amos, London, building the Erith Iron Works. In 1889, he was appointed Director-General of the Royal Ordnance Factories at Woolwich, Waltham Abbey, Enfield and Birmingham. He was elected a Member of the Institution of Civil Engineers in 1869, and was later a Vice-President. He was also a Vice-President of the Institution of Mechanical Engineers, and of the Society of Arts. In 1897 he was knighted and received the degree of Doctor of Civil Laws from Durham University. He was also a Fellow of the Royal Society.

Mr. Samuel McElroy, M. Am. Soc. M. E., a civil engineer, long identified with the public works of Brooklyn, N. Y., died of heart disease in that city, on Dec. 9, aged 74 years. Mr. McElroy was born in Albany, and in early life served as a steam engineer on the U. S. S. "Fulton." As early as 1854 he was an assistant of Gen. Ward B. Burnett, Engineer of the Long Island Water Works Co., in making the surveys for obtaining a constant supply of water from Long Island streams, as a substitute for a well supply. In 1855 Mr. McElroy, as Chief Engineer, prepared the specifications appended to the contract between the Nassau Water Co., the successors of the Brooklyn Water Co., and the Long Island Water-Works Co., with Henry S. Welles & Co., for the construction of a distributing pipe and hydrant system, the Prospect Hill and Ridgewood distributing reservoirs and a closed conduit from the Ridgewood Pumping station to Baiseley's Pond. In the same year Mr. James P. Kirkwood became Chief Engineer, and Mr. McElroy, with Moses Lane, and later Julius W. Adams, was appointed one of the Assistant Engineers for this work. Later McElroy was engaged in laying out streets in the outer wards of Brooklyn and in surrounding towns, and for the last twenty-five years he has been extensively employed as an expert and consulting engineer in matters connected with water supply. As an engineering expert for the city of Brooklyn he was prominently connected with the adjustment of the late controversy between that city and the Long Island Water Supply Co.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

AMERICAN INSTITUTE AND THE HENRY ELECTRICAL SOCIETY.
Dec. 16. "Light," William Hallock, Secy., D. R. Lovejoy, 111 W. 38th St., New York city.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Dec. 16. Secy., F. H. Olmsted, Byrne Bldg., Los Angeles, Cal.

ROCHESTER ENGINEERING SOCIETY.
Dec. 16. Secy., John F. Skinner, Reynolds Library Bldg., Rochester, N. Y.

NORTHWESTERN TRACK AND BRIDGE ASSOCIATION.
Dec. 16. Secy., D. W. Meeker, St. Paul, Minn.

CHICAGO ELECTRICAL ASSOCIATION.
Dec. 16. "Wireless Telegraphy," Arthur V. Abbott. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.

THE DETROIT ENGINEERING SOCIETY.
Dec. 16. "The Civil Engineer and National Public Works," Geo. Y. Wisner. Secy., Henry Goldmark, Wayne Co., Sav. Bank Bldg., Detroit, Mich.

THE ENGINEERS' CLUB OF PHILADELPHIA.
Dec. 17. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

ENGINEERS' CLUB OF COLUMBUS.
Dec. 17. Secy., H. M. Gates, 12½ North High St., Columbus, O.

ENGINEERS' CLUB OF PHILADELPHIA.
Dec. 17. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Dec. 19. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

ENGINEERS' CLUB OF MINNEAPOLIS.
Dec. 19. Secy., H. E. Smith, 1620 S. E. 14th St., Minneapolis, Minn.

TECHNICAL CLUB OF OMAHA.
Dec. 19. Secy., J. Harry Lawrie, Omaha, Neb.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA
Dec. 20. Secy., R. A. Fessenden. 410 Penn Ave., Pittsburg, Pa.

WESTERN RAILWAY CLUB.
Dec. 20. Secy., F. M. Whyte, 225 Dearborn St., Chicago, Ill.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.
Dec. 21. Secy., Frank H. Olmsted, Los Angeles, Cal.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Dec. 21. Secy., S. E. Tinkham, City Hall, Boston, Mass.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Dec. 21. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

ENGINEERS' CLUB OF ST. LOUIS.
Dec. 21. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Dec. 21. "Building Laws" Discussion. Secy., C. W. Hunt, 220 West 57th St., New York City.

WESTERN SOCIETY OF ENGINEERS.
Dec. 21. "Foundations for Railroad Bridge Across the St. Lawrence River at Cornwall, Ont.," George E. Thomas. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.

CANADIAN SOCIETY OF CIVIL ENGINEERS.
Dec. 22. Secy., C. A. McNab, 112 Mansfield St., Montreal, Canada.

ENGINEERING ASSOCIATION OF THE SOUTH.
Dec. 22. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Dec. 27. Secy., Wm. H. Searles, Case Library Bldg., Cleveland.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
Dec. 28. Secy., Ralph W. Pope, 26 Cortlandt St., New York city.

ENGINEERS' SOCIETY OF WESTERN NEW YORK.
Jan. 2. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Jan. 2. Secy., C. L. Annan, City Engineer's Office, St. Paul, Minn.

FOUNDRYMEN'S ASSOCIATION, PHILADELPHIA.
Jan. 4. Secy., Howard Evans, Pier 45, Delaware Ave., Philadelphia, Pa.

BROOKLYN INSTITUTE OF ARTS AND SCIENCES.
Jan. 6. "The Electro-Metallurgy of Copper," John B.F. Hereschoff. Secy., Henry I. Weed, Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.

THE LOUISIANA ENGINEERING SOCIETY.
Jan. 9. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

ENGINEERS' CLUB OF KANSAS CITY.
Jan. 9. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.

DENVER SOCIETY OF CIVIL ENGINEERS.
Jan. 10. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Col.

NORTHWEST RAILWAY CLUB.
Jan. 10. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

NEW ENGLAND RAILWAY CLUB.
Jan. 10. Secy., Edw. L. Janes, P. O. Box 1158, Boston, Mass.

CENTRAL RAILWAY CLUB.
Jan. 13. Secy., H. D. Vought, 114 Fifth Ave., New York city.

ST. LOUIS RAILWAY CLUB.
Jan. 13. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.

SCRANTON ENGINEERS' CLUB.
Jan. 14. Annual meeting. Secy., F. E. Pratt, 730 Madison Ave., Scranton, Pa.

MONTANA SOCIETY OF ENGINEERS.
Jan. 14. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

AMERICAN INVENTORS' AND MANUFACTURERS' ASSOCIATION.
Jan. 15. Annual meeting, Washington, D. C. Secy., Arthur Steuart, Washington Loan and Trust Bldg., Washington, D. C.

FRANKLIN INSTITUTE.

NEW YORK RAILROAD CLUB.
Jan. 19. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.
ENGINEERS' CLUB OF CINCINNATI.
Jan. 19. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.
SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Jan. 19. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.
THE WEST VIRGINIA SOCIETY OF CIVIL ENGINEERS AND ARCHITECTS.
Jan. 19-20. Annual meeting, Charleston, W. Va. Secy., W. Steenbergen, Point Pleasant, W. Va.
NORTHWESTERN ELECTRICAL ASSOCIATION.
Jan. 19-21. Semi-annual meeting, Milwaukee, Wis. Secy., Thos. R. Mercein, 511 Montgomery Bldg., Milwaukee, Wis.
TECHNICAL SOCIETY OF THE PACIFIC COAST.
Jan. 20. Annual meeting. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.
NATIONAL ASSOCIATION OF MANUFACTURERS.
Jan. 24-26. Annual convention, Cincinnati, O. Secy., E. P. Wilson, Room A, Chamber of Commerce, Cincinnati, O.
INDIANA ENGINEERING SOCIETY.
Jan. 24-26. Annual meeting, Indianapolis, Ind. Secy., J. B. Nelson, 61 Baldwin Block, Indianapolis, Ind.
MICHIGAN ENGINEERING SOCIETY.
Jan. 24-26. Annual meeting, Lansing, Mich. Secy., F. Hodgman, Climax, Mich.
ILLINOIS SOCIETY OF ENGINEERS AND SURVEYORS.
Jan. 25-27. Annual meeting, Champaign, Ill. Secy., Jacob A. Harman, Peoria, Ill.

WEST VIRGINIA SOCIETY OF CIVIL ENGINEERS AND ARCHITECTS.—The 4th annual meeting of this society will be held at Charleston (Kanawha Co.), West Virginia, Jan 19-20. W. Steenbergen, Secy.

ENGINEERS' CLUB OF COLUMBUS.—The regular meeting of this club was held Dec. 3. The subjects discussed were: "Metal Protection, Lead vs. Zinc Paint"; "Best Method of Residence Heating"; "The Metric System: Can It be Brought Into Common Use in America."

MONTANA SOCIETY OF ENGINEERS.—The regular meeting of this society was held at Helena, Mont., Nov. 12, 1898.

The bill providing for the appointment of a State Engineer and defining his duties, was read and discussed, after which Mr. O. Jackson, recently from Alaska, addressed the society upon Railway, Tramway and other improvements now being made in that country. The reading of the paper by F. W. Blackford upon the Butte-Centerville Electric Railway, was postponed until the December meeting.

BROOKLYN ENGINEERS' CLUB.—The annual meeting of this club was held at the Argyle Hotel, Brooklyn, N. Y., on Dec. 8. The early part of the evening was devoted to the consideration of reports of the officers and various committees. This was followed by the election of officers for the ensuing year, as follows: Pres., Walter M. Meserole; Vice-Pres., Henry B. Seaman; Secy., A. J. Provost, Jr.; Treas., Calvin W. Rice.

SCRANTON ENGINEERS' CLUB.—This club held a regular meeting on Dec. 7, at which Mr. Edmund A. Bartt related his experience as a prospector in the Peace River district of the Northwest Territory. During this work he took copious notes of topography and location, which have been of great service to the Canadian Geological Survey, enabling it to correct the existing maps of this district, which he showed to be very inaccurate.

The following officers were nominated for the ensuing year: Pres., W. M. Marple; Vice-Pres., C. C. Rose; Secy., H. W. Rowley; Corres. Secy., Morgan Davis; Treas.; A. C. Lamont; Librarian, A. C. Lister. Directors: James Archbald, Capt. W. A. May and Chas. S. Farrer.

THE CIVIL ENGINEERS' SOCIETY OF ST. PAUL.—The regular meeting of this society was held Dec. 5. An invitation to visit the shops of the Great Northern Ry., extended to the society by the Superintendent, Mr. J. F. Forbes, was accepted. A revised membership list was ordered printed.

The paper of the evening on "The Manufacture of U. S. 12-in. Mortar Carriages" was read by Mr. Oliver Crosby.

The American Hoist & Derrick Co, of St. Paul, have been turning out these carriages at the rate of two per month during the past year. Ten pieces of gun iron, the strength of which was twice that of ordinary cast iron, were exhibited. C. L. Annan, Secy.

AMERICAN INSTITUTE OF MINING ENGINEERS.—The 29th annual meeting of the Institute will be held in New York city, beginning Feb. 21. Hotel headquarters will be at the Murray Hill Hotel, and the sessions will be held, through the courtesy of the American Society of Mechanical Engineers, in its hall, No. 12 West 31st St.

A special topic of discussion at this meeting will be the paper on "The Evolution of Mine-Surveying Instruments," by Dunbar D. Scott, Ironwood, Mich. This paper surveys the history of mine surveying, describing, illustrating and criticising the successive types of apparatus employed in this and other countries.

R. W. Raymond, Secy.

ENGINEERS' CLUB OF ST. LOUIS.—The 480th meeting, which was also the annual meeting, was held Dec. 7, with 53 members and visitors present. The several standing committees presented reports, and the nominating committee presented a list of nominees for 1899. It was announced that the annual supper would be held Dec. 21.

The paper of the evening, by Mr. A. H. Zeller, was then read. The author was a delegate from the Engineers' Club of St. Louis to the celebration of the 50th anniversary of the Civil Engineers of France, and the paper described the manner in which the event was celebrated. After the reading of the paper, a number of lantern slides were exhibited, showing views of engineering works in Paris, Berlin and other European cities.

Richard McCulloch, Secy.

AMERICAN ECONOMIC ASSOCIATION.—The 11th annual meeting of this association will be held at New Haven, Conn., Dec. 27-29. The following are some of the papers to be presented:

Dec. 27.—"The Relation between Economics and Politics." Prof. Arthur T. Hadley.

Dec. 28.—Report of the committee on the 12th Census. Discussions: "Is it possible to get Statistics of Capital and Industry?" "What may and should Statistics of Municipal Finance be made to show?" "Early Canal, Railway, and Banking Enterprises of the States, in Relation to the Growth of Corporations in the United States," Dr. G. S. Callender.

Dec. 29.—Report of the Committee on Banking and Currency; "Dynamic Standards of Wages and Interest," Prof. J. B. Clarke; "The Present Study of Practical Labor Problems in France," Dr. W. F. Willoughby; "Municipal Taxation as a Means of Public Control of Corporations," C. W. Curtis; "The Nature of Municipal Franchises," Dr. Max West.

THE NEW JERSEY SANITARY ASSOCIATION.—The fourth annual meeting of the association was held at Lakewood, N. J., on Dec. 9 and 10. The president, Mr. Vernon H. Davey, Superintendent of the Schools of East Orange, devoted the greater part of his address to school house construction, school sanitation, and hygiene. Floors of school buildings should be made of some wood that will not shrink or splinter, like kiln dried Georgia pine. There should be 18 sq. ft. of floor space for each child. Reliance cannot be placed on gravity systems of ventilation, in mild weather.

A paper on "Methods of Sewage Disposal" was expected from Mr. Rudolph Hering, M. Am. Soc. C. E. He was unable to attend, and Mr. Jas. H. Fuertes, M. Am. Soc. C. E., presented a paper on the same subject. He outlined the various methods in use and spoke hopefully of Cameron's septic tank and Dibden's bacterial filter systems, of which so much is now heard in and from England. These systems, he said, are still in an experimental stage, but promise to simplify the sludge problem. The discussion on this paper was opened by Mr. M. N. Baker, who stated that the concentration of population in some portions of the state, and notably the Passaic valley, made it difficult to find sites for sewage purification plants. This fact, coupled with the economy of co-operation in such matters suggested the desirability of a joint system of sewage disposal, whether the final treatment be dilution or otherwise. Mr. Fuertes said that disposal by dilution sometimes involved the question of temperature. If the water receiving the sewage were cold, nuisance was less likely to result. Mr. Jas. Owen said he had just completed a septic tank for the sewage of a hospital located in Essex county, N. J. The tank has not been put in operation. It will serve about 1,000 people.

Besides acting as a substitute for Mr. Hering, Mr. Fuertes presented a paper on "Public Water Supplies and the Prevention of the Pollution of the Same." Some authorities hold that cities should own the whole drainage area from which their water supply comes. This is generally impracticable for large cities. Some English cities having such ownership do not show, by their typhoid statistics, any advantage over Boston or New York. The securing of a strip of land on the shores of reservoirs, lakes or streams used as water supplies is a practicable and valuable measure. It excludes sources of pollution from close proximity to the water. The drainage of county roads is sometimes kept out of surface supplies abroad, but Mr. Fuertes knew of no such practice here. In New York the State Board of Health, on application from local authorities, formulates rules for the sanitary protection of public water supplies, varying the rules to suit each case. In discussing the paper, Mr. Geo P. Olcott, of East Orange, urged that more attention should be given to the quality of water supplies in planning them, notwithstandihng the pressure often brought to bear in the case of municipal works to keep the cost down. Mr. Wm. Kent, M. Am. Soc. M. E., said that the engineering side of the case was clear, but how about its legal phases in New Jersey? Mr. Baker said the state legislation on the subject had improved of late, but there was great need of central supervision of sources of water supply in New Jersey. The commission recently appointed to investigate stream pollution could render a great service by pointing out the work to be done over the whole state, instead of confining itself to the Passaic River, both it and the public seeming to think it was created to look after one stream, whereas the language of the act includes the streams of the state.

◆◆

NEW PUBLICATIONS.

LITERARY MAGAZINES.—The November "Contemporary Review" contains a paper by Prof. Ramsay on "The Kinetic Theory of Gases," in which that eminent English scientist explains the remarkable manner in which purely theoretical studies led to the discovery of the new elements, Helium and Neon. In the "Fortnightly," the article of most interest to American readers is a very realistic account of life in the Klondike, written evidently by one who has been through that rough experience.

The December "McClure's" is notable for a paper by Capt. Alfred T. Mahan on the lessons of the Spanish War. He takes occasion to roundly condemn the building of monitors, and remarks that there was not an hour throughout the late war when we would not have been glad to exchange all our six monitors for two battleships of much less cost and total tonnage. In fact he declares that the two popular errors that have worked most injury to the nation's naval strength are that the navy should be designed for defensive instead of offensive action, and that the monitor is an efficient type of war vessel. "McClure's" also contains two good railway stories; one by Mr. John Hill, of the "American Machinist," and the other by Capt. J. E. Brady, describing the life of a train dispatcher.

In "The Cosmopolitan" we find a brief account of the late Col. Waring's work in organizing the street cleaning department of New York city; and Sir Norman Lockyer the English astronomer, tells of the expeditions to India of astronomers of all countries to observe the total eclipse of the sun, which occurred last January. In the Christmas "Harper's," the thrilling story of how the "Winslow" was rescued, is told by Lieut. Ernest E. Mead, of the U. S. Revenue Cutter Service. In "The Coming Fusion of the East and West," an American, long resident in Japan, urges that England, the United States and Japan join hands to rescue China from partition among European nations. The writer appears too enthusiastic, and deals too much in broad generalities to be a very safe guide; but he writes of many recent happenings in the East that are at least worth knowing by those interested in the study of international politics. A much more valuable paper in the same field we find in the December "Scribner," where Hon. Joseph Chamberlain writes on "Recent Developments of Policy in the United States." Mr. Chamberlain outlines the methods by which England has been successful in governing her tropical colonies, and thinks the United States can do as well. In the same magazine the capture of Manila is described by Capt. T. B. Mott; and R. H. Davis tells of life in the rifle-pits before Santiago during the two weeks that elapsed from Cervera's flight to the city's surrender.

The December "Atlantic" has three articles discussing the new "expansion policy," and an excellent paper on "California and the Californians," by President David Starr Jordan, of Leland Stanford University. In the "Review of Reviews," Wm. E. Curtis tells the story of the recent coup d'etat in China, and a very different story it is from that which has appeared in fragmentary shape in the newspapers. Dr. Albert Shaw writes a brief account of Col. Waring's life and work. The most valuable paper in the magazine, however, is that in which Lieut. John H. Parker criticises the methods by which our army supply departments are now conducted and points out the need of a general staff in our army—a need which it is to be hoped the present Congress may supply. "Forest Fires" and the methods of preventing them are considered by Mr. Henry Gannett, of the U. S. Geological Survey, in the December "Forum," and in the same magazine the very limited scope of the Sherman anti-trust act as interpreted by the Courts is explained.

In the December "Popular Science Monthly," Edward Atkinson writes on "The Wheat-Growing Capacity of the United States," and endeavors to prove that we have but just begun to show what we can do in producing breadstuffs to feed the world. "The Reorganization of the Naval Personnel" is the title of a symposium with which the "North American Review" opens. Among the contributors are Theodore Roosevelt, Commodores Philip and Melville and Hon. Francis H. Wilson. "The Latest Aspects of the Nicaragua Canal Problem" are discussed by C. M. Stadden; but the kaleidoscope is changing so rapidly here that this article is hardly up to date when it appears in print. Besides these articles the magazine also contains papers on the "Decision Against Railway Pooling," by President Roswell Miller, and "The Scientific Prevention of Yellow Fever," by Dr. A. H. Doty, Health Officer of the Port of New York. In the December "Century" Naval Constructor Hobson begins the story of the sinking of the "Merrimac," in the attempt to cork up the entrance to Santiago Harbor, and Capt. Sigsbee gives the second installment of his narrative of the loss of the "Maine." These "Century" articles undoubtedly deserve to rank among the most valuable contributions to the history of the recent war that have appeared in any of the magazines.

WATER SUPPLY DEPARTMENT OF QUEENSLAND.—Report of the Hydraulic Engineer, J. B. Henderson, M. Inst. C. E., for 1896-7. Address the Department, Brisbane, Queensland, Australia. Paper; 8 × 13 ins.; pp. 52; tables and plates.

This report contains a variety of interesting information regarding the urban and rural water supply of Queensland, including that from artesian wells. Rainfall and other diagrams and a number of maps are presented, together with some good reproductions of photographs of artesian wells.

DIVISION OF FORESTRY.—U. S. Department of Agriculture. Bulletin No. 19. Progress in Timber Physics. The Bald Cypress (Taxodium distichum). Paper; 11½ × 9¼ ins.; pp. 24.

The Bald Cypress, here described by Mr. Filibert Roth, is one of the important timber trees of the Southern States and differs from other conifers in losing its foliage in the winter. It has many local names but in the trade the adjective is usually dropped. The best authorities figure the supply of cypress at 27,000 million ft. B. M., and the annual cut is placed at about 500 million ft. B. M., mostly from Louisiana. The cypress wood is of dark color, medium weight and strength, great durability, fine even grain, slow to dry but easily worked, and especially adapted for use as shingles. The report enters fully into specific weights, moisture and shrinkage, strength and test results with differing percentages of moisture.

REVENUE AND EXPENSES OF BOSTON, 1892-6.—Special Publications, Department of Municipal Statistics. No. 1, Estimates, Appropriations and Actual Expenditures of Ordinary Revenue. No. 2, Ordinary Revenue. Address the Department. Paper; 9 × 12 ins.; pp. 105 and 38; tables.

These are the first issues of special publications of the recently established Department of Municipal Statistics. They present in some detail the ordinary receipts and expenditures of the city of Boston for the past five years, together with the estimates by and appropriations to the several departments. The figures were compiled from the reports of the city auditor and were designed, among other things, to aid the city officials in making up their appropriations for the coming year. As a survey of the financial operations of the whole city for five years, by a board having no possible interest in anything but a presentation of facts, these and the proposed supplementary reports promise to be of great value to Boston and suggestiveness to other cities.

TRADE PUBLICATIONS

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

ACETYLENE GAS FOR POPULAR LIGHTING.—Pan-American Acetylene Co., Buffalo, N. Y. Pamph.; 3½ × 6¼ ins.; pp. 32.

This little pamphlet describes the principles of the manufacture of carbide of calcium and of acetylene gas, and advertises the merits of the gas for domestic lighting purposes and of the "Buffalo" gas generator. It gives the best brief popular account of acetylene we have yet seen.

STEAM ENGINES.—The Westinghouse Compound Engine. Westinghouse Machine Co., Pittsburg, Pa. Pamph.; 9 × 6 ins.; pp. 94.

This pamphlet describes and illustrates the well-known Westinghouse automatic cut-off single-acting compound non-condensing engines, and discusses its various points of merit. It is written in an interesting and rather unusual style, and is well worth reading by steam engineers. We notice especially a photographic copy of an office record of a brake, indicator, and steam consumption test of an 11 and 19 × 11-in. engine at three different loads, viz., 113, 61 and 35 HP., showing a water rate per I. HP. per hour of 22.41, 23.61 and 29.15 lbs. and a water rate per brake HP. per hour of 24.16, 27.1 and 38.6 lbs., respectively, for the three different loads. This is no doubt excellent performance for a small non-condensing engine, but to us the most remarkable thing about the record is that, as far as we know, no other engine builder publishes in his catalogue any record whatever of actual steam consumption tests of engines under variable loads. The example set by the Westinghouse Company should be followed by other builders.

RAILWAYS.

ARGENTINE.—Press reports state that Herr Schiffner has returned to Berlin, Germany, from Buenos Ayres, with concessions approximately comprehending 2,000 miles of proposed railway.

ARIZONA.—Work has begun on the construction of a railway from Kingman to White Hill, Mojave county, Ariz., a distance of about 54 miles, according to reports. The line will pass through one of the richest mining sections of Arizona. Work will begin at McConnico Junction, four miles west of Kingman, and an entrance will be gained into Kingman over the tracks of the Atchison, Topeka & Santa Fe Ry.; the heaviest grade will not exceed 1.85%. Theodore B. Comstock, Ch. Engr., Los Angeles, Cal.

ATCHISON, TOPEKA & SANTA FE.—At the annual meeting of this company at Topeka, Kan., Dec. 8, the directors formally ratified the purchase of the San Francisco & San Joaquin Valley Ry., by which an entrance will be made into San Francisco, and also of the Kansas City, Topeka & Western Ry., the Leavenworth Northern & Southern Ry., the Southern Kansas Ry., the New Mexico & Southern Pacific Ry., the New Mexican Ry., the Rio Grande, Mexico & Pacific Ry., the Silver City, Deming & Pacific Ry., the Wichita & Western Ry., and the St. Joseph, St. Louis & Santa Fe Ry.

BLACK DIAMOND.—Col. Albert E. Boone, Pres., Zanesille, O., informs us that the Ghent-Vevay Bridge & Terminal Ry. Co. was incorporated in Kentucky, Dec. 6, and that it proposes to build across the Ohio River for the northern outlet of this projected system. Location has been made for this bridge and for that to be built by the Dover-Ripley Bridge & Terminal Ry. Co., on main line at Dover, Ky. We are also informed that contract for work between Cynthiana and Vevay will not be awarded until about May, but that the first steps towards receiving bids will be taken in January or February.

BRIDGEPORT & HELENA.—Reports state that this company, which was incorporated in Oregon last June to build a line from Bridgeport, Ore., to Helena, Mont., has completed surveys from Helena to the Seven Devils mining district. W. Thos. Hart, Pres., Weiser, Idaho.

BRITISH COLUMBIA.—Reports state that applications will be made to the legislature of British Columbia for power to construct the following lines: From Fort Simpson to Glenora or Telegraph Creek, on the Stikine River, B. C.; from the main line of the British Columbia Yukon Ry. to Tagish Lake, and thence to Atlin City; also for a railway from Golden, on the main line of the Canadian Pacific, to Cranbrook, on the Crow's Nest Pass branch, a distance of about 150 miles.

CALIFORNIA.—Plans are about consummated for the construction of a new narrow-gage railway from Truckee, Cal., to Lake Tahoe, about 15 miles south. N. K. Masten, Pres. of Maricopa & Phoenix and Salt River Valley R. R. Co., San Francisco, Cal., is said to be interested.

CHOCTAW & MEMPHIS.—Johnson Bros. & Faught, St. Elmo, Ill., and J. H. McCarthy & Reichardt, Little Rock, Ark., general contractors, have sub-let work to the following contractors for the construction of this new line from Little Rock, Ark., to Howe, Ind. Ter., 164 miles: M. A. Wogans, St. Joseph, Mo.; Mike Tansy, St. Louis, Mo.; W. M. Powell, Oklahoma City, Okla.; Jacob Collins, Kansas City, Mo.; A. G. Brown, St. Elmo, Ill.; R. Morris, Beloit, Kan., and Welch Bros., St. Elmo, Ill. J. F. Cullens, of St. Louis, will do the masonry work. Grading is now in progress from Little Rock west to Danville, 80 miles; the maximum grade is one per cent, compensated, and the maximum curves, seven degrees. F. A. Molitor, Ch. Engr., Little Rock, Ark.

CLEVELAND, LORAIN & WHEELING.—Press reports state that this railway has been purchased by the Federal Steel Co., and that several extensions will probably be built.

DAYTON & FAUNSDALE.—G. L. Siddons, Pres., Siddonsville, Ala., informs us that ten miles of this proposed line has been graded between Dayton and Faunsdale, and 40 miles located and rights of way secured; capital has been secured only for the first ten miles. N. McKay, of New York, is to build and equip this section before March 1, and other contracts will be let when bonds are sold. The projected route is 110 miles in length from Linden, via Dayton and Faunsdale, and thence to Greensboro and Tuscaloosa, or to Marion, Centerville and Blocton, Ala. J. D. Jones, Ch. Engr., Shiloh, Ala.

DETROIT & MACKINAC.—The railway commissioners have approved of the map for the extension of this railway through the counties of Presque Isle, Cheboygan and Iosco.

EGYPT.—Reports state that plans are being formulated for the extension of the Soudan Ry. to Khartoum, 180 miles, and to other points, and that orders for bridges are now being placed with British firms.

FARMVILLE & POWHATAN.—This company contemplates the extension of its lines from Chester to Manchester, Va., and has had J. S. Taylor, J. A. Brown and others appointed as commissioners to secure the right of way. C. P. E. Burgwyn, Ch. Engr., Richmond, Va.

GRAND RAPIDS, BELDING & SAGINAW.—Andrew Fyfe, Secy., Grand Rapids, Mich., informs us that the right of way has been secured and that surveys are being perfected for this proposed line from Lowell to Belding, via Alton and Smyrna, Mich., about 17 miles. It will serve as an extension of the Lowell & Hastings R. R. W. A. Smith & Co., Grand Rapids, Mich., is said to hold the contract. Thomas Hefferan, Pres., Grand Rapids; C. A. Gordon, Ch. Engr., Hermitage Bldg., Grand Rapids.

JAMESTOWN TERMINAL.—This company, which was incorporated Nov. 9, expects to build a short line in Jamestown, N. Y., from the terminus of the Jamestown & Lake Erie Ry., for freight purposes, with possible extensions later on to Falconer. The incorporators are: Samuel A. Briggs, William J. Maddox, John W. Doubleday, T. H. Smith, O. E. Jones, and others.

KANSAS & SOUTHERN.—This company was organized in Kansas, Dec. 3, with a capital stock of $100,000, to build nine miles of railway in Pottawatomie county. The directors are: Irving H. Wheatcroft, St. Louis, Mo.; C. B. Holmes, New York; A. J. Clark, New Orleans, La.; George C. Moore, Montreal, Que.; J. L. Rodgers, J. K. Codding and T. R. Cave, Westmoreland.

NEW YORK & PENNSYLVANIA.—Theodore Cobb, Contractor, Spring Mills, N. Y., informs us that he has about completed the construction of the extension to this line through Oswayo, Hebron and Clara townships, Potter county, Pa., six milus. William Cobb, Pres., Spring Mills; H. J. Rumsey, Ch. Engr., Oswayo, Pa.

NORTHERN PACIFIC.—Wren & Greenough, Spokane, Wash., are said to have been awarded the contract for the construction of a spur up Lapwai Creek, from Spaulding, Idaho. Right of way through the Caldwell grant has been secured.——Three and a half miles of the branch line being built from near Carbonado to the new Fairfax mines, in Pierce county, Wash., are finished, and it is expected to have the remainder of the line ready for use March 4. The extension will be about seven miles long and will be laid with 56-lb. rails. Three or four hundred men are working on the construction. E. H. McHenry, Ch. Engr., St. Paul, Minn.

OHIO.—The Eastern Ohio & West Virginia Mining has taken an option on 200,000 acres of land in the vicinity of the Ohio Valley, according to reports, on which extensive coal operations will soon be begun. The opening up of the district will require many miles of railway and sidings. O. E. Psarts, Ch. Engr., Canton, O.——Reports state that the Federal Steel Co. is considering the advisability of building a railway from its Lorain plant to Cleveland, O., about 25 miles.

PORTO RICO.—We are informed that J. G. White & Co., Engineers and Contractors, 29 Broadway, New York, have bought the eight existing miles of narrow-gage steam tram railway, now in operation in and near San Juan, Porto Rico. No immediate changes, either in the gage or the motive power, are projected.

RIO GRANDE. SIERRA NEVADA & PACIFIC.—J. Fewson Smith, Ch. Engr., P. O. Box 431 Salt Lake City, Utah, informs us that the current reports regarding the extension of this railway from Casa Grande, Mexico, to the Yaqui Gold country, 80 miles, are entirely premature, as no decision has yet been reached by the company.

SCRANTON, HONESDALE & EASTERN.—Press reports state that this company will soon be incorporated in Pennsylvania and New York, with a capital stock of $9,000,000, to construct a railway from Carbondale to the Hudson River, along the Delaware & Hudson Canal, via Honesdale, Pa., and Port Jervis and Rondout, N. Y., 138 miles. It is designed to provide an outlet from the Lackawanna coal fields to tidewater. It is also stated that the London Railway Construction Co., Ltd., has awarded to a Chicago firm the contract for constructing a tunnel through the Moosic Mountains, 8,642 ft. in length, 14 ft. high, and 14 ft. wide, to be completed by Jan. 1, 1900, at a cost of $421,730, or $65 a lin. ft.

SHAWNEE, GUTHRIE, & NORTHWESTERN.—This company was incorporated in Oklahoma, Nov. 29, with a capital stock of $50,000, to construct a railway from Shawnee to Guthrie and west, via Enid or Kingfisher, Okla. The officers are: Pres., Henry Hudson; Vice-Pres., H. L. Miller; Secy., A. H. Humphrey; Treas., J. W. McNeal; directors, Henry Hudson, of Chicago; H. L. Miller, Guthrie, Okla.; W. S. Search, Shawnee, Okla., and others.

SUMMITVILLE, BLUE MOUNTAIN, WALLA WALLA.—Reports from Walla Walla, Wash., state that surveys are being made for this proposed line between Walla Walla and Union, Ore., a distance of about 80 miles. P. J. Taylor, Pres.; L. B. Rhinehart, Supt. of Construction.

TENNESSEE CENTRAL.—Naugle, Holcomb & Co., 355 Dearborn St., Chicago, Ill., are reported to have been awarded the general contract for building this entire line, work to be done by the Cumberland Const'n Co.; N. C. Chapman, Pres., St. Louis, Mo. The contract includes grading, tracklaying, bridges and materials, except rails, and fastenings and equipment. The 60-mile section of the road between Monterey and Harriman, Tenn., will be completed first. Grading was completed on 45 miles several years ago under Jere. Baxter, Pres., Nashville, Tenn. G. T. Bigelow, Ch. Engr., Rockwood, Tenn.

STREET AND ELECTRIC RAILWAYS.

BRIDGEWATER, MASS.—The Brockton, Bridgewater & Taunton St. Ry. Co. has filed a petition with the selectmen of Bridgewater, asking permission to lay a branch track from the main line to the power station. G. H. Campbell, Pres., Brockton, Mass.

LAKEVILLE, MASS.—A public hearing will be given in this town, Dec. 17, on the application of the Taunton & Middleboro St. Ry. Co. for a location in Lakeville. Nathaniel G. Staples, First Selectman.

EAST GREENWICH, R. I.—The Providence & East Greenwich Electric Traction Association has been organized in Providence, R. I., to promote the extension of electric railway service between Providence and this village; the extension of the Union R. R. Co.'s tracks is especially desired. Louis K. Potter, Pres., Cowsett, R. I.; L. D. Pierce, Secy., Norwood, R. I.

CROMWELL, CONN.—It is reported that F. W. Siebert, Edward W. Shedd and C. Siebert will apply to the incoming legislature for a charter to build an electric railway in Cromwell.

MERIDEN, CONN.—The Meriden, Southington & Compounce Tramway Co. contemplates increasing its capital stock to $500,000, and the extension of its tracks from Milldale to Mt. Carmel, to Waterbury, to Meriden and to Berlin, by an independent route, and to Plainville from its present Southington terminus, from Dunham's on Queen St. to Compounce Lake; and to build a cable line to West Peak. Francis Atwater, Pres., Meriden.

MOUNT VERNON, N. Y.—The council, Dec. 6, granted a franchise to the New York, Westchester & Connecticut Traction Co. to build extensions connecting its lines through Mount Vernon with Pelham, White Plains and Harlem. Frederick C. Cocheu, 189 Montague St., Brooklyn, N. Y., is said to be interested.

ROME, N. Y.—A hearing will be given in this city, Jan. 16, on the application of the Rome City St. Ry. Co. and the Utica Suburban St. Ry. Co. for a franchise to build through this city. John W. Boyle, Pres., of Utica Co., Utica; J. S. Wardwell, Pres. of Rome Co., Rome.

SARATOGA, N. Y.—The Saratoga Traction Co., which runs from Saratoga to Saratoga Lake and the Geysers, will, it is stated, continue the trolley system from the Geysers to Ballston Spa, a distance of five miles. R. E. Dunston, Mgr.

BOUND BROOK, N. J.—The council has passed an ordinance granting a franchise to the Philadelphia Traction Co. to build an extension on East Main St. to connect the New Brunswick line with that running to Somerville and to Plainfield.

CLIFFSIDE, N. J.—Reports state that the Bergen County Traction Co., office address, foot West 130th St., New York, has decided to build a spur line from Fort Lee Ferry at Undercliff to Hudson county, via Cliffside, connecting with the North Hudson County Ry.

LODI, N. J.—Colin R. Wise, Ch. Engr., Passaic, N. J., informs us that surveys have all been made and franchises obtained for the proposed 2½ miles of electric railway to be built for the Saddle River Traction Co. from Passaic to Lodi. Rails, ties and poles are all purchased; power will be obtained from the Passaic Lighting Co. as stated in our issue of Dec. 1. the contract for the work has been let to Sanford & Stillman, 26 Exchange Place, Jersey City, N. J.

HARRISBURG, PA.—The extension of the lines of the Harrisburg Traction Co. from Progress to Linglestown and Cahoe's Springs is under contemplation.

PERKASIE, PA.—The council has granted a franchise to the Quakertown Traction Co. to build in this borough. C. Taylor Leland, Pres., Quakertown, Pa.——Messrs. Trelly and Pascoe, of the Inland Traction Co., also have franchises to build from Perkasie to Lansdowne.

PHILADELPHIA, PA.—The council has been petitioned to permit the Union Traction Co. to extend its tracks on 4th St., from Snyder Ave. to Ritner St., and to erect string wires on Island Road and Eastwick Ave.; also to permit the Delaware & Schuykill Electric Ry. Co. to lay tracks in the 28th and 32d Wards.

POTTSTOWN, PA.—The Montgomery & Chester Electric Ry. Co. was incorporated, Dec. 9, with a capital stock of $300,000, to construct and operate an electric street railway between Pottstown, Montgomery county, and Phoenixville, Chester county, Pa., a distance of 17 miles. The incorporators are: Daniel S. Mann, Pres., 49 North 13th St.; Wm. H. Grebe and Claude S. Jarvis, all of Philadelphia, Pa.; Geo. F. P. Wanger, Pottstown; J. G. MacPherson, Washington, D. C.

STONEYCREEK MILLS, PA.—Reports from Oley, Pa., state that Davis Bros., engineers for the Reading Traction Co., Reading, will soon begin surveys for an electric railway to connect Stonycreek Mills and Friendensburg.

BALTIMORE, MD.—Press reports state that the Baltimore & Northern Electric Ry. Co., H. A. Parr, Pres., has secured control of the Baltimore City Passenger Ry., including 26 miles of line.

CUMBERLAND, MD.—Isaac A. Walker & Son, engineers and contractors, 1218 Stephen Girard Bldg., Philadelphia, Pa., inform us that they have bought the franchises and charters of the Cumberland & Frostburg, the Frostburg & Lonaconing and the Lonaconing & Westernport R. R. Co.s, formerly controlled by J. W. Burchinal, Moundsville, W. Va., and others. The route is from Elkhart, Md., through Frostburg, Midland, Lonaconing, Westernport and ten other towns, 27 miles. Surveys are now being made, and construction is expected to be started by March 1. T. D. Howell, Ch. Engr., Philadelphia.

WASHINGTON, D. C.—Theodore J. King, Ch. Engr., 1509 Florida Ave., N. E., informs us that the grading for a new section of the Columbia Ry. along Benning Road, will be done by John Jacoby. The new power house and motor equipment will be furnished by the General Electric Co.; the engine by the E. P. Allis Co., and the boiler by Campbell & Zell Co. Nathaniel Wilson, Pres.——The following street railway bills have been introduced in Congress: To extend the Metropolitan R. R. by underground electric up Brightwood Ave. to Rock Creek Church Road; also up 11th St., extended through Columbia Heights and westward through Mount Pleasant; to extend the same line from its present terminus at Columbia Road and 18th St., through Lamier Heights and Mount Pleasant, and to extend the line from Lincoln Square down 11th St. east to connect with the Anacostia line.

PETERSBURG, VA.—The Virgina Traction Co. has been organized in this city, according to reports, with the following officers: T. O. Troy, Pres., Charlottesville, Va.; Augustus Wright, Vice-Pres., Petersburg; R. J. Spartley, Treas., Petersburg; and others.

BIRMINGHAM, ALA.—The Bloomfield & Orchard Lake Ry. Co. has been incorporated with a capital stock of $25,000, to construct a street railway to Orchard Lake, by Almeron Whitehead, of Birmingham, and others. The franchise was granted Nov. 26, as stated in our last issue.

GADSDEN, ALA.—The address of the Gadsden & Attala Union Ry. Co. which has made arrangements to operate its line by electricity is as above, and not Gadsden, Tenn., as stated in our last issue.

TOLEDO, O.—The Toledo, Maumee & Perrysburg Electric R. R. Co. is said to contemplate the construction of a $40,000 power house at Miami. Extensions in the spring to Waterville and Woodville are also projected. J. K. Tillotson, Pres. and Mgr.

WARREN, O.—It is reported that the Cleveland & Chagrin Falls Electric R. R. Co. has issued $300,000 in bonds, and that an extension to Warren will be built at once. V. A. Taylor, Pres., American Trust Bldg.

RICHMOND, IND.—Wm. A. Pickens, Indianapolis, Ind., through A. C. Lindemuth, of this city, has applied to the council for a franchise to build a railway through this city, using either steam, electric or other motive power.

HOWARD, ILL.—It is reported that H. N. Bates, Gen. Mgr. of the Continental Construction Co., Boston, Mass., has offered to build and equip the projected electric railway from Howard to the head of Geneva Lake.

OREGON, ILL.—Fred G. Jones, Vice-Pres., Rock River Electric R. R. Co., informs us that contracts will be let before Dec. 20 for the construction of this proposed electric railway from Oregon to Rockford, via Byron, Ill., 30 miles. Surveys have been made and most of the right of way secured. E. M. Hopkins, Chicago, Ill.; J. B. Bertolet, Ch. Engr., Leaf River, Ill.

MILWAUKEE, WIS.—George H. Sager, of Chicago, has applied to the council for a franchise to build a competitive street railway system in this city.

KANSAS CITY, MO.—Bids are asked by the North East Electric Ry. Co., according to reports, for the rebuilding of its road, including a new steel bridge at Agnes Ave.; estimated cost, about $200,000; W. M. Reid, Pres.

FORT SMITH, ARK.—Reports state that the Midland Land Co., recently organized in this city, contemplates the building of an electric line to Van Buren.

PINE BLUFF, ARK.—The Pine Bluff Electric Light & St. Ry. Co. was incorporated in Arkansas, Dec. 6, with a capital stock of $300,000, with $175,000 subscribed, to build an electric street railway in this city. Jeff. Hicks, Pres.; Thos. L. Chadbourne, Jr., Vice-Pres.; H. H. Hunn, Secy. and Treas.; all of Pine Bluff.

WARDNER, IDAHO.—The Wardner & Kellogg Electric Ry. Co. has been incorporated with a capital stock of $500,000, to construct a line between Kellogg and Wardner. The incorporators are: Bartlett Pressey, Kellogg, Idaho; Wm. W. Woods, Wallace, Idaho, and others.

PARIS, FRANCE.—Press reports state that the General Electric Co., Schenectady, N. Y., has received a large order for the equipment of a terminal section of the Chemin de Fer d'Orleans, a suburban railway to Paris.

ELECTRIC LIGHT AND POWER.

CAMPTON VILLAGE, N. H.—It is stated that this place has decided to put in electric lights.

BOSTON, MASS.—Bids are asked until Dec. 23 for extending the wiring system and power plant at the Boston navy yard. M. T. Endicott, Ch. Bureau Yards & Docks, Washington, D. C.

FAIRFIELD, CONN.—F. W. Siebert, Edward W. Shedd and C. Siebert, it is reported, will ask the legislature, soon to be in session, for a charter to furnish light and water to Southport and Fairfield. Chas. Sherwood, Pres. Bridgeport Hydraulic Co., Bridgeport, Conn., may be able to give information.

CAMILLUS, N. Y.—The Globe Milling Co., it is stated, proposes to put in electric lights at its mill. The plant may be used for street and commercial lighting.

LOCKPORT, N. Y.—Local papers state that the manufacturers at this place propose to build a dam for furnishing sufficient water power during the winter. Chas. T. Raymond, Mgr., and Jos. Eilers, Supt. Lockport Pulp Mill, may be addressed.

NORTH TONAWANDA, N. Y.—The aldermen have granted a franchise to the Niagara Falls Power Co. The city will, after three years, receive from the power company 2½% of the gross receipts.

ONONDAGA VALLEY, N. Y.—E. J. Clark writes us that no plant will be put in at present.

GIBBSTOWN, N. J.—The Repauno Chemical Co., Repauno, N. J., and 97 Cedar St., New York, has let the contract to the Tucker Electrical Construction Co., 14 Whitehall St., New York, for the entire lighting and power plant for the Repauno works. General Electric machinery will be used. The plant will have about 100 HP.

PATERSON, N. J.—Bids are asked until Dec. 27 for a system of iron armored conduits or cold-drawn steel tubing with interior non-corrosive lining, or tubing equal thereto, wiring and distribution tablets, in the U. S. post office. O. L. Spaulding, Acting Secy. Treasury Dept., Washington, D. C.

BELLEVUE, PA.—The Pennsylvania Light, Heat & Power Co. has asked for a franchise to operate a plant. The plant will be built on the Ohio River front.

ELLWOOD, PA.—It is stated that an election will be held Dec. 20 to vote on the question of issuing $8,000 in bonds for a plant.

PHILADELPHIA, PA.—Bids will soon be asked by the park commission for furnishing electric lights in the parks. The contractor will be required to lay 2,000 ft. of conduit in each park.

HAGERSTOWN, MD.—E. M. Schindel, Mayor, has signed the ordinance authorizing the establishment of a municipal plant, at a cost of $60,000. The city at present is lighted by the Hagerstown Ry. Co., the contract for which will expire in two years.——The Western Maryland R. R. Co., it is stated, has decided to build a plant for its yard in this city. J. M. Hood, Pres. and Gen. Mgr., Baltimore.

WASHINGTON, D. C.—Bids are asked until Dec. 27 for manufacturing and placing in the post office building combined gas and electric light fixtures. O. L. Spaulding, Acting Secy. Treasury Dept.

SMITHFIELD, VA.—J. W. Holloway writes us that the contracts for the proposed plant have been made.

ASHEVILLE, N. C.—M. W. Robertson, Cy. Clk., writes us that bids for electric lighting were not coming in to the satisfaction of the board; it was therefore decided on Dec. 2 to renew the contract with the Asheville Electric Co. for one year, at $85 a light. In the meantime, the city is open for a long term contract or for the purchase of a plant.

ORANGEBURG, S. C.—It is stated that bids are wanted until about Dec. 19 for furnishing the materials and for building a plant, water-works and a sewerage system; estimated cost, $55,000. Frederick Minshall, Engr., 150 Nassau St., New York, and Pocomoke City, Md.

YORKVILLE, S. C.—T. B. McClain, it is stated, proposes to build a plant for his cotton mill. The plant will probably have capacity to furnish light for the town.

NEW ORLEANS, LA.—The Western Electric Co., 227 South Clinton St., Chicago, has been awarded the contract for building the plant at Gravier and Clark Sts. for the Merchants' Electric Light & Power Co., to cost about $300,000. The plant will be operated under the franchise granted to Cohn & Ber. M. Ber, Pres.; C. A. Gaines, Ch. Engr.

NEW HAVEN, KY.—The "Echo" is urging the construction of a power plant at this place. Some years ago the late Col. John C. Broadhead made a survey for a water power plant to furnish 900 HP.

CLEVELAND, O.—Bids are asked until Dec. 21 for furnishing 878 arc lights for one year. Geo. R. Warden, Dir. Pub. Wks.

INDIANAPOLIS, IND.—Local papers state that the Chenoweth Light & Power Co. has filed with the board of public works an application for a franchise. A plan of overhead wires outside of the mile square was also filed. The company will cater only for that part of the city outlying the territory bounded by North, West, South and East Sts. Daniel A. Chenoweth, Pres., writes us that the plant will be operated by gas. Estimated cost, $25,000.

ALLEGAN, MICH.—The council has refused to award a 10-year contract to the Kalamazoo Valley Electric Co.

CHARLOTTE, MICH.—Press reports state that another election will soon be held to vote on the question of building a municipal plant.

FLAT ROCK, MICH.—Geo. Williams, Editor, writes us that a local merchant offered to put in a plant if he could get 300 lights subscribed for at 43 cts. a light a month. He could get but 150 lights engaged, and has decided not to put in the plant.

SAULT STE. MARIE, MICH.—Local papers state that the Chandler-Dunbar Water Power Co. will build a power plant at St. Mary's Falls, to develop about 30,000 HP. Plans are said to have been prepared and arrangements are soon to be made for the machinery. Estimated cost, $1,500,000. Wm. Chandler, Pres., Sault Ste. Marie.

ROCKFORD, ILL.—The Rockford Ry., Light & Power Co. has certified to an increase in the capital stock from $250,000 to $350,000.

MARSHALLTOWN, IA.—A committee is reported to have been appointed to consider the question of putting in a city plant. Population, 10,000. F. G. Pierce, Mayor.

OLIVIA, MINN.—F. McCormick, of Duluth, Minn., is reported to have made arrangements for a plant for this place.

HASTINGS, NEB.—It is stated that Denver parties have offered to purchase the plant of the Hastings Electric Co. If it is purchased a number of improvements to it will be made.

TOPEKA, KAN.—Bids are asked by the city clerk for a new engine for the electric plant, to cost $7,000.

MAYSVILLE, MO.—The question of having a municipal plant or of letting the contract for electric lighting is being considered.

ST. LOUIS, MO.—We are informed as follows in regard to the proposed municipal plant for this city: No plans have been secured, no money appropriated and no contracts awarded for the plant. The committee of the board of public improvements on electric lighting, consisting of M. L. Holman, Water Comr.; Robt. E. McMath, Pres., and B. H. Colby, Sewer Comr., has, within the past two years, drawn and sent to the municipal assembly 14 electric light ordinances, covering the field completely and providing for electric lighting and gas lighting, but every ordinance has been killed or filed, with the exception of the first one, which passed, and under which the board advertised for bids but received none. The committee has now drawn another ordinance for electric lighting, by contract, for a term of 10 years, and will present the same to the board of public improvements for approval about Dec. 13, and after approval it will go to the assembly for action the same day. The assembly can reject or pass ordinances sent from the board, but does not have the power to amend. The project for municipal ownership has, for the present, been abandoned, owing to financial reasons.

PALOUSE, WASH.—Codd & Mackenzie, owners of the plant at Colfax, Wash., have offered to erect a plant in this place, at a cost of about $10,000.

FULLERTON, CAL.—It is stated that sites for a plant are being considered.

WOODSTOCK, ONT.—Press reports state that the question of the city purchasing the plant of the Woodstock Electric Light, Power & St. R. R. Co. is being considered.

NEW COMPANIES.—Delaware County Electric Light & Power Co., Clifton Heights, Pa.; $5,000; Chas. M. Wagner, Lansdowne, Pa.; Richard L. Austin, Philadelphia; Jas. S. Austin, Yeador, Pa.

New York Gas and Electric Light, Heat & Power Co., Cable Bldg., New York; Wm. C. Whitney, Roswell P. Flower, New York; Thos. Dolan, Philadelphia.

BRIDGES.

BOSTON, MASS.—A hearing was given Dec. 8 by the street commissioners on the question of extending Atlantic Ave. to Dorchester Ave., South Boston, by a bridge over the tracks of the Terminal Co. and over Fort Point Channel. Nothing definite has been decided. It is proposed to give at least two other hearings. J. H. Benton, Jr., Counsel, Terminal Co.

MOUNT VERNON, N. Y.—The plans and specifications prepared by the New York, New Haven & Hartford R. R. Co. for a new bridge at Third Ave., have been approved by the board of aldermen. The contract is soon to be awarded.

RENSSELAER, N. Y.—Bids are asked until Dec. 20 for extending Washington St. and constructing an iron bridge over Mill Creek. The bids received Dec. 6 were rejected. C. A. Ryan, Cy. Clk.

WATERTOWN, N. Y.—The board of public works is considering the question of replacing the old bridge at Court St. The city engineer will correspond with several bridge companies, and an expert will probably be secured to examine the old structure.

PHILADELPHIA, PA.—A bill has been introduced by Councilman Large, appropriating $75,000 for the construction of a bridge over the Pennsylvania R. R. at 42d St.

WASHINGTON, D. C.—The committee on interstate and foreign commerce is considering the question of constructing a memorial bridge across the Potomac River to connect West Washington with the government reservation at Arlington, Va.; estimated cost, about $1,250,000.

SELMA, ALA.—Bids are asked by the county clerk until Dec. 21 for the purchase of $65,000 of 6% bridge bonds.

SCRANTON, MISS.—The county supervisors awarded a contract Dec. 6 to the Geo. E. King Bridge Co., Des Moines, Ia., for a steel bridge across Cedar Creek.

CANTON, O.—The construction of a viaduct from near Newton St. to Hazlett Ave. is being talked of. The question will probably be submitted to the council in a few weeks. Thos. J. Bidwell, Township Trustee.

ZANESVILLE, O.—The contract for the erection of the iron approach to the Monroe St. bridge was awarded by the county commissioners Dec. 7, to the King Bridge Co., Cleveland, at $13,600.

DETROIT, MICH.—Reports state that the Detroit & Lima Northern Ry. bridge over the Huron River, near Flat Rock, has fallen. C. H. Roser, Ch. Engr., Detroit.

SAGINAW, MICH.—The street railway company has decided to erect an iron bridge across the river at Bristol St. to replace the wooden structure, according to reports.

ARCADIA, WIS.—Reports state that at a special election this place voted to construct a bridge across the Trempealeau River.

MILWAUKEE, WIS.—G. H. Benzenberg, Cy.Engr., submitted plans Dec. 5 to the council for the construction of a viaduct over Kinnickinnie Ave., between Maple and Beacher Sts. The structure to be a double-deck rolling bascule 1,720 ft. long and about 60 ft. wide, estimated cost, $184,000.

DULUTH, MINN.—R. Murchison, Clk. Bd. Pub. Wks., informs us that the steel bridge across Fischer's Creek, which was destroyed Nov. 29, is being replaced by a temporary wooden structure under the direction of Thos. F. McGilvray, Cy. Engr.

MINNEAPOLIS, MINN.—The following bids were received Dec. 9 for the steel and iron work for widening the stone arch bridge over the East Channel of the Mississippi River. Material to be furnished f. o. b. cars:

Toledo Bridge Co., Toledo, O	$10,990
Chicago Bridge & Iron Co., Chicago, Ill	10,996
Hoff Bros., Minneapolis, Minn	11,787
Penn Bridge Co., Beaver Falls, Pa	11,240
American Bridge Works, Chicago, Ill	14,540
Wrought Iron Bridge Co., Canton, O	12,093

ST. PAUL, MINN.—It is reported that about 150 ft. of the St. Paul & Duluth R. R. bridge at 6th St., fell Dec. 7. C. J. A. Morris, Ch. Engr., St. Paul.

BLAIR, NEB.—Bids are asked until Dec. 20 for the construction of steel bridges for the year 1899, according to reports. Watt Gauldrie, County Clk.

GRAND ISLAND, NEB.—Arnold C. Koening, County Surveyor, writes us under date of Dec. 5 in regard to a proposed bridge over the Platte River, five miles south of this place, to be constructed by Hall county. The Platte River is divided into four channels at this point aggregating 2,100 ft. across. A plain wooden bridge, perhaps trussed stringers 40-ft. span, resting on piles, is contemplated, but nothing definite will be done for 30 or 60 days. The new county board upon organizing in January, will probably order the surveyor to prepare plans and specifications and then advertise for bids.

NELSON, NEB.—Bids are asked until Jan. 3 for repairing two 84-ft. combination bridges, according to reports. N. A. Clark, County Clk.

PLATTSMOUTH, NEB.—Bids are asked until Dec. 31 for constructing wooden and iron bridges for the year 1899, according to reports. James Robertson, County Clk.

LEAVENWORTH, KAN.—The county commissioners have awarded a contract to the Missouri Valley Bridge Co., at $1,150 for three iron bridges.

SMITHVILLE, TEX.—The county commissioners, Bastrop, Tex., awarded a contract Dec. 2 to the Indiana Bridge Co., Muncie, Ind., at $23,500, for the construction of a bridge over the Colorado River.

ASPEN, COLO.—Bids are asked until Jan. 2 for the construction of a bridge across the Roaring Fork River near Basalt. Geo. W. Nyce, County Surveyor; R. C. Parr, Clk.

TACOMA, WASH.—It is proposed to have the city engineer prepare plans of the location, etc., for a bridge over the Puyallup River on the extension of 11th St., and if the council passes a resolution, the question will be submitted to the war department for approval, according to reports. Senator John L. Wilson is interested.

OGDEN, UTAH.—Bids are asked until Dec. 28 for furnishing plans and constructing a steel truss bridge 140 ft. long and 18 ft. wide, across Weber River. Newton Farr, Clk. County Comrs.

KAMLOOPS, B. C.—M. P. Gordon, Mayor, writes us that the proposed bridge over Thompson River at the ferry, is government work and will cost about $40,000. Bids have not been asked. F. C. Gamble, Engr., Dept. Pub. Wks., Victoria, B. C.

BUILDINGS.

BROOKLYN, N. Y.—Bids are asked by the department of public buildings, 346 Broadway, New York, until Dec. 22, for certain repairs and alterations to the Municipal Building of the Borough of Brooklyn, city of New York. ——Bids are asked until Dec. 23 for erecting a storehouse for ordnance materials at the Navy Yard, in Brooklyn. FERNANDINA, FLA.—Reports state that a new city building will soon be erected.

KNOXVILLE, TENN.—Reports state that a 14-story office building, to cost between $750,000 and $1,000,000, will be erected at this place. I. P. Thurman, of Allegheny, Pa., is interested. Chas. S. Bickel, Arch., Pittsburg.

MEMPHIS, TENN.—The following bids have been received by Custodian James Jeffreys for painting and other work on the Custom House: Cole Mfg. Co., $9,324; Balton Co., $9,200; True-Tagg Co., $9,177; Eberhardt, $7,477.

ASHLAND, KY.—Bids are asked until Jan. 3 for all or any portion of the labor and material for the construction of an edifice for the Episcopal Church at this place. J. R. Geiske, Arch., Ceredo, W. Va.

LOUISVILLE, KY.—The county commissioners have appointed a committee to receive bids and plans for an addition to the court house, to cost about $40,000.——The Mutual Life Insurance Co., of Kentucky, contemplates the expenditure of about $100,000 in improving the Bull Block.

BOWLING GREEN, O.—The people of Wood county are considering the erection of a new jail.

CINCINNATI, O.—Bids are asked until Dec. 20 for erecting a station house in the 6th Police District. W. H. Harrison, Clk. of Bd. of Police Comrs.; Hannaford & Sons, Archs.

CLEVELAND, O.—Wm. C. Wood will erect an apartment house, 56 × 81 ft., on Clinton St., to cost about $25,000. Steffens, Searles & Hirsch, Archs.——The Euclid Ave. Congregational Church will erect a new Sunday-school building, to cost between $30,000 and $40,000.

YOUNGSTOWN, O.—Bids are asked until Dec. 16 for the purchase of $54,000 of bonds for the equipping of the Mahoning County Infirmary, plumbing, lighting, etc. C. F. Brenner, County Audr.

FRANKFORT, IND.—A fire here Dec. 5 destroyed the Commercial Block; reported loss estimated at $100,000.

LEBANON, IND.—The commissioners of Boone county are considering the question of erecting a new $150,000 court house.

DETROIT, MICH.—The board of works, it is stated, will recommend that the contract for the G. A. R. memorial building be let to Spitzley Bros., 83 Beacon St., at $39,000.

CHICAGO, ILL.—The board of education will soon receive bids for the 3-story and basement Darwin School building, 90 × 188 ft., to be erected at Edgewood Ave. and Catalpa Place, and to cost $90,000.——The contract for the masonry work of the new post office building has been let by the contractor, John Pierce, of New York, to the E. F. Gobel Co., of this city.——William Deering will erect a 4-story brick apartment house on Lill Ave., to cost $40,000.——Atchison & Blaisdell will erect a 3-story brick store and apartment building on West Congress St., to cost $35,000.——Mrs. Lucy Morton proposes to erect seven 3-story brick residences on Washington Ave., to cost $42,000.——Marshall, Field & Co. will erect an 8-story brick warehouse on West Polk St., to cost $100,000.

APPLETON, WIS.—The council will soon receive plans for the proposed city hall and library building, according to reports.

BALSAM LAKE, WIS.—Bids are asked until Jan. 3 for furnishing the labor and materials required in the erection of the court house, jail and residence. H. P. Burdick, Secy. County Comrs.

KENOSHA, WIS.—The county board has appropriated $5,400 for remodeling and repairing the county jail.

MILWAUKEE, WIS.—Bids are asked by the supervisors of Milwaukee county until Dec. 24 for the remodeling of the south wing of the court house, etc.; bond, $2,500. Aug. F. Zentner, County Clk.

OSHKOSH, WIS.—Bids are asked by the board of public works until Dec. 19 for furnishing and installing a heating plant in the Punhoqua school. Wm. Waters, Arch. Bids are also asked on plans by bidders, and bids including fan system will receive special attention. Bond, $1,000.

WAUPACA, WIS.—The board of trustees of the Wisconsin Veteran's Home at this place will ask for an appropriation of $30,000 for the purpose of enlarging the capacity of the home. It will also act upon the plans for the new hospital to take the place of the one recently burned.

WEST SUPERIOR, WIS.—The contracts, it is stated, for the new theatre building to cost $100,000 will soon be let. Geo. A. Garnsey, Arch., Chicago. Arthur Miller, of Boston, and others, are interested.

LEAVENWORTH, KAN.—Capt. John Seaton, Atchison, Kan., is said to be contemplating the erection of a new opera house in this city.

DULUTH, MINN.—Reports state that new bids will be asked by the Eastern Minnesota R. R. Co. for the construction of a freight warehouse.

MINNEAPOLIS, MINN.—Pike & Cook have the contract for erecting a 9-story office building, 156 × 120 ft., to cost $200,000, for Mr. Andrus. F. B. & L. L. Long, Archs.

OWATONNA, MINN.—Bids are asked until Jan. 4 by the secretary of the board of directors for a brick and stone library building. Smith & Gutterson, Archs., Des Moines, Ia. B. E. Darby, Secy.

LEAVENWORTH, KAN.—The Metropolitan St. Car Co. contemplates the erection of a new street car barn in which will be located the machine shops of the company. Capt. W. D. Bethel may be addressed.

FORT TOTTEN, N. DAK.—Owen & Hille, of Minneapolis, Minn., have been awarded the contract for erecting the school building, at $29,000, and for putting in a water system, at $4,790.

FORT WORTH, TEX.—L. S. Thorne, Gen. Mgr. of the Texas & Pacific R. R., according to reports, states that the company will erect a passenger station to cost about $150,000, in this city.

COLORADO SPRINGS, COLO.—Plans are being prepared by Building Inspector Roby for the proposed addition to the city hall.

COLFAX, WASH.—W. W. Waite, Mgr. Colfax Military Band, contemplates erecting a 2-story opera house building, 50 × 120 ft.

SPOKANE, WASH.—The Spokane Lodge of Elks has decided to incorporate with a capital of $100,000, for the purpose of erecting a 3-story brick building, 100 × 150 ft., at Riverside Ave. and Lincoln St.

OAKLAND, CAL.—Contracts will soon be let for the erection of the buildings for a naval school for which the appropriation of $50,000 was secured by Senator Perkins.

SAN FRANCISCO, CAL.—Reports state that the contract will soon be let for the erection of permanent buildings for hospital at the Presidio, to cost about $80,000. ——The finance committee of the supervisors has decided to appropriate $60,000 for erecting now building and stables for the police department.

SANTA BARBARA, CAL.—This city will soon vote on the question of issuing $50,000 in school bonds.

STOCKTON, CAL.—Reports state that plans for a 3-story hotel to be erected near the Southern Pacific depot have been completed.

WATSONVILLE, CAL.—W. H. Weeks is preparing plans for a convent to be erected here to cost $120,000.

LIVERPOOL, N. S.—Bids are asked until Dec. 23 for constructing a public building. E. F. E. Roy, Secy. Dept. Pub. Wks., Ottawa, Ont.

NEW WESTMINSTER, B. C.—John Coughlin & Son have been awarded the contract for the new Bank of Montreal building. Rattenbury & Tiarks, Archs.

HAVANA, CUBA.—Bids are asked until 12 o'clock, noon, Dec. 15, for the construction of one warehouse on pier now under contract to be built on the east side of Havana Bay, and six warehouses on grounds adjacent; bond, $25,000. Col. Frank J. Hecker, Ch. of Bureau of Transportation, Washington, D. C.

NASSAU, BAHAMA ISLANDS.—James Reilly & Co., New Haven, Conn., have been engaged to do the stone work on the new $2,000,000 hotel at this place.

WATER-WORKS.

BATH, ME.—The question of this city and of Brunswick owning their water-works is being discussed. The legislature will be asked to grant a charter to the cities for this purpose.

ROCKPORT, ME.—This place has voted to accept the contract of the Camden & Rockport Water Co. to supply this place with water. Granville W. Carleton and L. H. Lovejoy are on the committee.

BUFFALO, N. Y.—The commissioners of public works have decided to ask for more money, in addition to the $18,000 appropriated last spring, for the construction of three new chimneys at the water-works pumping station, each to be 225 ft. high.

CLAYTON, N. Y.—This place voted Dec. 6 to issue bonds for works and a sewerage system to cost $50,000. It is said that bids will be asked at once. F. L. Hall, Village Pres.

MOUNT VERNON, N. Y.—Press reports state as follows in regard to the water question: The council has decided to enter into a contract for ten years with the New York Suburban Water Co. Under the new contract the city pays $30 a year for each hydrant, and a hydrant must be rented for every 500 ft. of new pipe laid. This means an aggregate rental to be paid by the city of about $10,100. According to George E. Hoffmaster, Supt., this is about the same as is now being paid. The company also agrees to furnish meters to its 3,400 private consumers and to establish a meter rate of 22½ cts. for 100 cu. ft. The consumer is to pay for the expense of placing the meter in the house.

WATERVLIET, N. Y.—This place voted Dec. 12 to build new works to cost about $234,000. Chas. G. Whitbeck, Cy. Engr.

FRENCHTOWN, N. J.—We are informed that the proposed works for this place and Milford, N. J., to be built by the Spring Mill Water Co., will consist of 7¾ miles of 4 to 10-in. pipe, together with hydrants, etc., a 1,000,000-gallon reservoir, etc. The work will probably be let in the spring. The supply will be by gravity. Howard Mutchler, Pres.; J. W. Fladd, Secy. and Treas.; L. A. Francisco, Engr., all of Easton, Pa.

JERSEY CITY, N. J.—The street and water commissioners have awarded the contract for the new water supply to Patrick H. Flynn, of Brooklyn, N. Y., at $7,595,000. This is for plan No. 1, the supply to be taken from the Rockaway watershed. Up to Dec. 10 the mayor had not approved the contract.

VINELAND, N. J.—Chas. J. Keighley has offered to sell the works of the Vineland Water-Works Co. to the city for $200,000.

DRAVOSBURG, PA.—The American Water-Works & Guarantee Co. has secured permission from the U. S. government to lay water pipes under the Monongahela River from its works in McKeesport to supply this place with water.

ALLEGHENY, PA.—Wm. F. Patterson, Erie, Pa., has been awarded the contract for furnishing a new 250-HP. boiler and a Playford stoker for the Howard St. pumping station, at $5,298.

CANONSBURG, PA.—The council is considering the question of granting a franchise for works to J. P. McNary & Son. Councilmen Chambers and Greer may be addressed.

MILLVALE, PA.—Bids are asked until 6 p. m., Dec. 16, for furnishing and installing a vertical pump of 2,000,000 gallons a day. C. W. Dankmyer, Clk.

OIL CITY, PA.—The following submitted bids Dec. 5 to the water board for furnishing a 3,300,000-gallon vertical cross-compound pumping engine: Barr Pumping Engine Co., Philadelphia; Snow Steam Pump Works, Buffalo, N. Y., and Loretz & Co., New York.

HAWKINS POINT, MD.—Bids are asked by the U. S. Quartermaster, Fort McHenry, Md., until Dec. 24, for furnishing the material and for installing works at Hawkins Point. The works will have an artesian well, a pumping engine and a 10,000-gallon tank on a skeleton tower.

SMITHFIELD, VA.—J. W. Holloway writes us that the proposed works will not be built until the spring.

HIGHPOINT, N. C.—W. G. Bradshaw, Mayor, writes us that nothing definite has yet been done towards establishing works. The legislature, which convenes in January, will be petitioned to grant the city authority to issue bonds for works. Then an election will be held, and if the proposition is carried arrangements for the construction will be begun. Population (1890), 2,179.

SPARTANBURG, S. C.—John H. Montgomery writes us that nothing has yet been done towards securing new works, noted in our issue of Dec. 1.

GATE CITY, ALA.—Nicholas S. Hill, Jr., Ch. Engr. Water Bd., Baltimore, Md.; Canfield & Irwin, St. Louis, Mo., and Thos. P. Grasty, of the "Manufacturers Record," Baltimore, are making tests for a water supply at this place. If the tests are successful it is said that works will be built to supply water to a number of manufacturing plants that it is proposed to erect here, and also to Birmingham, Ala. It is estimated that a flow of 4,000,000 gallons a day can be secured from artesian wells.

PRATT CITY, ALA.—The legislature will be asked to grant this place authority to issue $25,000 in bonds for the proposed works. Dr. George Brown and W. G. Powell, Mayor, may be addressed.

COLUMBUS, O.—The director of public works will again soon advertise for bids for constructing the proposed new storage reservoir in the Scioto River.

LISBON, O.—E. C. Cooke, Society for Savings Bldg., Cleveland, has submitted a report on the proposed improvements to the works. It is proposed to put in a filter plant of 500,000 gallons a day, to cost $12,000.

SHERIDAN, IND.—The council has granted a 30-year franchise for works to the Sheridan Light & Water Co., Fort Wayne. The works will cost about $35,000. Chas. Pape, Sr., and others of Fort Wayne, Ind., are interested. The machinery will be built by the Fleming Mfg. Co., Fort Wayne, of which Mr. Pape is president.

GRAND RAPIDS, MICH.—O. N. Watson, Chn. Com. on Ways and Means, is making efforts to have the board of public works authorized to buy a 20,000,000-gallon pump. It is probable that bids for furnishing the machinery will be asked in a short time.

CHICAGO, ILL.—Bids are asked until 11 a. m., Dec. 16, for furnishing brass castings, hydrants, and stop valves, etc. L. E. McGann, Comr. Pub. Wks.

MONMOUTH, ILL.—The council, it is reported, will soon order plans prepared for the proposed improvements to the works. D. W. Mead, Rockford, Ill., will probably prepare the plans. I. Trumbull, Chn. Com.

ALLISON, IA.—W. F. Roy, Mayor, writes us that an election will probably be held in January to vote on the question of building works. Population, 500.

OTTUMWA, IA.—John A. Cole, Old Colony Bldg., Chicago, is preparing plans for certain improvements to the works of the City Water Co., according to reports. E. F. Starkweather, Mgr.

BERMIDJI, MINN.—This place voted Dec. 6 to issue $7,000 in bonds for works.

CANBY, MINN.—M. B. Haynes, 201 South Front St., Mankato, Minn., is preparing plans for works for this place. The contract for the work will soon be let.

MINNEAPOLIS, MINN.—We are informed that the council on Dec. 9 rejected the bids received Aug. 26 for furnishing one or two 10,000,000-gallon vertical triple expansion pumping engines for the north side pumping station. The bids were given in our issue of Sept. 1. F. W. Cappelen, Cy. Engr.

PELICAN RAPIDS, MINN.—This place voted Dec. 7 to issue $14,000 in bonds for works and an electric light plant, according to reports.

WHEATON, MINN.—The question of securing works is again being considered, according to reports. M. B. Haynes, Engr., 201 South Front St., Mankato, Minn.

CORSICANA, TEX.—The Corsicana Water Co. has secured a lease for 20 years of 3,000 acres of land about four miles from here for an increased water supply. W. N. Coler, Jr., may be addressed.

DARLINGTON, OKLA.—Bids are asked until Jan. 5 for furnishing the materials and for constructing works for the Arapahoe Boarding School at the Cheyenne and Arapahoe Indian Agency, Darlington. Address W. A. Jones, Indian Comr., Washington, D. C., or Maj. A. E. Woodson, Acting Indian Agent, Cheyenne Agency, Darlington.

COLORADO SPRINGS, COLO.—It is stated that General Palmer, of this city, has filed plans for works for Glen Ayrie.

FLORENCE, COLO.—We are informed that the following bids were received Nov. 28 for furnishing the materials and for constructing the works, as advertised in Engineering News; Geo. Killian, Town Clk.; Hiram Phillips, Engr., Oriel Bldg., St. Louis:

Bidder.	Complete Using cast iron pipe.	Complete Spiral riveted pipe.
Ruemmeli & Siebert Refrigerating Mach. Co., St. Louis, Mo.	$177,205	$165,740
Orman & Crook, Pueblo, Colo.	169,578	148,020
*H. C. McCreary, Denver, Colo.	75,802	6,000
Holmes & Allen, Denver, Colo.	172,375	164,375
R. P. McDonald, Denver, Colo.	144,200	†132,000
Greenville Const'n Co., Greenville, O.	139,300	129,800
Mitchell Bros., Denver, Colo.	138,000	‡130,675
Shutt Improvement Co., Pueblo, Colo.	138,000	128,000
Geddes & Searie Stone Co., Denver, Colo.	137,000	....
J. M. O'Rourke, Denver, Colo.	136,200	....

*First bid for cast iron only; second bid for standpipe, without foundation. †Complete with wooden pipe, $140,200. ‡Wooden pipe, $119,687.

BERKELEY, CAL.—Money is being subscribed for the proposed new works, 10 citizens having offered to give $1,000 each. About 122 acres of land will be purchased near San Pablo for the source of water supply. The works will cost about $450,000. J. N. Le Conte, Capt. W. H. Marston, J. J. Mason and Anson S. Blake are on the committee.

LAKEPORT, CAL.—An election will be held Dec. 20 to vote on the question of building works to cost about $17,250. In 1896 A. L. Adams, 401 California St., San Francisco, prepared plans. H. V. Keeling, Town Clk.

PORT COSTA, CAL.—The Port Costa Water Co. has been incorporated by G. W. McNear, P. E. Bowles, G. W. McNear, Jr., F. W. McNear and S. B. McNear. Capital stock, $250,000, of which $110,000 has been subscribed.

JEROME, ARIZ.—John Burkes writes us that the water supply will be secured from springs 500 ft. above the city. It is proposed to construct tanks at the springs and to lay pipes to the city. The citizens are now formulating plans. Population, 3,000.

PRESCOTT ARIZ.—This city has sold $150,000 of bonds to the U. S. Mortgage & Trust Co., 59 Cedar St., New York, for the proposed works. It is stated that arrangements will be made at once to construct the works. J. J. Fisher, Cy. Engr.

CHATHAM, N. B.—It is stated that plans are being prepared for the proposed works.

MONTREAL, QUE.—Alderman Laporte, of the committee, is urging the committee to consider the advisability of filtering the drinking water.

MIDLAND, ONT.—The question of building works is being considered, according to reports.

BUCHAREST, ROUMANIA.—Bids are asked until Jan. 9 for sinking two tubular wells for collecting water for a water supply and for furnishing the city with drinking water. The wells will cost about $36,000, and the piping, etc., for the water supply, about $470,000. Address Mr. Radu, Ch. Dept. of Construction, 9 Strada Mihai Voda, Bucharest, or the Roumanian Legation at Washington, D. C., where plans and specifications (in French) may be seen.

IRRIGATION.

BEAUMONT, TEX.—Reports state that the Southern Rice & Trust Co. has purchased 6,500 acres of rice land in Jefferson county, near this place, and proposes to construct an irrigation system at once. Alfred F. Bissell, Secy. and Mgr., Des Moines, Ia. An office will be opened in the First National Bank Bldg.

SAN BERNARDINO, CAL.—Hiram H. Smith filed a claim Nov. 28 to 5,000 ins. of water for irrigation on the Rancho San Bernardino, between the north and south slope of Live Oak canon.

SPOKANE, WASH.—It is reported that E. B. Palmer, 530 Pioneer Block, Seattle, Wash., has filed a claim to Liberty Lake, for irrigation purposes.

LOVELOCKS, NEV.—Chas. N. Sain, Secy. Humboldt Irrigation Co., is making efforts to have eastern capitalists become interested in a proposed irrigation system to reclaim land along the Humboldt River, to cost about $200,000, according to reports.

NEW COMPANIES.—McElmo Water Supply Co., McElmo, Colo.; $500,000; to furnish water for irrigation; Morris B. Colt, Alamosa, Colo.; John H. Knabel, Ernest Knabel, of Colorado, and others.

SEWERAGE.

BOSTON, MASS.—Bids are asked until Dec. 16 for building about 1,025 ft. of pipe sewers in Dorchester District. B. W. Wells, Supt. of Sts.

MIDDLEBORO, MASS.—The state board of health has decided that the system for this place must be improved as it pollutes the Nemasket River. The improvements are estimated to cost about $40,000. F. S. Tanzey, Mayor.

CLAYTON, N. Y.—This place voted Dec. 6 to issue $50,000 in bonds for a system and water-works. It is stated that bids for the work will soon be asked. F. L. Hall, Village Pres.

DEPEW, N. Y.—S. Jay Ohart, Village Pres., writes us that next year the village shall probably construct lateral sewers to cost $10,000, sewage disposal works to cost $20,000, etc., in addition to the work already done at a cost of $55,000.

MOUNT VERNON, N. Y.—Bids are asked until Jan. 3 for constructing 12-in. pipe sewers in two streets. W. N. Hoyt, Clk.

NEW YORK, N. Y.—Bids are asked until Dec. 23 for constructing a wooden barrel sewer under pier No. 36, North River. Jas. Kane, Comr. of Sewers, 265 Broadway, Manhattan.——Bids are asked until Dec. 28 for furnishing and laying a cast-iron sewer pipe on Randall's Island, N. Y. H. J. W. Keller, Pres. Dept. of Charities, foot East 26th St., Manhattan.

BAYONNE, N. J.—The bids for constructing a main sewer through the Centreville district received Dec. 6 have been returned to the bidders.

EAST ORANGE, N. J.—The Essex County Park Commission has adopted plans for a storm sewer to drain the valley through which the East Orange Boulevard runs. Estimated cost, $60,000. Wm. H. V. Reimer, Engr., East Orange.

JERSEY CITY, N. J.—The board of education wants the council to appropriate $12,000 for improving the drainage of school No. 12.

RED BANK, N. J.—A. C. Harrison, Town Clk., writes us that the following bids were received Nov. 29 for constructing certain sewers, as advertised in Engineering News:

* P. H. Harrison & Son, 220 Broadway, New York	$9,652
Doolittle & Brooks, 26 West Broadway, New York	12,333
J. Erwin Hillpot, Bound Brook, N. J.	13,502
A. Costa, Orange, N. J.	13,519
F. Kohlmeyer & Co., 102 Park St., New York	10,704

* Awarded contract.

KINGSTON, PA.—Bids are asked by the secretary of the council for building sewers in certain streets. P. B. Reynolds, Pres. Council; W. P. Somers, Secy.

NORRISTOWN, PA.—The trustees of the state hospital want an appropriation for repairing the system at the hospital. Frank C. Smith, Treas.

STEELTON, PA.—It is stated that the council is arranging for the construction of the proposed system to cost about $54,000. The system will require about 52,600 ft. of 8-in. sewer pipe, 8,400 ft. of 10-in. pipe, 3,730 ft. of 12-in., 890 ft. of 15-in. and 2,250 ft. of 18-in.; 100 ft. of 12 and 16-in. outlet pipe. Under the canal will be laid 75 ft. of 16-in. siphon and the same length of 12-in. pipe. There will be 73 flush tanks, 74 manholes, 117 lampholes and one flush inlet. H. H. Campbell, Pres. Council.

CUMBERLAND, MD.—The council has decided to build a sewer in South Cumberland at a cost of $6,000. Councilmen Shriver and E. F. Rizer may be addressed.

AIKEN, S. C.—Bids are asked until Jan. 18 for constructing pipe sewers and a filtration plant, as stated in our advertising columns. N. Wilson Davis, Engr.; M. B. Woodward, Mayor.

MONROE, LA.—J. M. Kelley, Secy., writes us that nothing will be done toward building the proposed system, water-works, etc., until the bonds are sold, which will be next year. The bonds were voted in November.

OWENSBORO, KY.—Bids are asked until Dec. 17 for constructing 1,500 ft. of 20-in. pipe sewers and 250 ft. of open ditch. W. P. Small, Mayor.

CINCINNATI, O.—Bids are asked until Jan. 3 for constructing sewers in Bassett Road. Geo. H. Spellmire, Clk. Bd. City Affairs.

COLUMBUS, O.—Julian Griggs, Ch. Engr. Dept. Pub. Improvements, informs us that no definite steps for sewers in the west side have yet been taken. There is under contract 2,212 ft. of 42-in. brick drain and about half a mile in Mound St., on the west side, which will connect the Mound St. storm sewer with the Renick Run system and overflow into the latter when the former is two-thirds full.

YOUNGSTOWN, O.—Bids are asked until Dec. 17 for constructing sewers in Hayes Ave. H. W. Calvin, Clk.

FORT WAYNE, IND.—The question of building a new intercepting sewer is being considered by the board of public safety. Estimated cost, $150,000. Geo. H. Wilson, and Dr. Kessler, a member of the board of health, may be addressed.

OTTUMWA, IA.—The council proposes to build a system in the south side. Councilmen Keefe, Chn. Com., and Peck may be addressed.

GUTHRIE, OKLA.—The council has decided to engage an engineer to prepare plans for the proposed system. Councilman Saunders may be addressed.

MACON, MO.—S. D. Lamb, Mayor, writes us that this place voted on Dec. 6 to build a system to cost about $24,000. Of this amount Col. Blees has offered to contribute $5,000. No arrangements have been made for building the system. C. L. Farrer, Clk.

ST. LOUIS, MO.—We are informed that Robt. Wycoff submitted the lowest bid Dec. 6 for sewers in Branch St., sewer district No. 35. Patrick McIntyre submitted the lowest bid for sewers in Elliott Ave., district No. 46. B. H. Colby, Sewer Comr.

BAKERSFIELD, CAL.—A. I. Lightner, Cy. Clk., writes us that no definite action has yet been taken in regard to the proposed system, to cost $100,000. The matter may come up early next year.

NEVADA CITY, CAL.—The board of trustees has engaged W. F. Englebright to prepare plans for the proposed system.

GARBAGE DISPOSAL—STREET CLEANING

ATLANTIC CITY, N. J.—Bids are asked until Dec. 19 for collecting and removing the garbagee of this city to the present crematory until the new one is completed; check, $100. E. D. Irelan, Cy. Clk.

PASSAIC, N. J.—Dr. A. Warde Van Riper, Pres. Bd. of Health, is urging the board to take definite steps toward securing better arrangements for the disposal of the garbage of the city.

ATLANTA, GA.—A bill has been introduced in the legislature amending the charter of the city to provide for the construction of a crematory in the center of the city.

COVINGTON, KY.—The aldermen have awarded the contract for removing the garbage and ashes in both districts of the city for one year to Gerhard Exterkamp.

LOUISVILLE, KY.—Dr. M. K. Allen, Health Officer, has submitted a report on garbage crematories, and has recommended the appointment of a committee to consider the question of a plant for this city.

CLEVELAND, O.—Bids are asked until Dec. 31 for cleaning the market grounds for one year. E. A. Abbott, Dir. of Police.

INDIANAPOLIS, IND.—Bids are asked by the board of public works until Jan. 15 for cleaning the streets for 1899. The specifications call for two sets of bids and contractors will be permitted to bid on both forms. Bid A calls for the work as done last year. That is, the contractor estimates his price for keeping an area of 10,000 sq. ft. clean for the whole year. The new form is known as bid B, and calls for an estimate for cleaning the streets of the whole city. At present the city is paying 14¾ cts. a 10,000 ft. in addition to the expense that it has to bear to maintain the orderly or day service. Bid B fixes the time limit from March 15, 1899, to Dec. 15, 1899. It also calls for machine sweeping from Jan. 1, to March 15, 1899, and from Dec. 15, 1899, to Jan. 1, 1900. The specifications require that all work must be done during the night time and provides a penalty for violation of this provision. It also sets forth that any work which the board or its representatives deem unsatisfactory will be subject to fine at the board's discretion. The sweepings are the property of the contractor, and he is held responsible for the disposal thereof. Both forms of bids require hand carts in the down-town portion of the city to collect all dirt, droppings and accumulations. The specifications require these carts to be similar to those which the city has introduced a short time ago, and they shall go on duty at 8 o'clock in the morning and be on until 5 o'clock in the afternoon.

MILWAUKEE, WIS.—Judge Sutherland, in the Superior Court, has rendered a decision in favor of the construction of the proposed crematory by the Engel Sanitary Crematory Co.

ST. JOSEPH, MO.—City Physician Graham is securing information, estimates, etc., for the disposition of the city garbage. Population, 75,000.

SAN FRANCISCO, CAL.—The Garbage Sanitary Cremation Co. has been incorporated, with a capital stock of $100,000, of which $25,000 has been subscribed. Incorporators, Adolph Ramish and Martin C. Marsh, Los Angeles, Cal., and Charles L. Asher, John Malowansky and Jacob Shaen, San Francisco.——The supervisors have cancelled the contract with the Sanitary Reduction Co., which provided that the city should pay the operating expenses and a reasonable profit to the company. The supervisors had appropriated $150,000 for this work.

SAN FRANCISCO, CAL.—Bids were asked until Dec. 12 for cleaning the paved streets, alleys, etc., to Jan. 1, 1901. John A. Russell, Secy. Bd. of Supervisors.

SANTA CRUZ, CAL.—Bids are asked until Jan. 2 for the purchase of a 50-year franchise for pumping sea water and for laying pipes, etc., the franchise having been applied for by Jno. E. Armstrong and Wm. Armstrong. J. L. Wright, Cy. Clk.

STREETS AND ROADS

BOSTON, MASS.—The town of Revere has voted to appropriate $3,000 for the repair of roads.

WETHERSFIELD, CONN.—It has been voted to macadamize a portion of Newington Ave.

JOHNSTOWN, N. Y.—It is reported that a bill will soon be presented to the state legislature to authorize the construction of a macadam road from Amsterdam to Northville, Fulton county, a distance of about 20 miles. The county supervisors will also be asked to pass the same bill.

BUFFALO, N. Y.—Bids are asked until Dec. 20 for furnishing and constructing asphalt pavement on portions of Erie St., Booth Alley, Mills Alley and for an 18-in. sewer on Miami St. R. G. Parsons, Secy. Bd. Pub. Wks.——The park board on Dec. 6 authorized the committee on grounds and roads to construct the proposed speedway on Humboldt Parkway.

DEPEW, N. Y.—S. Jay Ohart, Village Pres., informs us that $15,000 will probably be spent next year for macadamizing.

NEW ROCHELLE, N. Y.—C. Oliver Iselin made a proposition to the village trustees Dec. 5 to rebuild the entire street system of New Rochelle and keep it in repair for five years. President Clark may be addressed.

NEW YORK, N. Y.—Bids are asked until Dec. 21 for furnishing material and for constructing roads, sidewalks, curbing, grading, excavating and landscape gardening on the grounds of Bellevue Hospital. John W. Keller, Pres. Dept. Pub. Charities, East 26th St.

ATLANTIC CITY, N. J.—Bids are asked until Dec. 19 for constructing a road from Baltic Ave. to the crematory, and until Dec. 26 for paving certain streets, according to reports. Emery D. Irelan, Cy. Clk.

HACKENSACK, N. J.—Ernest Koester, Atty., Hackensack, writes us that at the election in Franklin township Dec. 6 it was voted, by a large majority, to issue $75,000 in bonds for the construction of macadam roads.

BRADFORD, PA.—Main St. will probably be paved with brick next summer, to cost from $15,000 to $20,000.

LEBANON, PA.—This city is beginning to agitate the question of having paved streets. With the exception of about half a block of asphalt block paving, the streets are of limestone and cinder macadam. A project is now before the council to have North Eighth St. substantially paved. George W. Hayes, Cy. Engr.

PHILADELPHIA, PA.—Bids are asked until Dec. 15 for constructing and repairing sheet asphalt pavement for the year 1899, according to reports. Thos. M. Thompson, Dir. Dept. Pub. Wks.

ANNAPOLIS, MD.—Bids are asked until Dec. 19 for distributing 6,000 bus. of shells on the Mill Creek Road and 30,000 bus. of shells on the road from Mountain Road to the Curtis Creek bridge. Charles Duvall, Road Comr.

WASHINGTON, D. C.—Bids are asked until Dec. 17 for improving Connecticut Ave. west of Rock Creek. John B. Wight, District Comr.

CLEVELAND, O.—The council passed resolutions Dec. 5 to improve portions of nine streets. Howard H. Burgess, Cy. Clk.

ZANESVILLE, O.—Bids are asked until Dec. 23 for furnishing and constructing brick paving, grading, etc., on North Seventh St. Chas. N. Bainter, Cy. Clk.

INDIANAPOLIS, IND.—Bids are asked until Dec. 19 for gravel and brick paving on Clifton and Miami Sts., respectively. M. A. Downing, Comr. Pub. Wks.

SULLIVAN, IND.—Bids are asked until Dec. 13 for grading and paving on Cross and Washington Sts. Jacob Mahley, Pres. Bd. Trustees.

CHICAGO, ILL.—Bids are asked until Dec. 19 for repairing the roadway and sidewalks of the Jackson St. bridge and viaduct. L. E. McGann, Comr. Pub. Wks.

ST. PAUL, MINN.—L. W. Rundlett, Cy. Engr., submitted plans to the board of public works Dec. 8 for the macadamizing of Como Ave., between Dale and Rice Sts.; estimated cost, $42,715. The park board will be consulted before any action is taken.

TOPEKA, KAN.—A petition to pave portions of Huntoon St. with brick, 30 ft. wide, has been referred to the street committee.

KANSAS CITY, MO.—Bids are asked until Dec. 17 for furnishing the material and constructing plank sidewalks on portions of eight streets, and grading three streets. Henry A. Wise, Cy. Engr.

ST. LOUIS, MO.—Bids are asked until Dec. 23 for grading portions of 20 streets, brick paving on eight streets and macadamizing on nine streets. Robt. E. McMath, Pres. Bd. Pub. Improvements.

HOUSTON, TEX.—Bids are asked until Jan. 9 for 8,500 cu. yds. of excavation, 19,000 sq. yds. of paving and 4,500 lin. ft. of stone curbing on Main St., as stated in our advertising columns. S. H. Brashear, Mayor; J. Austin Miller, Cy. Engr.

SAN MATEO, CAL.—Bids are asked until Dec. 19 for constructing 10 cross-walks of concrete foundation, and for grading C St. R. H. Jury, Cy. Clk.

MANUFACTURING PLANTS.

HYANNIS, MASS.—A fire here, Dec. 11, destroyed the engine house and carpenter shop of the New York, New Haven & Hartford R. R. Co.; loss, about $75,000.

WORCESTER, MASS.—Vernon Price, of this place, will erect a factory and boiler house, 102 × 75 ft., on Mill St. near Gates Lane, for the American Drug Plate Co.

ALTON, R. I.—A fire in this village, Dec. 5, destroyed the Walton Woolen Mill; estimated loss, about $75,000. W. A. Walton, owner.

DANBURY, CONN.—The hat factory of John W. Green & Co. was destroyed by fire Dec. 7. Loss, $110,000; insurance, $110,000.

SOUTH MANCHESTER, CONN.—Frank Goetz contemplates the erection of a 2-story brick cracker factory building, 150 × 40 ft.

BINGHAMTON, N. Y.—E. A. Beman will erect a 4-story brick factory building, 40 × 85 ft., on Chenango and State Sts., to cost between $10,000 and $12,000.——The Binghamton Cold Storage Co., according to reports, will erect an ice manufacturing plant. O. S. Heller, R. E. Hooper and G. G. Kappael are interested.

MECHANICSVILLE, N. Y.—The Duncan Co. contemplates enlarging its plant at a cost of over $100,000, according to reports.

NEW YORK, N. Y.—Reports state that the Manhattan Dry Dock & Construction Co. will build a dry dock and ship building yard in this harbor. E. C. Machen and Frank Brooks are said to be interested.

ALLEGHENY, PA.—The Pennsylvania Car Wheel Co. will erect a storage house, boiler house and foundry, to cost about $6,000.

CHESTER, PA.—The Keystone Plaster Co. will erect an addition, 180 × 60 ft. to its plant on Deleware Ave.

IRWIN, PA.—Reports state that the Penn Electrical Co. of Pittsburg will remove its plant to this place. F. C. Hockensmith and D. M. Wagner, of Irwin, are interested.

GREENVILLE, PA.—The Kimberly Iron Co., of Sharon, Pa., contemplates improving its plant at this place, to cost about $25,000.——The Shelby Tube Co., according to reports, will install considerable machinery in its plant.

KUTZTOWN, PA.—The plant of the Kutztown Foundry & Machine Co. was partially destroyed by fire, Dec. 10, causing a reported loss of $ 0,000. The new addition to the plant was not burned.

MONESSEN, PA.—It is reported that the Page Woven Wire Fence Co., Adrian, Mich., has been given ten acres of land at this place for the erection of a plant.

PITTSBURG, PA.—Laughlins & Co., according to reports, will erect a $750,000 furnace on 2d Ave.

UPPER BLACK EDDY, PA.—The Hero Knitting Mill Co. has been organized, and according to reports will erect a mill soon.

YORK, PA.—Reports state that a 3-story silk factory building, 250 × 50 ft. with engine room and boiler house, will be erected at Norway Park, a suburb of this place. Judge Stewart is said to be interested.

BALTIMORE, MD.—The Thistle Mfg. Co. contemplates making a number of improvements to its plant.

TANEYTOWN, MD.—T. E. Eckenrode, Taneytown, and Geo. W. Albaugh, Westminster, Md., expect to erect a roller mill, with capacity of 50 bbls. a day, at this place.

NEWPORT NEWS, VA.—Reports state that the Marsden Cellulose Co., of Philadelphia, Pa., will establish a main plant at this place, to cost $250,000.

CLEVELAND, O.—The Forest City Foundry & Mfg. Co. will erect a 5-story steel and brick building, 133 × 90 ft. on Washington and West Centre Sts. Fugman & Ulrich, Architects.——M. A. Bradley will erect a steel factory building 74 × 114 ft., on St. Clair St. and Park Place.

HAMLET, IND.—Reports state that Jamison & Heidrich, Peoria, Ill., will erect a beet sugar plant at this place.

DETROIT, MICH.—The Michigan Forge Co. will erect a large steel plant on the site of its present plant, the buildings of which are now being demolished.

PONTIAC, MICH.—The Oakland Sugar Mill Co., according to reports, will erect a factory building, to cost from $350,000 to $500,000.

WYANDOTTE, MICH.—The Michigan Alkali Co. will erect an addition to plant No. 1 for the manufacture of Portland cement and an addition to plant No. 2 to increase its facilities for the manufacture of soda ash.

OMAHA, NEB.—Metz Bros. contemplate the erection of a brewing plant here to cost about $225,000.

GAS PLANTS.

WASHINGTON, D. C.—Bids are asked until Dec. 27 for installing gas and electric light fixtures in the U. S. post office building. O. L. Spaulding, Acting Secy. Treasury Dept.

FINDLAY, O.—Wm. B. Cutter, Buffalo, N. Y., has purchased the city natural gas plant for $150,000. It is proposed to construct a plant for the manufacture of artificial gas, according to reports.

MILWAUKEE, WIS.—Reports state that the Western Gas Co. wishes to let a contract for a gas holder of 3,000,000 cu. ft. capacity.

LOS ANGELES, CAL.—It is reported that the works of the Standard Oil Co. at this place have been destroyed by fire, at an estimated loss of $225,000.

EVANSTON, ILL.—The Northwestern Gas Light & Coke Co., Evanston, has filed a trust deed with the Equitable Trust Co., Chicago, to secure a $2,000,000 bond issue, for the extension and improvement of the works, according to reports. Rufus C. Dawes, Pres.

NEW COMPANIES.—Acme Acetylene Gas Co., New York city; to manufacture, sell and use gas machines and generators; $500; William A. Newell, E. J. Fenlon, John Forman, George H. Graham and W. H. Graham, all of New York.

Patt Oil Co., Elmira, N. Y.; $5,000, with $500 paid in; to deal in natural gas and oil; Thos. S. Flood, Howard H. Hallock, Boyd McDowell, Edgar Denton, Alfred E. Ackley, Elmira.

Natural Gas & Development Co., Ottawa, Ont.; $9,000; to drill for natural gas, oil and minerals; H. L. T. Skinner, H. J. Allen, R. A. Wasson, A. M. Blair, G. L. Pancoast, J. Halloren, S. F. Beele, J. E. Byers, N. A. Hamilton, Ottawa.

Carolina Gas & Chemical Co., Washington, N. C.; $20,000; to construct and maintain gas plants for light and heat, also the manufacture of chemicals, etc.; A. McDowell, Robert Green, U. S. Fulford, C. W. Bilfinger, and Stephen C. Bragaw.

MISCELLANEOUS CONTRACTS.

PARK.—Joliet, Ill.—The council has purchased 40 acres of land for a park.

STEEL WALK.—Cape May, N. J.—The council has decided to construct an elevated steel walk along the beach.

TELEPHONE LINE.—Carlisle, Pa.—Reports state that the Pennsylvania Telephone Co. will establish an exchange at this place.

TUNNEL.—Santa Barbara, Cal.—Bids are asked by the city clerk until Dec. 22 for constructing 500 ft. of additional tunnel, according to reports.

SCOW BOAT.—New York, N. Y.—Bids are asked until Dec. 27 for furnishing a 200-ton scow boat. F. J. Lantry, Comr. Dept. Correction, 148 East 20th St.

SLUICEWAYS.—Wilmington, Del.—Bids are asked by the Levy Court until Dec. 20 for constructing four sluiceways on the St. Augustine marsh, to cost $3,500.

FIRE APPARATUS.—Averill Park, N. Y.—The council has decided to purchase a second-hand fire engine, a hose cart and to erect a fire station; estimated cost, $2,000.

DAM.—Indianapolis, Ind.—The board of public works proposes to construct a dam across the White River below the proposed parkway, according to reports.

FIRE HOSE.—St. Louis, Mo.—Bids are asked until Dec. 16 for furnishing 4,000 ft. of 2½-in. rubber-lined fire hose and for rubber suction hose. Jas. Richardson, Comr. Supplies.

TELEPHONE LINE.—Pocomoke City, Md.—It is reported that the Worcester Telephone Co. decided Dec. 8 to extend a line to Pocomoke City, Stockton and other points in the county.

LUMBER, ETC.—New York, N. Y.—Bids are asked until Dec. 23 for furnishing pine boards and spruce plank, joist, timbers, etc. Geo. C. Clausen, Comr. Parks, Arsenal, Central Park.

HOSPITAL VESSEL.—New York, N. Y.—Mrs. Helen C. Julliard has appropriated $32,000 for the construction of a floating hospital for the St. John's Guild. Wm. L. Strong, Pres.

TELEPHONE LINE.—Piedmont, W. Va.—The Gordon Telephone Co., Piedmont, will extend a line to Barnum, W. Va., and to Bloomington, Md., and Cumberland, Md., according to reports.

REPAIR OF FIRE BOAT.—New York, N. Y.—Bids are asked until Dec. 21 for furnishing material and repairing the fire boat "Zophar Mills." John J. Scannell, Fire Comr., 157 East 67th St.

TELEPHONE WORK.—Petersburg, Va.—Reports state that the Long Distance Telephone Co. has secured franchises in every town between Petersburg and Lynchburg, for the construction of a telephone line.

STEAM BOILERS.—Alexandria, Egypt.—Bids are asked by the administration of ports and lighthouses at the controller general's office, Alexandria, until Dec. 31, for furnishing two steam boilers, according to reports.

SIDEWALK SHELTERS.—Toronto, Ont.—Bids are asked until Dec. 19 for furnishing material and constructing corrugated iron sidewalk shelters under the bridges at Queen St. subway. John Shaw, Chn. Bd. Control.

TELEPHONE EXCHANGE.—Adairsville, Ga.—Reports state that a company is being organized to construct a telephone exchange for the near-by towns. J. P. Bowdoin is receiving estimates for 50 miles of telephone line.

PORTLAND CEMENT.—St. Paul, Minn.—Bids are asked until Jan. 12 for furnishing American Portland cement, f. o. b. cars, as stated in our advertising columns. Maj. Frederic V. Abbot, U. S. Engr., Globe Bldg.

ENGINEERS' SUPPLIES.—New York, N. Y.—Bids are asked until Dec. 19 for furnishing packing, plumbing material, earthen pipe, brass pipe, valves, tools, etc. John W. Keller, Pres. Dept. Pub. Charities, East 26th St.

TELEPHONE CONDUITS.—Boston, Mass.—The Massachusetts Telephone & Telegraph Co. was granted a franchise Dec. 12, by the board of aldermen, to construct an underground system of conduits in all the public streets.

POLICE SIGNAL SYSTEM.—Los Angeles, Cal.—The board of police commissioners awarded a contract to the Gamewell Fire Alarm Telegraph Co. Dec. 3 for installing a police signal system of 50 signal boxes, to cost about $10,000.

PUMPING ENGINE.—Charleston, S. C.—Bids are asked by the U. S. Engineer, at Charleston, until Jan. 10, for removing old and furnishing and placing new pumping engine on board the dredge "Charleston," as stated in our advertising columns.

TELEPHONE FRANCHISE.—McKees Rocks, Pa.—The Central District & Printing Telegraph Co. has been granted a franchise to construct and maintain a telephone and telegraph system in this borough. J. P. Gillen, Clk.; David Shaw, Burgess.

DREDGING.—New York, N. Y.—Bids are asked until Dec. 23 for dredging in the East River, near Catharine St., about 11,000 cu. yds. of mud, 7,200 cu. yds. of sand, loose stones, etc., and 3,750 cu. yds. of cribwork. J. S. Cram, Comr. Docks, Pier A, North River.

PORTLAND CEMENT.—Duluth, Minn.—Bids are asked until Jan. 10 for furnishing 12,000 bbls. of Portland cement for the concrete superstructure for piers for the Duluth ship canal, as stated in our advertising columns. Maj. Clinton B. Sears, U. S. Engr., Duluth.

TELEPHONE SYSTEM.—Sharon, Pa.—Reports state that it is proposed to consolidate the Citizens' Telephone Co., of Mercer and Lawrence counties, and extend the lines to Meadville, Franklin, Oil City, Erie and Youngstown, O. R. H. Adams, Baltimore, Md., is interested.

TIMBER BULKHEADS.—Boston, Mass.—We are informed that the following bids were received Dec. 7 for the construction of timber bulkheads on Summer St. extension: Ross & Fowler (accepted), $7,425; Wm. J. Lawler, $7,859; Miller & Ellis, $8,570. All local bidders. Wm. Jackson, Cy. Engr.

FIRE APPARATUS, ETC.—Philadelphia, Pa.—Bids are asked until Dec. 20 for furnishing fire hose, hand fire extinguishers, several steam fire engines, hose wagons and chemical engines; also water towers, aerial trucks, extension ladders, general fire supplies, general electrical supplies and bicycles. Dir., Frank M. Riter, City Hall.

FIRE APPARATUS.—New York, N. Y.—Bids are asked until Dec. 21 for furnishing one Holloway double tank chemical engine; one fourth size steam fire engine with La France pumps and one fourth size steam fire engine with Fox sectional water tube boiler; 3,600 ft. 2½-in. rubber lined fire hose. J. J. Scannell, Fire Comr., 157 East 67th St.

TUBULAR BOILERS.—San Francisco, Cal.—U. Sebree, Commander U. S. Navy, Inspector 12th Lighthouse District, informs us that the following bids were received Nov. 28 for furnishing two return tubular boilers of the Scotch type, for the lighthouse tender "Madrona:" Patrick F. Dundon, $18,443; Union Iron Works, $22,800; Risdon Iron & Locomotive Works, $24,950; T. J. Moynihan, $27,000. All local bidders.

PARK WORK.—New York, N. Y.—Bids are asked until Dec. 22 for constructing and improving grounds for use of the New York Zoological Society, in Bronx Park, including 12,500 cu. yds. of earth excavation, 3,600 cu. yds. of rock excavation, 9,700 cu. yds. of fill, 6,050 lin. ft. of 8 to 18-in. vitrified drain pipe, 2,000 lin. ft. of blue stone steps, 132,000 sq. ft. of gravel walks, 7,100 sq. yds. of telford and 3,700 sq. yds. of macadam pavement; surety $20,000. Geo. C. Clausen, Comr. Parks, Arsenal, Central Park.

CONTRACT PRICES.

BULKHEAD, WALLS, ETC.—Boston, Mass.—We are informed that the park commissioners received the following bids Dec. 5, 1898, for filling and bulkhead at the Ferns between Beacon St. and the Harbor Commissioners' line:

Bidder.	Filling, a cu. yd.	Bulkhead.	Total.
Perkins & White, Charlestown...	$0.51	$4,375	$13,555
J. W. Hurley, Melrose, Mass.....	.59	4,583	15,203
W. L. Miller, 17 Milk St., Boston.	.57	4,995	15,255
Johnson & Letteney, Boston	.65	5,900	17,600

Bidder.	Walls at Jamaica Park, a lin. ft.	Walls at Franklin Park, a cu. ft.
D. F. O'Connell, 34 School St., Boston	$1.70	$1.95
J. Sutherland, 17 Otis St., Boston....	1.81	1.79

RENT OF WAGONS, ETC.—Chattanooga, Tenn.—The following bids were received by the board of public works, Nov. 29, 1898, for the use of garbage wagons, etc., for the coming year: Garbage Wagons—T. N. Cunningham, one-horse wagon, 15 cts. per hour; 2-horse wagon, 22½ cts. per hour; G. L. Gillespie, one-horse, 15 cts.; 2-horse, 25 cts.; Whiteside & Carbough, one-horse, 15½ cts.; 2-horse, 21 cts.; G. M. Masterson, one-horse, 13 cts.; 2-horse, 20 cts.; B. Benkonitz, one-horse, 14 cts.; 2-horse, 19 cts.; J. F. Bryan, one-horse, 15½ cts.; 2-horse, 25 cts.; R. P. Mann, one-horse, 14 cts.; 2-horse, 20 cts. Street-Cleaning Wagons—T. N. Cunningham, street sweeper horses, 35 cts. per hour; sprinkler wagon, with driver, 25 cts. per hour; without driver, 20 cts. per hour; dirt wagon, 25 cts. per hour; G. L. Gillespie, street sweeper horses, 27½ cts.; sprinkler wagon, with driver, 20 cts.; without driver, 15 cts.; dirt wagon, 25 cts.; J. F. Bryan, street sweeper horses, 50 cts.; sprinkler wagon, with driver, 25 cts.; without driver, 20 cts.; dirt wagon, 25 cts.; R. M. Mann, street sweeper horses, 20 cts.; sprinkler wagon, with driver, 20 cts.; without driver, 14 cts.; dirt wagon, 20 cts.; Amos Teppenpaw, dirt wagon, 20 cts.

GRAVEL.—Chattanooga, Tenn.—The following bids were received by the board of public works, Nov. 29, 1898, for furnishing f. o. b. Chert gravel for the year: Alex. Bonnyman, 60 cts. a cu. yd.; Geo. L. Gillespie, 70 cts.; delivered, 95 cts.; H. L. Bible, 63 cts.; delivered, 83 cts.; J. F. Bryan, 89 cts.; delivered, 89 cts.; Aaron Simpson, 53 cts. (accepted).

SNOW REMOVAL.—New York, N. Y.—The street cleaning commissioner received the following bids, Dec. 9, 1898, for removing snow: Herbert Tate, 37½ cts. a cu. yd.; Bart Dunn, 321 East 81st St., New York, 30 cts.; American Transfer Co., 33.4 cts.; Edwin J. Schaefer, 38 cts.; National Contracting Co., 39⅓ cts. The contract was let to Bart Dunn. Last year the contract was awarded to G. M. Furman, at 36 cts. a cu. yd.

DREDGING.—Brooklyn, N. Y.—The following bids were received by the department of sewers, 265 Broadway, Manhattan, for 7,000 cu. yds. of dredging in New York Bay at the foot of 49th St., Brooklyn: Dubois Bros., 29½ cts. a cu. yd.; total, $2,065; Wm. H. Taylor, Jr., 23½ cts.; total, $1,645.

PAVING.—Council Bluffs, Ia.—E. A. Wickham & Co., Council Bluffs, has been awarded the contract, at $1.27½ a sq. yd., for paving in Harrison St. and Washington Ave. with Council Bluffs brick bottom and top courses. Bids were also received for asphalt paving, based on 5, 7 and 10-year guarantees, as follows: Barber Asphalt Co., 5-year guaranty, $2.05 to $2.60; 7-year guaranty, $2.15 to $2.70; 10-year guaranty, $2.30 to 2.85; E. A. Wickham & Co., 5-year guaranty, $1 92½ to $2.47; 7-year, $2.03½ to $2.56½ 10 year, $1.18½ to 2.71½; Hugh Murphy, 5-year guaranty, $1.39 to $2.45; 7-year, $1.99 to $2.57; 10-year, $2.27 to $2.78. The following are the bids for brick paving: Frank Cooper & Co.— A-1: Des Moines brick, $1.69 and $1.80; Galesburg, $1.745 and $1.87; St. Joseph, $1.70 and $1.95; Council Bluffs, $1.51 and $1.65. B-1: Council Bluffs, top and bottom, $1.285 and $1.395; Des Moines and Council Bluffs, $1.48 and $1.535; St. Joseph and Council Bluffs, $1.48 and $1.90; Atchison and Council Bluffs, $1.48 and $1.90. E. A. Wickham & Co.—A-1: Des Moines, $1.67 and $1.79; Galesburg, $1.73 and $1.85; Council Bluffs, $1.52 and $1.67. B-1: Des Moines and Council Bluffs, $1.46 and $1.58; Galesburg and Council Bluffs, $1.53 and $1.67; Council Bluffs, top and bottom, $1.275 and $1.39. E. A. Wickham & Co. add 5% to the above prices if payment is made in warrants, and Frank Cooper & Co. add 6%.

ASPHALT PAVING.—Louisville, Ky.—The following bids were received by the board of public works, Dec. 2, 1898, for asphalt paving in certain streets: Assyrian Asphalt Co., 5-year guarantee, No. 1 asphalt, $18.90; No. 2, $18; 10-year guarantee, No. 1 asphalt, $28.90; No. 2, $28; Barbour Asphalt Co., 5-year guarantee, No. 1, $19.50; No. 2, $17.50; 10-year guarantee, No. 1, $24.30; No. 2, $22.30; L. R. Figg, 5-year guarantee, No. 1, $22; No. 2, $21; 10-year guarantee, No. 1, $28; No. 2, $27; Alcatraz Asphalt Co., 5-year guarantee, No. 1, $19.40; No. 2, $17.40; 10-year guarantee, No. 1, $23.40; No. 2, $21.40; Boston Paving Co., 5-year guarantee, No. 1, $18.90; No. 2, $17.90; 10-year guarantee, No. 1, 27.90; No. 2, $26.90. The bids of L. R. Figg and the Boston Paving Co. were rejected as informal, because samples of the asphalt to be used had not been deposited in the office of the board of public works three days before the bids were opened.

◆

INDUSTRIAL NOTES.

THE MICHIGAN CENTRAL BRIDGE CO., Lansing, Mich., is reported to have changed its name to the Detroit River Bridge Co.

THE WATSON MACHINE CO., Paterson, N. J., is reported to have a contract for $50,000 worth of rope making machinery for the Boston Navy Yard.

JOSEPH W. CODY & CO., engineers and general contractors, have removed their offices from 120 Broadway, to the Empire Building, 71 Broadway, New York.

THE GENERAL ELECTRIC CO., Schenectady, N. Y., has an order for eight electric locomotives and other equipment for the Paris, France, underground street railway.

THE CONSOLIDATED STONE CO., Bloomington, Ill., has a contract for 150,000 cu. ft. of Bedford stone, to cost about $27,000, to be delivered in New York for use in a government building on Ellis Island. Mr. E. E. Worthington is president of the company.

THE MURRAY IRON WORKS CO., Burlington, Ia., was awarded a gold medal at the Trans-Mississippi and International Exposition at Omaha, Neb., for its Sioux Corliss engine, which furnished the power used on the grounds, running 24 hours a day during the greater part of the exposition.

THE WEBER RAILWAY JOINT MFG. CO., New York, will remove its principal office on or about Dec. 15, from the Cotton Exchange Building, to rooms 1813 to 1816 Empire Building, 71 Broadway. The company announces also that it has opened a new branch office in the Equitable Building, Baltimore, Md.

THE NEW YORK FILTER MFG. CO., 26 Cortlandt St., New York, through its patent solicitors, has brought suit in the U. S. Circuit Court, Eastern District of Missouri, against Mr. Powell Jackson, trading as the Jackson Filter Co., St. Louis, Mo., to restrain him from manufacturing or selling the Jackson filter which, it is claimed, infringes patent No. 293,740, owned by the plaintiff.

THE EUGENE DIETZGEN CO., of Chicago and New York, has recently put on the market a new paper for positive prints, called "Vandyke Solar Paper." Its principal advantage over ordinary blue-prints lies in the fact that the copies made have either blue lines or black lines on a clear white background. It is claimed by the manufecturers that the paper is easily manipulated, keeps well, does not become brittle, prints rapidly, saves original tracing, and does not spoil positive prints by over-exposure. The same firm has a rapid-printing blue-print paper, with which a blue-print can be made in cloudy winter weather within 7 to 12 minutes, when the regular paper requires an exposure of hours.

J. S. MUNDY, Newark, N. J., shipped a carload of hoisting engines to Chicago last week and a pile driving engine, derrick and hammer to Mexico. The Missouri Pacific R. R. Co. has ordered a double-cylinder, double-drum hoisting engines with a special boiler to be mounted on a pile driving car. An order was recently received from the Horseheads (N. Y.) Bridge Co., for a special bridge-erecting engine at Calicoon, N. Y. The works are also engaged at present in constructing a 38,000-lb. hoisting engine for the Merritt-Chapman Derrick & Wrecking Co. to be placed on a combined lighter and wrecker. The engine has a capacity of 100 tons and has two main hoisting drums, two auxiliary swinging drums and four large extension winches.

Mail Delivery Notice.

Special efforts are made to deliver our paper to its readers each week at the earliest possible moment. The largest binding and mailing establishment in New York begins work on Engineering News early each Wednesday evening, and all papers for Boston, Philadelphia and Washington are usually in the New York post-office by midnight; all Brooklyn and New York city papers by 3 o'clock—in ample time for the first delivery Thursday morning. The entire edition, including foreign copies, is in the mail soon after 6 o'clock Thursday morning. If your paper is not received promptly we advise that you make a complaint to your local post-office officials.

The Circulation of ENGINEERING NEWS among Prominent Contractors Probably EXCEEDS that of any other FIVE PAPERS,

ADVERTISE YOUR WORK IN ENGINEERING NEWS.

PERSONAL.

Mr. J. C. Munn, Secretary of the Pittsburg Bridge Co., has been elected Secretary and General Manager.

Mr. Louis J. Affelder, Jun. Am. Soc. C. E., has been appointed Principal Assistant Engineer of the Pittsburg Bridge Co.

Mr. Albert Heller has been promoted to be Chief Engineer of the Youngstown Bridge Co., vice Mr. Chas. E. Fowler, M. Am. Soc. C. E., resigned.

Mr. F. D. Anthony, Chief Engineer, New York & Ottawa R. R., has removed his office from Cornwall to Ottawa, Ont., where the principal offices of the road will be located hereafter.

Mr. Alex. Cox, Principal Assistant Engineer of the Imperial Railways of North China, is now passing through the United States on his way to England and Australia, on leave of absence.

Mr. H. E. Astley has been appointed Assistant Roadmaster of the Providence Division of the New York, New Haven & Hartford R. R., vice Mr. C. S. Shafter, resigned. Mr. Astley was formerly employed in the engineering department of the Pennsylvania R. R.

Mr. M. J. Martinez, M. Am. Soc. M. E., has received the appointment of resident agent at Havana, Cuba, for the Snow Steam Pump Works, of Buffalo, N. Y. The business will be conducted under the name of M. J. Martinez, Consulting and Contracting Engineer.

Mr. John W. Gates has resigned as President of the Illinois Steel Co., the resignation to take effect on Dec. 31, 1898. The Illinois Steel Co., is one of the corporations that make up the new Federal Steel Co., of which Judge Elbert H. Gary, of Chicago, Ill., is President.

Capt. Jos. H. Crawford, civil engineer, Pennsylvania R. R., has returned from Cuba, where he has been for the past two months assisting Col. Frank J. Hecker, Chief of the Division of Transportation of the United States, in looking after the transportation means of that country. In speaking of the railroads in that island, he states that they show that about $50,000 a mile was invested in them, No attempt is made to keep the roads in order. Grass has grown in the ditches and sidings, and the bridges are of obsolete design, and are not capable of bearing heavy traffic. The culverts are fairly good, being built of concrete.

Capt. J. Francis Le Baron, M. Am. Soc. C. E., Jacksonville, Fla., late of the 10th U. S. Volunteer Infantry, has just returned from Honduras, Central America, where he went last August as Chief Engineer of the American-Honduras Co., to make examinations and surveys of the bar and river Potuca, for the purpose of designing a system of jetties for deepening the channel through the bar. He is now engaged in the preparation of detailed plans and estimates, and work has been commenced at the harbor by the company and will be pushed to a rapid conclusion. The company has a valuable land grant of 250,000 acres, and exclusive rights of navigation of the river.

OBITUARY.

Mr. Alfred Stephen Adams, Superintendent of the Hyde Park Water Co., of Hyde Park, Mass., died Dec. 15, at the age of 73 years.

Mr. Najah Taylor, Superintendent of the Brooklyn Polytechnic Institute, died in Brooklyn, N. Y., on Dec, 16, at the age of 53 years.

Mr. James Duane Wheeler, at one time a prominent railway contractor, died at St. Paul, Minn., on Dec. 11. Mr. Wheeler was born in Massachusetts in 1820.

Mr. John E. Wooten, at one time General Manager of the Philadelphia & Reading R. R., and well known as the inventor of the Wooten firebox for locomotives, died in Philadelphia, Pa., on Dec. 16, aged 76 years.

Mr. Charles E. Leary died in New York city on Dec. 13, after a long illness. At the close of the Civil War he was a member of the firm of Ravanel & Co., of Charleston, S. C., and built a large number of steamships, operating a line of vessels from New York to Charleston, and another from New York to Savannah. The line was afterward extended from Charleston to Fernandina, Fla. Mr. Leary was also active in marine insurance, being connected with the National Lloyds Co., of New York. He was for some years Vice-President of the Mutual Gas Light Co., of the same city.

Mr. Charles G. Lundborg died in New York city, on Dec. 3, at the age of 74 years. Mr. Lundborg was born in Stockholm, Sweden, and was an officer in the Swedish navy before coming to this country. He gained a reputation in marine circles through an unsuccessful attempt to raise the sunken Russian vessels of Sebastopol during the Crimean war, and turned his attention to naval architecture, in which work he continued until the sickness preceding his death.

Ex-U. S. Senator Calvin Stewart Brice, prominently interested in railway and other enterprises, died suddenly at his residence in New York, of pneumonia, on Dec. 15. Mr. Brice was born in Denmark, O., on Sept. 17, 1845, and was the son of a Presbyterian clergyman. He graduated in 1863 from the Miami University, at Oxford, O., but in the meantime had served in the army; in 1864 he was again in the field with the 23d Army Corps, and was appointed a Lieutenant-Colonel. He took the law course at Michigan University in 1865, and practiced law at Lima, O. Here he became interested in the affairs of the old Lake Erie & Louisville Railroad Co., and was so successful that he later undertook the construction of the Nickel Plate system in opposition to the Lake Shore. At the time of his death he was President of the Lake Erie & Western R. R., and the Cleveland, Akron & Columbus Ry., was Vice-President of the Duluth, South Shore & Atlantic Ry. He was also a director of the Chicago, Indianapolis & Louisville Ry., of the Pacific Mail Steamship Co., the Welsbach Commercial Co., and the Chase National Bank. He was also largely interested in the American China Development Co., which lately secured a concession to build a railway from Hankow to Canton.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Dec. 27. Secy., Wm. H. Searles, Case Library Bldg., Cleveland.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
Dec. 28. Secy., Ralph W. Pope, 26 Cortlandt St., New York city.

ENGINEERING SOCIETY OF WESTERN NEW YORK.
Jan. 2. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Jan. 2. Secy., C. L. Annan, City Engineer's Office, St. Paul, Minn.

FRANKLIN INSTITUTE.
Jan. 3. "Methods for the Examination of Explosives," Dr. W. J. Williams. Jan. 17. "The Clarification and Purification of Municipal Water Supplies," Mr. Allen Hazen. Jan. 20. "This Country of Ours," John Birkinbine. Secy., Wm. H. Wahl, 15 South 7th St., Philadelphia, Pa.

WESTERN SOCIETY OF ENGINEERS.
Jan. 3. Annual meeting. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.

FOUNDRYMEN'S ASSOCIATION, PHILADELPHIA.
Jan. 4. Secy., Howard Evans, Pier 45, Delaware Ave., Philadelphia, Pa.

ENGINEERS' CLUB OF ST. LOUIS.
Jan. 4. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Jan. 4. Secy.,C. W. Hunt, 220 West 57th St.,New York city.

BROOKLYN INSTITUTE OF ARTS AND SCIENCES.
Jan. 6. "The Electro-Metallurgy of Copper," John B.F. Hereschoff. Secy., Henry I. Weed, Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.

CHICAGO ELECTRICAL ASSOCIATION.
Jan. 6. "Telephone Engineering: Some Problems, Solved and Unsolved," S. G. McMeen. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.

THE ENGINEERS' CLUB OF PHILADELPHIA.
Jan. 7. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

ENGINEERS' CLUB OF COLUMBUS.
Jan. 7. Secy., H. M. Gates, 12½ North High St., Columbus, O.

THE LOUISIANA ENGINEERING SOCIETY.
Jan. 9. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

ENGINEERS' CLUB OF KANSAS CITY.
Jan. 9. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.

DENVER SOCIETY OF CIVIL ENGINEERS.
Jan. 10. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Col.

NORTHWEST RAILWAY CLUB.
Jan. 10. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

NEW ENGLAND RAILWAY CLUB.
Jan. 10. Secy., Edw. L. Janes, P. O. Box 1158, Boston, Mass.

CANADIAN SOCIETY OF CIVIL ENGINEERS.
Jan. 12. Annual meeting. Secy., C. A. McNab, 112 Mansfield St., Montreal, Can.

ENGINEERING ASSOCIATION OF THE SOUTH.
Jan. 12. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.

CENTRAL RAILWAY CLUB.
Jan. 13. Secy., H. D. Vought, 114 Fifth Ave., New York city.

ST. LOUIS RAILWAY CLUB.
Jan. 13. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.

SCRANTON ENGINEERS' CLUB.
Jan. 14. Annual meeting. Secy., F. E. Pratt, 730 Madison Ave., Scranton, Pa.

MONTANA SOCIETY OF ENGINEERS.
Jan. 14. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

AMERICAN INVENTORS' AND MANUFACTURERS' ASSOCIATION.
Jan. 15. Annual meeting, Washington, D. C. Secy., Arthur Steuart, Washington Loan and Trust Bldg., Washington, D. C.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Jan. 16. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

TECHNICAL CLUB OF OMAHA.

NORTHWESTERN ELECTRICAL ASSOCIATION.
Jan. 19-21. Semi-annual meeting, Milwaukee, Wis. Secy., Thos. R. Mercein, 511 Montgomery Bldg., Milwaukee, Wis.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Jan. 20. Annual meeting. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

ROCHESTER ENGINEERING SOCIETY.
Jan. 20. Secy., John F. Skinner,Reynolds Library Bldg., Rochester, N. Y.

THE DETROIT ENGINEERING SOCIETY.
Jan. 20. Secy, Henry Goldmark, Wayne Co., Sav. Bank Building, Detroit, Mich.

NATIONAL ASSOCIATION OF MANUFACTURERS.
Jan. 24-26. Annual convention, Cincinnati, O. Secy., E. P. Wilson, Room A, Chamber of Commerce, Cincinnati, O.

INDIANA ENGINEERING SOCIETY.
Jan. 24-26. Annual meeting, Indianapolis, Ind. Secy., J. B. Nelson, 61 Baldwin Block, Indianapolis, Ind.

MICHIGAN ENGINEERING SOCIETY.
Jan. 24-26. Annual meeting, Lansing, Mich. Secy., F. Hodgman, Climax, Mich.

ILLINOIS SOCIETY OF ENGINEERS AND SURVEYORS.
Jan. 25-27. Annual meeting, Champaign, Ill. Secy., Jacob A. Harman, Peoria, Ill.

AMERICAN CHEMICAL SOCIETY.—The 18th annual meeting of this society will be held Dec. 27-28, at the Chemists' Club House, 108 W. 55th St., New York city.

ROCHESTER ENGINEERING SOCIETY.—The annual meeting and the meeting for the election of officers was held on Dec. 16. The paper of the evening, on "Topographic Methods of the U. S. Geological Survey," was presented by Mr. Warner W. Gilbert.

ENGINEERS' AND ARCHITECTS' ASSOCIATION OF SOUTHERN CALIFORNIA.—This association enjoyed an excursion on Dec. 16 to the Santa Ana Canyon, where the plant of the Redlands Electric Co. was inspected. The company furnished transportation and hotel accommodations for the visiting members.

THE CIVIL ENGINEERS' CLUB OF CLEVELAND.—The regular monthly meeting was held Dec. 13. A committee of three was appointed to consider the feasibility of renting new and better quarters for the club.

Mr. Edwin L. Thurston read a paper on "The Nature and History of Patent Rights." W. H. Searles, Secy.

NATIONAL BOARD OF TRADE.—The 29th annual meeting of this commercial association was held in Washington, D. C., on Dec. 13. The National Board of Trade was organized in 1868, and holds yearly meetings for the consideration of ways and means of securing unity and harmony of action in reference to commercial and financial matters of the country as a whole.

Committees were appointed on the following subjects: Banking and Currency; War Revenue Taxation; Interstate Commerce and Pooling; Interoceanic Canal; Postal Matters; American Merchant Marine; Reciprocity and American Trade; Inland Waterways; Department of Commerce.

The matter of protection and preservation of timber lands, with reference to the maintenance of sources of supply, and the influence of forest lands upon climatic conditions, was considered, and a resolution urging the various state legislatures to enact laws with this object in view was adopted.

A resolution favoring irrigation, storage reservoirs and means for increasing the agricultural products of arid sections of the country, all under the direction of United States authorities, was adopted.

AMERICAN SOCIETY OF HEATING AND VENTILATING ENGINEERS.—The following is the list of nominations for officers of this Society for 1899:

President—Henry Adams, Washington, D. C.; J. H. Kinealy, St. Louis,Mo. First Vice-President—D. M. Quay, Chicago, Ill.; H. D. Crane, Cincinnati, O. Second Vice-President—A. E. Kenrick, Brookline, Mass.; John A. Fish, Boston, Mass. Third Vice-President—F. A. Williams, New York; A. C. Mott,Philadelphia,Pa. Secreatry—W. M. Mackay, New York; L. B. Sherman, New York. Treasurer—Judson A. Goodrich, New York; J. J. Blackmore, New York. Board of Managers—W. F. Wolfe, New York; S. A. Jellett, New York; Henry C. Meyer, Jr., New York; U. G. Scollay, Brooklyn, N. Y.; B. H. Carpenter, Wilkesbarre, Pa.; John D. Hibbard, Chicago, Ill.; A. A. Cary, New York; J. A. Connolly, New York; Thomas Barwick, New York; W. A. Russell, New York. Council—R. C. Carpenter, Ithaca, N.Y.; W. McMannis, New York; W. S. Hadaway, Jr., New York; John Gormly, Philadelphia, Pa.; D. M. Nesbit, London, Eng.; W. H. Bryan, St. Louis, Mo.; B. F. Stangland, New York; T. J. Waters, Chicago, Ill.; George Mehring, Chicago, Ill.; F. W. Foster, Boston, Mass.

NEW YORK ELECTRICAL SOCIETY.—The 192d meeting of this society was held on Dec. 14. The principal address of the evening was on "Ideas Underlying the Organization of the Volunteer Engineer Corps; the Work Accomplished by it in Porto Rico and the Opportunity for Further Usefulness," by Col. Eugene Griffin, Colonel of the First Regiment, U. S. Volunteer Engineers, and also First Vice-President of the General Electric Co. The topic, "Electrical and Engineering Work in the Navy During the War," was discussed by Mr. F. W. Roller, late Chief Engineer of U. S. S. "Nashville," who divided all electrical devices used on shipboard into two classes, the sucessful and the unsuccessful. Annunciators, range finders and various indicating and firing appliances apparently failed completely. On the other hand, incandescent lamps, motors and search lights proved of the greatest value. The failure of the lighter devices was attributed to defective design or wrong principle, or they could not be adapted to the conditions that obtained on board a ship of war. The range finder, for instance, was utterly valueless and was not used during the war. Elevations were found on the vessels by means of test shots with 6-pounders. The electrical firing apparatus was uncertain and unsatisfactory. The indicating apparatus was too delicate and complicated to stand the shocks which necessarily come on a warship, and it was continually getting out of order. Mr. Roller then read a brief paper on the same subject by Mr. W. D. Weaver, Editor of the "American Electrician," and late Chief Engineer of U. S. S. "Glacier," which strongly recommended the substitution of electricity for steam for operating all auxiliary apparatus on shipboard.

Capt. Zalinski, well known as the inventor of the dynamite gun that bears his name, spoke briefly of the work of the "Vesuvius" during the war.

LOUISIANA ENGINEERING SOCIETY.—The regular meeting of this society was held on Dec. 12. The paper of the evening was the "History of Street Pavements in New Orleans," by Mr. A. C. Bell, City Engineer.

The paper opened with a description of the site of New Orleans and a sketch of the history of the city. This was followed by an account of the development of street paving and improved sidewalks. In August, 1898, the character and mileage of street pavements in New Orleans was as follows, the estimated unit cost being given in the last column:

Material.	Miles.	Estimated cost per sq. yd.
Plank	40.64	*
Cobble-stone	40.49	2.00
Square block	26.14	5.00
Belgian block	2.32	4.25
Vitrified brick	5.83	2.50
Asphalt	11.98	3.10
Wood block	0.06	3.40
Shell	21.83	1.00
Gravel	42.55	1.50
Chert	2.78	1.75
Total	194.62	....

*$16 per M. ft. B. M.

The total mileage of streets open to use is 700, of which only about 18% have been improved.

Mr. Bell recommends Belgian blocks, asphalt and chert for heavy, medium and light traffic, respectively. The Belgian blocks are bedded in 2 ins. of sand on 6 ins. of concrete, the latter being placed on a tamped or rolled earth surface. The blocks are rammed or rolled, then their joints are partly filled with fine gravel and finally with pitch. The blocks are of granite, 4 × 10 ins., 5 ins. deep. The asphalt has the same kind of foundation as the block. On the concrete is laid a 1½-in. binder, and on this is placed the 2-in. wearing surface of asphalt. Chert roads are constructed as follows: After proper excavation the earth is rolled or tamped and 1 × 12-in. cypress boards laid on it. The first layer of chert is then spread to a depth of 6 ins., sprinkled and rolled. Two 3-in. layers, sprinkled and rolled, follow in succession, the last layer being worked until a compact, uniform surface is obtained.

NEW PUBLICATIONS.

AMERICAN WATER-WORKS ASSOCIATION.—Proceedings of the Eighteenth Annual Meeting, Held at Buffalo, N. Y., June 14 to 18, 1898. Peter Milne, Secretary, 12 John St., New York City. Paper; 6 × 9 ins.; pp. 208; illustrations. Price, $1.

Abstracts of the papers and discussions included in this report were published in our issue of June 23, 1898. Quite a wide range of subjects relating to water-works construction and operation are presented.

MISSOURI BUREAU OF LABOR STATISTICS AND INSPECTION.—Report for 1897-8. Compiled and Published by Arthur Rozelle, Commissioner of Labor, Jefferson City, Mo. Paper; 6 × 9 ins.; pp. 284; tables.

A large part of this report is taken up with statistics of various manufacturing industries of the state and a general review of the industries and condition of each county. The bureau has recently established a free employment bureau.

U. S. GEOLOGICAL SURVEY.—Bulletin 150: The Educational Series of Rock Specimens Collected and Distributed by the U. S. Geological Survey. By J. S. Diller; pp. 400; illustrated. Bulletin 151: The Lower Cretaceous Gryphæas of the Texas Region. By Robt. T. Hill and T. Wayland Vaughan; pp. 66; illustrated. Bulletin 152: A Catalogue of the Cretaceous and Tertiary Plants of North America. By Frank Hall Knowlton; pp. 247. Bulletin 153: A Bibliographic Index of North American Carboniferous Invertebrates. By Stuart Weller; pp. 653. Bulletin 154: A Gazeteer of Kansas. By Henry Gannett; pp. 246; maps. Bulletin 155: Earthquakes in California in 1896 and 1897. By Charles D. Perrine; pp. 45. Bulletin 156: Bibliography and Index of North American Geology, Paleontology, Petrology and Mineralogy for 1897. By Fred Boughton Weeks; pp. 130; Washington, D. C.; paper; 9 × 6 ins.

PROCEEDINGS OF THE 18TH ANNUAL MEETING OF THE INDIANA ENGINEERING SOCIETY. Held at Indianapolis, Jan. 4, 5 and 6, 1898. James B. Nelson, Secretary, Indianapolis, Ind. Published by the Society. Paper; 9 × 6 ins.; pp. 170.

Contents: Officers and Committees: Roads and Road Building, J. F. O'Brien; Brick vs. Asphalt for Small Cities, Harry L. Weber; National Road and Wernwag Bridge over White River at Indianapolis, Ed. Hill; The Columbia City, Ind., Sewer System, C. G. H. Goss; Engineering Expert Testimony, Prof. R. L. Sackett; The Municipal Engineer, A. J. Hammond; Methods of Construction and Assessment for Tile Drains, J. W. Fawcett; The Business End of Civil Engineering, C. G. H. Goss; Some Difficulties Encountered in City Surveying, H. B. Fatout; Retracing Old Lines, J. W. Fawcett; How we Make Ditches in Jasper County, John Alter; Minimum Grades for Drain Tiles, Wm. M. Whitten; Relation of the Board of Health to the Engineer, Dr. J. N. Hurly; Cement Testing, John W. Dickinson; Summary of proceedings at annual meeting.

METRIC TABLES FOR THE TRANSIT MAN.—By H. H. Filley, M. Am. Soc. C. E., Kansas City, Mo. Paper; 4 × 6½ ins.; pp. 14. Unbound so as to slip in note book.

Mr. Filley has been engaged for 15 years or more in railway surveys in Mexico, where the metric system is used in all measurements. He found that the field books used were not properly arranged for that system; and that considerable time was lost, and errors crept into the work of reducing radii, tangents and externals from the foot to metric measures. He then made a set of tables covering these reductions, and added to them a collection of trigonometric and curve formulas and a condensed table of "chords to a radius of 1," for protracting. The radii are computed for 20 m. chords down to a radius of 100 m., and for 10 m., or a half-chain, for all curves of less than 100 m. radius. This provides for the use of short chords where most needed, and keeps the correction so small, in sharp curves, that it may be readily and mentally interpolated. Mr. Filley has had these tables stereotyped, and offers to mail copies without charge to any engineer who may have use for the tables, and who will write him at the address given above.

LIVERPOOL TRIALS OF MOTOR VEHICLES FOR HEAVY TRAFFIC, May 24 to 27, 1898, conducted by the Liverpool Centre of the Self-Propelling Traffic Association; President, the Right Honorable the Earl of Derby, K. G. Judges' Report. Edited by E. Shrapnell Smith. Liverpool: Winstanley & Watkins. Paper; 9¾ × 6 ins.; pp. 126; illustrated. 5 shillings. Address the Association at Royal Institution, Colquitt St., Liverpool, England.

This report gives the regulations and conditions for competition, the points considered by the judges, rules for ascertaining cost of working, the general arrangements, and the methods of keeping records. Then follow illustrated descriptions of the vehicles which took part in the trial, with details of mechanism, and the results in each case. While notes of this trial have already been published in this journal, some of the conclusions of the judges are interesting. The vehicles used were all propelled by steam. The judges concluded that they were well fitted for many trade purposes and could economically take the place of horses, and they were capable of hauling loads up to 4 tons 30 to 40 miles. But the volume of traffic between Liverpool and the manufacturing districts is too large and varied to be dealt with by any isolated scheme of motor wagon transport. Although the calculated cost per net ton-mile shows a saving on existing railway rates the judges do not consider that motor vehicles could successfully compete for traffic in opposition to reduced railway rates, except under exceptional circumstances. The severity of the service on common roads, at useful speed, is such as to involve, perhaps, greater cost for maintenance than was used in the trials. As to the vehicles themselves, the wheels and tires used, though efficient as carriers were all structurally inefficient as drivers; none of the vehicles were handled quite as well as was expected, though the general control was at least as good as with the best type of horse-drawn vehicles. The motors would climb hills better than horses. At least two speed gears, or an equivalent reserve of power, are essential to successful working on common roads with steep or even average gradients. The most onerous conditions, however, are those involved in the limitations of the "Locomotives on Highways Act," of 1896. Legislative relief is here required. The judges believe that the experience gained in this trial will tend to obviate some of the difficulties encountered and they propose new trials with eight months' previous notice to builders of motor vehicles.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

ROLLER BEARINGS.—Hyatt Roller Bearing Co., Harrison, N. J. Pamph.; 6 × 9 ins.; pp. 34.

This is an illustrated catalogue and price-list of the "Hyatt" flexible roller bearings. It is claimed that these bearings save from 25 to 60% of the work of overcoming the frictional resistance of ordinary bearings. The pamphlet contains records of tests made at the Franklin Institute, showing reductions of the coefficient of friction, as compared with solid roller bearings.

ORNAMENTAL IRONWORK.—The Winslow Bros. Co., Chicago, Ill. Paper; 7 × 6 ins.; pp. 12.

This pamphlet contains excellent half-tone engravings of specimens of the company's work in the way of grilles, elevator cars and enclosures, balustrades, railings, stairways, lamps, etc.

METALINED OR OILLESS BEARINGS. North American Metaline Co., 6 West Ave., Long Island City, N. Y. Small circulars and leaflets.

These circulars, besides describing "metaline" and its merits, give directions for inserting metaline plugs in bearings. Metalined bushings are largely used on loose pulleys, and instances are given of their running for eight years at 380 revolutions per minute.

ELECTRIC SUPPLIES.—General Catalogue No. 14.—Western Electrical Supply Co., St. Louis, Mo. Cloth; 7⅜ × 10⅜ ins.; pp. 754; illustrated.

This is a full general catalogue of the principal lines of standard electrical goods and appliances handled by the Western Electrical Supply Co.

The book is very complete and will make a useful addition to any engineer's library, particularly as a supplement giving discounts is included.

ENGINES AND DIRECT-CONNECTED GENERATORS.—B. F. Sturtevant Co., Boston, Mass. Pamph.; 8 × 10½ ins.; pp. 8.

This is an illustrated circular of the "Sturtevant Generating Sets," with automatic horizontal and upright engines, direct-connected to dynamos of various forms. A novelty is a "midget" set, which has a 2½ × 2-in. engine, to run 1,000 revolutions per minute, with a 1,500-watt dynamo capable of furnishing current for 25 16-c. p. lights, the whole combination weighing only 400 lbs.

RAILWAYS.

ALLEGHENY & WESTERN.—Reports state that the headings of the tunnel near Curwensville, Pa., on this extension of the Buffalo, Rochester & Pittsburg Ry., have been brought together. The tunnel is about 2,317 ft. long, 24 ft. high and 20 ft. wide. The excavating is expected to be completed before Dec. 25, and the work on constructing the arches will soon begin. The completion of the tunnel leaves only two extensive pieces of work to be done in that section. They are the Lyons cut, 104 ft. deep, between Curwensville and Adrian, and the Prenter cut, south of Curwensiville, which is 40 ft. deep. It is not expected to complete the Lyons cut before early spring. Bennett, Talbott & Smith, Contractors, Greensburg, Pa.; J. M. Floesch, Ch. Engr., Kittanning, Pa.

AUSTRALIA.—Press reports state that bids are being received for supplying 32,180 tons of steel rails and 3,258 tons of fish plates to the railway commissioner of Victoria, at Melbourne, Australia. The Agent-General for Victoria. at London, England, can give particulars.

BALTIMORE & SOUTHERN.—Reports state that negotiations are pending for the immediate construction of this proposed railway to connect Baltimore, Md., and Drum Point, via Millersville. Considerable work has already been done under the charter of the Baltimore & Drum Point Ry. Co., and much of the right of way obtained. The principal promoters are said to be Edward Lauterbach, of New York, and Frank R. Biedler, of Baltimore.

BANGOR & PORTLAND.—Henry I. Hoffman, Ackermanville, Pa., is reported to have been awarded the contract for building a two-mile extension of this line, from Pen Argyle, Pa., to the American Bangor slate quarry, to cost about $11,000. C. Miller, Pres., Bangor, Pa.

CENTRAL VERMONT.—P. H. Fitzgerald, New London, Conn., has been awarded the contract for the construction of a spur track from the main line at Montville, to Palmertown, Pa. Work was to begin this week. The siding will be about 2½ miles in length, with a graded incline of 200 ft.; estimated cost, $100,000. D. Mackenzie, Division Supt., New London.

CLEARWATER SHORT LINE.—This company has filed articles of extension in Washington for a branch line from Ainsworth, in Walla Walla county, to the state line near the mouth of the Clearwater River, a distance of 135 miles, and for a branch from the main line at or near the junction of Potlach Creek and the Clearwater River, Nez Perces county, Idaho, to the main line of the Northern Pacific near Connell, Wash., 140 miles. C. S. Mellen, Pres., St. Paul, Minn.; Thomas Cooper, Resident Agt., Tacoma, Wash.

COAHUILA CENTRAL.—We are informed that C. E. Corn, Saltillo, Mexico, has the contract for grading and track-laying on this proposed line, from Saltillo to Trevino, a distance of 60 miles. A further extension to Sierra Majada, in the State of Chihuahua, is also projected. The maximum grade is 2% and the maximum curve, 8°. Additional contracts will be let after Jan. 15. S. J. Martin, Pres. of Coahuila Central Construction Co., Saltillo, Mex.; John C. McMynn, Vice-Pres., The Rookery, Chicago; W. E. Dorwin, Gen. Mgr., 304 Tacoma Bldg., Chicago, Ill.; S. Potis, Ch. Engr., Saltillo.

COLUMBIA & WESTERN.—Steel is now being laid on the Robson-Picton branch of this new railway in British Columbia at the rate of about 2,000 ft. a day, beginning at West Robson. Three tunnels have been finished between Robson and Brooklyn, respectively 246 ft., 350 ft. and 700 ft. in length, but a number of trestles and culverts still remain to be built. Most of the grading has been completed, and when several large cuts shall have been made work will begin on a 3,000 ft. tunnel, four miles west of Brooklyn. Mann, Foley Bros. & Larson are the general contractors for this 105-mile piece of work.

COLORADO & SOUTHERN.—This company, which has obtained control of the reorganizd Gulf and South Park lines, has been incorporated in Colorado, with a capital stock of $48,000,000. The incorporators are: E. E. Whitte, Alexis D. Parker, John E. Macbeth, Thomas E. Dunaway and B. T. Winchell.

GUTHRIE, LANGSTON & DOWNS.—This company has been organized at Guthrie, Okla., according to reports, to construct a railway from Langston to Guthrie, thence southward to Downs, Okla., a distance of about 40 miles. The capital stock is $2,000,000, and the line is expected to serve as a connecting link for some proposed through line.

HANNIBAL & ST. JOSEPH.—Reports state that plans and specifications are being prepared for the construction of a new terminal system for the Hannibal & St. Joseph R. R. and the Kansas City, St. Joseph & Council Bluffs R. R. in Kansas City, Mo.; estimated cost, about $200,000. A new freight station will also be built at 12th and Mulberry Sts. L. F. Goodale, Ch. Engr., St. Joseph, Mo.

LITCHFIELD, CARROLLTON & WESTERN.—It is announced that Johnson Bros. & Faught, Contractors, St. Elmo, Ill., who purchased this line on foreclosure, will probably extend it from Litchfield, Ill., east to St. Elmo, via Coffeen, about 45 miles, and from Columbiana, Ill., to Qunicy, about 60 miles. The present route is from Columbiana to Litchfield, via Carrollton, 58 miles.

LOUISIANA & ARKANSAS.—This company has filed amended articles of incorporation in Arkansas, in order to increase its capital stock from $150,000 to $300,000. It is intended to construct an additional line from a point on the Vicksburg, Shreveport & Pacific R. R., at or near Sibley, La., in a southwesterly direction, through the parishes of Webster, Bienville, Natchitoches and Winn, and unite with a line in operation from Minden to Sibley. J. A. Buchanan, Gen. Mgr., Stamps, Ark.

MINNESOTA.—The Empire Lumber Co., of Winona, Minn., and other logging firms are said to contemplate the construction of a line of railway from Dedham into the Black River region for the purpose of hauling logs to the St. Croix, a distance of from 12 to 20 miles. It is thought that work will be commenced next spring.

NEWFOUNDLAND.—Reports state that Joseph Chamberlain, English Colonial Secy., has refused to disallow the railway contract made by this colony with W. G. Reid, 30 St. John St., Montreal, Que.

PENNSYLVANIA.—Reports state that Ora L. Nichols, County Surveyor, Coudersport, Pa., has been making surveys for the Lackawanna Lumber Co. for a railway to be built from Mina, Pa., to the top of "Lookout Mountain," for timber purposes. Many switch-backs will be needed as the grade is in some places 200 ft. to the mile. In the spring, an extension will probably be built to Austin and the line made permanent.

PITTSBURG & ALLEGHENY RIVER.—This company was incorporated in Pennsylvania, Dec. 15, with a capital stock of $30,000, to build a steam railway from 32d St., in Pittsburg, to Herrs Island, in Allegheny, Pa. The incorporators are: J. H. Park, Pres.; C. E. Clapp and John A. Sutton, all of Pittsburg; D. E. Park, Allegheny; W. G. Park, New York.

SAUGATUCK & SOUTH HAVEN.—This company was incorporated in Michigan, Dec. 16, with a capital stock of $176,000, of which $11,000 is subscribed and $550 paid in, to build a standard gage railway between the towns named. The incorporators are: A. A. Patterson, Jr., D. H. Patterson, J. W. Johnston, S. H. Kelly, Benton Harbor, Mich.; H. T. Leslie, Chicago; W. A. Patterson, Saratoga, N. Y.; F. McOmber, Berrien Springs, Mich.

TENNESSEE CENTRAL.—M. Schwerin, Vice. Pres. and Secy., Crossville, Tenn., informs us that the contract for the construction of this railway has been awarded to Naugle, Holcomb & Co., 355 Dearborn St., Chicago, Ill. The contractors agree to complete the first 60 miles from Harriman, Tenn., on the line of the Cincinnati Southern, via Rockwood, to Monterey, Tenn., in about 8 months. From Rockwood the road begins to ascend the Waldens Ridge to the top of the Cumberland Plateau, which is about 2,000 ft. above sea level; it will pass the Roane Iron Works on a steel viaduct of considerable height, and three miles from Rockwood the line will pass through a long tunnel; in fact, the entire line is cut through solid rock in many places at a very heavy outlay of labor and of dynamite. The line also passes through the celebrated Crab Orchard Gap, which is the only pass for a railway from Rockwood to Crossville, and from thence to Crossville a fairly level country is traversed. The distance from Harriman to Crossville is about 34 miles. From Crossville the company intends to run branch lines to the different coal banks west of Crossville. The coal seams will average nearly 6 ft., and has been declared by Mr. Fulton, a coal expert, of Johnstown, Pa., to be first class for cooking purposes. The coal fields cover 25 square miles, and there is also a plentiful supply of fine limestone, building stone, fire clay, and a good indication of coal oil and iron ore; also plenty of timber. The climate is good. Jere. Baxter, Pres., Nashville, Tenn.; Geo. T. Bigelow, Ch. Engr., Rockwood, Tenn.; George Westeon, Ch. Engr. of the construction company; temporary office, Rockwood, Tenn. The officers of the Central Land & Coal Co. are: W. F. Niedringhaus, Pres., St. Louis, Mo.; M. Schwerin, Vice-Pres. and Secy., Crossville, Tenn.; W. Niedringhaus, Treas., St. Louis. The company is a close one, for none of the stock is on the market. The grade of the railway from Harriman to Monterey is more than half finished, and the ties for nearly 20 miles are also on the line. The capitalists who are behind the project have ample means to finish the entire work from Harriman to Clarksville, Tenn., a distance of 220 miles. By the opening up of this new line the distance from New York to Nashville by the Southern R. R., via Knoxville and Harriman, will be shortened fully 100 miles, saving the distance from Knoxville to Chattanooga.

STREET AND ELECTRIC RAILWAYS.

HUDSON, MASS.—The selectmen have granted a franchise to the Clinton & Hudson St. Ry. Co. to build and operate an electric railway through this town.

MILFORD, MASS.—It is reported that the Pittsfield St. Ry. Co. contemplates the extension of its lines to Peck's and Onota. J. Tucker, Pres.

ANSONIA, CONN.—The Seymour Electric Ry. Co. has been organized in Ansonia, which proposes to apply for a charter granting it permission to build a trolley line from this city to Seymour, and thence to Beacon Falls, a distance of 10 miles. Connections are to be made with the Derby St. Ry. Co., H. H. Wood, Pres., of Derby, and the Waterbury Traction Co.'s line, which is expected to be extended from its present terminus at Naugatuck to Beacon Falls.

HARTFORD, CONN.—W. E. Goodwin, of Elmwood, Conn., and Fred C. Rockwell, of Hartford, are said to be the promotors of a project to build an electric line from Hartford to New Britain, via Prospect Ave. A charter will be applied for.

MERIDEN, CONN.—The Meriden Electric R. R. Co. expects to petition the next state legislature for permission to extend its lines in this city. N. H. Heft, Pres., 127 Pratt St.

NEW BRITAIN, CONN.—It is announced that the Central Ry. & Electric Ry. will ask the state legislature for permission to build several extensions to its system. A. M. Young, Pres., Chestnut St.

NEW HAVEN, CONN.—Reports state that Thos. M. Waller, Lieut.-Gov. Jas. D. Dewell, Israel I. Kelsey, Vice-Pres. of Winchester Ave. R. R. Co.; S. Harrison Wagner, of the New Haven St. Ry. Co., and W. B. Ferguson, Pres. of Winchester Ave. Co., have petitioned the general assembly for an act of incorporation empowering them to form a new street railway company, and to lay tracks through several streets in New Haven and through surrounding towns.

ELMIRA, N. Y.—It is reported that the American Engineering Co., Bound Brook, N. J., has been awarded the general contract for the construction of the proposed Elmira & Seneca Lake Electric Ry., which is to connect Elmira and Seneca Lake, via Watkins, Montour Falls, Millport and Pine Valley. Samuel Knapp, Montour Falls, will furnish the cross ties and trolley poles, and Michael Frank is to furnish 200 laborers. Work on the construction of the culverts, bridges, etc., will be commenced soon, but track will not be laid until the spring. Harry M. Herbert, Ch. Engr.

NEW YORK, N. Y.—It is announced that the Westinghouse Electric & Mfg. Co., Pittsburg, Pa., has been awarded the contract for the steam and electrical equipment of the power house and street railway lines of the Third Ave. R. R. Co. The contract involves the expenditure of several million dollars, and covers the steam engines, boilers and entire steam plant, and the electric generators, rotary transformers and all other electrical apparatus required. The power house will be built at 216th St. Albert J. Elias, Pres., 1119 Third Ave.

NYACK, N. Y.—Work has been suspended on the proposed line of the Nyack Traction Co. until the spring.

CLIFFSIDE, N. J.—The Bergen County Traction Co., foot of West 130th St., New York, informs us that the construction of an extension of its line, from Fort Lee Ferry to Hudson county, via Cliffside, has not yet been positively decided upon, but will depend largely upon the terms of the franchises offered the company.

HARRISBURG, PA.—F. B. Musser, Supt., of Harrisburg Traction Co., informs us that the proposed extension to Lingleston was surveyed several years ago. Nothing has since been done, nor is it expected to build very soon. E. C. Felton, Pres.

PERKASIE, PA.—The Inland Traction Co. has been granted a franchise to build on certain streets in this borough. Pascoe & Crilly, Contractors, Allentown, Pa., are said to be interested.

PHOENIXVILLE, PA.—It is reported that work will soon be begun on a trolley line to be built by the Montgomery & Chester Electric Ry. Co., between Phoenixville and Spring City, six miles, with possible extensions to Limerick Square and Pottstown. John J. Ridgway, Pres., Philadelphia, Pa.

STONYCREEK MILLS, PA.—We are informed that Davis Bros., of Reading, Pa., have about completed preliminary surveys for an electric railway from this place to Friedensburg, a distance of 6 miles. It is expected that the right of way will be secured this winter, and that actual construction will begin in the spring.

VICKSBURG, MISS.—It is reported that Geo. F. McCullough, of Richmond, Ind., will have charge of the construction of the proposed electric railway and light plant in Vicksburg, for J. C. Shaffer, of Chicago.

CHATTANOOGA, TENN.—It is announced that the Chattanooga Electric Ry. Co. will expend $55,000 in improving and equipping its system. J. H. Warner, Pres.

ALLIANCE, O.—The Stark county commissioners have granted an extension of six months' time to the Stark Electric Ry. Co., within which to complete its line between Alliance and Canton.——H. Blakeley, of Alliance, is said to be interested in a projected electric railway to connect Alliance and Akron, to be 30 miles in length.

BUCYRUS, O.—Press reports state that F. Coleman Boyd, Vice-Pres. of New Haven Bar Register Co., and C. W. Blakeslee, Contractor, of New Haven, Conn., are interested in the construction of a proposed electric railway between Bucyrus and Galion.

CHAGRIN FALLS, O.—We are informed that all the grading has been completed on a 50-ft. private right of way for the Chagrin Falls & Eastern Electric R. R. Co., which proposes to build from South Newbury to Garretville, via Burton, Troy, and Hiram, a distance of 26 miles. Capital for construction has been secured. Jay E. Latimer, Cleveland, O., has the contract for the overhead work, and the contract for the tracklaying will be awarded Jan. 1. R. S. Hubard, Pres., Cleveland.

HAMILTON, O.—The Hamilton & Eaton Electric St. Ry. Co. was incorporated in Ohio, Dec. 15, with a capital stock of $10,000, to construct an electric railway between Hamilton and Eaton, via Camden, Somerville, Collinsville and Seven Mile, a distance of 125 miles. Incorporators are: J. H. Shallenberger, J. A. Walker, A. T. Elliott, J. C. Unzicker.

XENIA, O.—Reports from Xenia state that J. Wayne Neff writes from Philadelphia that he has made a contract with contractors in that city for constructing the proposed line between Xenia and Dayton.

TERRE HAUTE, IND.—Forbes Holton, of the Union Glass Works, and M. R. Williams, Mgr. of Strawboard Trust plants, of Anderson, Ind.; and Crawford Fairbanks, of Terre Haute, have formed a company for the purpose of building an electric railway from Terre Haute to Charleston, via Mattoon, Ill. The line will be joined to the Indiana system by a line from Indianapolis to the Terre Haute via Green Castle and Brazil.

LIBERTYVILLE, ILL.—The council has granted a 50-year franchise to the Chicago & Fox Lake Electric Ry. Co., to build in this village. A. W. Waldo, Village Pres.

SPRINGFIELD, O.—An electric railway between this city and Decatur is projected by a Chicago company, represented by F. L. Sparrow.

OSHKOSH, WIS.—The Citizens' Traction Co. has secured the right of way along the Ridge Road, between this city and Neenah. The company has 60 days in which to accept the franchises, and, if accepted, agrees to pay a forfeiture of $4,000 if the road is not completed by August 1. The plan is said to be independent of the Tillotson Interurban road along the lake shore.

LOS ANGELES, CAL.—The board of public works has recommended that the council grant a franchise to the Los Angeles Traction Co. to build an extension on 11th St. from Georgia to Hoover St. T. J. Hook, Pres.

LEAVENWORTH, KAN.—The commissioners of Leavenworth county have granted a 50-year franchise to A. A. Fenn and others, to construct an electric line connecting Kansas City and Leavenworth. Work is to begin by April 1, and to be completed before Jan. 1, 1900.

DENVER, COLO.—The Denver City Cable Ry. was sold at auction Dec. 15, to H. E. Rogers, representing Fred. P. Olcott, of New York, at $500,000.——It is also stated that the West End Electric Ry. was purchased by the same company at $40,000.

DARTMOUTH, N. S.—The council has appointed a subcommittee to prepare a by-law authorizing the town to supply its own electric light and operate an electric railway.

HAMILTON, ONT.—An act incorporating the Hamilton & Caledonia Co. will be applied for at the next session of the Ontario Legislature, for power to build a railway from Hamilton to Caledonia and Selkirk, thence to some pleasure resort on the shore of Lake Erie. The company proposes to try compressed air as a motive power, according to reports.

HAVANA, CUBA.—The property of the Ferro Carril Urbano was sold, Dec. 14, to a syndicate, headed by Col. G. B. M. Harvey, 32 Nassau St., New York, at $1,472,000, or $92 a share. Others that are interested are: Hanson Bros., Montreal, Que.; the Bank of Toronto; B. F. Pearson, Halifax, N. S.; Harry P. Whitney, New York, and others.

ELECTRIC LIGHT AND POWER.

SOUTHBRIDGE, MASS.—C. W. Weld, who owns the water privilege on the Quinebaug River, below Sanderdale, is considering the question of building a power plant. A local paper stated that a company may be formed.

CHERRY VALLEY, N. Y.—Dr. Geo. L. Merritt, S. W. Barnum and Alva Pearson have been appointed a committee to consider the question of electric lighting.

CROGHAN, N. Y.—The question of lighting this place with electricity is being considered.

ILION, N. Y.—It is proposed to vote at the next municipal election on the question of the city's ownership of the plant.

LOCKPORT, N. Y.—C. T. Raymond, Secy. Lockport Mfg. Association, writes us that plans are being prepared by state engineering department for a dam at this point, to furnish power during the winter. It is not known when bids for the work will be asked.

MANLIUS, N. Y.—W. J. Phillips, who has a franchise, proposes to build a new lighting and power plant.

MIDDLEPORT, N. Y.—Thos. P. Hammond, Village Clk., writes us that S. J. Lawrence, Niagara Falls, N. Y., has been awarded the contract for furnishing 25 lights for the streets at $68 a year. Another bid was received from J. A. Murray, Wilkes-Barre, Pa., at $95 a light.

NEWFANE, N. Y.—T. L. Bunting, of Hamburg, N. Y., and W. T. Ransom, of Lockport, N. Y., are reported as interested in a proposed power plant at this place.

NEW YORK, N. Y.—Bids are asked until Dec. 28 for furnishing the materials and for installing lighting plants for the fireboats "Zophar Mills," "The New Yorker," and the "Robert A. Van Wyck." John J. Scannell, Comr. Fire Dept., 157 East 67th St., Manhattan, New York.

ROCHESTER, N. Y.—Geo. E. Warner, Mayor, writes us that nothing has been done in reference to a municipal plant, save the mayor's recommendation to the committee.

CAMDEN, N. J.—The council committee has decided to ask for new bids for lighting the city with electricity for three or five years.

WILDWOOD, N. J.—Estimates for a plant have been submitted to the council.

BELLEFONTE, PA.—The council is considering estimates for a municipal plant, to be operated in connection with the water-works; estimated cost, about $9,000.

BELLEVUE, PA.—The Pennsylvania Light, Heat & Power Co. has asked for a franchise to operate in this city. The company proposes to build a plant on the Ohio River front.

HOMESTEAD, PA.—The Homestead Electric Light & Power Co. is reported to have purchased 400 ft. of ground along the river front, on which it is proposed to build a new plant.

ANNAPOLIS, MD.—Bids are asked by the bureau of navigation, Navy Dept., Washington, D. C., until Jan. 12, for constructing a power house at the naval academy. Ernest Flagg, Arch., 35 Wall St., New York.——The council has adopted an order offered by Mr. Moss to enter into a contract with the Annapolis Gas & Electric Light Co. for lighting the city for five years upon plans and specifications prepared by Charles G. Edwards, Baltimore, Md., and the street committee. It is upon the express condition that the company put in new lamps, the amount to be paid not to be greater than the present price, which is 25 cts. a light. It was thought impracticable and expensive for the city to build a plant of its own.

SALISBURY, N. C.—Press reports state that money is being subscribed to begin the construction of the proposed power plant on the Yadkin River, for the Yadkin Power Co. Plans for the construction will be considered at once. W. C. Bulliet and Howard Lippincott, Philadelphia, Pa., and Theo. F. Kluttz and Walter Murphy, Salisbury, are interested.

SPARTANBURG, S. C.—Press reports state that Julius L. Carson, Spartanburg, is considering estimates of cost for a plant. It will consist of a 500-HP. water-wheel for 26-ft. head, 125 arc lights of 2,000 c. p., transmitting the currrent 10 miles to the city; dynamo for 2,000 incandescent lights, wire, insulators, transformers, etc.

YORKVILLE, S. C.—T. B. McClain writes us that bids are wanted at once for furnishing the machinery and for building a plant of 25 2,000-c. p. arc and 600 16-c. p. incandescent lights.

DALTON, GA.—This place voted Dec. 10 to issue $7,000 in bonds for a plant, according to reports.

CULLMAN, ALA.—W. H. Jones, Cy. Clk., writes us that this place voted Dec. 12 in favor of asking the legislature for authority to build a plant and water-works. The bill will probably be passed in January, after which steps will be taken to issue the bonds.

HUNTINGDON, TENN.—This place, it is stated, will soon vote on the question of issuing bonds for a plant.

GREENUP, KY.—We are informed that the Greenup Light Co., recently incorporated with a capital stock of $5,000, has purchased the plant now in operation. It does not propose to build an extension.

LISBON, O.—Press reports state that the council will soon establish a plant in connection with the water-works.

PLEASANTVILLE, O.—Bids are asked until Jan. 1 for lighting the streets of this village. Geo. L. Gebhart, Clk.

HARTFORD CITY, IND.—The question of purchasing the plant of the Hartford Light & Power Co. is being considered by the council.

WABASH, IND.—Press reports state as follows: A syndicate has been formed to acquire possession of 12 electric light and power plants now illuminating as many towns and cities in this part of Indiana, ranging in population from 4,000 to 25,000. These plants are all within a radius of 60 miles of Wabash, and the scheme originated in this city. Options on nine of the 12 plants have been obtained at favorable figures, and it is expected options on the remaining three will soon be closed. The aggregate price of the nine is $360,000, but the syndicate, which intends to add many and important improvements and extend the scope of operation to other fields, will be capitalized at $1,500,000. The capital for carrying out the scheme has been pledged in this and neighboring cities, together with parties in Indianapolis, Hamilton, O., and New York.

WINCHESTER, IND.—Bids are asked until Jan. 18 for furnishing the materials and for constructing an extension of the plant and for building water-works. S. D. Fox, Cy. Clk.

BELDING, MICH.—The council, it is reported, wants to grant a franchise for lighting the city by electricity.

LAWTON, MICH.—The council has awarded the contract for furnishing the machinery for the proposed plant to the General Electric Co., Schenectady, N. Y., and to the Wray-Austin Machinery Co., Detroit, Mich. The equipment will cost about $5,000, the building not included.

EDWARDSVILLE, ILL.—Plans have been completed for a plant for the Edwardsville Electric Light & Power Co., to take the place of the one recently destroyed. The company has asked for an extension to its franchise. C. A. Vallette, Secy. and Treas.

EAU CLAIRE, WIS.—Bids are asked until Dec. 31 for lighting the streets and public places with electricity. J. P. Cockrane, Cy. Clk.

MILWAUKEE, WIS.—The committee on public buildings of the county board is considering the advisability of installing a heat, light and power plant in the courthouse, to cost about $10,000. Nothing definite will be done until after Jan. 1.

FONDA, IA.—R. F. Beswick writes us that an election will be held in March to vote on the question of building a plant.

MADRID, IA.—The council has been asked to grant a franchise for electric lighting.

TOPEKA, KAN.—Bids are asked until Dec. 29 for furnishing and installing one 26 × 48 simple, heavy duty Corliss engine, a line of shafting and pulleys, one 40-in. two-ply belt, one 12-in. belt for the electric plant. Engine and shafting to include foundations, the setting, and the operation of same for two weeks. C. A. Fellows, Mayor; S. S. McFadden, Cy. Clk.

WELLINGTON, KAN.—John T. Stewart, A. Graff and W. A. Renn, of the Commercial Club, have been appointed a committee to urge the council to submit to the voters the question of issuing $100,000 of 4% bonds for a plant and improvements to the water-works.

ABERDEEN, S. DAK.—We are informed that the private plant is rather unsatisfactory, but no change has been made yet, although it is under consideration. The question of the city's putting in a plant is being considered.

EDGERTON, MO.—It is proposed to build a plant here, according to reports.

ELDORA, COLO.—It is stated that a 20-year franchise has been granted to the Eldora Mining, Milling & Power Co. to put in water-works and electric lights for this town. Work will be commenced in the spring. The same company is erecting a 75-ton chlorination plant here at a cost of $80,000.

LAKE CITY, COLO.—The Hinsdale Electric Light & Power Co. is reported to have purchased land and a water right near Argenia Falls, which it will use for power purposes.

PRINEVILLE, ORE.—H. V. Gates, Albany, Ore., is considering the question of building a plant and water-works here.

SANTA CLARA, CAL.—The question of putting in incandescent lights in addition to the arc lights already in is being considered by the council. Councilmen Miller and Bray may be addressed.

EAST SOURIS, P. E. I.—The question of building a plant to be operated by water power is being considered, according to reports.

OTTAWA, ONT.—The Metropolitan Electric Light Co. of Ottawa, is arranging for the immediate construction of its plant at the Britannia water power lands. A canal 180 ft. wide, 9 ft. deep and 2,000 ft. long will be built. Thos. Lindsay, Pres.; Geo. Albert Wanners, Secy.; Henry Aylen, Solicitor.

PRESCOTT, ONT.—James Fowler, of Arnprior, Ont., it is stated, has asked for a franchise.

CASCADE CITY, B. C.—Press reports state that work has been begun on the proposed power plant on the Kettle River cascades. About 20,000 HP. will be developed. A dam 400 ft. and 35 ft. high will be built. The Dominion Mining & Development Agency, Ltd., London, England, and C. K. Millbourne, Civil Engr., Nelson, B. C., may be addressed.

WINNIPEG, MAN.—An election will be held Feb. 20 to vote on the question of issuing $50,000 in bonds for a municipal plant according to reports.

NEW COMPANIES.—Bradford Electric Light Co., Bradford, Ill.; $10,000; Robert Thompson, Daniel J. Phoenix, Edmund F. Deyo, John P. Code.

James River Construction Co., Richmond, Va.; $1,000,000; to construct a power plant and mills on the James River, etc.; R. Lancaster Williams, Pres., 227 East German St., Baltimore, Md.; A. W. Weddell, Secy. and Treas., Richmond.

Merchants' Electric Light & Power Co., New Orleans, La.; $300,000; to operate under a franchise recently granted to Cohn & Ber; M. Ber, Pres.; Jos. Simon, Vice-Pres.; E. W. Goldschmidt, Secy. and Treas.; C. A. Gaines, Ch. Engr.

Manhattan Lighting Co., New York; $250,000; to manufacture and supply gas and electricity for lighting, heating and power purposes in New York and Westchester counties; Henry D. Brenner, New York; H. E. Bowen, Brooklyn, and Henry P. Keith, Hempstead, L. I.

South African General Electric Co., Schenectady, N. Y.; $50,000; S. D. Greene, Henry W. Darling, J. R. Lovejoy, Schenectady.

Standard Automatic Lighting Co., East Orange, N. J.; $100,000; to erect light plants; Edmund K. Sargeant, Jr., Joseph Stretch, East Orange, N. J.; R. T. Stout, Asbury Park, N. J.

W. E. Douley Electric Light & Power Co., Big Rapids, Mich.; $40,000, fully subscribed; to supply electricity for light, heat and power; W. E. Douley, J. S. Douley, D. M. Martindale, Chicago, Ill.; J. W. Morton, W. I. Trott, Big Rapids.

Elizabeth Lake Water & Power Co., Los Angeles, Cal.; S. R. Thorpe, W. H. McCoy, P. C. Kennedy, C. C. Wright, H. L. Flast.

Swedesboro Light, Heat & Power Co., Swedesboro, N. J.; $25,000; Chas. D. Lippincott, Henry M. Ridgway, Chas. B. Mitchell, Thos. B. Turner, John C. Rulon, Benj. F. Lawrence, Jas. J. Davidson.

Pine Bluff Electric Light & St. Ry. Co., Pine Bluff, Ark.; $300,000, of which $175 has been subscribed; Jeff. Hicks, Pres.; Thos. L. Chadbourne, Jr., Vice-Pres.; H. H. Hunn, Secy. and Treas.

Tuolumne County Water & Electric Power Co., Columbia, Cal., to furnish water and electric power and light; $550,000, with $143,000 paid in; J. W. Ellis, Wm. Mansfield, Thomas Conlin, J. B. Pawnall, Columbia; M. B. Harrimann, Shaws Flat, Cal.; Geo. Wright, Springfield, Cal.; Geo. W. Hale, Sonora, Cal.

BRIDGES.

BOSTON, MASS.—Bids are asked until Dec. 29 for constructing the superstructure of fixed spans of the bridge on Summer St. extension across Fort Point Channel. Wm. Jackson, Cy. Engr.——The county commissioners are considering the question of having the Fitchburg R. R. Co. widen the bridge at Massachusetts Ave., North Cambridge.

MEDFORD, MASS.—A bridge of steel or masonry, from 50 to 60 ft. in width and of 60 to 70-ft. span, at the Mystic Ry., crossing by Boston Ave. into Somerville, is in contemplation at Medford.

NEW BEDFORD, MASS.—The county commissioners propose to construct a temporary bridge between New Bedford and Fish Island, to be used during the construction of the Fairhaven bridge.

BINGHAMTON, N. Y.—Bids are asked until Jan. 17 for furnishing plans and constructing a bridge across the Susquehanna River at Tompkins St., as stated in our advertising columns. B. W. Mosher, Cy. Clk.——At a meeting of the board of trade Dec. 13 it was decided to urge the council to take steps for the construction of a viaduct across the railroad on Chenango St. E. F. Jones, Pres.

BROOKLYN, N. Y.—Bids are asked until Dec. 28 for furnishing the material and constructing the Blissville bridge over Newtown Creek, at Greenpoint Ave.; surety, $10,000; for constructing a new superstructure, including electrical equipment and fender rack, for the Union St. bridge over Gowanus Canal; building safety gates for five bridges over the Gowanus Canal; installing electric circuit and furnishing electric motive power for the Washington Ave. bridge over Wallabout Canal and the Carroll St. bridge over Gowanus Canal. John L. Shea, Comr. Bridges, 280 Broadway, New York.

LE ROY, N. Y.—It has been decided to construct a bridge over the Buffalo, Rochester & Pittsburg R. R. at Haskins Crossing, 50 ft. long and 16 ft. wide, with 220 and 240 ft. approaches, to cost about $8,400. Half of the cost will be paid by the railroad company and $2,000 each by the state and town.

WATERTOWN, N. Y.—C. O. McComb, Cy. Engr., writes us that contracts will be let during January for the repair of the old Court and Factory St. bridges and possibly to build a new bridge at Pearl St.

NEWARK, N. J.—The Pennsylvania R. R. Co. has awarded a contract to the Edgemoor Bridge Works, Wilmington, Del., for the construction of a steel drawbridge 500 ft. long of three spans, across the Passaic River.

PHILADELPHIA, PA.—The following bids were received Dec. 13 for the steel superstructure drawbridge over the Schuylkill River at Gray's Ferry. To consist of pin-connected trussed spans on each side of the draw span, with plate girder viaduct approaches, entire length of metallic structure 1,660 ft. Thos. M. Thompson, Dir. Dept. Pub. Wks.:

New Jersey Steel & Iron Co., Trenton, N. J.	$189,000
Pennsylvania Steel Co., Steelton, Pa.	167,422
Phoenix Bridge Co., Phoenixville, Pa. (accepted).	145,000
Elmira Bridge Co., Elmira, N. Y.	164,750
Carnegie Steel Co., Pittsburg, Pa	186,493

NEWPORT NEWS, VA.—The Edgemoor Bridge Works, Wilmington, Del., has been awarded a contract to furnish the material and construct a viaduct 750 ft. long, requiring 1,000,000 lbs. of steel, for the Newport News Shipbuilding & Dry-Dock Co.

JACKSON, MISS.—We are informed that this place will issue Jan. 1 $20,000 of 6% 20-year bonds for the construction of a double span Melan arch bridge; also a number of small rolled girder bridges; by day labor. Walter G. Kirkpatrick, Cy. Engr.

GHENT, KY.—Reports state that the Ghent-Vevay Bridge & Terminal R. R. Co., with a capital stock of $35,000, has been chartered to construct a bridge over the Ohio River, between this place and Vevay, Ind. Albert E. Stone, Fred. Stucy, Sam Stucy and Sam Brown are interested.

CINCINNATI, O.—Robert McRoberts, Legislator, proposes to have the board of legislation submit a proposition to the board of city affairs to abolish the high bridges over the canal and construct draw bridges, at a cost of about $7,000 each.

TOLEDO, O.—It is reported that the receivers of the Detroit & Lima Northern Ry. Co. have been authorized by the U. S. court to expend $6,500 for repairing the bridge over the River Raisin. C. H. Roser, Ch. Engr., Detroit, Mich.

SAGINAW, MICH.—Geo. M. Brown, Ch. Engr., Flint & Pere Marquette R. R. Co., Saginaw, writes us that a contract has been awarded to the Toledo Bridge Co., Toledo, O., for the construction of a bridge over the river one mile west of Saginaw. One truss span 130 ft. long and 6 girder spans 15 ft. wide on pile foundation, capacity 4,000 lbs. per lin. ft.; estimated cost, $15,000. No other work is proposed. C. C. Bothfeld, Des. Engr., Detroit.

QUINCY, ILL.—A bridge 108 ft. long and 20 ft. wide will be constructed over Curtis Creek on Eighth St., to cost about $3,500, the city and county each to pay half.

ST. PAUL, MINN.—The following estimates for bridge work have been submitted to the council: High Bridge—New floor and pavement, $25,800; 3d St. Bridge—New floor, pavement and painting, $11,400; Edgerton St. Railway Bridge—New floor and pavement, $4,800; University Ave. Railway Bridge—New floor, pavement and painting, $17,600; Westminster St. Railway Bridge—New stringers, floor and painting, $5,100; So. Robert St. Railway Bridge—New floor, pavement and painting, $3,100; Western Ave. Bridge—Rebuilding, $6,000; Raymond Ave. Bridge—Rebuilding, estimated cost $46,000, funds on hand $25,000, necessary to raise $21,000; Wabasha St. Bridge—Rebuilding, estimated cost $110,000, funds on hand $27,000, necessary to raise $83,000; 6th St. Bridge—Rebuilding 180 ft., $15,000.

MILWAUKEE, WIS.—Ed. C. Lydon, Secy. Bd. Park Comrs., informs us that negotiations for the proposed bridges and viaducts on the extension of Highland Boulevard are still pending in court.

DENISON, IA.—Bids are asked until Jan. 4 for constructing and repairing bridges for the year 1899, according to reports. J. T. Carey, County Audr.

MAQUOKETA, IA.—Fred. Fischer, County Audr., informs us that the proposed 200-ft. iron bridge at Royertown will not be built this season.

HASTINGS, NEB.—Bids are asked until Jan. 10 for bridge work for the year 1899. D. P. Bigelow, County Clk., informs us that there are no specifications mentioned.

DENVER, COLO.—The committee, consisting of John Henderson, J. P. Carrigan, and T. D. Cobbey, will report Dec. 26 on the legality of constructing a viaduct over the railroad and river at 19th St. G. R. Weir, Pres.——The board of public works is contemplating the reconstruction of the old Blake St. Cherry Creek bridge and placing the old structure at Stout St.; also a bridge forming part of the old viaduct across the Platte River to be placed in location across Cherry Creek at South 14th St.——Reports state that surveys have been made by the city engineer for the proposed Bryant St. bridge.

GAINESVILLE, TEX.—The county commissioners' court has decided to construct several bridges across the Red River, and negotiations will be taken up immediately, according to reports.

DENVER, COLO.—The board of public works has decided to have D. W. Campbell prepare estimates for the proposed viaduct from 7th or South 7th Sts. to Highlands Boulevard and West Colfax Ave.

CHEHALIS, WASH.—Bids are asked until 5 p. m., Dec. 23, for putting in new truss timbers and braces for a 185-ft. span Pratt combination truss bridge. Albert Schooley, County Audr.

SEATTLE, WASH.—The county commissioners have awarded a contract to the San Francisco Bridge Co., at $3,695, for the construction of a bridge over the Green River.

SPOKANE, WASH.—A proposition to construct a bridge to connect the west end of Main Ave. with West Riverside Ave., and an incline bridge from the west end of Main Ave. to Peaceful Valley, will probably be brought before the council in the near future, according to reports.

LOS ANGELES, CAL.—The committee has recommended that a contract be awarded to Sawyer & Arthur, at $13,664, for constructing the Los Feliz, Ave. 26 and 9th St. bridges, and J. D. Mercereau, at $6,890 for the 6th St. bridge.

SACRAMENTO, CAL.—Bids are asked until Jan. 5 for constructing three pile trestles, a total length of about 214 ft., on Grand Island. W. B. Hamilton, Clk. Bd. Supervisors.

SACRAMENTO, CAL.—Marco Verozza, Comr., Placerville, Cal., has reported to the governors that $45,000 is required for new bridges along the Lake Tahoe wagon road. There are four bridges crossing the American River, one crossing Truckee River and one crossing Front Creek, which will have to be rebuilt within the next two years.

SANTA CRUZ, CAL.—Bids are asked until 10 a. m., Dec. 23, for a bridge across Valencia Creek. E. Martin, County Clk.

CHATHAM, ONT.—Owen McKay, Ch. Engr., Lake Erie & Detroit River Ry. Co., Walkerville, Ont., writes us that proposals are wanted at the earliest possible date for the superstructure of the Thames River bridge over the Erie & Huron Ry., at this place. It will consist of two girder spans each 75 ft. in length and a draw span of 278 ft.; estimated cost, $25,000.

ST. THOMAS, ONT.—Bids are asked until Jan. 24 for the construction of two iron bridges, each 120-ft. span, across Kettle Creek, as stated in our advertising columns. Jas. A. Bell, Cy. Engr.

BUILDINGS.

BOSTON, MASS.—Andrew Lumsden & Co., 30 Oliver St., Boston, has received the contract for heating and ventilfiating the hall of the Redemptorist Fathers' Mission Church, according to reports, at $2,800.

NEW BEDFORD, MASS.—Bids are asked until Dec. 27 for erecting a brick building at the city poor farm, Clark's Point; deposit, $500; Edmund O'Keefe, Supt. of Pub. Bldgs.; S. C. Hunt, Arch., Odd Fellows' Bldg.

CINCINNATI, O.—Bids are asked until Jan. 5 for brick work, cut stone work, galvanized iron and tin work, plastering, painting and glazing, carpenter work and wrought and cast-iron work and plumbing for proposed alterations and additions to the Public Library building; also for erecting an elevator therein. L. L. Sadler, Chn. of Bldg. Com.; G. W. Drach, Arch., 519 Main St.; Thos. G. Smith, Jr., Consulting Engr., Hammond Bldg.

MARION, IND.—The grand jury has recommended that a new county jail be erected at once.

TERRE HAUTE, IND.—A fire in this city, Dec. 19, destroyed the buildings occupied by Havens & Geddes, Breinig & Miller and others, causing a total reported loss of $800,000.

ALTON, ILL.—The building occupied by Pierson & Carr, dry goods, was destroyed by fire Dec. 17; reported total loss, $50,000.

ELWOOD, IND.—A new city hall building will be erected here. Theodore Harnach, Chn. Bldg. Com.

MILWAUKEE, WIS.—The department store of G. Harstein Sons, at 18th St. and Fond du Lac Ave., was burned Dec. 16, causing a reported loss of about $80,000.

SHELL LAKE, WIS.—The commissioners of Washburn county have decided to erect a new jail to cost not less than $5,000.

CHICAGO, ILL.—Plans have been completed for the rebuilding of the Lincoln Theatre, to cost about $75,000. Carl Zimmerman is reported to be interested.——Postle & Postle, 204 Dearborn St., have completed plans for the reconstruction of the building at 150 Michigan Ave. for the Women's Athletic Club, at a cost of $50,000.—— William Dearing will build a 4-story brick apartment house at 1543 and 1545 Lill Ave., to cost $40,000.

MINNEAPOLIS, MINN.—Reports state that sketch plans have been prepared for an addition to the post office in this city, to cost about $75,000. James Knox Taylor, Supervising Arch., Washington, D. C.

BOONE, IA.—Plans and specifications are asked until Jan. 10 for a new jail building to cost about $10,000. M. D. McGregor, County Audr.

DES MOINES, IA.—It is announced that J. S. Polk, Pres. of Des Moines St. Ry Co., and others, will erect an 8-story building at 6th and Mulberry Sts., to cost about $250,000. Other buildings are planned to be erected in this city during the coming year to bring the total up to about $2,000,000.

NADEAU, KAN.—The following bids were received by the Office of Indian Affairs, Washington, D. C., Dec. 13, for the erection of a frame dormitory and school building on the Kickapoo Reservation: L. D. Eversole, P. O. Box 246, Topeka, Kan., $12,968; Samuel J. Thompson, Holton, Kan., $13,874; Thomas J. Bowers, 407 Monroe St., Topeka, Kan., $13,898; James Nesbit, Atchison, Kan., $12,800; Joseph H. Betts, 1029 Quincy St., Topeka, Kan., $14,402. Victor Bauer, Horton, Kan., $15,750; Herman & Babcock, Hiawatha, Kan., $13,482.

FLANDREAU, S. DAK.—The following bids were received by the office of Indian Affairs, Washington, D. C., Dec. 15, for (a) installing a steam heating plant in the Indian school at Flandreau, and (b) for conduits:

	(a)	(b)
American Heating Co., Duluth, Minn......	$16,157	$13,997
Hess & Rau, Watertown, S. Dak..........	13,098	10,598
J. J. Hanighen, Omaha, Neb...........	13,900	....
Pittsburg Htg. Supply Co., Pittsburg, Pa	17,944	10,500
Allen Black & Co., Minneapolis, Minn....	11,850	9,850
Augustus J. Archambo, Minneapolis, Minn.	11,660	9,160
Charles D. Symms	11,500	9,150
H. Moors Co., Milwaukee, Wis...........	11,000	9,316

ST. LOUIS, MO.—Christian Peper will erect a new 6-story warehouse on Main St., between Morgan and Lucas Aves., to cost $50,000.

ARKADELPHIA, ARK.—Reports state that Chas. L. Thompson will prepare plans and specifications for a $30,000 jail for Clark county. J. H. Crawford, Comr.

EL PASO, TEX.—This city has voted to issue $51,000 in bonds, of which $30,000 will be used for school purposes.——Maydwell & McClintock, 22 and 24 Sheldon Block, have prepared plans for a new city hall building, to cost $30,000, and for which bids were to be opened on Dec. 20.

ROSEBURG, ORE.—The court house of Douglas county was destroyed by fire Dec. 7. Reported loss, $40,000; insurance, $15,000.

FRESNO, CAL.—A fire in this city, Dec. 16, damaged the Voorman block, occupied by Radin & Kemp; reported loss, $100,000.

SACRAMENTO, CAL.—Plans have been accepted for the proposed 12-room high school building, to cost about $75,000. Bids will soon be asked. J. M. Curtis, 126 Kearney St., Arch., San Francisco.

WATER-WORKS.

PLYMOUTH, N. H.—A. F. Wentworth, Jas. N. McCoy, Frank H. Romins, Chas. J. Ayer and Warren G. Chase have been appointed a committee to purchase the works of the Plymouth Aqueduct & Water Co., for not more than $40,000, or, if failing in this, to arrange for the construction of new works.

ESSEX JUNCTION, VT.—E. R. Russell writes us that the legislature has authorized the village to increase its indebtedness to build works. No plans have been prepared and no decided action will be taken until April. Population, 1,000. J. S. Reynolds may be addressed.

PITTSFIELD, MASS.—The water mains will be extended at a cost of $5,000.

WESTERLY, R. I.—A syndicate has offered to purchase the works from the city at cost. L. W. Arnold may be addressed.

FAIRFIELD, CONN.—F. W. Siebert, Edward W. Shedd and C. Siebert have applied to the legislature for permission to build works for this place and Southport. This is probably an application for the renewal of the charter of the Southport Water Co., which was granted in 1889 and lapsed last month.

BUFFALO, N. Y.—The commissioners of public works have decided to put in apparatus at the pumping station for purifying the water for the boilers; estimated cost, $9,000. The apparatus will be purchased from Irlbecker & Son, Agents.

HUNTER, N. Y.—Press reports state that money is being subscribed for the construction of the proposed works, for which a franchise was granted in March, 1897, to John A. Longyear, of Kingston, N. Y. The capital stock of the company is $20,000. W. H. Cowan, of Montgomery, N. Y., is interested.

NIAGARA FALLS, N. Y.—The board of public works is again considering the question of improving the works, putting in a filter, etc. After estimates have been made the question will be submitted to the voters.

JAMESBURG, N. J.—It is reported that specifications for works have been adopted, and that bids for the construction will soon be asked by the city clerk.

JERSEY CITY, N. J.—Bids are asked until Dec. 27 for furnishing 1,020 lengths of 6, 8 and 12-in. cast-iron water pipe. Anthony Hauck, Chn. Com.

ORANGE, N. J.—Col. Daniel F. Minnihan, Orange, and the Borough Construction Co., New York, submitted the only complete bids, at $66,667 and $50,000, respectively, Dec. 12, for the engine house, pumping station, 16 and 20-in. cast-iron pipe, masonry dam, etc., for the improvements to the works and the increased water supply from Campbell's Pond. Fred. T. Crane, Cy. Engr.

HARRISBURG, PA.—At the election in February this city will vote on the question of purchasing new pumping engines, at a cost of about $75,000. E. Mather, Pres. Water Comrs.; M. G. Stoner, Select Councilman, may be addressed.

PUNXSUTAWNEY, PA.—The Punxsutawney Water Co. is considering the question of securing an increased water supply.

STEELTON, PA.—The Steelton Home Water Co. proposes to purchase a new pumping engine.

OAKLAND, MD.—G. S. Hamill, City Attorney, writes us that, due to the fact that the law authorizing the issuance of $30,000 in bonds for works was defective, no works will be built. Population, 2,000.

WASHINGTON, D. C.—The board of engineers in charge of the Washington Aqueduct is preparing a report on the matter of filtering the water supply, and will soon submit it to Congress. Lt.-Col. A. M. Miller, Chn. Bd.; John B. Wight, Pres. Bd. Comrs.

WEST TAMPA, FLA.—The contract for building the proposed works, as advertised in Engineering News, has been let to Guild & Co., Chattanooga, Tenn., at about $35,000. J. N. Hazlehurst, Engr., Tampa; M. E. Gillette, Chn. Com.

CULLMAN, ALA.—W. H. Jones, Cy. Clk., writes us that this place voted Dec. 12 in favor of building works and a light plant. The legislature will be petitioned in January to grant the city authority to issue the necessary bonds. Population (1890), 1,017.

AVONDALE, ALA.—The house of the legislature has passed the bill granting this place authority to issue $25,000 in bonds for works, the water supply to be secured from the Avondale Park Springs. J. R. Ellard may be addressed.

GADSDEN, ALA.—The legislature has been asked to grant this place authority to build municipal works.

PRATT CITY, ALA.—G. W. Brown, Chn. Citizens' Meeting, writes us that a committee has drafted a bill to present to the legislature asking for authority to issue $25,000 in 30-year 6% gold bonds for constructing works. The supply will be secured from wells. Population of city and that in in the immediate vicinity is 6,000; inside of corporate limit, 3,500. It is expected to extend the city limits. P. M. McNeil, Chn. Com.

COLUMBUS, MISS.—W. D. Humphries, Mayor, writes us that it will be about two months before anything definite will be done in regard to the proposed extension to the works. The new supply will be secured from the river and overflow wells. No engineer has yet been decided upon. Population, 6,000.

HOLLY SPRINGS, MISS.—We are informed that this city will bore two or three 8-in. wells, to be 500 ft. deep. Walter G. Kirkpatrick, Engr., Jackson, Miss.; D. C. Cannon, Cy. Clk.

CHATTANOOGA, TENN.—The water and gas rates committee has directed the city engineer to prepare a report and estimates for municipal works. After the report is made the legislature will be asked to grant the city authority to issue bonds, and if the request is granted a vote will be taken. J. J. Brown, Chn. Com.; E. Watkins, Mayor.

HILL CITY, TENN.—The Chattanooga Co., Ltd., Chattanooga, will soon begin the construction of the works, which, along with other improvements, will cost about $45,000. H. C. Beck, of the company, may be addressed.

KNOXVILLE, TENN.—Arrangements are being made for the purchase of the works of the Knoxville Water Co., which it is proposed to take possession of on Aug. 1.

RUSSELLVILLE, KY.—H. G. Frederick, Boonsboro, Md., has applied to the council for a franchise to build works. Population, 3,500. B. B. Andrews, Mayor.

IRONTON, O.—Press reports state that John W. Hill, Glenn Bldg., Cincinnati, O., has submitted a report for a better water supply, to cost about $55,000.

YOUNGSTOWN, O.—Press reports state that F. Herbert Snow, consulting engineer, Brockton, Mass., who has been in Warren, O., advising the commissioners of Trumbull county as to means of purifying the sewage at the county infirmary, has also been asked to visit Youngstown to confer with the water-works trustees relative to a source of supply other than the present source.

BROWNSTOWN, IND.—The council, it is stated, will take immediate steps looking towards the construction of works.

FORT WAYNE, IND.—The council has awarded the contract for furnishing a 6,000,000-gallon pumping engine to the Holly Mfg. Co., Lockport, N. Y., at $20,500.

FRANKTON, IND.—It is stated that this place has decided to build works.

SHERIDAN, IND.—We are informed that nothing will be done towards building the proposed works for the Sheridan Light & Water Co. before the spring. Chas. Pape, Sr., Pres. Fleming Mfg. Co., Fort Wayne, Ind., is interested.

SOUTH BEND, IND.—The council proposes to extend the water mains in certain streets. J. T. Kelley, Pres. Bd.

WINCHESTER, IND.—Bids are asked until Jan. 18 for furnishing and constructing works and for extending the electric plant. Estimated cost, about $50,000. S. D. Fox, Cy. Clk.

BAY CITY, MICH.—City Engineer Bloomshield has submitted preliminary plans for securing a pure water supply from Saginaw Bay, at a cost of about $55,000. The intake pipe will cost about $40,000.

DETROIT, MICH.—The water board will prepare estimates for an addition to the works sufficiently extensive to operate three high pressure pumps, two high pressure engines with a capacity of at least 24,000,000 gallons each a day, and a boiler plant with power enough for a subpumping station in the northern part of the city.

GRAND HAVEN, MICH.—The board of public works has recommended the purchase of new boilers for the works and electric light plant, to cost about $3,500.

JONESVILLE, MICH.—T. C. Brooks & Sons, Jackson, Mich., have been awarded the contract for furnishing the materials and for constructing the works, described in our issue of Nov. 10. J. D. Cook, Engr., Law Bldg., Toledo, O.; W. M. Wetmore, Clk.

IRONWOOD, MICH.—Press reports state that Edward Nelson, Mayor, has purchased the plant of the Ironwood Water Co. for $25,000, besides assuming the debt of $225,000 in outstanding bonds.

BEMIDJI, MINN.—Bids are asked until Dec. 31 for the purchase of $7,000 of 6% bonds for constructing the proposed works, noted last week. Ted Smith, Pres. Council; C. F. Schroeder, Village Recdr.

LITTLE FALLS, MINN.—F. E. Hall, City Clerk, informs us that the bond sale set for Dec. 17 has been postponed until some time in January.

MINNEAPOLIS, MINN.—Supervisor McConnell is urging the city to complete the new basins at a cost of about $100,000, and also to construct a filter plant at a cost of about $150,000. It is probable that the council will not ask for new bids for furnishing new pumping engines for some time to come.

DUBUQUE, IA.—The Dubuque Water Co. has given a trust deed for $800,000 to secure bonds issued for raising funds to improve its works.

SIBLEY, IA.—The question of building works is reported as being considered.

WELLINGTON, KAN.—The Commercial Club has appointed John T. Stewart, A. Graff and W. A. Renn a committee to urge the council to submit the question to the voters of issuing $100,000 in 4% bonds for municipal works and an electric light plant.

STANBERRY, NEV.—Bids are asked until Jan. 2 for the purchase of $3,000 of 20 year 5% bonds for the proposed water tower. W. A. Erwin, Mayor.

ABILENE, TEX.—The Lytle Water Co., it is stated, has decided to enlarge Lytle Lake so as it may hold 200,000,000 gallons more water than at present. Other improvements to the works may also be made. N. Werenskiold, Engr., P. O. Box, 511, Dallas, Tex.

DALLAS, TEX.—The question of improving the works is being considered.

GREENVILLE, TEX.—Tests are being made by Lestargetter & Co. for a new water supply to be owned by the city, according to reports.

MARLIN, TEX.—C. C. Chatham, it is stated, has purchased 35 acres of land, about 1½ miles from here, on which it is proposed to build new works and sink wells for a water supply for this place.

VICTORIA, TEX.—Bids are wanted at once by J. H. Schneider, Jr., Chn. Com., for sinking a 6-in. artesian well for an additional water supply.

ENID, OKLA.—Joe. Meibergen, Mayor, writes us that the city is corresponding with manufacturers for estimates for works. The supply will be secured from wells. Population, 3,500.

ELDORA, COLO.—The trustees have granted a 20-year franchise for works and a light plant to the Eldora Mining, Milling & Power Co. Work will be begun early in the spring.

FLORENCE, COLO.—Judge M. S. Bailey has granted an injunction restraining the city from putting in works at a cost of $135,000. The injunction was sustained because Trustee Deibert failed to receive official notice of the special meeting of the town board when the ordinance was passed calling an election. The board is determined to build the works on the original proposition. The bids for the construction were given in our last issue. Another election will be held Dec. 29.

LEADVILLE, COLO.—The Leadville Water-Works Co. was incorporated Dec. 14 by C. N. Priddy, Supt. and Secy., Leadville; Andrew N. Dix, B. L. Carr and W. E. Hawks, Bennington, Vt. The company is formed to acquire by purchase the property and franchises of the Leadville Water Co. for supplying the city with water for fire and domestic purposes; to erect plants for the generation of electricity and the compression of air. Capital stock, $400,000. The principal business of the company will be carried on at Leadville. Branch offices will be established at Boston, Mass., and Portland, Me.

KETTLE FALLS, WASH.—D. H. Brown writes us that an election will be held in January, to vote on the question of issuing bonds for works.

RITZVILLE, WASH.—This place voted Dec. 6 to sell the works to a company. The plant is said to be very incomplete, and the new owners will probably take steps at once to improve it. Population (1890), 700. M. R. Peters, Mayor.

PRINEVILLE, ORE.—H. V. Gates, of Hillsboro and Albany, Ore., proposes to build works and an electric light plant in this place.

OAKGROVE, CAL.—The Oakgrove Water Co. has been incorporated, with a capital stock of $10,000, by E. Fleur, M. Regnier and Edgar E. Lefebie.

PLEASANTON, CAL.—The question of the municipal ownership of the works is being considered.

SAUSALITO, CAL.—John H. Dickinson, Pres. Bd. of Trustees, writes us that nothing is likely to be done for some time towards a new water supply, which a new company proposes to secure.

PHOENIX, ARIZ.—An election will be held Jan. 12 to vote on the question of issuing $265,000 in bonds for municipal works and a sewerage system, or of issuing $150,000 for the works alone. Ernest Abs Hagen, Engr., Byrne Bldg., Los Angeles, Cal., and Adams Hotel, Phoenix; J. C. Adams, Mayor.

RENO, NEV.—Bids are asked until Feb. 13 for the purchase of $130,000 of 6% bonds for the proposed works. (Postponement from Dec. 12.) F. B. Porter, Cy. Clk.

STAYNER, ONT.—This place voted Dec. 13 to issue $24,000 in bonds for works.

INGERSOLL, ONT.—M. Mills, Mayor, writes us that no action will be taken towards the purchase of the works and light plant of the Ingersoll Water-Works Co. before next year.

UXBRIDGE, ONT.—It is stated that the question of building new works and a sewerage system is being considered. The supply will be received from wells. Population (1890), 2,023.

SEWERAGE.

SPRINGFIELD, MASS.—Bids are asked until 12 o'clock noon, Dec. 23, for completing the construction of the brick sewer in Fulton, Sargeant and Carew Sts. There will be about 1,000 ft. of 84×56-in. to 81×54-in. brick sewer. W. L. Dickinson, Supt. of Sts.; C. M. Slocum, Cy. Engr.

ROCHESTER, N. Y.—It is proposed to build a sewer in North St. Paul St. and to pave with macadam a portion of Alexandria St.; at a cost of $6,000 and $6,800, respectively. Peter Sheridan, Cy. Clk.

EAST ORANGE, N. J.—Wm. H. V. Reimer, Township Engr., 28 Maple Ave., writes us that the construction of the drains in the East Orange Boulevard is awaiting some definite action by the Essex County Park Commissioners as to the share of the cost which the commissioners will bear. The ordinance for the building of the drain has passed its first reading and will probably be laid over from time to time until the financial problem is solved. There will be 7,000 ft. of 66 to 34-in. brick sewer; average cut, 10 ft.; estimated cost, $53,000.

ELIZABETH, N. J.—Bids are asked until Jan. 16 for constructing about 800 ft. of 18 and 12-in. pipe sewers, etc. N. K. Thompson, St. Comr.

HACKENSACK, N. J.—Bids are asked until Dec. 28 by the Hackensack Improvement Commission for the purchase of $56,000 of 5% sewer bonds. L. A. Campbell, Clk., 76 Main St., Hackensack.

OCEAN GROVE, N. J.—The township committee has been asked to grant a franchise to the Sanitary Sewer & Sewage Utility Co. The company proposes to build a reservoir at Duck Creek of sufficient size to accommodate the sewage of the township, including Asbury Park, Ocean Grove, Bradley Beach and Avon. Capital stock, $1,250,000.

CARLISLE, PA.—Chauncey D. Ives, Chambersburg, Pa., has submitted plans and estimates for certain sewers to cost about $11,000. Councilmen J. E. Einstein, Pres., and Porter may be addressed. Councilman M. Cherry writes us that further information can be secured at an early date.

CHAMBERSBURG, PA.—The council has been petitioned to have surveys for a system made. Councilmen Hoffeditz and Kennedy may be addressed.

BALTIMORE, MD.—It is proposed to build a sewer from Eutaw St., near Druid Hill Park, to Jones Falls.

LAKEWOOD, O.—It is stated that this place is arranging to build a system.

LEBANON, IND.—Press reports state that it is proposed to clean and deepen about 30 miles of Prairie Creek and its tributaries. After this is completed it is possible that plans for a sewerage system will be considered.

BLOOMINGTON, ILL.—The council has voted to construct a brick sewer to drain the Sugar Creek Valley.

BUSHNELL, ILL.—An election was held Dec. 19 to vote on the question of issuing $17,000 in bonds for sewers.

ELGIN, ILL.—The commissioners have recommended the construction of new sewers, at a cost of about $7,000.

HAVANA, ILL.—H. C. Breidert, Cy. Engr., writes us that the city will advertise in the early spring for bids for extending the system. J. M. Henninger, Mayor; W. C. McKinney, Chn. Com.

MILWAUKEE, WIS.—The city authorities of Wauwatosa have asked the county board of supervisors to consider plans for improving the system of the county institutions near that city. A joint committee has been appointed to consider the question. The present system for the county buildings was built at a cost of about $22,500. D. G. Hathaway, Health Comr.

GRAND ISLAND, NEB.—A. C. Koenig, Cy. Engr., writes us that the city proposes to build 7,200 ft. of 8-in. pipe sewers in three districts. About 2,400 ft. will probably be built this season, and the balance will be postponed until next spring.

ST. JOSEPH, MO.—The council has decided to ask for new bids for building new sewers in Sewer Districts Nos. 56 and 16.

DENVER, COLO.—Wm. H. Taylor, Secy. Bd. Pub. Wks., writes us as follows in regard to the proposed Capitol Hill storm sewers: The bill for an ordinance creating Capitol Hill Storm Sewer District No. 1 of this city passed the board of supervisors unanimously, and is now in committee of the board of aldermen. It is hoped that the aldermen will pass the bill within the next few days. If it does, a notice calling for bids for the construction will then be published for 10 days. The bids would then probably be received and opened early in January. The entire work will cost about $1,000,000.

GUTHRIE, OKLA.—A. P. Saunders, Chn. Fire Comrs., writes us that the council has passed an ordinance directing the engagement of an engineer to prepare plans for a system. An election will be held to vote on the question of issuing bonds for the improvement.

SPOKANE, WASH.—The council is reported to have voted to build new sewers in Post and Pacific Sts. Councilmen Acuff and Schiller may be addressed.

LONG BEACH, CAL.—Estimates for a system have been submitted. There will be about 24,370 ft. of pipe; estimated cost, $25,000. C. J. Gouncher, Cy. Engr.; T. H. James, Consult. Engr.

PALO ALTO, CAL.—The question of building an outfall sewer, to cost about $35,000, jointly with the University, is reported as being considered by the board of city trustees. Trustee Mark may be addressed.

WATSONVILLE, CAL.—Plans are to be prepared at once for a system to cost about $35,000, according to reports.

PHOENIX, ARIZ.—Ernest Abs Hagen, Byrne Bldg., Los Angeles, Cal., has submitted plans for a system and waterworks to cost about $255,000. An election will be held Jan. 12.

GARBAGE DISPOSAL—STREET CLEANING

NEW HAVEN, CONN.—Bids are asked until Dec. 27 for removing the garbage from the city for one year from Feb. 1. Ward Bailey, Clk. Bd. of Health.

NEW YORK, N. Y.—Bids are asked by the department of correction, 148 East 20th St., Manhattan, until Dec. 30, for furnishing six self-dumping cars for Riker's Island and for furnishing a 200-ton scow, and also by Jas. McCartney, Comr. St. Cleaning, 346 Broadway, until Dec. 30, for the towing of loaded deck scows from the several dumps of the Boroughs of Manhattan and the Bronx to Riker's Island, and the return to the said dumps from Riker's Island of light scows.

CHICAGO, ILL.—The finance committee of the council has adopted specifications for moving the city garbage. Bids will be asked at once by L. E. McGann, Comr. of Pub. Wks.

STREETS AND ROADS

BOSTON, MASS.—The town of Revere has voted to improve Dolphin, Ware, Waverly and Garfield Aves., at a cost of about $10,000.

BRAINTREE, MASS.—A contract has been awarded to Charles McDermott & Sons, at $5,640, for constructing retaing walls, culverts and widening Commercial St.

HULL, MASS.—At a town meeting Dec. 13 it was decided to appropriate $3,000 for the repair of roads.

MERIDEN, CONN.—This place will make an effort to secure legislative authority to issue $200,000 in street improvement bonds.

NORFOLK, N. Y.—A resolution by County Commissioner Mein, Canton, N. Y., was adopted Dec. 9 for the improvement of about 2½ miles of highway.

NEW YORK, N. Y.—Bids are asked until Dec. 28 for granite block paving on concrete foundation on portions of four streets and asphalt paving on five streets. James P. Keating, Comr. Highways, 150 Nassau St.——Bids are asked until Dec. 31 for furnishing 11,000 cu. yds. of top soil, 4,250 cu. yds. of crushed trap rock, a 12-ton steam road roller, 10 750-gallon road sprinklers and six dump carts. Geo. C. Clausen, Comr. Parks, Arsenal, Central Park.

JAMESTOWN, N. Y.—Bids will soon be asked by the board of public works for paving Chandler St. with brick on concrete, between East Second and Windsor Sts.

ATLANTIC CITY, N. J.—Bids are asked until Dec. 27 for about 21,340 sq. yds. of macadam, including excavation; 5,025 sq. yds. of brick paving on concrete, 13,840 lin. ft. of straight curbing, 512 lin. ft. of curved curbing, etc., as described in our advertising columns. J. W. Hackney, Cy. Surveyor.

JERSEY CITY, N. J.—The street and water commissioners will give a hearing Dec. 27 for the proposed improvement of Claremont, Orient, West Side and Greenville Aves., and the Hudson and Old Bergen Roads. Geo. T. Bouton, Clk.——A contract has been awarded to the New Jersey Mexican Asphalt Co. for the improvement of Prospect St.

MIDVALE, N. J.—The state road commission has passed favorably on a petition to have four miles of the Greenwood Lake Road improved next spring.

PHILADELPHIA, PA.—Bids are asked until Dec. 22 for furnishing and constructing asphalt, brick and macadam paving and electric lighting, sewers, etc., at Fairmount and Hunting Parks, according to reports. J. T. Vogdes, Ch. Engr. and Supt.

BALTIMORE, MD.—Bids are asked until Dec. 28 for paving on Forrest St. and two alleys. O. W. Connet, Acting Cy. Comr.

GULFPORT, MISS.—S. S. Bullis, Mayor, informs us that plans will be ready and a contract let about Jan. 1 for street and drainage work, for which $10,000 in bonds has been authorized.

LOUISVILLE, KY.—Bids are asked until Dec. 29 for asphalt paving on Von Borries Ave., Hepburn Ave., East Broadway and Chestnut St. Chas. F. Granger, Bd. Pub. Wks.

CINCINNATI, O.—Bids are asked until Jan. 7 for the construction of 10 miles of macadam on the Montgomery pike, between Norwood and Silverton; estimated cost, $15,000. Engr., J. A. Stewart, 518 Johnston Bldg.

CLEVELAND, O.—The council has resolved to grade, drain and curb Montgomery St., from Geddings Ave. to Parker St. Howard H. Burgess, Clk.

CROWN POINT, IND.—Michael Grimmer, County Audr., informs us that the following bids were received Dec. 17 for the construction of about 20 miles of macadam roads; advertised in Engineering News:

Chicago Crushed Stone Co., Chicago, Ill.	$127,890
Dolese Bros., Chicago, Ill.	125,750
Peters, Sullivan & Runyan, Orleans, Ind......	127,000
John Holloran, Hobart, Ind.	127,000
Brownell Improvement Co., Chicago, (accepted)	124,500

EAU CLAIRE, WIS.—Alderman E. S. Hammond writes us that the ordinance for brick paving on South Barstow, Kelsey and four other streets, has passed the council and the specifications were to be decided upon Dec. 21. Bids will soon be asked. C. A. Alderman, Cy. Engr.

LA CROSSE, WIS.—A special committee, composed of the mayor and three aldermen, will be appointed to investigate the present method of street paving and to recommend such new system as it may find on investigation to be preferable.

KEOKUK, IA.—Bids are asked until Dec. 31 for 2,100 cu. yds. of excavation, 3,767 sq. yds. of macadamizing and 2,204 lin. ft. of stone gutter, on Franklin St. G. M. Walker, Cy. Engr.

BRYAN, TEX.—The council has under consideration the question of issuing $15,000 in bonds for grading and graveling Main and intersecting streets.

DENVER, COLO.—The board of public works has requested an appropriation of $6,500 for paving repairs and about $24,000 for resurfacing Larimer and 16th Sts.

SEATTLE, WASH.—A hearing will be given Jan. 2 to consider the proposed improvement of 9th Ave., 10th Ave. and Lee St. W. V. Rinehart, Pres. Council; W. H. Parry, Comptroller.

SPOKANE, WASH.—The council has authorized the board of public works to prepare plans for asphalt paving on First, Monroe and Bridge Aves.

PORTLAND, ORE.—A petition for the paving of Alder St., from Sixth to Lownsdale Sts., with wooden block, has been granted by the council.

AUBURN, CAL.—J. B. Hayford informs us under date of Dec. 10 that the board of county supervisors wish to purchase a rock crusher and an upright boiler. Two members of the board have been to Stockton and San Francisco, but did not find what was wanted.

OAKLAND, CAL.—Resolutions have been passed by the council for macadamizing portions of Filbert, Jackson, Third, Sixth, Seventh and Harrison Sts.

SACRAMENTO, CAL.—Marco Varozza, Comr., Placerville, Cal., has reported to the governor that about $20,000 will be necessary for the maintainence of the Lake Tahoe wagon road for the next two years.

EDMONTON, ALTA.—The dominion parliament, Vancouver, B. C., has voted to appropriate $15,000 toward the construction of a wagon road from this place to the Yukon River.

MANUFACTURING PLANTS.

BOSTON, MASS.—It is reported that L. Edgar Trinson and others have petitioned the legislature for authority to construct and operate in the streets and highways of the commonwealth the refrigerating works for the purpose of distributing liquid ammonia and other like compounds.

NEW BEDFORD, MASS.—The W. S. Hill Electric Co. will soon erect a 4-story brick building, 30 × 80 ft., on the corner of Elm and Water Sts. Caleb Hammond & Son, Archs.

NORWICH, CONN.—H. P. Cummings, Ware, Mass., is said to have been awarded the contract for the construction of a one-story brick mill, 150 × 150 ft., and a boiler house, 35 x 77 ft., in this city, for the J. B. Martin Co., Ltd., Lyons, France; work to be completed by March 1.

BALDWINSVILLE, N. Y.—A fire here Dec. 19 destroyed the plants of the Kenyon Paper Mill, the New Process Rawhide Works, and the G. H. & A. T. Hotaling Flour Mill; reported loss, about $60,000.

LAUREL HILL (L. I.), N. Y.—The Nichols Chemical Works has filed plans for a proposed 3-story building, 115 × 78 ft., for the manufacture of its fertilizers.

LEONARDSVILLE, N. Y.—Reports state that the Eureka Mower Works will remove its plant from Utica, N. Y., to this place.

NEWARK, N. Y.—The Hunt Mfg. Co., Cato, N. Y., is considering the matter of removing its plant to Newark.

NIAGARA FALLS, N. Y.—The Electro-Chemical Co. has awarded the contract for the mason work on the 50 × 125-ft. addition to its plant to John Sandstrum, and the contract for carpenter work to Schumacher & Moyer.

BAYONNE, N. J.—Reports State that the Erie Dry-Dock & Shipbuilding Co. will establish an iron shipbuilding yard on Shooter's Island, near Bayonne. Andrew Carnegie is said to be interested.

NEWARK, N. J.—The tannery of the Chrome Patent Leather Co., at Ave C. and Thomas St., was destroyed by fire, Dec. 20, causing a reported loss of about $150,000; partly insured.

ALLEGHENY, PA.—A new $500,000 brewery building will be erected by the First National Brewery Co., between Preble Ave. and the river, according to reports. V. Wyss Thallman, Arch., Bissel Bldg.

CHESTER, PA.—S. I. Birkin & Co., lace manufacturers, will erect an addition to their plant at 2d and Clayton Sts., according to reports.

CONSHOHOCKEN, PA.—The pattern works and boiler house of John Wood, Jr.'s iron plant were destroyed by fire Dec. 14; estimated loss, $40,000.

ELLWOOD CITY, PA.—Reports state that Clark Bros., chief owners of the American Lamp & Brass Co., Trenton, N. J., will remove their western factory from Blairsville, Pa., to this city.

BALTIMORE, MD.—Bids are asked for the new Baltimore & Ohio R. R. Co.'s warehouse at Camden Station. Baldwin & Pennington, Archs., 44 South St, Baltimore.

DAHLONEGA, GA.—It is reported that the Dahlonega Consolidated Gold Mining Co. contemplates installing new machinery, and will erect a 200-stamp mill or two 100-stamp mills and a plant to treat the shipments. H. D. Ingersoll, Mgr.

DECATUR, ALA.—The Louisville & Nashville R. R. Co.'s shops, according to reports, will be enlarged. R. Montfort, Ch. Engr., Louisville, Ky.

NEW ORLEANS, LA.—The Home Ice Distilling Water Mfg. Co., Ltd., contemplates the erection of an ice plant at Water and Milan Sts., according to reports.

NEW ORLEANS, LA.—The plant and franchises of the New Orleans Abattoir Co., Ltd., will be sold at auction Jan. 4. W. C. H. Robinson, Special Master, Hennen Bldg.

TOLEDO, O.—W. C. McElhenny and C. H. Burchenal, of Pittsburg, Pa., are said to contemplate the erection of a dock and an asphalt plant in this city.

CONVERSE, IND.—The erection of a plate glass factory at this place is projected. R. M. Crouch is said to be interested.

EVANSVILLE, IND.—It is reported that a $100,000 distillery will be erected here by William Schelhorn, of Evansville, and others.

FAIRMOUNT, IND.—The Fairmount Zinc Co., according to reports, will erect a factory at this place. W. B. Pershing, Geo. E. and Chas. E. Potter, Directors.

DETROIT, MICH.—The Edward Armstrong Mfg. Co. has been organized, with a capital stock of $60,000, with $30,000 paid in, to manufacture window shade cloth, oil cloth, etc. A plant will be erected here, the main building to be 50 × 170 ft. Edward S. Madden, Pres.; Geo. S. Clark, Secy.

CHICAGO, ILL.—The American Stove Board Co. has awarded contracts to Geo. H. Fuller for erecting two main buildings, 80 × 250 ft. each, with one addition, 22 × 40 ft., for baking purposes; an engine room, 21 × 35 ft.; a boiler room, 25 × 34 ft.; coal room, 21 × 25 ft., and a 60-ft. smokestack. All to be built of brick, stone and iron. ——The plant of the Johnson Chair Co. was burned Dec. 23, causing a loss of about $90,000; insurance, $75,000.

PEORIA, ILL.—William M. Allen has been awarded the contract for the erection of additional buildings to the Great Eastern distilling plant.

APPLETON, WIS.—Reports state that the Riverside Fiber Co. contemplates the erection of a 30-ton sulphite plant here.

KAUKAUNA, WIS.—It is reported that the Badger paper mills may be rebuilt. Col. H. A. Frambach is interested.

WEST SUPERIOR, WIS.—The Great Northern R. R. Co. will erect a new steel elevator on St. Louis Bay, next spring, to have a capacity of 3,000,000 bushels.

ELY, MINN.—Simpson & Brown have awarded the contract for the machinery for their mill on Fall Lake, near here, to the Diamond Iron Co., Minneapolis, Minn.

SACRAMENTO, CAL.—The Union Iron Works of Root, Belson & Co. were destroyed by fire Dec. 14. Loss, $60,000; insurance, $20,000.

SALT LAKE CITY, UTAH.—The erection of a beet sugar factory at this place is projected. H. O. Fisher is interested.

MONTREAL, QUE.—Reports state that a company has been organized to erect a smelter for the treatment of ores of the Old Ironsides and Knot Hill companies, in the Boundary Creek District. Jay P. Graves, Montreal, is interested.

HAVANA, CUBA.—Reports state that a number of Chicago packers will erect cold storage plants at Havana, Santiago and in Porto Rico. P. D. Armour, G. F. Swift, Nelson Morris and Thos. J. Lipton are said to be interested.

MEXICO, MEX.—Press reports state that the Panuco Sugar Co. will erect a large refinery at this place. Denis Oliver, Pres.

SHANGHAI, CHINA.—The E. P. Allis Co., Milwaukee, Wis., has been awarded the contract for the construction of a new 500-bbl. flour mill at Shanghai, according to reports; shipments to be made by Feb. 1.

GAS PLANTS.

LAWRENCE, MASS.—Reports state that the Lawrence Gas Co. proposes to extend its mains next season.

SHARPSBURG, PA.—W. J. Barton, Borough Solicitor, will present an ordinance at the next meeting of the council, on the application of the American Gas Co. for right of way through the borough.

LOUISVILLE, KY.—The Louisville Gas Co. is preparing to construct a new plant and apparatus at a cost of about $100,000, according to reports. President Morris may be addressed.,

BELLEVUE, O.—It is reported that Baxter & Lynn have been awarded a contract for installing an artificial gas plant.

CHICAGO, ILL.—The People's Gas, Light & Coke Co. will construct a foundry building, 130 × 240 ft., of brick, stone and iron, at Townsend and Superior Sts., including a traveling crane; estimated cost, $15,000. Arch., Minard L. Beers.

IOLA, KAN.—This place will vote Dec. 26 on the question of issuing $40,000 in bonds for the purchase of the plant of the Iola Gas Co., according to reports.

MONROE, WIS.—It is reported that the Monroe Water-Works Co. has applied to the council for a franchise to construct and operate a gas plant, to cost about $25,000. W. H. Wheeler, Pres.

VENTURA, CAL.—Reports state that the Pacific Coast Oil Co. has awarded a contract to Lacy & Co., Los Angeles, Cal., for the construction of a 10,000 bbl. oil tank estimated to cost about $15,000; a compound Worthington pump will be installed, with a capacity of 1,200 gals. of oil per minute; also a pipe line, 2,500 ft. long, to conduct oil to the wharf.

NEW COMPANIES.—Kennedy Mfg. Co., Indianapolis, Ind.; $50,000; to manufacture gas meters; H. C. Jordan, J. P. McGrath, H. L. Kennedy, E. M. Bose and John E. Kennedy.

Gartlan Oil & Gas Co., Sistersville, W. Va.; $500,000, with $3,000 paid in; to mine and deal in oil, gas and materials; Thomas Gartlan, Parkersburg; J. C. Cappeau, Pittsburg; G. F. Dunham, U. J. Nevenschander, H. A. Jackson, Sistersville.

Home Natural Gas Co., Clarion county, Pa.; $6,000; to produce and supply natural gas; W. E. Davis, Treas. and John W. Buzard, West Monterey, Pa.; Thos. G. Christie, Allegheny City, Pa.; Calvin G. Christie, Butler, Pa.; E. Ralph Buzard, West Monterey, Pa.

MISCELLANEOUS CONTRACTS.

FIRE ENGINE.—Salem, Mass.—The council has appropriated $5,100 for a new steam fire engine.

DRAINAGE DITCH.—Ponca, Neb.—Bids are asked until Jan. 2 for constructing a drainage ditch. J. F. Ekeroth, County Clk.

PILES AND STONES.—St. Louis, Mo.—Bids are asked until Jan. 14 for furnishing piles and stones. Maj. Thos. H. Handbury, U. S. Engr., St. Louis.

STEAM TENDERS.—St. Louis, Mo.—Bids are asked until Jan. 14 for furnishing three steel-hulled steam tenders. Maj. Thos. H. Handbury, U. S. Engr., St. Louis.

DITCH.—Burlington, Ia.—Bids are asked until Jan. 4 for constructing a ditch 8,300 ft. long requiring about 26,000 cu. yds. of excavation. M. P. Sharts, County Audr.

DOCK.—Toledo, O.—It is reported that the Toledo Dock & Warehouse Co. has purchased land on Water St., between Jefferson and Monroe Sts., for the construction of docks.

STEAMBOAT.—Fort McHenry, Md.—Bids are asked until Jan. 4 for furnishing a steamboat for government service. N. G. McAlexander, A. Q.-M., Governor's Island, N. Y. H., N. Y.

CHANNEL WORK.—Chicago, Ill.—The board of local improvements has decided to straighten the Chicago River from Belmont Ave. to Lawrence Ave., to cost about $45,000.

TIMBER AND PLANKS.—Montreal, Que.—Bids are asked until Dec. 27 for furnishing timber and planks for the Harbor Commissioners. Alex. Robertson, Secy.; John Kennedy, Ch. Engr.

FREIGHT CARS.—New York, N. Y.—Reports state that the New York, Ontario & Western Ry. Co. and the Central R. R. of New Jersey, are in the market for 500 and 2,000 freight cars, respectively.

SEA WALL.—Annapolis, Md.—Bids are asked by the navy department, Washington, until Jan. 12, for constructing a sea wall at the naval academy. Arch., Ernest Flagg, 35 Wall St., New York.

WOODEN PIER.—New York, N. Y.—Bids are asked by the department of docks, Pier A, Battery Place, Manhattan, until Dec. 31, for building a new wooden pier at Catharine St and the East River.

PIER.—Philadelphia, Pa.—The Pennsylvania R. R. Co. has awarded to the Edge Moor Bridge Co. the contract for a steel and wooden pier, to be constructed at the foot of Wharves 13, 14 and 15, to cost about $40,000.

OLD STEEL RAILS, ETC.—Genoa, Italy.—It is stated that Edward Lambatti, of Genoa, is visiting the United States with a view to purchasing old steel rails and scrap for use in open-hearth steel manufacturing plants.

WHARF, ETC.—St. John, N. B.—Nicholas & Michael Connolly have been awarded a contract by the department of railways and canals for the construction of a wharf, including dredging, at the Intercolonial Ry. terminus.

FIRE ALARM SYSTEM.—Rochester, N. Y.—Commissioner Whalen will present a petition to the finance committee at the beginning of the year for an appropriation of about $35,000 for the construction of a fire alarm telegraph system.

CUTTING AND LOGGING.—Cherokee county, N. C.—Bids are asked by the Apalachian Land & Lumber Co., Apalachia, Cherokee county, until Jan. 2, for cutting and logging 35,000 to 50,000 ft. of logs per day, distance not to exceed 1½ miles.

BREAKWATER BLOCK.—Miminegash, P. E. I.—Bids are asked until Dec. 22 for constructing a new block at the outer end of the northern breakwater. Engr., Jas. B. Eagan, Charlottetown, P. E. I.; E. F. E. Roy, Secy. Dept. Public Wks., Ottawa, Ont.

EARTH FILL, LIME, DREDGING, ETC.—Brooklyn, N. Y.—Bids are asked until Dec. 28 for constructing an embankment of earth filling, furnishing 12,045 bbls. of Maine rock lime and dredging in Newtown Creek at Metropolitan Ave. Jas. Kane, Comr. Sewers, 265 Broadway, New York.

DOCK, DREDGING, ETC.—Two Harbors, Minn.—Reports state that the Duluth & Iron Range R. R. Co. will construct a new dock, No. 1, and dredge the harbor basin. The contract is soon to be awarded. J. L. Greatsinger, Pres. and Gen. Mgr., Duluth, Minn.; W. A. McGonagle, Supt. Bridges and Bldgs., Two Harbors.

JETTIES.—Honduras, Central America.—J. Francis Le Baron, Ch. Engr. American-Honduras Co., Jacksonville, Fla., is preparing plans and specifications for a system of jetties for deepening the Patuca River channel through the bar. The company has a valuable land grant of 250,000 acres and exclusive rights of navigation of the river.

PUMPING MINES.—Leadville, Colo.—The question of pumping the water from the workings of the claims of several of the mines in this vicinity is being considered. Operations will probably be conducted from the standard shaft of the Wolftone Co., which is now 600 ft. deep. It is proposed to make it deeper. Address the Wolftone Co., Leadville.

TELEPHONE SYSTEM.—Fergus Falls, Minn.—The Fergus Falls Telephone Co. is planning to establish toll lines in the spring, to connect the villages in this vicinity with the local telephone system, and has employed J. A. Colehour to secure the right of way for a line which will pass through Underwood, Battle Lake, Henning, Vining, Clitherall and Deer Creek, terminating in Wadena, according to reports.

RAISING VESSELS, ETC.—Washington, D. C.—Press reports state that at a meeting of the board on construction, held at the Navy Department, Dec. 19. It was decided to recommend to the Secretary of the Navy that public bids be invited for raising the battleship "Maine," in Havana Harbor; the Spanish armored cruiser "Cristobal Colon," lying 60 miles to the west of Santiago, and to recover or remove other property on the Cuban coast, including several Spanish gunboats and auxiliary cruisers sunk by Americans, or by the Spaniards, to prevent them from falling into the hands of the United States.

CEMENT.—Providence, R. I.—Bids are asked until Dec. 28 for furnishing cement for use in the sewer, water, highway and bridge departments during the coming year. The cement is to be of the best quality, fresh, fine tested in a sieve of 2,500 mesh a sq. in. At the option of the contractor, it may be contained in well-made, tight casks or in tight, good cloth sacks, and shall not have been exposed to dampness. The contents of each cask of natural cement shall be of the full net weight of 300 lbs. or three sacks to a cask, and of each cask of Portland cement of the full net weight of 375 lbs. or four sacks to a cask. Before the cement is received it shall be subjected to inspection and vigorous tests. Robt. E. Smith, Comr. Dept. Pub. Wks.

CONTRACT PRICES.

EARTHWORK.—Tampico, Ill.—In our issue last week it was stated that M. Riley & Co., Chicago, Ill., submitted a bid at 12.64 cts. a cu. yd. for 132,182 cu. yds. of earthwork for mile 11 of the Illinois and Mississippi Canal. This was a mistake, the bid being 92.64 cts. a cu. yd. This makes the bid of John Berhery, New York, the lowest, at 16.5 cts. a cu. yd. The work on this mile is considered very difficult, and the bids were much higher than for any other mile. Frank L. Wheaton, Civil Engr., 37 South Arlington Ave., East Orange, N. J., is interested in the lowest bid.

ELECTRIC LIGHTING.—Pasadena, Cal.—The council has awarded the following contract to the Pasadena Electric Light Co. for furnishing electric lights: The contract, which goes into effect Jan. 1, calls for 105 2,000-c. p. arc lights at $6.50 a month, all night on a moonlight schedule. Additional lights are demanded at the same rate. The former price paid for the same service was $10.25. It gives the city power to substitute, on 60 days' notice, 10 16-c. p. incandescent lights for each arc light, or 1,200-c. p. lights for the 2,000-c. p. lights. The incandescent lights, if required, must be placed in a continuous circuit on poles with extension arms of 6-ft., and to be scattered with a reflector. The public buildings, city hall, library, etc., will be lighted for one-third the commercial rate or single lights at $1 a month.

INTERCEPTING SEWERS.—Washington, D. C.—The following bids were received by the district commissioners Dec. 10, 1898, for building the northerly portion of the Tiber Creek and New Jersey Ave. high-level intercepting sewer, as advertised in Engineering News; the work will include 2,310 ft. of 14×14¼ ft. D-shaped sewer, 320 ft. of 9×11 ft. D-shaped sewer in C St., 35 ft. of bell section, and connections with existing sewers:

Bidder.	Price, a cu. yd.				
	Excavation, &c.	Br'k mas'ry, nat'l cem. mortar.	Vit. br'k masonry, Portland cem. mortar.	Concrete masonry in place.	Rubble stone masonry.

O. E. Robinson, 4647 Hamilton Ave............	1.90	.50	1.00	.01	1.00	.05	1.00	1,785
A. J. Henkel & Bro., 140 University Ave........	1.00	.45	.50	.01	1.05	.05	.01	1,612
D. Folz Asphalt Paving Co., 8th and Plum......	2.50	.48	.75	.01	.90	.03	.50	1,733
M. T. Flynn, 1252 Chase Ave..................	2.40	.47	.94	.01	.85	.03	.50	1,664

PIPE SEWERS.—Scranton, Pa.—The following bids were received by councils Dec. 8, 1898, for constructing pipe sewers in the 16th district: V. H. O'Hara, Scranton, $2.75 a lin. ft., complete; extra manholes, $35.00 each; extra basins, $90.00 each; extra house connections, $1.00 a lin. ft. M. J. Gibbond, Scranton, Pa., $2.35; extra manholes, $50; extra basins, $80; extra house connections, $1.25. Donohoe & O'Boyle, Scranton, $2,47½ a lin. ft. complete. Length of sewer, 4,352 lin. ft., of 8, 10, 12 and 15-in. pipe; average depth, 11 ft. The price a lin. ft. to include the building of 30 manholes, 12 basins, and 140 house connections to curb line (about 2,634 lin. ft.). Jos. P. Phillips, Cy. Engr.

ELECTRIC LIGHTING.—Lowville, N. Y.—The Wetmore Electric Co. has submitted to the board of trustees the following bids for street lighting: 32 arc lights of 2,000-c. p. to run from twilight to 1 o'clock a. m. on all but moonlight nights, and 5 lights on State St. to run every night, $50 a light a year; the same number of lights to run all night, $60 a year each; 40 arc lights until 1 a. m., same conditions as above, $50 a light; 40 arc lights all night, $60 a year each; 50 arc lights until 1 a. m., 5 all night, $50 a light; 50 arc lights all night, $55 a year each. In years past $1,800 a year has been paid for 32 arc lights until 12 o'clock midnight. According to the above proposition, the Wetmore company offers to give the same number of lights that have been the case in the past, giving an additional hour's service, for $1,600, or $200 less than has been paid. It seems to be conceded that more lights are needed, and there is also a strong sentiment in favor of all-night lighting. The present contract does not expire until May 5, 1899. The annual charter election occurs in March.

INDUSTRIAL NOTES.

THE W. S. DICKEY CLAY MFG. CO., Kansas City, Mo., has a contract for furnishing pipe for the new sewer system in the city of Mexico.

THE PHOENIX BRIDGE CO, Phoenixville, Pa., has been awarded the contracts for the iron work for the Gray's Ferry bridge, in Philadelphia, at its bid of $145,000.

THE F. W. EMERSON MFG. CO., Rochester, N. Y., has just shipped three of its adjustable drafting tables to the Civil Engineering department of the University of California, Berkeley, Cal.

THE CARNEGIE STEEL CO., Pittsburg, is announced in press despatches from London to have received an order for 40,000 tons of steel rails for the Cape, at 15 shillings a ton under the English bids.

THE DETROIT GRAPHITE MFG. CO., Detroit, Mich., has removed its New York office to the St. James' Building, 1133 Broadway, corner 2 th St. The office was formerly in the Home Life Building, which was injured by the recent fire.

THE PENNSYLVANIA STEEL CO., Steelton, Pa., has just shipped 2,000 steel poles to the city of Mexico, for use in the construction of a new electric railway. It is stated that the poles are of steel, 28 ft. in height, and that 8,000 will be required.

THE BALDWIN LOCOMOTIVE WORKS, Philadelphia, has received orders for 16 more locomotives for the Imperial Ry. of China, 30 for the Reading, 10 for the Chicago & Northwestern, 10 for the Midland R. R., of England, besides various smaller orders.

J. S. MUNDY, Newark, N. J., shipped last week a carload of hoisting engines to Portland, Ore., one being a special steel logging engine; a hoisting engine to Cuba for use in the sugar cane business, and also two double-cylinder double-drum engines to Pittsburg. Other recent shipments include two 60-ft. pile-driving machines, with 4,000-lb. hammers and 30 HP. engines and boilers complete to the Broklyn Navy Yard.

THE GROTON BRIDGE & MFG. CO., Groton, N. Y., reports a large increase in its output during the past year, the shops having run overtime since June 1. During the year the company has erected lift bridges over the Erie Canal at Syracuse and Utica, N. Y., a large shop for the Ingersoll-Sergeant Drill Co., at Easton, Pa., and important heavy highway bridges in Texas, Arkansas and the Southern Middle States. Shop work is now about completed on upwards of 75 bridges for the Lehigh Valley R. R.

THE SCHENECTADY LOCOMOTIVE WORKS, Schenectady, N. Y., has an order from the Midland R. R., of England, for ten Mogul freight locomotives. The engines will have 18 × 24-in. cylinders, and will be of American design. The works has just completed an order for 27 locomotives to Japan, and 14 of its heaviest locomotives for the Northern Pacific Ry. The works has an order for four 8-wheel passenger locomotives for fast service between Indianapolis and St. Louis on the Vandalia Line.

THE BERLIN IRON BRIDGE CO., East Berlin, Conn., has recently built for the town of Newport, N. Y., a bridge having two spans of about 70 ft. each. This bridge is of the parabolic type, with steel floor beams and stringers. The company has the contract for the steel work for a building which the Boston & Maine R. R. Co. is erecting at Portsmouth, N. H., for its electric power station. The building is 118 × 64 ft., divided into two rooms, one for the boilers and the other for the engines and electric generators.

THE AMERICAN TIN-PLATE CO. was incorporated in New Jersey, Dec. 15, with a capital stock of $50,000,000, as a consolidation of practically all of the tin-plate mills in this country. The local office of the company is given as at 525 Main St., East Orange, N. J. The capacity of the combination is said to be 8,000,000 100-lb. boxes of tin a year. At a meeting of the stockholders in Chicago Dec. 15, Daniel G. Reid was elected President, Wm. B. Leads, First Vice-President, and Richard R. Quay, of Philadelphia (son of Senator Quay), one of the directors.

THE OLIN GAS ENGINE CO., Buffalo, N. Y., reports a good business, its plant now being run overtime and employing extra hands. Among engines which the company has just installed are the following: A 25-HP. engine at Grove City, Pa., for the town water-works; a 30-HP. engine using gasoline for the water-works at Cambridge Springs, Pa., and a 15-HP. engine for the water-works at Lawrenceville, Va. The company has also installed a number of gas engines for electric lighting service, among others being the following: A 35-HP. engine for the mill of E. M. Upton, Carlton Station, near Rochester, N. Y., and a 35-HP. engine for H. Adler, of Pittsburg, Pa. The latter is the second order for an engine of this type received from Mr. Adler.

THE BROOKS LOCOMOTIVE WORKS, Dunkirk, N. Y., has an order from the Lake Shore road, according to press reports for 45 loco-express freight engines with 19 × 30-in. cylinders, 62-in. driving wheels and weighing 150,000 lbs. each; 15 consolidated freight engines with 19½ × 28-in. cylinders, 56-in. driving wheels, and weighing 150,000 lbs. each, and 15 6-wheeled switching engines, with 19 × 26-in. cylinders, 52-in. driving wheels, and weighing 128,000 lbs. each. The company has also an order for four new 10-wheel passenger locomotives for the Buffalo, Rochester & Pittsburg R. R.

THE AMERICAN WOOD FIREPROOFING CO., 11 Broadway, New York, is building works at Newark, N. J., and will be in a position to fireproof all kinds of timber and lumber needed in naval, marine and architectural work, also all kinds of shingles. The company will sell rights outright for the control of territory, or will give the right to manufacture under royalties, and will superintend the building of the works. The officers of the company are: Pres., Guy Phelps Dodge; Vice-Pres., J. S. H. Clark; Treas., Geo. H. Clark, Jr.; Secy. and Mgr., A. Eugene Kirby; Asst. Mgr., Samuel A. Clark.

NEW COMPANIES.—St. Peter Telephone Co., St. Peter, Minn.; $10,000; H. P. Proctor, Augustus Proctor, Frank A. Chase, J. H. Chase, Viroqua, Wis.; Walter S. Proctor, St. Peter.

Yukon Prospect Corporation, Ltd., New York; $1,000,000, commencing with $10,000; to acquire, own and hold mineral and other lands in Alaska; F. W. Watkins, James R. Mullett, H. H. Russell, George C. Grey and Seymour Kisch, all of New York.

Clarksville Furnace Co., Clarksville, Tenn.; Milton H. Smith, Pres., of Louisville & Nashville R. R., Louisville, Ky.; Cushman Quarrier, and J. H. Ringold, H. W. Bruce, W. D. Hines and E. C. Lewis.

Honduras Ice Co., 106 Market St., Camden, N. J.; $100,000; to manufacture ice and conduct a general cold storage business; George F. Archer, 330 North Sixth St., and Franklin M. Archer, 106 Market St., Camden, N. J.; Thomas S. Nekervis, Merchantville, N. J.

Atlantic Land & Improvement Co., Richmond, Va.; $500,000; to carry on a general real estate business; H. Walters, Baltimore, Pres. Atlantic Coast Line, is believed to be interested.

Chama Improvement Co., Louisville, Ky.; $5,000,000, commencing with $10,000; to operate and sell railways, electric plants, improve lands, etc.; J. M. Hunter, Warwick Villa, Ky.; Ed. H. Schoening, W. E. Rapp, Claude Buckley and Curran Pope, of Louisville, Ky.

Columbia Exploration & Tunnel Co., San Francisco, Cal.; $1,000,000, commencing with $625; to own and otherwise dispose of water rights, power, light, etc.; J. E. Chilton, Wm. C. Leonard, Geo. S. Chilton, John F. Noyes and J. E. Scroggs, of Charleston, W. Va.

Colton Export & Import Co., New York; $250,000, commencing with $10,000; to establish and operate manufactures of all kinds, etc.; Chas. W. Colton, Pelham Manor, N. Y.; M. F. Colton, B. J. Radigan, P. M. Allo and Alexander Richardson, of New York.

St. Louis Gasoline Motor Co., St. Louis, Mo.; $50,000; J. H. Daman, O. L. Anderson, J. D. Fishback and Louis Langan.

Midland Appliance Co., 127 Market St., Camden, N. J.; $100,000; to deal in appliances of all kinds; C. A. Wilson, Howard H. Sypher and C. S. Rushing, Philadelphia; Norman Grey, Woodbury, N. J.; Alexander Duer, Camden.

Lake Michigan & Lake Superior Ship Canal & Dock Co., Lansing, Mich.; commencing with $50,000; to connect Lakes Michigan and Superior by canal, across the counties of Delta, Schoolcraft and Alger; D. C. Dennison, A. H. Parker and C. W. Parker.

Sawyer Mfg. Co., 227 Market St., Camden, N. J.; $50,000, commencing with $30,000; to manufacture gas and electric fixtures, etc.; H. H. Sawyer and H. S. Sawyer, Ridley Park, Pa.; Geo. L. Rowland, Philadelphia, Pa.

Essex Iron Co., Corporation Trust Co.'s Bldg., Jersey City, N. J.; $50,000; mining, smelting, etc., of iron ores; Hugh A. Bayne, 128 East 24th St.; Acton C. Bassett, 11 West 31st St., and Edwin O. Holter, 6 East 9th St., New York; Walter E. Stewart, Jr., 526 West 7th St., Plainfield, N. J.

Mohawk Mining Co., Houghton, Mich.; $2,500,000, commencing with $750,000; Wm. Paine, Boston; Fred Smith, Allouez, Mich.; F. M. Stanton, Houghton; John Stanton and Jos. Gay, of New York.

South American Co., New York; $1,000,000, commencing with $500; to acquire and develop mines in South America; Thos. Holden, Jr., White Plains, N. Y.; Chas. Engle, W. F. Craig, W. A. Kissan and Dewitt H. Lyon, of New York.

Antilles Syndicate of America, New York; $5,000,000, commencing with $1,000; to develop mines, sugar, tobacco and coffee estates; A. J. Weir, H. G. Weil, D. H. Monjo, D. L. Monjo and Lyman Elmore, of New York.

Forge Mining Co., 60 Grand St., Jersey City, N. J.; $20,000, commencing with $3,000; to mine, sell and manufacture iron and other ores; Chas. Seymour, Wm. Fillingham and Kenneth McLaren, of Jersey City.

Gray Eagle Gold Mining Co., New York; $100,000, commencing with $10,000; Wm. O. Saxton, Henry Harms, John Doscher, John Meyer and Christopher Bargrede, of New York.

Tuscarawas Telephone Co., New Philadelphia, O.; $75,000; to operate line between New Philadelphia, Canal Dover, Uhrichsville, Denison, Canton, Carrollton, Cadiz, Cambridge, Coshocton, Millersburg, Wooster and neighboring towns; J. S. Bailey, F. W. Bainbridge, J. W. Yeagley, O. S. Welty and J. H. Mitchell.

Ohio Telephone Co., Columbus, O.; $100,000; to operate a telephone system throughout the state; R. E. Jones, T. A. Simons, David C. Beggs, F. D. Simons, Howard Park, L. D. Myers and William C. Orr.

Riverside Telephone Co., Burlington, N. J.; $15,000; Mitchell B. Perkins, Beverley; Henry V. Massey, Philadelphia; Nathan Haines, J. Howard Pugh, and Geo. C. Gunn, of Burlington.

Columbus Brewing Co., Columbus, O.; $100,000, commencing with $875; Phillip A. Effler, Jos. C. Huston, Chas. H. Engle, Louis Goetz and Martin Heinmann, of Columbus, O.

Pacific Automatic Telephone Exchange Co., Seattle, Wash.; to operate telephone and telegraph lines in Washington; E. F. Sweeney, Jas. D. Hoge, Jr., H. C. Henry, E. W. Price, F. D. Schuyler, A. L. Kasson and Frank B. Ingersoll, of Seattle, and R. B. Lehman, Tacoma, Wash.

New Rochelle & Westchester Telephone Co., New Rochelle, N. Y.; $150,000; to operate lines between New Rochelle, New York, Boston, Providence, New Haven, White Plains, Yonkers, Albany, Buffalo, Ogdensburg, and elsewhere; Heinrich Meyer, New York; Geo. W. Sutton and Joseph Claudet, New Rochelle, N. Y.; John H. Scofield, Grand View, N. Y., and others.

Price Rail-Joint Co., Philadelphia, Pa.; $5,000,000, commencing with $100; to manufacture rail-joints, metallic ties, etc.; F. E. Martin, Wm. C. Wolfersberger, Carl de Mall, Edwin G. Evans and D. F. Lightfoot, all of Philadelphia.

American Fireproof Wood Co., Philadelphia, Pa.; $1,000,000, commencing with $700,000; Adam Tindel, Samuel G. Morris and Samuel Huekel, Jr., of Philadelphia, and Robt. H. Groff, Berlin, N. J.

Annapolis Ice Mfg. Co., 310 Market St., Camden, N. J.; $100,000; Robt. J. Berryman, 1009 North 43d St.; W. C. Berryman and Samuel D. Berryman, 3884 Emerald St., Philadelphia, Pa.; Wm. J. Thompson, Jr., Gloucester City, N. J.

Powers & Robinson Foundry & Machine Co., Garwood, N. J.; $100,000; to make boilers, engines, etc.; Jas. T. Powers, Houghton B. Robinson, Roland S. Brotherhood, Chas. G. Robinson, Halcyon M. Close and Fred'k Brotherhood, all of Garwood.

United States Automatic Telephone Co., New York; $1,000,000; Elias E. Ries, Martin Lowenstein, Henry A. J. Wilkens, Israel Steinhart and Henry J. Furling, New York.

Electric Haulage & Mfg. Co., Brazil, Ind.; $10,000; to manufacture motors and machinery; Jas. H. McClelland, Brazil; Edmund C. Morgan, Chas. B. Nibbloch, Chicago.

Kennedy Mfg. Co., Indianapolis, Ind.; $50,000; to manufacture gas meters; J. P. McGeath, John E. and Harry L. Kennedy, E. M. Bose and H. C. Jordan.

Gallipolis Foundry & Machine Co., Gallipolis, O.; $25,000; to manufacture steam, milling and mining machinery; H. R. Bradbury, T. E. Bradbury, C. R. Comer, Hollis C. Johnston.

Manhattan Oil Motor Co., 11½ Beaver St., Newark, N. J.; $1,000,000; to manufacture gasoline and acetylene gas motors, etc.; George T. Harris, The Bourse, Philadelphia; G. Waldron Blake, 11½ Beaver St., Newark, N. J.; Edwin W. Preston, Merchantville, N. J.

Colonial Contract Co., Corporation Trust Co.'s Bldg., Jersey City, N. J.; $100,000; to construct vessels, wharves, etc.; Wm. H. Sackett, Washington, D. C.; Colin McLean, St. George (S. I.), N. Y.; Charles C. Dodge, 1 West 83d St.; J. G. Batterson, Jr., 31 Nassau St., New York; J. L. Cunningham, 145 Fair St., Paterson, N. J.

West Side Hygeia Ice Co., Jersey City, N. J.; $100,000; Joseph H. Furl, Wallace A. Downs and John Furl, Jersey City.

Girard Machine Works, 106 Market St., Camden, N. J.; $50,000; to manufacture engines and machines; Charles A. Gildemeyer, Haddonfield, N. J.; Horace S. Glazier and Jessie L. Doyle, Philadelphia.

Co-operative Telephone Co., Columbus, O; $50,000; to operate local telephone system; George Riddle, Frank H. Howe, Charles A. Spinny, W. B. Childers, W. B. Earnhart, and others.

Fallek Telephone & Automatic Switch Co., San Francisco, Cal.; $100,000, commencing with $500; A. K. Andriano, W. T. Hess, Frederick Hess, Jr., Nathan Fallek, San Francisco; I. Harris, Oakland, Cal.

Richmond & Potomac Construction Co., 259 Washington St., Jersey City, N. J.; $100,000; to construct public works of all kinds; Oliver W. Barnes, Charles H. Cooke, Simeon F. Sullivan, John M. Enright, Jersey City.

Acme Electric Lamp Co., New Brunswick, N. J.; $500,000; to manufacture electric lamps; Louis A. Jackson, Ralph W. Booth, Jr., New Brunswick.

Spring Lake Ice Co., Chicago, Ill.; $100,000; John J. Warde, Miles E. Barry and Levi Wendermuller.

Homestead Telephone Co., Homestead, Pa.; $10,000; G. Gladden, R. Kennedy, J. Purman, D. H. Carus, A. J. Kuhn, W. S. McConegby, H. J. O'Donnell, of Homestead.

PERSONAL.

Mr. Abram Wing, Superintendent of the Iowa Water Co., Ottumwa, Ia., has resigned.

Mr. H. Nelson Hyde, for 20 years Superintendent of the water-works at Newton, Mass., has resigned.

Mr. Samuel Sloan, President of the Delaware, Lackawanna & Western R. R., will, it is reported, resign that office in February at the annual meeting of the company. He has held the office for 32 consecutive years.

Mr. Henry B. Seaman, M. Am. Soc. C. E., and M. Am. Soc. M. E., with offices at 40 Wall St., New York city, has resigned as Chief Engineer of the Audit Co., of New York, and will devote his entire time to private practice.

Prof. W. H. Dean, for several years past Water Inspector under the direction of the city council of Wilkes-Barre, Pa., has resigned to accept the position of Expert on Chemical Analysis for the Spring Brook Water Supply Co., of that city.

Mr. Rudolph Hering, M. Am. Soc. C. E., hydraulic and sanitary engineer, of New York city, has been appointed Expert Mechanical and Sanitary Engineer to review the plans of the City Engineer of Buffalo, N. Y., to abate the Hamburg Canal nuisance.

Mr. George W. Jones, who has just completed a large bridge over the Magdalena River in the United States of Colombia, arrived in New York, Dec. 19, on the steamer "Altai." The bridge has taken seven years to build on account of the swiftness of the river.

Mr. Clemens Herschel, M. Am. Soc. C. E. and M. Inst. C. E., has been awarded the Elliott Cresson gold medal by the Franklin Institute, of Philadelphia, for his invention of the Venturi water-meter. This is a well-deserved recognition of the value of a most useful discovery in hydraulic engineering.

Mr. Frederick H. Mason has opened an office as a consulting mechanical engineer, at 1020 Monadnock Block, Chicago, and will also act as the Western representative of the Frankford Steel & Forging Co., Philadelphia, Pa. He has been associated with a number of engineering firms in the West, until recently having been with the Railroad Supply Co., Chicago.

Mr. George Lewis Bradbury, Vice-President and General Manager of the Lake Erie & Western R. R., with headquarters in Chicago, has been elected President of that railway, to succeed the late Senator Calvin S. Brice, whose death was noted in our last issue. Mr. Bradbury is also Vice-President of the Cleveland, Akron & Columbus Ry., General Manager of the Northern Ohio Ry., and President of the Peoria & Pekin Union Ry.

OBITUARY.

Mr. Charles Hessean, architect, of Danville, Ill., died Dec. 16.

Capt. John Adams, of the Adams Bros. Co., bridge contractors, of Findlay, O., died Dec. 18, aged 58.

Mr. Charles Hillman, President of the Chas. Hillman Ship & Engine Building Co., Philadelphia, Pa., died Dec. 22, aged 75.

Mr. Walter Rosser, Sr., Division Superintendent of the Nashville, Chattanooga & St. Louis Ry., died at his home in Stevenson, Ala., Dec. 26.

Mr. Charles Hughes, senior partner of the firm of Hughes Bros. & Bangs, government contractors, of Syracuse, N. Y., died Dec. 18.

Mr. Charles G. Martin, brass manufacturer, of Mount Vernon, N. Y., died Dec. 21, aged 84. He was a brother of the late Daniel B. Martin, who was an engineer in the U. S. navy.

Col. Daniel Morris, civil engineer, of Atlantic City, N. J., died Dec. 21, aged 79. He laid out the city, and was the constructing engineer of the first railway from Camden to Atlantic City.

Mr. Albert C. Robinson, architect, of East Kingston, N. H., died Dec. 18, aged 52. He was for several years Superintendent of water-works at Knoxville, Tenn.; Fort Paine, Ala., and other places in the South.

Mr. Edward F. Randolph, of the firm of Randolph & Clowes, manufacturers of brass and copper tubing, etc., of Waterbury, Conn., died Dec. 18, of pneumonia, at his residence in New York city, aged 68. The business, we are informed, will continue under the same management as heretofore.

Dr. Wellington Adams, an electrical engineer and inventor, of St. Louis, Mo., died Dec. 20, aged 42. He came into prominence some years ago as the promoter of an electric railway from St. Louis to Chicago.

Major Frederick Henry Smith, M. Am. Soc. C. E., civil engineer and bridge builder, died at Baltimore, Md., on Dec. 24, aged 59 years. He was a brother of the late C. Shaler Smith, M. Am. Soc. C. E., and was associated with the latter in many of his bridge enterprises.

Col. Philip Henry Moore, Editor and owner of "The Ohio Valley Manufacturer," died at Wheeling, W. Va., Dec. 26, of paralysis. He served in the Engineer Corps of the Confederate Army during the Civil War. In 1859 he established the "Daily Union" of Wheeling, W. Va.

Mr. Stephen A. Morse, inventor and founder of the firm of Morse, Williams & Co., Philadelphia, Pa., elevator manufacturers, died in that city Dec. 22. He was born in Holderness, N. H., May 28, 1828, and learned the trade of a machinist. He went to Philadelphia about 25 years ago and soon after began the manufacture of elevators. He was the inventor of the well-known Morse twist drill.

Mr. R. T. McDonald, President of the Fort Wayne Electric Corporation, Fort Wayne, Ind., died in Dallas, Tex., Dec. 24, of pneumonia, aged 49. He was born in Pennsylvania, and removed to Fort Wayne in 1859, where he identified himself with various business enterprises and was instrumental in introducing electric lighting into that city. Later he gave his attention to electric railways and assisted in the formation of the company of which he was the head at the time of his death. He was also interested in a large ice-making plant in New Orleans, La., and had lately obtained the contract to build sewers in that city.

ENGINEERING SOCIETIES.

COMING TECHNICAL MEETINGS.

ENGINEERING SOCIETY OF WESTERN NEW YORK.
Jan. 2. Secy., H. J. March, Library Bldg., Buffalo, N. Y.

CIVIL ENGINEERS' SOCIETY OF ST. PAUL.
Jan. 2. Secy., C. L. Annan, City Engineer's Office, St. Paul, Minn.

FRANKLIN INSTITUTE.
Jan. 3. "Methods for the Examination of Explosives," Dr. W. J. Williams. Jan. 11. "Segregation Tests on Steel Ingots," A. W. Allen. Jan. 17. "The Clarification and Purification of Municipal Water Supplies," Mr. Allen Hazen. Jan. 20. "This Country of Ours," John Birkinbine. Secy., Wm. H. Wahl, 15 South 7th St., Philadelphia, Pa.

WESTERN SOCIETY OF ENGINEERS.
Jan. 3. Annual meeting. Secy., N. L. Litten, Monadnock Block, Chicago, Ill.

FOUNDRYMEN'S ASSOCIATION, PHILADELPHIA.
Jan. 4. Secy., Howard Evans, Pier 45, Delaware Ave., Philadelphia, Pa.

ENGINEERS' CLUB OF ST. LOUIS.
Jan. 4. Secy., Richard McCulloch, 2401 N. Spring Ave., St. Louis, Mo.

AMERICAN SOCIETY OF CIVIL ENGINEERS.
Jan. 4. Secy.,C. W. Hunt, 220 West 57th St.,New York city.

AMERICAN INSTITUTE, AND THE HENRY ELECTRICAL SOCIETY.
Jan. 6. "Polarized Light," Louis H. Laudy. Jan. 20. "Alternating Currents," Wm. H. Freedman. Secy., D. R. Lovejoy, 111 W. 38th St., New York city.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Jan. 6. Secy., O. Von Geldern, 19 Market St., San Francisco, Cal.

BROOKLYN INSTITUTE OF ARTS AND SCIENCES.
Jan. 6. "The Electro-Metallurgy of Copper," John B.F. Hereschoff. Secy., Henry I. Weed, Brooklyn Institute of Arts and Sciences, Brooklyn, N. Y.

CHICAGO ELECTRICAL ASSOCIATION.
Jan. 6. "Telephone Engineering: Some Problems, Solved and Unsolved," S. G. McMeen. Secy., J. R. Cravath, 825 Monadnock Block, Chicago, Ill.

THE ENGINEERS' CLUB OF PHILADELPHIA.
Jan. 7. Secy., L. F. Rondinella, 1122 Girard St., Philadelphia, Pa.

ENGINEERS' CLUB OF COLUMBUS.
Jan. 7. Secy., H. M. Gates, 12½ North High St., Columbus, O.

THE LOUISIANA ENGINEERING SOCIETY.
Jan. 9. Secy., J. F. Coleman, 712 Union St., New Orleans, La.

ENGINEERS' CLUB OF KANSAS CITY.
Jan. 9. Secy., F. W. Tuttle, Baird Bldg., Kansas City, Mo.

DENVER SOCIETY OF CIVIL ENGINEERS.
Jan. 10. Secy., W. B. Lawson, 36 Jacobson Bldg., Denver, Col.

NORTHWEST RAILWAY CLUB.
Jan. 10. Secy., T. A. Foque, Soo Line, Minneapolis, Minn.

NEW ENGLAND RAILWAY CLUB.
Jan. 10. Secy., Edw. L. Janes, P. O. Box 1158, Boston, Mass.

CIVIL ENGINEERS' CLUB OF CLEVELAND.
Jan. 10. Secy., Wm. H. Searles, Case Library Bldg., Cleveland.

CANADIAN SOCIETY OF CIVIL ENGINEERS.
Jan. 12. Annual meeting. Secy., C. A. McNab, 112 Mansfield St., Montreal, Can.

ENGINEERING ASSOCIATION OF THE SOUTH.
Jan. 12. Secy., C. B. Wilson, 1000 Broad St., Nashville, Tenn.

CENTRAL RAILWAY CLUB.
Jan. 13. Secy., H. D. Vought, 114 Fifth Ave., New York city.

ST. LOUIS RAILWAY CLUB.
Jan. 13. Secy., H. H. Roberts, 511 Commercial Bldg., St. Louis, Mo.

SCRANTON ENGINEERS' CLUB.
Jan. 14. Annual meeting. Secy., F. E. Pratt, 730 Madison Ave., Scranton, Pa.

MONTANA SOCIETY OF ENGINEERS.
Jan. 14. Annual meeting, Helena, Mont. Secy., A. S. Hovey, National Bank Bldg., Helena, Mont.

AMERICAN INVENTORS' AND MANUFACTURERS' ASSOCIATION.
Jan. 15. Annual meeting, Washington, D. C. Secy., Arthur Steuart,Washington Loan and Trust Bldg.,Washington, D. C.

ENGINEERS' AND ARCHITECTS' CLUB OF LOUISVILLE.
Jan. 16. Secy., Marshall Morris, 16 Norton Bldg., Louisville, Ky.

TECHNICAL CLUB OF OMAHA.
Jan. 16. Secy., J. Harry Lawrie, Omaha, Neb.

ENGINEERS' CLUB OF MINNEAPOLIS.
Jan. 16. Secy., H. E. Smith, 1620 S. E. 14th St., Minneapolis, Minn.

ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA
Jan. 17. Secy., R. A. Fessenden, 410 Penn Ave., Pittsburg, Pa.

WESTERN RAILWAY CLUB.
Jan. 17. Secy., F. M. Whyte, 225 Dearborn St., Chicago, Ill.

BOSTON SOCIETY OF CIVIL ENGINEERS.
Jan. 18. Annual meeting. Secy., S. E. Tinkham, City Hall, Boston, Mass.

WESTERN FOUNDRYMEN'S ASSOCIATION.
Jan. 18. Secy., B. M. Gardner, 1522 Monadnock Block, Chicago, Ill.

THE IOWA ENGINEERING SOCIETY.
Jan. 18-19. Annual meeting, Iowa City, Iowa. Secy., E. P. Boynton, Cedar Rapids, Ia.

NEW YORK RAILROAD CLUB.
Jan. 19. Secy., W. W. Wheatley, 168 Montague St., Brooklyn, N. Y.

ENGINEERS' CLUB OF CINCINNATI.
Jan. 19. Secy., J. F. Wilson, P. O. Box 333, Cincinnati, O.

SOUTHERN AND SOUTHWESTERN RAILWAY CLUB.
Jan. 19. Secy., F. A. Charpiot, P. O. Box 13, Savannah, Ga.

THE WEST VIRGINIA SOCIETY OF CIVIL ENGINEERS AND ARCHITECTS.
Jan. 19-20. Annual meeting, Charleston, W. Va. Secy., W. Steenbergen, Point Pleasant, W. Va.

NORTHWESTERN ELECTRICAL ASSOCIATION.
Jan. 19-21. Semi-annual meeting, Milwaukee, Wis. Secy., Thos. R. Mercein, 511 Montgomery Bldg., Milwaukee, Wis.

TECHNICAL SOCIETY OF THE PACIFIC COAST.
Jan. 20. Annual meeting. Secy., O. Von Geldern, 819 Market St., San Francisco, Cal.

ROCHESTER ENGINEERING SOCIETY.
Jan. 20. Secy., John F. Skinner,Reynolds Library Bldg., Rochester, N. Y.

THE DETROIT ENGINEERING SOCIETY.
Jan. 20. Secy, Henry Goldmark, Wayne Co., Sav. Bank Building, Detroit, Mich.

NATIONAL ASSOCIATION OF MANUFACTURERS.
Jan. 24-26. Annual convention, Cincinnati, O. Secy., E. P. Wilson, Room A, Chamber of Commerce, Cincinnati, O.

INDIANA ENGINEERING SOCIETY.
Jan. 24-26. Annual meeting, Indianapolis, Ind. Secy., J. B. Nelson, 61 Baldwin Block, Indianapolis, Ind.

MICHIGAN ENGINEERING SOCIETY.
Jan. 24-26. Annual meeting, Lansing, Mich. Secy., F. Hodgman, Climax, Mich.

AMERICAN INSTITUTE OF ELECTRICAL ENGINEERS
Jan. 25. Secy., Ralph W. Pope, 26 Cortlandt St., New York city.

ILLINOIS SOCIETY OF ENGINEERS AND SURVEYORS.
Jan. 25-27. Annual meeting, Champaign, Ill. Secy., Jacob A. Harman, Peoria, Ill.

ROCHESTER ENGINEERING SOCIETY.—The annual meeting of this society was held on Dec. 16. The following officers were elected for the ensuing year: Pres., William Jordan; First Vice-Pres., Wm. R. Storey; Second Vice-Pres., C. C Laney; Secy., John F. Skinner; Treas., Robert Cartwright.

THE ENGINEERS' SOCIETY OF WESTERN PENNSYLVANIA.—A regular meeting of this society was held at Pittsburg, Pa., on Dec. 20. The paper of the evening, entitled "Design and Construction of the 29th St. Power Station of the Consolidated Traction Company," was read by Mr. G. F. Greenwood, Chief Engineer and General Manager of the company.

THE ELECTRICAL TRADES SOCIETY OF NEW YORK, a society composed of manufacturers of electrical goods, held a meeting at the Astor House, New York city, on Dec. 6, at which it was decided to file incorporation papers under the New York State laws.

The following officers were elected for the ensuing year: Pres., R. E. Gallaher; Vice-Pres., C. P. Geddes; Secy.-Treas., A. P. Eckert.

ENGINEERS' CLUB OF CINCINNATI.—This club held its annual meeting on Dec. 15 with an attendance of over 40. Routine business was transacted, after which the customary banquet was enjoyed. The officers elected for the ensuing year are as follows: Pres., Schuyler Hazard; Vice-Pres., T. B. Punshon; Secy.-Treas., J. F. Wilson; Directors, A. O. Elzner, W. C. Jewett and L. E. Bogen.

BOSTON SOCIETY OF CIVIL ENGINEERS.—This society attended a meeting of the Society of Arts held in the new Pierce Building of the Institute of Technology, on Dec. 22, to inspect the equipment of the new building. Descriptions of the heating and ventilating, and electric light equipments were given by Prof. S. Homer Woodbridge and W. L. Puffer. The apparatus in the mechanical laboratories was inspected and the large Emery testing machine was shown in operation.

ENGINEERS' CLUB OF ST. LOUIS.—The annual meeting and dinner of this club was held at the Mercantile Club, Dec. 21. Previous to the toasts officers for the ensuing year were elected as follows: Pres., B. H. Colby; Secy., E. R. Fish; Treas., Thos. B. McMath; Librarian, E. J. Jolley; Directors, J. H. Kinealy and John A. Laird; Members of the Board of Managers of the Association of Engineering Societies, J. B. Johnson and Richard McCulloch.

Richard McCulloch, Secy.

THE AMERICAN CHEMICAL SOCIETY.—The 18th annual meeting of this society opened on Dec. 27 at the House of the Chemists' Club of New York, 108 W. 55th St., New York city. Hon. Randolph Guggenheimer, President of the City Council, welcomed the society to New York. Prof. Alexander S. Webb, President of the College of the City of New York, spoke in behalf of the educational institutions of the city. The President of the society, Mr. Chas. E. Monroe, responded, and the reading of the papers was then taken up.

CONNECTICUT ELECTRIC LIGHTING ASSOCIATION. —The annual meeting of this association was held at New Haven, Conn., on Dec. 17. Papers were read by Prof. W. L. Robb on the "Use of Rotary Transformers and Storage Batteries by the Hartford Electric Light Co.," and on "The Merits and Demerits of the Welsbach Lamp," by H. L. Purrington.

The following officers were elected for the ensuing year: Pres., James English; First Vice-Pres., C. A. Learned; Second Vice-Pres., C. H. Nettleton; Secy., A. F. Hunie; Treas., A. M. Young.

UNDERWRITERS' NATIONAL ELECTRICAL ASSOCIATION.—The 6th annual meeting of the Electrical Committee of this association was held in New York city, Dec. 6-8. Such matters as specifications for standard electric light fittings and slight changes in the national electrical code were discussed. A committee was appointed to formulate specifications for tests of rubber covered wires.

Several resolutions were passed recommending the general adoption by all underwriters' associations of a List of Approved Electrical Fittings. This is a list of fittings approved by the National Board of Fire Underwriters.

MONTANA SOCIETY OF ENGINEERS.—A regular meeting of this society was held on Dec. 10, at which Mr. Francis W. Blackford read a paper on the "Butte-Centerville Electric Ry.," in which the construction of this road was fully described. The next meeting, to be held at Helena, Mont., Jan. 12-14, will be the 12th annual meeting. Mr. M. S. Parker will present a paper upon the "Big Hole River Dam." The State Engineer's Bill will also come up for discussion. Excursions will be made to the dam at Canyon Ferry, Missouri River, the Peck concentrator, East Helena and the East Helena smelter.

A. S. Hovey, Secy.

NORTHWESTERN ELECTRICAL ASSOCIATION.— The 7th annual convention of this association will be held at Milwaukee, Wis., on Jan. 18-19.

The following papers will be read: "Trend of Central Station Design," B. J. Arnold, Chicago; "Meter-rate Systems," E. L. Debell, Sheboygan, Wis.; "Design of Secondary Circuits in Alternating Plants," George L. Thayer, Belle Plaine, Ia.; "Electricity Direct from Coal," Prof. A. J. Rogers, Milwaukee, Wis.; "Inductive Loads on Alternating Current Transformers," Prof. D. C. Jackson, Madison, Wis.; "Electric Vehicles and Their Relation to Central Stations," H. M. Maxim, Hartford, Conn.; "Association Management," H. L. Doherty, Madison, Wis.

WESTERN SOCIETY OF ENGINEERS.—At the meeting on Dec. 21, Mr. W. H. Finley, Bridge Engineer of the Chicago & Northwestern Ry., described the design and erection of the new Kinzie St. drawbridge over the Chicago River. It is a riveted lattice structure, replacing an old pin-connected bridge built of "Hay" steel, which is hard and brittle. In order to provide an increased width of channel and still prevent interference with the adjacent Kinzie St. highway bridge, the railway bridge has its pivot under one of the trusses. On the inner side of the roller tracks are top and bottom racks, with which engage spur wheels on roller shafts. This is done to prevent any tendency of the rollers to work out from under the bridge. The structure was partially erected on launching ways on land, then hauled out 30 ft. to allow of its completion, the completed structure being then carried by scows to the site, the old bridge being floated away on scows at the same time.

NEW PUBLICATIONS.

THE USE OF COKE BREEZE IN SEWAGE PURIFICATION.—A Paper by Jno. W. Alvord, C. E., read before the Western Society of Civil Engineers, May 18, 1898. Paper; 6 × 9 ins.; pp. 11. Address the author, The Rookery, Chicago.

A number of experiments with filters designed to work at a high rate, both in this country and abroad, are reviewed in this pamphlet.

MUNICIPAL REPORTS.—The following reports have been received, the reports and the names given being those of city engineers, unless otherwise specified: Boston, Mass., Benj. Wells, Superintendent Street Department. Cambridge, Mass., Special Report on Means to Prevent Back Flooding from Sewers, L. M. Hastings. Newton, Mass., H. D. Woods. Central Falls, R. I., W. F. Keene. Easton, Pa., Harrison R. Fehr. Philadelphia, Pa., Thos. M. Thompson, Director Public Works. Wilmington, Del., T. Chalkley Halton, Engineer Sewers. Glenville, O., Report on Sewerage and Sewage Purification for Glenville, O., by John P. Force, Columbus, O. Indianapolis, Ind., J. Clyde Power, Engineer and Superintendent of Parks. Detroit, Mich., Henry D. Ludden. Duluth, Minn., Thos. F. McGilvray, Minneapolis, Minn., W. M. Berry, Superintendent of Parks. St. Paul, Minn., L. W. Rundlett. St. Louis, Mo., A. N. Milner, Street Commissioner. Toronto, Ont., Report on Sewage Disposal, C. H. Rust.

TRADE PUBLICATIONS.

(The standard sizes for pamphlets and trade catalogues recommended by all the principal engineering societies of the United States are: 3 1-2 x 6 ins.; 6 x 9 ins., and 9 x 12 ins.)

STEEL LATH.—Bostwick Steel Lath Co., Niles, O. Pamph.; 6 × 9 ins.; pp. 28; illustrated.

This catalogue contains descriptions and illustrations of the Bostwick patented, perforated metal lath, Holton's patent slip joint eave trough, and a general line of gutters, ventilators, etc., etc.

IRON AND STEEL ROOFING.—Sykes Iron & Steel Roofing Co., Niles, O. Pamph.; 9 × 6 ins.; pp. 40; illustrated.

This is a descriptive catalogue of a general line of corrugated iron and steel roofing and siding.

FRICTION CLUTCHES.—G. D. Grannis, Syracuse, N. Y. Pamph.; 3¾ × 5½ ins.; pp. 15; illustrated.

This pamphlet describes and illustrates the construction and operation of the Jackson friction clutch for which several advantages are claimed in economy and efficiency.

WIRE CABLE FERRIES.—Trenton Wire Co., Trenton, N. J. Pamph.; 5¾ × 8¼ ins.; pp. 7; illustrated.

This pamphlet gives a pretty complete illustrated description of the above company's system of wire rope ferry construction.

VALVES, INJECTORS, STEAM SPECIALTIES, ETC.— The Lunkenheimer Co., Cincinnati, O. Pamph.; 4¾ × 7¼ ins.; pp. 208.

This is a very complete illustrated catalogue of the well-known Lunkenheimer specialties for steam, water, gas and oil.

STRUCTURAL STEEL WORK.—The Pittsburg Bridge Co., Pittsburg, Pa. Pamph.; 6 × 3¼ ins.; pp. 40; illustrated.

This pamphlet is made up chiefly of illustrations of a great variety of bridges and buildings for which the company named has furnished the steel work.

VALVES, EXPANSION JOINTS, STEAM AND WATER APPLIANCES.—Caldwell Wilcox Co., Newburgh, N. Y. Pamph.; 9 × 5 ins.; pp. 20.

This is an illustrated catalogue of a variety of appliances used in connection with steam and water piping, including screens, flexible joints, steam and water separators, or water-catchers, slip joints, etc.

RECENT BALDWIN LOCOMOTIVES.—Baldwin Locomotive Works, Philadelphia, Pa. Pamph.; 9 × 6 ins.; pp. 32; illustrated.

This is No. 9 of the 1898 series of pamphlets describing the locomotives built by the above-named company to American and foreign orders, and it is devoted mostly to heavy locomotives for freight service.

WINTER TOURS: LEHIGH VALLEY R. R.—Passenger Department, Lehigh Valley R. R., New York, N. Y. Pamph.; 5½ × 8 ins.; pp. 74; illustrated.

This pamphlet outlines a large number of tours to the winter resorts of Florida and other southern states, with such details of the natural attractions, hotel accommodations, railway and hotel rates, etc., as are likely to interest the prospective tourist.

STEEL ROOFING.—Canton Steel Roofing Co., Canton, O. Pamph.; 6 × 9 ins.; pp. 128; illustrated.

This is a catalogue and price list of the different forms of stamped sheet metal manufactured by the above company. Among the various forms of plain and stamped work produced are sidings, ceilings, moldings, cornices, gutters and eaves troughs, roofing, ridges, skylights, vanes, ventilators, finials, etc.

FIREPROOF GRAIN ELEVATORS.—Steel Storage & Elevator Cons. Co., Buffalo, N. Y. Pamph.; 6 × 9 ins.; pp. 31; illustrated.

This catalogue gives a very good illustrated description of the steel storage grain elevators and pneumatic grain conveying system of which the above company makes a specialty. Views of a number of elevator plants built by the company in the Western and Central States are given.

STREET SWEEPING MACHINES.—Improved Street Sweeper Co., German National Bank Building, Pittsburg, Pa. Paper; 4½ × 7 ins.; pp. 12; illustrated.

This catalogue describes a pick-up street sweeping machine. The broom is of wire, instead of fiber. The dirt is accumulated in a tank, which is emptied mechanically either at intervals on the street, or at the dump, the broom being raised in case the dirt is to be hauled to the dump.

STEEL ROOFING.—Niles Iron & Steel Roofing Co., Niles, O. Pamph.; 6 × 9 ins.; pp. 25; illustrated.

This catalogue describes the construction of the different forms of steel roofing, ceilings, ridges, gutters and other forms of stamped sheet metal work produced by the company named. Special qualities of roof paints and tools used in laying sheet metal roofing are also described and a price list of all articles is given.

STEAM SHOVELS AND DREDGES.—The Toledo Foundry & Machine Co., Toledo, O. Pamph.; 9½ × 6¾ ins.; pp. 94; illustrated.

The several classes of "Victor" shovels which are built by this firm are quite fully described and illustrated in this pamphlet. It also contains a number of illustrations of dipper dredges built by the same company, together with the "Victor" railway pile driver and the "Victor" turntable.

HOISTING AND CONVEYING MACHINERY.—G. D. Grannis, Syracuse, N. Y. Pamph.; 8½ × 6 ins.; pp. 16; illustrated.

This pamphlet describes and illustrates quite fully the Jackson hoister and conveyor for sewer and trench work, the Jackson rotating hoister and conveyor, and the Jackson revolving, self-propelling pile driver. These machines have been quite extensively used on the Erie Canal enlargement, and on various pieces of sewer work.

"SALAMANDER" FIREPROOFING.—The American Fireproofing Co., Boston, Mass. Pamph.; 6 × 3½ ins.; pp. 32; illustrated.

Salamander is made in rolls, like roofing felt, and is designed to be used as a lining between floors, and in other places where a sound deadener or a dust and air-proof lining is desired. Among the claims made for the material are that it is non-inflammable and a non-conductor of heat, and this pamphlet describes more particularly the results of various tests made to demonstrate these characteristics.

ELECTRICALLY OPERATED TURNTABLES. — The Westinghouse Electric & Mfg. Co., Pittsburg, Pa. Pamph.; 9 × 6 ins.; pp. 12; illustrated.

In this pamphlet the company presents a brief description and a number of illustrations of its special motor car, or "donkey," for turntable operations. The device requires no changes in the turntable proper, and can be attached to any construction of table, and a quite complete account of its construction and operation was given in Engineering News of May 27, 1897, and Aug. 25, 1898.

BRIDGE RAILINGS.—Chester B. Albree, Allegheny, Pa. Pamph.; 9 × 6 ins.; pp. 130; illustrated.

This pamphlet illustrates and describes very briefly a large number of structural and special styles of railings, portal castings, lamp posts, cornice and facias, stairways, etc., for bridges, which are manufactured by the above-named firm. The variety of designs shown is very large and most of them are examples of actual work. In a supplement the pamphlet devotes several pages to the special forms of bridge riveters designed and built by Mr. Albree.

THE REMINGTON TYPEWRITER AFLOAT.—Wyckoff, Seamans & Benedict, New York, N. Y. Pamph.; 9 × 7 ins.; pp. 24; illustrated.

This pamphlet contains handsome half-tone engravings of the different larger vessels of the United States Navy, each accompanied by a brief description giving dimensions, armament, a general outline of the machinery, and other similar details. The statement that each vessel's equipment also includes one or more Remington typewriters constitutes the "trade" feature of the pamphlet, which is in many respects a better handbook of our larger war ships than many more formal and pretentious books which we have seen.

TRANSFORMER DESIGN AND OPERATION.—General Electric Co., Schenectady, N. Y. Pamph.; 8 × 10½ ins.; pp. 38.

This pamphlet, number 9,064 of the General Electric series, is a reprint of two papers on transformers, one, "Alternating Current Transformers from the Station Manager's Standpoint," by Mr. W. F. White, read before the American Institute of Electrical Engineers, and the other, "Transformer Economy," by Prof. W. E. Goldsborough, read before the National Electric Light Association. These are supplemented by several maps of Conshohocken, Pa., showing how a few large transformers were substituted for a number of smaller ones, with a considerable saving in operating expenses. As a further example of the economy of large transformers, the alternating current distribution system at Pueblo, Colo., is shown in the same way. Instruments for making transformer tests are also illustrated and briefly described.

TARGET-READING TACHEOMETER.—Bell-Elliott patent, Messrs. Elliott Brothers, Opticians to the Government, 101-102 St. Martin's Lane, London, England. Paper; 8 × 5½ ins.; pp. 22.

This pamphlet describes the method of using a target-reading tacheometer invented by Mr. George Joseph Bell, Assoc. M. Inst. C. E., of Carlisle, England. The instrument is intended to measure distances and altitudes, when a graduated staff is placed on the point to be measured, and it accomplishes the work of a transit, level and chain at one operation and with extreme accuracy. In general the instrument resembles a transit with level divided wide and compass attached. But it is also provided with a tangent scale, moved by a micrometer drumhead, dividing one full division of 1-16 in. on the tangent scale into 1,000 equal parts; it is read by a microscope. The instrument reads the actual natural tangent of the observed angle, and books of tables are not required for field work. While instruments of this type are not much used in this country, the results obtained with the Bell-Elliott tacheometer are said to be accurate to five places of decimals, and to be more precise than when obtained by the chain. The cost of the instrument complete ranges from $200, for a 4-in. reading to 1′, to $250 for a 6-in. reading to 20″.

RAILWAYS.

ARKANSAS & CHOCTAW.—We are informed that this company has built 13 miles in Arkansas and two miles in Indian Territory this year. The line has been located some 12 miles west from Choctaw City, Ark., into Indian Territory, and a preliminary line surveyed to the Chickasaw and Choctaw boundary line, via Doaksville, Goodland and Atoka, a distance of about 130 miles. Mr. Valliant will make a location through Indian Territory and Oklahoma, following Red River; and probably before any more contracts are let. This will require about four or five months. R. H. Keith, Pres., of Kansas City, can furnish any other information. F. W. Valliant, Ch. Engr., Rocky Comfort, Ark.

ARKANSAS, GUTHRIE & CALIFORNIA.—Henry Hudson, Pres., Guthrie, Okla., informs us that surveys were expected to begin last week for this proposed railway from Shawnee to Guthrie and thence northwest to a point on the Chicago, Rock Island & Pacific Ry., a distance of 250 miles. The line will cross the St. Louis & San Francisco at Shawnee, the Choctaw, Oklahoma & Gulf, and the Chicago, Rock Island & Pacific if the road is built to Enid. The prospects for construction are good. J. W. McNeal, Treas.

CHICAGO, ROCK ISLAND & PACIFIC.—Reports state surveys have been completed and that construction work will soon be commenced on the proposed extension from the main line at Chilaska, Ind. Ter., to Fort Sill, Okla., a distance of about 33 miles. W. E. Dauchy, Supt. of Construction, Topeka, Kan.

CHINA.—Press reports from St. Petersburg, Russia, state that the embankment of the Russian railway will soon be partially completed as far as Port Arthur. The railway to Shan Haikwan is making progress. The embankment and cuttings at Niu-chwang have been begun, and are completed for 50 miles from Shan Haikwan onwards. The rails are now being laid, and a temporary bridge erected; the final bridge will consist of 30 spans of 100 ft. each. Thus Niu-chwang will soon be connected with Peking by railway.

CINCINNATI, HILLSBORO & WELLSTON.—C. Gillilan, Portsmouth, O., informs us that a second expert examination of the resources and practicability of this proposed line will be made next January. The route is from the coal fields at Wellston to Cincinnati, via Jackson, Piketon and Milford, O., 112 miles. It is hoped that this report may help to secure the capital needed to commence work early next spring. M. McKeehan, Pres., Hillsboro, O.; P. H. Doyle, Columbus, O.

CLEVELAND, CANTON & SOUTHERN.—Press reports state that this railway will be sold in Cleveland, O., on Feb. 2, at 10 a. m., by Special Master Commissioner Carleton. J. W. Wardwell, Recvr. and Gen. Mgr., Cleveland.

CLEVELAND TERMINAL & VALLEY.—Reports state that the Magnolia Coal Co. has made a contract with this company for the construction of six miles of track from Sandyville to the company's mines at Magnolia, O. Work is expected to begin at once. E. G. Lane, Ch. Engr., Cleveland, O.

COAHUILA & PACIFIC.—We are informed that an important charter has been granted by the Mexican Government to A. W. Lilliendahl for a standard gage railway, 310 kilometers long, from Saltillo to Torreon, the junction of the Mexican Central Ry. and the Mexican International R. R. This line will traverse the rich "Laguna," the great cotton producing belt of Mexico, also passing through Parras, the wine and fruit district. Throughout its entire length the line will be through haciendas of wealth and importance, the owners of which are large subscribers. Surveys are in progress by T. S. Abbott, Ch. Engr., of New York, with headquarters at Saltillo, Mexico. Construction work is expected to begin within one year.

COLORADO, UTAH & WYOMING.—E. H. Saltiel, Trustee, Rawlins, Wyo., informs us that this company was incorporated in Wyoming in 1895, to build a railway 600 miles in length, and that the first proposed section of line to be built is from the Union Pacific Ry., six miles east of Rawlins, to Iron, Wyo., 28 miles, with eight spurs to various iron mountains, coal mines and limestone quarries, about 15 miles additional. Negotiations are now pending and will possibly be concluded in January. The Wyoming Land, Iron & Coal Co., of which Mr. Saltiel is president, has offered to guarantee 500 tons of coal a day to the first company building to Iron, and to further agree to double the tonnage or guarantee 300,000 tons a year, to commence six months after line shall have been put in operation. Many offers have been made, but all except one, which is expected to be considered in January, have been unsatisfactory. It will be a cheap railway to construct, as the country is largely a flat alkali desert, with about 2½ miles of sand hills, and without any rivers.

FARMINGTON & IRONDALE.—Surveys have commenced at Irondale, Mo., according to reports, for this proposed railway from Irondale, Washington county, to Farmington, through the Flat River lead district, about 20 miles. The company was incorporated Nov. 26 by H. J. Cantwell, William Carter and others.

GEORGES VALLEY.—Reports state that this line, now in operation between Warren and Union, Me., eight miles, will probably be extended to Searsmont, about eight miles north of Union. J. Mitchell, Pres. and Mgr., Union, Me.

HUMBOLDT, DYERSBURG & TIPTONVILLE.—This company was incorporated in Tennessee, Dec. 21, with an authorized capital stock of $1,500,000 to build a railway from Humboldt, in Gibson county, to Dyersburg, and then to Tiptonville, in Lake county, about 60 miles. The incorporators are: F. S. Blake, J. S. McTighe, J. D. McClerkin, W. H. Tucker, J. N. Parker, W. F. Fowler and John F. Hamilton.

KANSAS & SOUTHERN.—J. L. Rodgers, Westmoreland, Kan., informs us that surveys have not yet been made for this proposed line to connect with Blaine or Wheaton, Kan., on the Union Pacific Ry., a distance of 9 or 11 miles, but that they will most likely be completed by Jan. 15. Capital has not been fully secured, but an election has been called to vote aid to the project. The Southern Construction Co., of St. Louis, will do the construction work. Irving H. Wheatcroft, Pres., St. Louis, Mo.

KANSAS, OKLAHOMA CENTRAL & GULF.—Jacob H. Bartles, Pres., Bartlesville, Ind. Ter., informs us that surveys have been made and location completed for 200 miles of this proposed line from Cherryvale, Kan., to Vernon, Tex., via Bartlesville, Ind. Ter., Guthrie and El Reno, Okla., a total distance of 350 miles. About 45 miles have already been graded and are ready for ties and rails. B. J. Dalton, Ch. Engr., Caney, Kan.

KANSAS SOUTHWESTERN.—This company was incorporated in Kansas, Dec. 23, with a capital stock of $8,000,000. The incorporators own the old Anthony branch of the St. Louis & San Francisco Ry., which as bondholders they lately purchased at the foreclosure sale. The property is now operated by the Santa Fe, which, it is reported, will buy it in due time. It is stated in the articles of incorporation that the road is to be extended into Oklahoma and the Indian Territory. The directors are: Samuel Barker, Patrick M. Banker, John S. Hendrie and William N. Long, of Hamilton, Ont.; John Penman, Paris, Ont.; James N. Young of Chicago; Albert A. Newman, of Arkansas City, Kan.; W. E. Blackburn, Anthony, Kan., and James Glover, of Bluff City, Kan. The offices of the company are at Kansas City.

LAKE TAHOE.—This company has been incorporated in California, with a capital stock of $100,000, to construct a narrow gage line from Tahoe City, Cal., to Truckee, on the Central Pacific Ry. Surveys have already been made. The directors are: D. L. Bliss, Carson City, Nev.; D. O. Mills, N. K. Masten and others.

MEXICAN INTERNATIONAL.—Reports state that the extension of this line from Reata to Monterey, Mexico, about 50 miles, will soon be completed. Thos. H. Hubbard, 23 Broad St., New York.

MINNESOTA & IOWA.—This company was incorporated in Iowa, Dec. 23, with a capital stock of $50,000, to construct and operate a line from Sanborn, on the Winona & St. Peter Ry., south to the state line, via Brown, Cottonwood, Watonwan and Martin counties. Marvin Hughitt, Pres.; M. M. Kirkham, Vice-Pres. and Treas.; J. B. Redfield, Secy.; J. M. Whitman and J. B. Redfield, of Chicago; Edward C. Cartney, of Evanston, and W. A. Scott and J. C. Stuart, of St. Paul, are the incorporators.

ONTARIO & RAINY RIVER.—D. F. Burke, Port Arthur, Ont., is stated to have said that the construction of this new line from Port Arthur towards Rainy Lake, 200 miles, is progressing, and that about 400 men are at work on the line. It is expected that by the end of next May the rails will be laid on 20 miles of the roadbed, extending from Stanley station, on the Port Arthur, Duluth & Western Ry., to the Mattawan River. A further extension of ten miles will be made by July, bringing the railway to the Mattawan iron range, thus permitting the shipment of iron ore. There are now 12 survey parties at work between Stanley station and the mouth of the Rainy River. The company hopes to obtain a grant of the $6,400 a mile at the coming session of the legislature, in which case about 4,000 men will be put on construction work next summer, and an effort made to complete the line within two years. E. F. Fauquier, Ottawa, Ont., is the contractor for the first 20 miles. Wm. Mackenzie, Pres., Toronto; T. H. White, Ch. Engr., Port Arthur.

QUEEN ANNE'S.—Reports state that this company has decided to build a branch from Queenstown to Centreville, Md., a distance of seven miles. Right of way has already been secured and the survey is now being made. It is expected that construction will begin this winter or early in the spring and the line will be opened next summer. The company is also considering the advisability of establishing steamer service between Rehoboth Beach and Cape May, a distance of 12 miles. I. W. Troxel, Gen. Mgr. and Ch. Engr., Queenstown, Md.

SABINE PASS & NORTHWESTERN.—This company, which has been incorporated in Texas, with a capital stock of $400,000, proposes to construct a line from Sabine Pass to Bonham, via Palestine, Athens, Canton and Greenville, Tex., a distance of about 300 miles. Surveys have been made between Greenville and Palestine, 100 miles, and contracts on this section will probably be let about Jan. 15. W. H. Brooker, Gen. Mgr., Fort Worth, Tex.

ST. LOUIS, IOWA & NORTHERN.—Preliminary surveys have been made by C. J. Dubois, Macon, Mo., according to reports, for this proposed line. The company is expected to be incorporated soon in Missouri, and to begin work about 25 miles east of Macon and extending north and south.

ST. LOUIS & O'FALLON.—Press reports state that the St. Louis & O'Fallon Coal Co. will soon let contracts for the construction of 12 miles of railway from East St. Louis to the company's mines near O'Fallon, Ill.

SAN FRANCISCO & SAN JOAQUIN VALLEY.—Foley Bros. & Muir, St. Paul, Minn., and Grant Bros., San Francisco, Cal., have been awarded contracts for different pieces of grading between Port Richmond and Pinole, a distance of nine miles. Work on the Franklin tunnel is said to be about half finished. East of this tunnel, two more will be built, one 1,200 ft. in length and the other 300 ft. East of the Contra Costa hills no grading has yet been done. It will be easy work, and the contract will soon be let. From Antioch east 12 miles to the tules half the grading has been completed. Through the tules seven miles of embankment has been thrown up and two miles of bridges and trestles are being built; the embankment is 16 ft. high. The grading from the tules to Stockton, a distance of eight miles, is also being rushed forward. Across the San Joaquin River at Stockton a bridge 240 ft. in length will have to be constructed. Plans for the bridge are now being prepared. A steel viaduct one-half mile long will also be built across one end of the Alhambra Valley. W. B. Storey, Jr., Ch. Engr., San Francisco, Cal.

SAN JUAN & RIO PIEDRAS.—This company has been incorporated in New York, with a capital of $300,000, to construct and operate an electric or steam railway, 7½ miles in length, from San Juan to Rio Piedras, Porto Rico. The directors are: George H. Walbridge, Fernando G. Echeveddia, H. H. Harrison, Edward Schmidt, Lathrop R. Bacon, F. Kingsbury Curtis, Philip H. McMillan, Augustin N. Hand and Wm. B. Parsons, of New York. Reports state that this company recently purchased the street railway in San Juan, which is operated by steam and was formerly owned by Count Ubarri, and that the new owners purpose to change the motive power from steam to electricity. As stated in our issue of Dec. 15, J. G. White & Co., Engineers and Contractors, of New York and Baltimore, informed us that they were interested, and that no immediate changes were contemplated.

SOMERSET.—This company has issued a notice that it will petition the legislature for permission to build an extension to Moosehead from Bingham, Me., the present terminus. On account of previous unsettled litigation the extensions could not be made. As yet no survey has been made of an extension to Moosehead or to a point where connections might be made with the Canadian Pacific or the Bangor & Aroostook. R. W. Dunn, Pres., Oakland, Me.

SOUTHERN PACIFIC.—This company is said to contemplate extending its double track from Oliver to Segura, La., a distance of eight miles. J. T. Mahl, Ch. Engr., Houston, Tex.——Reports state that the Southern Pacific Co. has just placed with several Eastern firms contracts for new cars and locomotives of the aggregate value of about $2,000,000. The new rolling stock comprises 2,500 box cars, 250 flat cars, 250 gondolas or coal cars and 50 locomotives. Most of the locomotives will be of the 10-wheel type, and are intended for the freight service. Quite a number of them will be used on the mountain sections of the road in California. The new box cars will mostly be used in the overland freight service. This is said to be the largest order ever given for equipment at one time by the company.

WABASH.—Reports state that this company is unloading material for the construction of its 27-mile cut-off between Moulton and Albia, Ia. The surveys are completed, specifications are out and contracts will be awarded early in the spring. W. S. Lincoln, Ch. Engr., St. Louis, Mo.

WASHINGTON.—Malcolm M'Dougall, Colonial Bldg., Seattle, Wash., has applied to the commissioners of Kings county for a franchise for the construction and operation of a standard gage railway from Tacoma northward, presumably to Seattle.

WASHINGTON & COLUMBIA RIVER.—The trustees of this company have declared their intention to build seven branch lines in Oregon and Washington of a total length of 160 miles. J. G. Cutler, Ch. Engr., Walla Walla, Wash.

WISCONSIN & MICHIGAN.—Press reports state that this railway, 60 miles in length, has been sold to the Toledo & Ann Arbor R. R. Co. The Wisconsin & Michigan is to be extended six miles, to connect with the Holmes & Son logging line, which extends 40 miles in a northwesterly direction from Pembina. The Holmes road will be extended to tap a big tract of pine timber in Forest and Vilas counties, estimated at 1,000,000,000 ft. This timber will be brought to Marinette to be sawed in Marinette and Menominee mills, and will prolong the life of the mills here many years. Ultimately the Holmes road will be extended to Duluth. The Wisconsin & Michigan extends from Peshtigo Harbor to Faithorn Junction. The company will lay its own tracks into Marinette, Wis. Next year the extension will reach the Menominee iron range.

STREET AND ELECTRIC RAILWAYS.

BIDDEFORD, ME.—It is announced by F. A. Hobart, of Boston, that a contract has been closed and executed with Isaac A. Walker & Son, contractors, of Philadelphia, Pa., to build, equip and put in operation early in the season of 1899 the Saco River Electric R. R., from the Biddeford line to Bonny Eagle, in the town of Standish.

PORTSMOUTH, N. H.—The stockholders of the Portsmouth & Dover R. R. Co. have voted to authorize the Boston & Maine R. R. Co. to extend the Portsmouth Electric St. Ry. through Newcastle, Rye and Hampton, and accept its proposition for the loan of money to complete the road until new stock could be issued to repay the loan. The project of equipping the Portsmouth and Dover line with electricity was not acted upon.

LAKEVILLE, MASS.—N. G. Staples, First Selectman, Lakeville, informs us that no opposition was made to the granting of a franchise to the Taunton & Middleboro St. Ry. Co., at the public hearing on Dec. 17. The proposed route is from Taunton to Lakeville, six miles. Chas. H. Wilson, Pres., Exchange Bldg., Boston, Mass.

TEMPLETON, MASS.—It is reported that work will begin in the spring on the proposed Templeton & Gardner Electric St. Ry., in which P. Blodgett, of Templeton, and others are interested. The company has been incorporated for two years, but its charter has been extended to next March.

WAITSFIELD, MASS.—This town has voted to issue $19,000 in bonds to aid in the construction of the proposed Mad River Valley Electric Ry., from Montpelier to Warren, via Middlesex, Moretown and Waitsfield, a distance of about 26 miles. F. C. Kennedy, Pres., Burlington, Vt.; V. K. Nash, Ch. Engr., Woonsocket, R. I.

BRANFORD, CONN.—The Branford Electric Co., has organized the Branford Electric Ry. Co., with a capital stock of $200,000 to build a line to East Haven. A. M. Young, Pres.; A. E. Hammer, Secy.; A. O. Shepardson, Treas.

ELMIRA, N. Y.—H. M. Herbert, Ch. Engr., Bound Brook, N. J., informs us that the news item in our last issue referring to the construction of the Elmira & Seneca Lake Ry., was correct, except that no contract has yet been made for the ties, poles or labor. The American Engineering Co., Bound Brook, N. J., and 710 Harrison Bldg., Philadelphia, Pa., has the contract to build and equip the line, which will be 17 miles in length, and will be put in operation by May 15. The final location of the line is now being made, after which the dry masonry culverts will be built, piles driven, and the iron work ordered for bridges. Grading and track laying will not be commenced until the frost is out of the ground. The route is from Horseheads to Watkins, via Pine Valley, Millport and Montour Falls. Fourteen miles of the line is on private right of way, all of which has been secured. Gen. John E. Mulford, Pres., of Montour Falls, N. Y.; John Blair MacAfee, Pres. of American Engineering Co.

SCHUYLERVILLE, N. Y.—The company which proposes to build a line from Greenwich to Schuylerville, and in which J. A. Powers, Lansingburg, N. Y., is interested, has bought the water power at Middle Falls, on the Batten Kill.

MORRISTOWN, N. J.—J. E. Melick, of Morristown, informs us that definite facts regarding the proposed electric railway from Paterson to Trenton, N. J., can not be given until about April.

ROSELLE, N. J.—A public hearing will be given here Jan. 6, on the application of the Westfield & Elizabeth Electric Ry. Co., for a franchise to build through this place. Should the franchise be granted it will complete the company's right of way between Elizabeth and Plainfield.

LANCASTER, PA.—It is reported that the Inter-Urban Ry. Co., has decided to build a trolley line from 63d and Market Sts., Philadelphia, to Lancaster, via Willistown Inn, Westchester, Unionville and Quarrytown, with a branch between Oxford and Westchester. For the construction and equipment of the line an issue has been made of $1,000,000 of 5 per cent. 40-year gold bonds, being at the rate of $12,000 a mile. Among those interested are: W. T. Forsyth, Ch. Engr., of Avondale, Pa.; J. P. Thomas, Whitford, Pa.; Dr. G. N. Philips and Marshall S. Way.

MACUNGIE, PA.—An extension of the trolley line from Emaus to this borough, a distance of 3½ miles, is projected. Hugh E. Crilly, Allentown, Pa., is said to be the promoter.

POTTSTOWN, PA.—Joseph MacCarroll, Pres. of Fairmount Construction Co., 723 Walnut St., Philadelphia, Pa., informs us that his company has already received the contract for the construction of the proposed Montgomery & Chester Electric Ry. from Pottstown to Phoenixville, via Limerick Square, Royersford and Spring City, a distance of 16 miles. The rights of way between Spring City and Phoenixville have been obtained and the necessary capital for construction secured. The incorporation of this company was noted in our last issue. John S. Ridgway, Pres., Philadelphia.

BALTIMORE, MD.—J. G. White & Co., of Baltimore, and 29 Broadway, New York, have the contract for building an extension of one mile to connect the Baltimore, Middle River & Sparrow's Point Electric Ry. with the Fairmount Ave. line of the Central Ry.

NORFOLK, VA.—Reports state that the Norfolk & Atlantic Terminal Ry. Co. has asked permission of the city council to build a trolley line in the city. This road is proposed from Norfolk to a point on Chesapeake Bay, nearly opposite Old Point Comfort. D. Lowenburg, Pres., Norfolk.

CHATTANOOGA, TENN.—The Chattanooga Electric Ry. Co. is said to contemplate the extension of its Carter St. line to the factories west of Cameron Hill. J. H. Warren, Pres.

HAMILTON, O.—Press reports state that a company has been incorporated by J. C. Hooven, G. A. Rentschler, C. E. Hooven, George Helvey, Fred. Shaffer and Stanley Shaffer, of Hamilton, with a nominal capital of $25,000, to build from the terminus of the Cincinnati Consolidated line at Anderson's Ferry, seven miles below Cincinnati, to the towns of Lawrenceburg, Aurora and Rising Sun and the "Queen City," a distance of 38 miles. Rights of way and franchises have been secured from the Indiana line to Aurora, and the preliminaries necessary for a continuation to Rising Sun, will soon be completed.

MARION, IND.—Charley L. Harry, Supt. of Kokomo St. Ry. Co., has filed petitions with the commissioners of Tipton and Hamilton counties asking for the right of way for an electric railway extending from Tipton south through Atlanta, Arcadia and Cicero to this city. E. H. Shirk, Pres. of the Tipton National Bank, is also said to be interested in the proposed line.

NEW CASTLE, IND.—The commissioners of Henry county, Dec. 16, granted a franchise to the New Castle Electric Ry. Co., consisting of E. B. Phillips, R. Wisehart, Thad. Gordon, D. P. Jennings, Dr. J. F. Thompson and T. B. Millikan. The franchise requires work to begin before Oct., 1899, and one of its proposed lines to be finished within six months from that time.

FLINT, MICH.—The common council Dec. 21 granted W. E. Avery, of Detroit, and Dan. L. Davis, of Pontiac, Mich., a 30-year franchise to build an electric street railway system in Flint, to be operated in connection with a line to be built to Long Lake. Work is to begin March 1, and cars are to be running to the lake by June 15. The franchise provides for a guarantee bond of $5,000.

CHICAGO, ILL.—The People's St. Ry. Co., of Chicago, has been incorporated with a capital stock of $10,000, by Joseph W. Latimer, Robert R. Reynolds and J. Guy Latimer, according to reports.——It is announced that the Northwestern Elevated R. R. Co., of this city, has closed negotiations for $4,500,000 whereby it will be enabled to resume work on its proposed elevated system. The directors of the company will be C. Ledyard Blair, of New York; Edward L. Brewster, Clarence Buckingham, Bryan Lathrop and D. H. Louderback, of Chicago; W. W. Miller, of New York, and John C. Welling, of Chicago.

HARVEY, ILL.—It is announced that the Chicago Electric Traction Co., will extend its line from Blue Island to Harvey in the spring. J. S. Bache, Pres., 88th St. and Vincennes Road.

KENOSHA, WIS.—John C. Wegner, of Milwaukee, Wis., has made application for a street railway franchise in Kenosha in behalf of the Kenosha Traction Co.

IOLA, KAN.—Work has begun, according to reports, on the proposed line of the Iola Rapid Transit Co., in this city. This company was incorporated May 17, with a capital stock of $10,000, to build between Iola and Laharpe and Moran. Alfred W. Beck, Secy.

LEAVENWORTH, KAN.—Amos A. Fenn, of Leavenworth, and others, have been granted a franchise to build an electric line between this city and Kansas City, to cost about $400,000. A power house will be built near Wallula.

OMAHA, NEB.—An extension of the Omaha St. Ry. in the spring is said to be projected. D. H. Goodrich, Secy.

FENTON, MO.—Reports from St. Louis state that the McCoy Construction Co. will begin at once the construction of the proposed Fenton & Southwestern Ry., from Fenton to Carondelet, St. Louis, a distance of 28 miles. Thos. F. Sneed, Pres.

GALENA, MO.—A. H. Rogers, Pres. of Southwest Missouri Electric Ry. Co., is stated to have said that his company intends to build a power house at Galena, so as to be able to extend the line through to Empire City, Riceville and Spring Grove.

ST. LOUIS, MO.—The St. Louis County St. Ry. Co. has filed a petition with the county commissioners for leave to substitute electricity for the present mule motive power. M. B. Greenfelder, Pres., Central P. O., St. Louis county.

PINE BLUFF, ARK.—Jeff Hicks, Pres. of Pine Bluff Electric Light & St. Ry. Co., of Pine Bluff, informs us that contracts for the construction of the proposed seven miles of electric railway for this company will be let not later than Jan. 10. Bonds are now being placed. This company was incorporated Dec. 6, with a capital stock of $300,000.

ELECTRIC LIGHT AND POWER.

EVERETT, MASS.—The petition of Perry D. Blackden for permission to construct and maintain an electric lighting plant here will be referred to the next city government.

HARTFORD, CONN.—The Housatonic Power Co. will petition the general assembly for an amendment to its charter, giving it the right to build a dam across the Housatonic River, between Bridgewater and Brookfield, and the right to conduct electricity from New Haven county to points in Hartford county. The company intends to obtain power from the water fall created by the construction of one or more dams for the generation of electricity.

ALBANY, N. Y.—Plans for the establishment of an electric light plant at the penitentiary whereby all the county building in this city and possibly Watervliet and Cohoes will be lighted, have been presented to the board of county supervisors.

CANANDAIGUA, N. Y.—Reports state that the village trustees have refused the petition of M. D. Munger for the operation of an electric light plant. Mr. Munger will petition the new board when organized.

CLEVELAND, N. Y.—A fire here, Dec. 18, destroyed the electric light plant which furnished the light and power for the United Glass Co.; loss, about $2,000.

ILION, N. Y.—John V. Schmidt informs us that the question of municipal ownership of light and power plant is being agitated.

LOCKPORT, N. Y.—W. T. Ransom informs us that the plans for developing power at Lockport are not yet completed, and that it cannot be stated at present when work will be started.

NEW YORK, N. Y.—The following bids were received Dec. 17 by the bureau of yards and docks, Washington, D. C., for enlarging the wiring system at the navy yard: Blake & Williams, New York, $19,577; Chas. L. Eidlitz, New York, $16,529; Commercial Construction Co., New York, $16,108; J. F. Buchanan Co., Philadelphia, Pa., $15,555; T. M. Mowrey, New York, $21,000; New York Electric Equipment Co., New York, $16,870; Western Electric Co., New York, $18,360.——The following bids were also received, according to reports, for extending the electric light system at the navy yard (a, engines, dynamos, etc.; b, condensors, insulators, pumps, piping, etc.): Eddy Electric Mfg. Co., Windsor, Conn., a, $18,300; b, $6,366; a, Ball engines, $21,500. Ridgway Dynamo & Engine Co., Ridgway, Pa., a, $20,977; alternate, deduct $650. Burhorn & Granger, 136 Liberty St., New York, a, $19,191.62; b, $6,371, Sheppard engines. Triumph Electric Co., Cincinnati, O., a, $20,575. Francis Bros. & Jellett, Philadelphia, a, $22,700, $23,100, $23,700 and $24,200; b, $21,200. Northern Engineering Co., New York, a, $19,167; Ball engines, $21,972; Armington-Sims engines, a, $20,982; b, $5,278. Thresher Electric Co., Dayton, O., Buckeye engines, a, $18,401; Ball engine, a, $20,026; $26,766; Watertown, $16,486. Siemens & Halske Electric Co., Philadelphia, a, Ball, $21,237; Ball, $21,987; A. & S. engines, $19,962; do., one wheel, $20,362; Watertown, $18,612, type I dynamos; Ball, $20,762; do., $21,512, A. & S., $19,962, A. & S., $20,362; Watertown, $12,612. Type D internal armature dynamos. Bullock Electric Co., New York, a, Wells engine, $18,975, or Watertown engines, $21,150; Ball engines, $21,150. General IncandescentArc Light Co., New York, a, $19,000. General Electric Co., New York, a, $18,500; one extra engine, $1,500 more. Western Electric Co., New York, a, (a) $20,932, (b) $21,614, (c) $27,845; b, (a) $6,602, (b) $7,896; (a) Standard Ball; (b) Standard Ball, Western dynamos; (c) Ball & Wood engines; (d) Western dynamos.

NEW YORK, N. Y.—Reports state that the New York Gas, Electric Light, Heat & Power Co. has purchased land between 95th and 96th Sts., 1st Ave. and the East River, and also on Berrian's Island. The erection of a power plant on the latter and a distributing station on the former in order to furnish light and power for New York city is projected. W. C. Whitney and John D. Crimmins are interested.

CAMDEN, N. J.—Bids are asked until 7.30 o'clock, Dec. 29, for lighting the streets of this city with incandescent and arc lights for the terms of one, three and five years, beginning July 1, 1899. Chas. C. Southard, Chn.

SYRACUSE, N. Y.—Bids will be received until Dec. 30 for the wiring, etc., of the Washington Irving school building for electric lighting. P. D. Cooney, Clk.

SWEDESBORO, N. J.—H. W. Ridgway, Secy., informs us that nothing has been done towards the proposed electric light plant.

VINELAND, N. J.—The Citizens' Committee of this place will petition the property holders for $140,000 in bonds for electric light, water and sewerage improvements.

WILDWOOD, N. J.—L. R. Baker informs us that no steps have been taken towards securing an appropriation or awarding contracts for proposed electric light plant.

EASTON, PA.—The Easton Power Co., according to reports, will soon begin the erection of an electric light plant at this place. T. A. H. Hay, Easton, Pres.; L. I. Fletcher, Boston, Mass., Supt. of Construction.

BALTIMORE, MD.—Reports state that Thos. F. Hayward has purchased the charter of the Wenstrom Electric Light Co.

SALISBURY, S. C.—It is reported that the Yadkin Power Co. contemplates the erection of a plant.

SPARTANBURG, S. C.—J. L. Carson informs us that preliminary estimates for an electric light and power plant are being sought to see whether it would be a paying investment.

ATLANTA, GA.—George Hillyer informs us that the people voted in favor of municipal ownership of power plant last October, and that the problem will be considered by the new council taking office Jan. 1.

COLUMBUS, GA.—Bids will be received until Jan. 4 for 100 arc lights in old city and 15 in annex, 200 c. p. each. M. M. Moore, Clk. of Council.

TUSKEGEE, ALA.—The legislature has passed a bill authorizing the issuance of $30,000 water-works and electric light bonds.

TUSKEGEE, ALA.—Alber & Byrne, Engrs., Birmingham, Ala., have been engaged by this city to prepare plans and specifications for a plant in this city. Contracts will be let about Feb. 1.

LAKE PROVIDENCE, LA.—This city has voted in favor of the issuance of $7,500 of water and electric light bonds.

NEW ORLEANS, LA.—Alfred Raymond, Cy. Electrician, informs us that no plans have been made for an electric light plant for this city. Light will be supplied by the present contractor until the end of 1902.

RICHMOND, KY.—The Richmond Electrical Co. has been organized with a capital stock of $10,000 to erect a plant at this place. J. D. Hariss, Pres., Cincinnati, O.; F. H. Adair, Supt., Carlisle, Ky.

NEW PHILADELPHIA, O.—The injunction which restrained the work being done by Mr. Beyer has been dissolved.

NEW RICHMOND, O.—The following contracts were awarded for the construction of an electric light and water-works plant, the engine only being omitted: Rumsey & Co., Seneca Falls, N. Y., pump, $1,950; American Pipe & Foundry Co., Chattanooga, Tenn., pipes and special castings, $6,766; R. D. Wood & Co., Philadelphia, Pa., hydrants, 6-in., $22.50, 4-in., $19.80; Bourbon Copper & Brass Works, Cincinnati, O., valves, 10-in. at $18.50, 8-in. at $13, 6-in. $9, 4-in. $5.65,; Standard Boiler & Bridge Co., Bellaire, O., building (including smokestack), boilers, well and intake, reservior and pipe-laying, $11,268; Westinghouse Electrical & Mfg. Co., Pittsburg, Pa., electric light system complete, $5,000.

SIDNEY, O.—The council proposes to issue $15,000 in bonds for constructing a plant.

INDIANAPOLIS, IND.—A power house is being designed for John H. Murphy for supplying power and light to small manufacturing concerns in this city. The building will be five stories high, 90 × 250 ft., and will cost from $40,000 to $45,000.

MUNCIE, IND.—The electric light plant here was damaged by a natural gas explosion, Dec. 16, to the extent of about $5,000.

BELDING, MICH.—We are informed that bids will be received until Jan. 20 for street lighting. Fred. P. Smith, Cy. Clk.

DETROIT, MICH.—It is probable that an additional plant will be necessary for Belle Isle; estimated cost, $10,000. D. W. Simons, Comr.

GRAND RAPIDS, MICH.—The council has decided to spend $16,000 for the purchase of the electric light towers from the Grand Rapids Electric Light & Power Co.

MOUNT PLEASANT, MICH.—The following bids were received Dec. 20 by the Indian Office, for installing an electric light plant at the Mount Pleasant School: Arthur Frantzen & Co., Chicago, Ill., plant complete, $4,351; Fort Wayne Electric Corporation, Fort Wayne, Ind., plant complete, $3,500; W. C. Nagel & Co., Toledo, O., plant complete, $2,500; Fisher Electric Mfg. Co., Detroit, Mich., dynamo and switchboard, $790; Ridgway Dynamo & Engine Co., Ridgway, Pa., engine, generators and foundation, $2,221; Westinghouse, Church, Kerr & Co., New York, engine belting, etc., $1,410; Bullock Electric Mfg. Co., Cincinnati, O., generators, $735; switchboard, $115.

WAUKEGAN, ILL.—Reports state that the committee on electric lighting has engaged Foree Bain, of Chicago, to furnish estimates for an electric light plant. Com., Aldermen Rice, Garvin and Welch.

LITTLE FALLS, MINN.—F. E. Hall, Cy. Clk., informs us that nothing will be done towards the proposed water and electric light plant until some time in January.

MENAHGA, MINN.—Carl Eastwood informs us that bids for the electric light plant will probably be received Feb. 1; estimated cost, $4,000.

EAU CLAIRE, WIS.—Reports state that the Chippewa Valley Electric Ry. Co. contemplates the construction of a power plant and will bid for the contract for city lighting.

SIOUX CITY, IA.—The Iowa Building Co. has closed a contract for the purchase of a $4,000 electric light plant for the Iowa building, according to reports.

CENTRAL CITY, NEB.—Reports state that the construction of an electric light plant in this city is contemplated.

O'NEILL, NEB.—Reports state that the electric light plant will be started again. G. W. Johnson, Treas. Western Electric Association of Omaha, and A. Minnick, Falls City, Neb., are interested.

HASTINGS, NEB.—Reports state that the establishment of another electric light plant at this place is projected.

WICHITA, KAN.—The construction of the electric light plant will begin soon. L. B. Bradley, of the Western Engineering & Construction Co., Chicago, Ill., will superintend the work.

SEDALIA, MO.—W. H. Powell has petitioned the city for an electric light franchise.

PRAIRIE GROVE, ARK.—Reports state that this place will soon build water-works and an electric light plant.

HOUSTON, TEX.—The Citizen's electric light plant will be constructed by the General Electric Co. Gus. Warnecke has contracted with the Electric Company for supplying the new plant with a 6-in. artesian well.

REDLANDS, CAL.—F. G. Ferand, Secy., informs us that the Redlands Electric Light & Power Co. desires bids for 13 tunnels, ten miles of pipe line 22 to 28-in., four generators, and four water-motors, power house, two excitors, switchboard, transformers, and 80 miles of transmission line. Cost of plant is estimated at $250,000. F. C. Finkle, Engr., San Bernardino, Cal.; H. H. Sinclair, Gen. Mgr.

PRESCOTT, ONT.—The citizens of this place will vote for $15,000 electric light bonds on Jan. 2.

WINNIPEG, MAN.—F. A. Cambridge, Cy. Electrician, informs us that the issuance of bonds for the proposed electric light plant has been dropped for the present; estimated cost, $50,000.

NEW COMPANIES.—Milo Electric Light & Power Co., Milo, Me.; $10,000, commencing with $150; to supply electricity for lighting, heating and manufacturing purposes; Julian d'Este, Pres., Boston, Mass.; Frank E. Guernsey, Clk., Dover, Me.

Donley Electric Light Co., Lansing, Mich.; $40,000.

Perry Electric Co., Peoria, Ill.; $2,500; Nathaniel V. Perry, Ralph E. Seymour and Dwight R. Chapman.

Britton Power & Electric Light Co., Britton, S. Dak.; $3,500; to operate artesian well, water-works system and an electric light plant at this place; Charles Hamilton, Henry L. Stokes, Eugene A. Cooper, George Thiel and Joseph Barber.

Artesian Water, Ice, Light & Fuel Co., Arkansas City, Ark.; $25,000; J. E. Lacy, Pres.; H. F. Bailey, Vice-Pres.; H. Thane, Secy. and Treas.

Elizabeth Lake Water & Power Co., Los Angeles, Cal.; $500,000, commencing with $250,000; S. R. Thorpe, W. H. McCoy, C. E. Hayne, P. J. Kennedy and C. C. Wright, all of Los Angeles.

Cuban Electric Co., Asbury Park, N. J.; $1,000,000; to manufacture electricity for light, heat and power; Wm. R. S. Melvin, East Orange, N. J.; G. K. B. Wade, 1 East 42d St.; Herbert A. Howell, 350 West 22d St.; Henry K. Davis, 534 East 104th St., New York; Francis A. Fuller, 455 Halsey St., Brooklyn, N. Y.

BRIDGES.

BOSTON, MASS.—Wm. J. Marvin, Bridge Comr., Cambridge, has recommended in his annual report the construction of two new bridges over the Charles River, to replace the Craigil and North Harvard St. bridges.

BRIDGEPORT, CONN.—The board of aldermen voted Dec. 19 to ask the state legislature for power to issue $60,000 in bonds for the proposed new draw bridge over Yellow Mill Pond.

BATAVIA, N. Y.—The town board is considering a proposition to construct a bridge over the New York Central & Hudson River R. R. and the Erie R. R., at Jackson St. Justice Leavenworth, Com.

RENSSELAER, N. Y.—Robert H. Strong submitted the lowest bid, Dec. 20, at $4,982, for extending Washington St., and constructing a bridge over Mill Creek. C. A. Ryan, Cy. Clk.

TROY, N. Y.—The Albany Ry. Co. will construct a new bridge over the canal, according to reports.

TUPPER LAKE, N. Y.—W. E. La Fountain, Supervisor, Tupper Lake, writes us that he awarded a contract, Dec. 22, to the Groton Bridge Co., Groton, N. Y., for the construction of a steel bridge 160 ft. long, roadway 16 ft., capacity 100 lbs. per sq. ft., on four cylinder piers, 4 × 24 ft.

PHILADELPHIA, PA.—Bids were received Dec. 13 for a bridge at Sheaf Lane, from S. Gourley, Jr., 21st St. and Ridge Ave., Philadelphia (accepted), at $6,392, and Delaplaine & West, Fidelity Bldg., Philadelphia, at $4,957. Thos. M. Thompson, Dir. Dept. Pub. Wks.

CARROLLTON, KY.—The fiscal court has appropriated $20,000 for the construction of a bridge over the Kentucky River.

LORAIN, O.—We are informed that the following bids were received Dec. 22 for constructing the superstructure of a lift bridge over the Black River at Erie Ave., as advertised in Engineering News. Geo. H. Lewis, County Audr., Elyria, O.:

*King Bridge Co., Cleveland, O.	$145,000
Variety Iron Works, Cleveland, O.	150,000
Youngstown Bridge Co., Youngstown, O.	154,000
Groton Bridge Co., Groton, N .Y.	148,800
**C. L. Strobel, Chicago, Ill.	144,100
Wrought Iron Bridge Co., Canton, O.	148,000
Mt. Vernon Bridge Co., Mt. Vernon, O.	150,000
Toledo Bridge Co., Toledo, O.	150,000
J. Wagner Co., Milwaukee, Wis.,	147,000
Edge Moor Bridge Works, Wilmington, Del.	149,000
Horsehead Bridge Co., Horsehead, N. Y.	160,000
Massillon Bridge Co., Massillon, O.	150,000
Champion Bridge Co., Wilmington, O.	155,000

---

*Plan B, $145,200; C. $140,000.

**Plan B, $146,050; C, $144,150.

NORWALK, O.—The council proposes to construct a new steel viaduct at Linwood Ave., to cost about $15,000.

CHICAGO, ILL.—Bids are asked by the board of trustees of the sanitary district until Feb. 20 for furnishing the material and constructing the substructure and superstructure of a two-track Scherzer rolling lift bridge over the Chicago River, near Taylor St., as described in our advertising columns. Wm. Boldenweck, Pres.; Joseph F. Haas, Clk.

FOOSLAND, ILL.—Walter Ritchie, Comr. Highways, Foosland, informs us that a contract has been awarded to the Massillon Bridge Co., Massillon, O., for a bridge south of Bellflower Road.

MINNEAPOLIS, MINN.—The contract for furnishing the steel and iron work f. o. b. cars for the widening of the stone arch bridge over the East Channel of the Mississippi River was awarded by the council, Dec. 21, to the Toledo Bridge Co., Toledo, O., at $10,990. F. W. Cappelen, Cy. Engr.

NEWTON, IA.—Bids are asked until Jan. 2 for bridge work for the year 1899, according to reports. Frank Fisk, County Audr.

COLUMBUS, NEB.—Bids are asked until Dec. 31 for constructing a bridge across Shell Creek, according to reports. G. W. Phillips, County Clk.

GENEVA, NEB.—Bids are asked until Dec. 31 for constructing bridges for the year 1899, according to reports. A. M. Strickland, County Clk.

TRENT, S. DAK.—Bids are asked until Jan. 4 for replacing the Trent bridge, according to reports. H. W. B. Souther, County, Audr., Flandreau, S. Dak.

LEXINGTON, MO.—A bill has been presented to congress for the construction of the proposed bridge over the Missouri River, to cost about $50,000. Frank Bowman, Secy. Com., Lexington.

SEATTLE, WASH.—Reports state that the Great Northern Ry. Line proposes to replace all the wooden bridges with steel structures and fill in trestles west of Minot St., aggregating about 172,560 lin. ft., in the spring. N. D. Miller, Ch. Engr., St. Paul, Minn.

MULBERRY, CAL.—R. T. Stone, County Surveyor, Hollister, writes us that it is proposed to construct a combination bridge of one span, 100 × 18 ft., capacity, 1,400 lbs. per lin. ft., on two cylinder piers 40 ft. in diameter and 22 ft. high, filled with Portland cement 1 to 5 parts; estimated cost, $1,800. There is no other work projected at present.

LEWISTON, IDAHO.—W. E. Moore, Engr., Lewiston Water Power Co., informs us that the Pittsburg Bridge Co., Pittsburg, Pa., has the contract for the sub and superstructure of a cantilever Pratt truss bridge with viaduct approaches. Work was commenced Dec. 15 on the concrete piers. Des. Engr., J. R. Worcester, Boston, Mass.

ELORA, ONT.—The Wellington county court has adopted a resolution to construct a steel bridge at this place, to cost $3,100, according to reports.

SUMMERHILL, ONT.—Reports state that the county commissioner at Seaforth, Ont., recommends the construction of a bridge 100 ft. long on concrete abutments, next spring.

BUILDINGS.

BARRE, MASS.—Competitive plans are being prepared by six architects of Boston and Worcester for a new high school building in this town, to cost $30,000.

BOSTON, MASS.—The contract for erecting the new Quincy St. school building is reported to have been let to James Fagen, at $81,670.

BROCKTON, MASS.—Bids are asked until Dec. 29 for heating and ventilating the Copeland school building (four rooms). A. E. Woodward, Supt. of Pub. Property.

PAWTUCKET, R. I.—The council has appropriated $52,000 for the erection and furnishing of two new school buildings, one to cost $32,000 and the other $20,000.

BROOKLYN, N. Y.—Newman & Co., 355 Allen St., Brooklyn, were the lowest bidders, Dec. 22, for repairs and alterations to the Municipal Building in this city, at $31,750. Other bidders were: Leonard Bros., 963 Bergen St.; Charles Hart, 4th Ave. and Degraw St., Brooklyn; Kelly & Kelley, 220 Broadway, New York.——M. Gibbons & Son, Brooklyn, are said to have been the lowest bidders, Dec. 23, for the erection of a storehouse at the Navy Yard, at $62,975.

NEWARK, N. Y.—The Sherman House in this village was destroyed by fire Dec. 27, causing a reported loss of about $25,000. Stephen F. Sherman, Mgr.

NEW YORK, N. Y.—It is announced that Jacob H. Schiff will erect a new building at 92d St. and Lexington Ave., which he will present to the Young Men's Hebrew Association; estimated total cost, $150,000.——Plans have been filed by Roberts & Haines, 703 East 135th St., for four 5-story brick flat buildings on 136th St., east of Willis Ave., to cost $88,000. Harry T. Howell, Arch., 748 East 138th St.; by Arthur Moore, 232 West 112th St., for three 5-story brick tenement buildings on 108th St., near Columbus Ave., to cost $54,000. C. A. Millner, Arch., 81 East 125th St.; by A. L. Norrie, 17 East 41st St., for a 2-story brick stable at 14 and 16 East 86th St., to cost $85,000. Renwick, Aspinwall & Owen, Archs.; by L. F. J. Weiher, Jr., Owner and Arch., 125th St. and Park Ave., for a 6-story brick flat and store building at 3d Ave. and 81st St., to cost $100,000; by C. F. Rodgers, 1663 Amsterdam Ave., for a 6-story and two 7-story brick flat and store buildings at 142d St. and Hamilton Place, to cost $240,000. Neville & Bagge, Archs., 217 West 125th St.; by Charles Naarden, 138 East 104th St., for four 6-story brick flat and store buildings at 621 to 629 East 9th St., to cost, $100,000. Schneider & Herter, Archs., 46 Bible House; by Leopold Kaufman, 35 Nassau St., for two 6-story brick flat and store buildings at 633 to 637 East 11th St., to cost $50,000. Schneider & Herter, Archs.; by Goodman & Silverson, 233 East 50th St., for five 6-story brick flat and store buildings at 408 to 418 Cherry St., to cost, $110,000. M. Bernstein, Arch., 145 Centre St.; by Mary C. Dempsey, Astoria (L. I.), N. Y., for a 7-story brick flat building at Central Park West and 98th St., to cost $90,000. Neville & Bagge, Archs.——Plans have been prepared for the reconstruction of the burned portion of the Home Life Bldg., 265 and 267 Broadway, and the mason work will be done by John Downey. N. Le Brun & Sons, Archs.—The following bids were received Dec. 20 for installing a steam heating apparatus in the Zbrowski Mansion, Claremont Park: Wm. W. Tobin, 532 Columbus Ave., (accepted), $1,140; Phillips, Doup & Co., Brooklyn, N. Y., $1,164; E. Rutzler, 176 Centre St., $1,222; Wells & Newton Co., 235 Eldridge St., $1,238; Frank Dobson, 576 West 142d St., $1,374; Jas. D. Duffy, 344½ East 16th St., $1,386; Jas. Curran Mfg. Co., 512 West 36th St., $1,421; F. A. Williams, 362 West Broadway, $1,464.

NEW YORK, N. Y.—We are informed that the following bids were received Dec. 23 by the engineer of the 3d Light House District, Tompkinsville (S. I.), N. Y., for the erection of West Bank light house, lower bay, New York Harbor; advertised in Engineering News:

	1st Site.	2d Site.
R. G. Packard, 130 Pearl St., New York	$43,950	$47,775
Philadelphia Construction Co., Phila., Pa.	31,400	35,400
Engineering Contract Co., New York	32,800	36,700
W. H. Flaherty, 7 South St., New York	34,500	37,000
Jas. Symington, 16 Exchange Pl., N. Y.	35,000	40,000

——The following bids were also received for metal work for West Bank light house:

	1st Site.	2d Site.
Emil Severin, Aurora, Ind.	$18,287	$22,677
Snead, Van Alstine, Meldrum Co.[1]	15,430	17,150
Chamblin & Scott, Richmond, Va.	16,993	18,954
Russel Wheel & Foundry Co., Detroit, Mich.	15,645	16,595
Atlanta Machine Works, Atlanta, Ga.	12,445	13,930
Builders' Iron Foundry, Providence, R. I.	14,800	16,300
Jno. P. McGuire, Cleveland, O.	11,700	13,100

---

[1] Louisville, Ky.

WHITEHALL, N. Y.—The following bids were received by the adjutant-general of this state Dec. 23 for erecting and furnishing a new armory building in this city: John J. Turner, Amsterdam, N. Y., $36,493; Henry E. Wieber, Rondout, N. Y., $45,800; A. Pasquini, Albany, N. Y., $41,512; Peter Keeler, Albany, N. Y., $39,440; Pat McCann, Albany, $38,400; O'Brien & Hoolihan, Syracuse, N. Y., $39,780; William P. Buckley, Oxford, N. Y., $36,854; P. J. McCaffery, Utica, N. Y., $42,000; H. Probst, New York, $47,600; R. Richards & Son, Utica, N. Y., $39,070.50; Andrew Douglass, Rome, N. Y., $32,368.47; J. W. Whalen, Whitehall, $39,000; J. & L. McCarthy, $40,779; Reardon & Burnham, Glens Falls, N. Y., $38,100; For electric wiring the following offered bids: Blake & Williams, $1,683; Gaylord & Eitapence, $1,290; Com. Car Co., $2,155; Seymour Taylor, $1,250. The contracts were to be awarded on Dec. 28, at a meeting of the armory board.

PATERSON, N. J.—A fire in the city last week destroyed Continental Hall; estimated loss, $60,000.

TOM'S RIVER, N. J.—The following bids were received Dec. 21 for the construction of a life-saving station on Berkeley Beach, near the present station at Tom's River:

Bernard Johnson, West Hoboken, N. J., April 15	$8,966
L. J. Stone, Haddonfield, N. J., June 1	7,100
Henry A. Tolbert, Barnegat, N. J., Sept. 1	6,650
N. H. Glover Co., Rockland, Me., June 1	6,700
Wm. L. Butler, Beach Haven, N. J., May 1	6,499
Chas. W. Kafer, Trenton, N. J., May 1	7,468

McKEESPORT, PA.—McCallum & Ely, Washington, Pa., have been selected as the architects for the new 3-story brick, stone and terra cotta high school building to be erected on Shaw Ave., McKeesport, at a cost of about $80,000.

PHILADELPHIA, PA.—Bids are being received by J. E. & A. L. Pennock, contractors, according to reports, for the erection of an 11-story flat building for the Clarendon Flats Co., at 23d and Walnut Sts. Jas. D. Allen, Arch., 1017 Chestnut St.

POTTSVILLE, PA.—Bids are asked by the supervising architect, Washington, D. C., until Jan. 19, for the low pressure, return circulation, steam heating and ventilating apparatus for the U. S. post-office building at Pottsville.

WILKESBARRE, PA.—Bids are asked until 12 o'clock noon, Dec. 30, for alterations to the City Building. B. H. Carpenter, Chn. of Pub. Property Com.; A. H. Kipp, Arch., Wilkesbarre.

WASHINGTON, D. C.—Bids are asked until Jan. 21, according to reports, for erecting a new building for the "Evening Star" Newspaper Co. Marsh & Peters, Archs., 1503 Pennsylvania Ave.

ATLANTA, GA.—We are informed that the following bids were received Dec. 21 for the erection of a new court house for this county: The Butler-Ryan Co., St. Paul, Minn., granite, $144,080; oolite limestone, $143,420; marble, $146,920; sandstone, $144,350. F. P. Heifner, Atlanta, granite, $136,561; marble, $139,111; oolitic, $135,611; sandstone, $134,461. Lewis B. Beman, Cincinnati, O., granite, $145,835; marble, $148,672; limestone, $144,789. William Bensel & Co., Atlanta, marble, $137,000; granite, $135,400; oolitic, $133,600. Gude & Walker, Atlanta, granite, $131,010; oolitic limestone, $130,040; marble, $133,560; sandstone, $129,900. Chapman & Son, Atlanta, granite, $149,278; oolitic, $148,233; marble, $152,083; sandstone, $149,267. As the appropriation was but $100,000, all of the bids were rejected.

DOUGLASS, GA.—Bids are asked by the commissioners of Coffee county, until Feb. 25, for the erection of a new court house; surety, certified check for $500. Andrew J. Bryan & Co., Archs., 444 Equitable Blydg., Atlanta, Ga.

LEITCHFIELD, KY.—A fire in this city Dec. 27 caused a reported loss of about $80,000; partly insured.

AKRON, O.—Bids are asked by the supervising architect, Washington, D. C., until Jan. 19, for the low pressure, return circular steam heating and ventilating apparatus and pipe covering for the U. S. postoffice building.

WAPAKONETA, O.—Bids are asked until Jan. 4 for erecting a new school building for St. Joseph's Church. Leech & Leech, Archs., Lima, O.

DANVILLE, ILL.—Bids are asked by the National Home for Disabled Volunteer Soldiers, until Dec. 30, for the laundry machinery, engine, etc., for the laundry building at the Danville branch. W. B. Franklin, Pres. Bd. of Mgrs.; W. C. Gunnell, Engr., Danville.

DANVILLE, ILL.—It is reported that the L. J. Mueller Furnace Co., of Milwaukee, has been awarded the contract for supplying the heating apparatus in the Danville Soldiers' Home. The contract is one for material worth $35,000.

JOLIET, ILL.—The Auditorium Block, valued at $80,000, was damaged by fire, Dec. 27.

DES MOINES, IA.—Frost & Granger, Archs., 806-184 La Salle St., Chicago, Ill., inform us that bids will be let in March for the proposed passenger station to be erected in this city at a cost of about $75,000. The main station will be 280 × 40 ft., of stone and pressed brick and tile roof, with a shed 600 ft. in length. Low pressure boilers and electric lights will be installed.

MALDEN, MO.—A fire at Malden, Dec. 20, damaged the Eexton Merchandise Co.'s block and other buildings; reported loss, $70,000.

PHOENIX, ARIZ.—Bids are asked by the Office of Indian Affairs, Jan. 25, for the construction of one brick dormitory and of one water and sewer system at the U. S. Indian school. S. M. McCowan, Supt., Phoenix.

WATER-WORKS.

LIVERMORE FALLS, ME.—The Livermore Falls Water Co. has been incorporated with $100,000 capital; $1,200 paid in. D. J. Bogan, Pres.; J. H. Maxwell, Treas.

WATERVILLE, ME.—A mass meeting was held, Dec. 15, to take steps towards obtaining a new water supply, and a committee was appointed to confer with the cities of Winslow, Fairfield and Benton, with a view to presenting a bill to the legislature for the municipal ownership of the water system now in operation in these places. The Maine Water Co. owns the present system.

BOSTON, MASS.—Bids have been asked until Dec. 29 from the contractors of this city for constructing the new pumping station to be built at Spot Pond, in Stoneham. Shepley, Rutan & Coolidge, Archs.

CLAYTON, N. Y.—Sidney S. Snell, Lowville, N. Y., writes us that the specifications for the water-works and sewerage system for this town will be completed in about two weeks. There will be about five miles of mains and an equal amount of sewers.

EASTHAMPTON, N. Y.—The Home Water Co. has been incorporated with $25,000 capital, to build a plant in this village. A. M. Parsons, A. G. Terbell and J. Hunting are the incorporators.

LESTERSHIRE, N. Y.—Bids have been received for the machinery required for the new works to be built in this village. The contract involves the following: Two triplex pumps with a capacity of 350 gallons a minute; one triplex pump with a capacity of 60 gallons a minute; two gasoline engines of about 40 HP. each, and one gasoline engine of about 8 HP. Two 12-in. wells will be sunk. W. G. Faatz, Chn.; C. A. Cockroft, Engr.

MASSENA, N. Y.—A company is being organized in this place to build works, according to reports. H. B. Chase, Atty.

WHITESBORO, N. Y.—It is reported that the taxpayers voted, Dec. 19, to build works.

JERSEY CITY, N. J.—The board of finance has approved the contract to build a plant in this city, recently awarded to Patrick H. Flynn, of Brooklyn, N. Y., as noted in our issue of Dec. 15.

RIDGEWOOD, N. J.—A committee has been appointed to secure propositions for the building of works, according to report. Trustees Crouter, Stavens and Edwards have been instructed to consider them and report on Feb. 15.

VAILSBURG, N. J.—Bids are asked by the council until Jan. 11 for furnishing the material and constructing a system of water-works, including about 31,680 lin. ft. of 8, 6 and 4-in. iron pipe, 14,000 lbs. of special castings, 45 valves and valve boxes, and 43 hydrants, as stated in our advertising columns. Eugene A. McMurray, Borough Engr., 22 Clinton St., Newark, N. J.

PHILADELPHIA, PA.—Plans for the new 84,000,000-gallon Belmont reservoir, at George's Hill, have been approved of by the committee. Reports state that bids will be called for at once. Thos. M. Thompson, Dir. Pub. Wks.

PITTSBURG, PA.—Bids are asked by the bureau of water supply and distribution until Dec. 30, for laying a 48-in. riveted steel force main to the reservoir in Highland Park. Edw. M. Bigelow, Dir. Pub. Wks.

ROBESONIA, PA.—The Robesonia Water Co. has been incorporated with a capital stock of $10,000, with $1,000 paid in, to build works in this town. H. F. Fidler, of Womelsdorf, Pa., Treas. The other incorporators are Geo. H. Valentine and Wm. D. Filbert, of Womelsdorf; Saml. P. Keppel, Sinking Spring, Pa.; W. W. Light, Reading, Pa.

WASHINGTON, D. C.—It is reported that plans have been completed for a new 15,000,000-gallon reservoir, for which bids will soon be asked. W. A. MacFarland, Supt. of Water Dept.

TUXEDO, MD.—Press reports state that plans and specifications have been prepared by the Tuxedo & Embla Park Water & Light Co. for a system of water-works to be built in this place and Embla Park, and that bids will soon be asked for the construction of the same, involving a 300,000-gallon steel tower, a pump house and about two miles of 4-in., 6-in. and 8-in. cast-iron pipe. Kennedy & Beck have the contract for the 8-in. artesian wells, two of which have been sunk. D. G. Addsberger, Engr.

ROME, GA.—It is reported that this city has decided to install a filtration system.

TUSKEGEE, ALA.—We are informed that Alber & Byrne, Engrs., Birmingham, Ala., have been engaged by the city to prepare plans and specifications, and to superintend the construction of the proposed water-works and electric light plant. The city will be prepared to let the contracts about Feb. 1.

NEW ORLEANS, LA.—A. Brittin, Pres. of Council, writes us that an ordinance has just been adopted for a special tax of 2½ mills to purchase the existing water-works, owned by a private company, and to extend the same, and for building sewers. The ordinance will be voted upon on Feb. 2.

CLEVELAND, TENN.—Reports state that Judge Clark has decided in favor of the city, in a suit against the National Water-Works Construction Co., on the ground that the charter of the company is void. The company has been doing business in Cleveland under the name of the Cleveland Water & Electric Light Co. R. J. Cunningham, Recr.

KNOXVILLE, TENN.—Press reports state that the council has refused to pass an ordinance allowing the Knoxville Water Co. and the Lonsdale-Beaumont Water Co. to consolidate, as the city will soon make an effort to purchase both plants. W. A. Gage, Cy. Engr.

WELLSVILLE, N. Y.—John A. George, East Liverpool, writes us that bids will be asked in about 30 days for furnishing and laying about 1¾ miles of 12-in. water pipe.

GOSHEN, IND.—Bids have been asked for three miles of water mains for an extension across the Elkhart River, at an estimated cost of $10,000, according to press reports.

ROCKPORT, IND.—It is stated that citizens of this town are in correspondence with the state board of health with regard to building works.

HARTFORD, MICH.—It is reported that this town would vote, Dec. 27, on the question of issuing $12,000 in bonds for the erection of works.

MINNEAPOLIS, MINN.—It is reported that the Minnesota Sugar Co., St. Louis Park, has awarded a contract to S. Stenson to sink an artesian well on its property, at a cost of $6,000, with a guarantee of a supply of 1,000,000 gallons a day.

COLFAX, IA.—The council has just bought a pump for $460 from the Gardner Governor Co., Quincy, Ill., having a capacity of 500,000 gallons in 24 hours; it will be installed at once.

GIRARD, KAN.—J. B. Gratham, Cy. Clk., writes us that the council has advertised for bids for a reservoir 80 ft. in diameter and 12 ft. deep to be built of brick and cement. W. S. Hitch, Chn. Water-Wks. Com.

WAMEGO, KAN.—Bids are asked until Jan. 24 for the purchase of $25,000 of water-works bonds. F. S. Haacke, Cy. Clk., write us that the contract for constructing works has been awarded to W. W. Cook, Junction City, Kan., at $22,473. B. F. Evans, Newton, Kan., $22,500.

BOZEMAN, MONT.—Bids are asked until Jan. 17 for the purchase of $165,000 of water-works bonds; check, $2,500. Geo. D. Pease, Cy. Clk.

NEVADA, MO.—J. B. Quigley is reported to have bought the works at this place.

ARKANSAS CITY, ARK.—The Artesian Water, Ice, Light & Fuel Co. has been incorporated with $25,000 capital, to build works in this place. J. E. Lacy, Pres.; H. F. Bailey, Vice-Pres.; H. Thane, Secy. and Treas.

ABILENE, TEX.—N. Werenskiold, Engr., P. O. Box 511, Dallas, Tex., writes us that the work which the Lytie Water Co. proposes doing, as noted last issue, consists of raising the masonry spillway and dam 18 inches, and in building a flood levee to prevent high water from spreading over the land near the dam. The work will be done by day labor. Fred. Cockrell, Pres.; J. Lowdon, Secy. and Treas.

CORSICANA, TEX.—J. S. Thatcher, Dallas, Tex., has just completed a survey for the Corsicana Water Co. of the land on which it proposes to build a large reservoir. A pumping station will also be built.

WACO, TEX.—The city is reported to have secured several acres in East Waco for the establishment of a new system of artesian wells and a large reservoir.

LAKEPORT, CAL.—A special election was held Dec. 20 to vote on bonding the town for $15,400 for the construction of works.

BILLINGS BRIDGE, ONT.—The proposition to build works in this village was defeated, Dec. 15, according to reports.

GANANOQUE, ONT.—The town council is reported to be preparing plans and specifications for the construction of water-works and a sewerage system.

UXBRIDGE, ONT.—Wm. Hoster, Mayor, writes us that the resolution to build works passed the public meeting but nothing more will be done until after the elections are over.

CASCADE CITY, B. C.—The Cascade Water Power & Light Co. has begun the construction of a water supply and electric light plant, according to report. Engr. Anderson may be addressed.

NIAGARA, B. C.—It is reported that S. K. Crocker has secured a franchise to build a water supply system at this place. A dam across Fisherman Creek, 1,500 ft. above the village, will be built, and 5,000 ft. of pipe will be laid.

IRRIGATION.

BEAUMONT, TEX.—The Beaumont Irrigation Co. awarded a contract to the Connorsville Blower Co., Connorsville, Ind., Dec. 15, for installing a pumping plant with a capacity of about 60,000 gals. per minute, to cost about $40,000. J. T. Wilkins, Engr., Connorsville.

PERRIS, CAL.—Reports state that C. J. Ritchie, Los Angeles, Cal., will sink a well and put in a pumping plant at once, to irrigate about 160 acres.

SALT LAKE CITY, UTAH.—R. S. Carberry and F. S. Dettrich, of the Marysville Power & Canal Co., Idaho Falls, Idaho, have applied to the state land board for permission to reclaim about 20,000 acres.

PHOENIX, ARIZ.—A meeting was held by the canal companies in the city hall, Dec. 12, to consider the question of constructing a storage reservoir for the Salt River valley. The building of a reservoir by private capital was considered the most feasible plan. No definite action was taken. Aaron Goldberg of the Territorial Council, may be addressed.——N. W. Haggart and J. H. Ivy have filed a claim for 5,000 ins. of water in Salt River. A canal will be constructed about 8 miles long.

GUERRERO, MEX.—The state government has been asked to give its aid for the sinking of a number of artesian wells in the waterless regions of the state, which, experts say, can be sunk without great expense or difficulty, and would provide ample water for irrigation.

NEW COMPANIES.—Yokohl Water Co., Exeter, Cal.; $24,000; to do an irrigation business; B.T. Teagan, A. D. Moore, Harvey Ferris, James Kirk, E. H. Miles, Exeter.

Silver Lake Irrigation Co., Silver Lake, Ore.; $100,000; to carry on an irrigation business; James M. Small, Gilbert B. Wardwell, James M. Martin, Francis M. Chrisman.

SEWERAGE.

HARTFORD, CONN—A petition is being circulated requesting the selectmen and sewer commissioners to construct sewers in the section known as Charter Oak, according to report. Neil Stalker, New Park Ave., is interested.

NEW BRITAIN, CONN.—Saml. M. Gray, Providence, R. I., has been engaged to furnish plans and specifications for sewerage disposal systems with a view to introducing a system in this city.

ONEIDA, N. Y.—Geo. S. Miller was awarded the contract Dec. 19 to construct a sewer, at $587, according to report.

KINGSTON, PA.—Bids are asked until Jan. 2 for the construction of 9,462 ft. of sewers. P. B. Reynolds, Pres.; Wm. P. Somers, Secy.; Thos. Wright, Borough Engr., Luzerne, Pa.

SCRANTON, PA.—Bids are asked until Jan. 5 for constructing a sewer on Von Storch Ave. and Honesdale St. M. T. Lavelle, Cy. Clk.

STEELTON, PA.—John D. Young, Secy. of council, writes us that the borough has voted to build a sewer system during next summer from plans prepared some years ago by the late Geo. E. Waring. Bids will be asked within a short time.

SALISBURY, N. C.—Dowd & King are reported to have a contract for a private sewerage system in this place.

BIRMINGHAM, ALA.—The aldermen have decided to construct a sanitary sewer to cost about $250. F. V. Evans, Mayor; A. J. Camp, Cy. Clk.

GREENSBORO, ALA.—It is reported that the city will construct about two miles of sewers within the next three months. E. B. Randolph, Mayor.

JACKSON, MISS.—The board of aldermen has ordered an election Feb. 1 on the proposition of issuing $100,000 in bonds for a sewerage system. W. G. Kirkpatrick, Cy. Engr.; D. P. Porter, Jr., Cy. Clk.

DAYTON, O.—Bids will be asked for the construction of a sanitary sewer on Simpson St., from Howard St. to Madriver St., according to report. City Engineer Turner.

EAST LIVERPOOL, O.—John A. George, Cy. Engr., writes us that specifications for about seven miles of 8-in., 10-in. and 12-in. pipe sewers, to cost about $30,000, will be ready in about two weeks. Proposals for pipe will be called for in about a month and for construction in the spring.

ZANESVILLE, .—The city council has voted to construct brick and tile sewers on five streets and alleys. J. F. Brown, Pres.; C. N. Bainter, Cy. Clk.

TOLEDO, O.—Plans and specifications have been prepared for the construction of sewers in several streets and alleys. Lem. P. Haris, Cy. Clk.

WELLSVILLE, O.—John A. George, East Liverpool, O., writes us that this place is considering the advisability of building a sewerage system.

YOUNGSTOWN, O.—M. Rochford & Sons, are reported to have received the contract for the construction of a sewer in Hayes Ave., noted in our issue of Dec. 15. H. W. Calvin, Clk.

LEBANON, IND.—J. H. Busby, Mayor, writes us that the council is contemplating some improvements in the spring, but has made no definite plans as yet.

NEENAH, WIS.—The board of public works has prepared plans for a sewerage system, with an outlet into Little Lake Butte des Morts, and will hear objections from property owners Jan. 21. W. L. Davis and Ole O. Myhre may be addressed.

NEWTON, KAN.—H. H. Hendershot, Designing and Constructing Engr., Wichita, writes us that the outfall was finished Dec. 6, and work on 1½ miles of 6-in. lateral pipe sewers, to cost about $3,800, has been suspended until spring.

McKINNEY, TEX.—Kelly & Steele, Gainesville, have the contract to build a sewerage system in this city of about seven or eight miles in length.

OKMULGEE, IND. TER.—H. H. Hendershot, Engr., Wichita, Kan., writes us that this city contemplates the construction of a system of sewers.

DENVER, COLO.—The board of aldermen has passed the Capitol Hill storm sewer bill, noted in our last issue.

GANANOQUE, ONT.—The town council is preparing plans and estimates for the construction of a sewerage system, according to report.

OSHAWA, ONT.—Bids are asked until Jan. 4, 1899, for the construction of a complete system of sewers and water-works in this town, at an estimated cost of about $110,000. C. French, Chn. Fire and Water-Works Com.

PEMBROKE, ONT.—The town council has passed a bylaw to raise $12,000 to construct main sewers, according to report. A public election to vote on the question will be held Jan. 2.

WINNIPEG, MAN.—W. F. Lee is reported to have received the contract to furnish $909 worth of sewer pipe.

MEXICO, MEX.—Vezin & Letellier are reported to have received the contract to construct sewers in this city.

GARBAGE DISPOSAL—STREET CLEANING

WOONSOCKET, R. I.—The people of this city are discussing the question of garbage disposal.

BINGHAMTON, N. Y.—The board of health is preparing a resolution to be presented to the council, calling attention to the need of a crematory at this place.

HUDSON, N. Y.—Bids are asked until Dec. 29 for removing garbage, etc., for three years. Wm. S. Hallenbeck, Secy.

NEW YORK, N. Y.—Bids are asked until Jan. 13 by the department of street cleaning, at 346 Broadway, for loading and trimming deck scows and dumpers, and unloading the pocket dumps in the boroughs of Manhattan and the Bronx. James McCartney, Comr.

ATLANTIC CITY, N. J.—The following bids were received for the collection of garbage for one, two or three years, beginning Jan. 9, and for building road to the new crematory: Joseph M. Johnson, first year, $10,373, with a deduction of $500 if city provided stabling for horses required; Benj. F. Leeds, first year, $9,875, second year, $10,575, third year, $10,995, with an allowance of $5 a year for city stabling; Alvin P. Risley, Pleasantville, N. J., $15,000 for one, two or three years, with allowance of $5 a year for city stabling; John Unsworth, first year, $13,500, $27,900 for two years, or $43,000 for three years, with an allowance of $5 a year for stabling; Andrew P. Jeffries and Samuel Gregson, bidding jointly, offered to do the work for three years at $10,000; Sylvester Leeds, $14,000 one year, $28,000 two years, and $43,000 for three years, allowing $200 a year for city stabling; John Murtland, first year, $6,400, second year, $6,800, and third year for $7,200. The bids received for building the road to the new crematory, to be 2,800 ft. in length, were those of Alvin P. Risley, of Pleasantville, $5,800, and of Benjamin G. Leeds, $6,878.

MILLMONT, PA.—Beard & McConnell, Reading, Pa., have been awarded the contract, at $2,098, for erecting a building, 30 ft. high and 40 × 65 ft., for the General American Reduction Co.

NEWPORT, KY.—W. L. Glazier, Cy. Engr., has made a report on the disposition of garbage for this city, and has recommended the erection of a crematory and the destruction of garbage by burning. Report will be acted on in January and appropriations then made for same if the council approves of the plans.

STREETS AND ROADS

BRIDGEPORT, CONN.—The board of aldermen voted Dec. 19 to apply to the legislature for power to issue $100,000 for street improvements. Address, Chairman Foster.

ROCHESTER, N. Y.—Bids are asked until Jan. 5 for asphalt paving on South Fitzhugh St., estimated cost, $11,100, and constructing a pipe sewer on Caroline St. and Weddale Way. Chas. M. Beattie, Clk.; Edwin A. Fisher, Cy. Engr.——An ordinance has been passed to pave Bartlett St. with asphalt, to cost about $9,700.

NISKAYUNA, N. Y.—A committee, consisting of John A. De Remer, Andrew J. McMillan and Wm. Kohring, are considering the question of reconstructing the Dennison Road, a distance of 2,000 ft.

PHILADELPHIA, PA.—The department of public works has received the lowest bid for repairing and maintaining roads during 1899, from David McMahon, at $94,800. It will require about 50,000 tons of broken stone.

SCRANTON, PA.—The council received the following bids Dec. 17 for the repair of asphalt pavement for five and ten years respectively: Barber Asphalt Paving Co., $87,600 and $175,200; Pennsylvania Asphalt Paving Co., $93,500 and $187,000; Alcatraz Co., $108,680 and $234,058; George McDonald, $141,756 and $305,293. M. T. Lavell, Cy. Clk.

BRICK PAVING.—Meadville, Pa.—D. T. McKay, Jr., Cy. Clk., writes us that the contract for 3,120 sq. yds. of brick paving on concrete foundation in Terrace St., as advertised in Engineering News, has been awarded to Ross & Robinson, Meadville, at $1.24 a sq. yd. for Brady Run repressed brick. The bids were opened Dec. 16 and 10 different makes of brick were submitted. The bidders included Thomas McGuigan, Meadville; James McAfee & Co., Allegheny; Peter Schenck, Butler, Pa.

WATER-WORKS SUPPLIES.—Honolulu, H.I.—Contracts were awarded Nov. 30 as follows: Crane Co., 12 and 8-in. water pipe, $28.75 a ton; pig lead, $3.35 per 100 lbs.; connections and fittings, $54 a ton; packing yarn, 3 cts. a lb.; 8-in. gate valves, $16; 12-in. gate valves, $36.

MAIN SEWER.—Newburgh, N. Y.—The following bids were opened Dec. 19, for constructing the 1st St. main sewer, as advertised in Engineering News:

The estimated quantities are as follows: No. 1—About 30 ft. timber trunk sewer, 4 × 4 ft., at Hudson River; No. 2—About 860 ft. cast-iron pipe sewer, 42-in., with average depth of about 8 ft.; No. 3—About 320 ft. brick sewer with invert blocks, 54 ins. diameter, and average depth of 12 to 20 ft.; No. 4 About 500 ft. 54-in. brick sewer with invert blocks and average depth of 20 to 23 ft.; No. 5—About 110 ft. of 54-in. brick sewer with invert blocks and average depth of 15 to 20 ft.; No. 6—About 250 ft. of 48-in. brick sewer with invert blocks and average depth of about 13 ft.; No. 7—About 250 ft. of 36-in. brick sewer with invert blocks and average depth of 13 ft.; No. 8—about 13 ft.; No. 7—About 250 ft. of 36-in. brick sewer depth of about 9 ft.; No. 9—About 2,750 cu. yds. rock excavation in trench, if made open; No. 10—About 150 cu. yds. concrete with American cement; No. 11—About 8 manholes built with brick: No. 12—About 3 manholes built with special castings; No. 13—About 120 ft. of sewer to connect Chambers, Lander, Johnston, and Dubois St. sewers with main sewer; No. 14—About 1,000 ft. B.M. of timber grillage in place.

INDUSTRIAL NOTES.

THE MONASH WATER HEATER CO., Pittsburg, has leased the 4-story building, 306 Wood St., for its new factory.

THE RITER-CONLEY MFG. CO., Pittsburg, has a contract for cyanide tanks, to cost $30,000, for the Gold Hill Mining Co., Johannesburg, South Africa.

THE Q. & W. TIE PLATE, illustrated in our issue of Dec. 15, has been declared in interference in the patent office with a plate known as the Glendon Flange tie-plate, patented by Wm. Goldie, of Dilworth, Porter & Co., Sept. 6, 1898, Patent No. 610,179.

THE CRUMLISH FORGE CO., 18 and 20 Elk St., Buffalo, N. Y., announces that the increasing demand for its forges has necessitated the removal of its shops to the above address. The company was formerly located at 80 Virginia St.

THE WESTINGHOUSE ELECTRIC & MFG. CO., Pittsburg, is said to have a oontract from the Kings County Electric Light Co., Brooklyn, for two 3,000 K-W. generators, which will produce about 4,000 HP. each, and reported as to cost $80,000 to $85,000.

THE F. W. EMERSON MFG. CO., Rochester, N. Y., informs us that there were about 50 adjustable drafting tables in the large shipment just made to the University of California. These tables are now in use in many drafting rooms, and are said to give excellent satisfaction.

THE NEW YORK & OHIO CO., Warren, O., manufacturer of the Packard incandescent lamps and transformers, received a contract Dec. 22 for 15,000 incandescent lamps of from 8 to 100 c. p. from the Bangkok Electric Light Syndicate, Bangkok, Siam, which has a 20-years' contract to light the king's palace. The order is for one year's supply.

THE ERIE CAR CO., Erie, Pa., reports that it has so many orders on hand that it has been obliged to enlarge the plant. The company has an order for 400 gondola cars for the Pennsylvania R. R., and another order for 300 gondola cars for the Pennsylvania Lines West of Pittsburg. The cars are to be of 80,000 lbs. capacity each. Mr. William H. Hamilton is the President of the company.

THE CARNEGIE STEEL CO., Pittsburg, is reported in local papers to have purchased 35 acres west of Homestead upon which will be erected a 250 × 1,500-ft. shop for the manufacture of flat and hopper-bottom freight cars, similar to those now made by the Schoen Pressed Steel Co., of Allegheny. It is said that the new plant will have a capacity of 40 cars a day, in addition to a forge for the manufacture of car axles.

THE THOMSON METER CO., 79 Washington St., Brooklyn, states that it recently received from a large city, a 6-in. water meter, No. 44,368, for repairs. On examination it was found that this meter was sold Oct. 17, 1893, since which time it has registered 99,989,870 cu. ft., or 749,924,025 gallons, of water, and it has never been repaired before. The cost of repairs necessary to put it in as good shape as new was less than $28.

THE PENNSYLVANIA & MARYLAND STEEL CO., is announced in press despatches to have contracts from the Russian Government for 80,000 tons of steel rails for the Eastern Chinese Railway, and from the government of Victoria, Australia, for 35,000 tons. One cargo of rails has already been sent to the latter country. It is stated that each contract was secured because the American bidder named a lower price than any competitor.

THE ERIE GAS ENGINE CO., Erie, Pa., is now installing a 200-HP. gas engine in the plant of the McCoy Glass Co., Kane, Pa. This is claimed to be the largest gas engine ever built in the United States. The company has, among other orders on hand, one for a 100-HP. gas engine for the Grand Driller Co., New Kensington, Pa., and an order for seven 50-HP. gas engines for use in the natural gas district. Mr. F. F. Curtze is the Secretary of the company.

THE LOMBARD WATER WHEEL GOVERNOR CO., 61 Hampshire St., Boston, reports that the demand for its governors is constantly on the increase. Last month orders were received for upwards of 20 governors to regulate 41 water wheels, which will develop 15,750 HP. More than half of this machinery will be used in electric stations, principally in power transmission plants, and electric railway stations, the balance being in textile and other manufacturing plants driven by water power.

THE LAIDLAW-DUNN-GORDON CO., Cincinnati, has just shipped to Shanghai, China, four carloads of machinery, consisting of two cross-compound condensing pumping engines, with condensers, boilers and other equipments. It is said that the machinery goes to New York and from there direct through the Suez Canal. The Shanghai Inland Water Co. secured the concession for the water-works, and will also take an engineer from Cincinnati to put up the plant and operate it under contract for one year or 18 months.

THE RUBBER GOODS MFG. CO. is announced in press reports as about to secure a charter at Trenton, N. J., with a capital stock of $30,000,000. Mr. Chas. R. Flint, who organized the United States Rubber Co., which makes boots and shoes, is conducting the preliminary negotiations for the new company. It is claimed that these two companies will tontrol five-eights of the annual world's production of crude rubber. Among the companies mentioned as included in the new concern are the Boston Belting Co., New York Belting & Packing Co., B. F. Goodrich, Akron, Ohio; New York Mechanical Rubber Co., Cleveland Rubber Co., New York Gutta Percha & Rubber Co., New York Rubber Co., Stoughton Rubber Co., Stoughton, Mass.; Hartford Rubber Co., and Morgan & Wright, Chicago.

THE BALL ENGINE CO., Erie, Pa., reports a good business in Ball engines, having a number of government orders on hand, among them the following: A 300-HP. vertical, double Ball engine, direct-connected to a Siemens-Halske dynamo, for the New York Navy Yard; two 175-HP. double Ball engines, direct-connected to Siemens-Halske dynamos, for the Norfolk Navy Yard, and a 175-HP. double Ball engine, direct-connected to a General Electric dynamo, for the naval station on Puget Sound, at Bremerton, Wash. The company also has orders for a 250-HP. engine and a 275-HP. engine to be direct-connected to Western Electric dynamos, by means of the Arnold system of connecting, for the Garrett Building, Chicago; also orders for three 250-HP. cross-compound engines, to be direct-connected to Western Electric dynamos, for the Great Northern Hotel, Chicago. The officers of the company are: Pres. and Mgr., Jas. McBrier; Vice-Pres., D. N. McBrier, and Secy. and Treas., H. L. McBrier.

THE PLAYFORD STOKER CO., Cleveland, O., received the following orders for stokers on Dec. 19: From the Apollo Iron & Steel Co., Pittsburg, 24 stokers, to be attached to 24 250-HP. Cahall vertical water-tube boilers at Vandergrift, Pa., where the former company has just completed installing six stokers, and for which it also has six more under construction; from the Heine Safety Boiler Co., Pittsburg, one stoker for a 200-HP. water-tube boiler, for the H. J. Heintz Co., Allegheny, Pa., and from W. F. Patterson, Pittsburg, one stoker to be fitted to a 250-HP. Erie City water-tube boiler, for the Howard St. pumping station of the Allegheny, Pa., water-works. The Playford Co. is also installing eight stokers to 300 HP. boilers for the National Tube Works, McKeesport, Pa.; three to 250-HP. boilers for the Crystal Ice Co., Allegheny, Pa., and three to 250-HP. Babcock & Wilcox boilers in the electric light plant, Allegheny. The company, since Sept. 1, has had orders for 58 stokers, of which all but one were 250 HP. or over. The exception is noted above.

NEW COMPANIES.—American Central Contracting Co., 127 Market St., Camden, N. J.; $100,000; to do general contracting; John C. Calhoun, 617 West End Ave.; James McNaught, Syndicate Bldg., New York; John W. Gephart, Bellefonte, Pa.; Samuel P. Langdon, 315 Drexel Bldg., Philadelphia, Pa.; Norman Grey, Woodbury, N. J.

Paragon Fan & Motor Co., New York; $2,500; to manufacture electric fan motors; James P. Williams, of 39 Cortlandt St., New York, and two others.

Yaryan Hot Water Distributing Co., Chicago, Ill.; $200,000; to operate hot water plants; H. T. Yaryan, H. C. Adams, T. P. Keater.

Metropolitan Water Filtering Co., New Jersey Guarantee & Trust Co. Bldg., Camden, N. J.; $2,000,000; Leander P. Randall, Edward P. Evans, Howard H. Sypher and Christian Pflaum, Jr., of Camden.

Mexican Land & Colonization Co., New Jersey Registration & Trust Co. Bldg., Orange, N. J.; $100,000; to deal in rubber, fruit, etc., construct bridges, canals, etc.; F. M. Crawford, S. M. Biddison, J. W. Le Rieur and John W. Burns, 67 Clark St., Chicago, Ill.

Moritz-Borwick Construction Co., St. Louis, Mo.; $10,000; Olive J. Borwick, Ellwin P. Moritz and M. W. Hoff.

Franklin H. Bullis Mfg. Co., New York; $100,000, commencing with $500; to manufacture and sell snow melting machines; Franklin H. Bullis, V. L. Haines, Frank Kugler, Brooklyn, N. Y.

Philadelphia & Baltimore Ice Cold Storage & Produce Co., 127 Market St., Camden, N. J.; $100,000; R. H. Parker, Joseph H. Young, Thomas Williams, James G. Pratt and James W. Gill, of Philadelphia, Pa.; Alexander Duer, Camden.

Pacific Coast Coal Co., Philadelphia, Pa.; $2,500,000, with $2,500 paid in; to own and lease lands; to mine and sell coal; to build and operate railroads; W. H. Ingham, F. T. Patterson, A. L. Green, F. B. Lee, W. D. Marks, Philadelphia.

Harbor Water Front Co., Portsmouth, Va.; $10,000; to buy and develop real estate and maintain factories, warehouses and wharves; to do general storage and wharfage business and to furnish light, water and sewerage; O. F. Byrd, L. C. W. Page, I. L. Watson, T. J. Wool, F. D. Gill, A. A. Blisoly, I. S. Crawford

Speed Elevator Co., Louisville, Ky.; $20,000; to conduct an elevator and storage business, and to buy and sell coal; J. S. Speed, W. S. Speed, F. M. Locket, Louisville.

South African General Electric Co., Schenectady, N. Y.; $50,000; to deal in electrical apparatuses and construct works and plants involving their use in the United States, South Africa, and other foreign countries; S. D. Greene, Henry W. Darling, D. Mazent, J. R. Lovejoy and M. F. Westover, of Schenectady.

Massies Mills Telephone Co., Massies Mills, Va.; $2,000; telephone and telegraph business; W. D. Meeks, James Dickie, J. C. Bentz, M. B. Hughes, E. P. Parsons, W. H. Miller, Massies Mills; A. G. Bryant, W. M. Boyd, Bryant; R. K. Anderson, Roseland, Va.

Randsburg Reduction Works, Los Angeles, Cal.; $50,000, with $23,000 paid in; Austin Granville, Edward Osborn, George R. Wilton, E. W. Gilmore, John A. Fairchild, Chas. St. Moris and James McLachlan.

Garretson Engine Co., Buffalo, N. Y.; $5,000, commencing with $3,000; to deal in engines and machinery; Albert F. Garretson, 786 Ellicott Sq.; N. H. Wolcott, R. L. Cox, all of Buffalo.

Dennison Motor Carriage Co., 1 Montgomery St., Jersey City, N. J.; $100,000; to manufacture engines and electrical and other motors; Geo. L. Record and Ernest Merrick, 1 Montgomery St., Jersey City; J. F. Dennison, New Haven, Conn.

Knoble Filter Co., Chicago, Ill.; $10,000; to manufacture filters; T. J. Knoble, M. E. Knoble, J. A. O'Donnell.

Liquid Pressed Casting Co., Chicago, Ill.; $60,000; to manufacture metal castings; F. G. Hewser, T. B. McGregor, R. I. Terry.

American Chemical Co., St. Louis, Mo.; $100,000; John E. Keller, Frank C. Lewis and Harmon J. Bliss.

Finlayson Steam Generator Co., Detroit, Mich.; $25,000, with $16,800 paid in; to manufacture steam generators, heaters and engines; A. W. Finlayson, J. L. Hacket, E. Lutz, C. A. Howell, Detroit.

Missouri Wrecking Co., St. Louis, Mo.; $4,000; G. M. Cherry, J. W. Drabelle and Robert A. Cherry.

Western Railway Equipment Co., East St. Louis, Ill.; $300,000, commencing with $100,000; to manufacture railway equipments; E. S. Barreiras, R. Payne, J. D. Houseman, Jr., G. W. Taussig, H. P. Taussig, H. L. Magee.

Manhattan Dry-Dock Construction Co., New York; $5,000,000, commencing with $100; to build, repair, sell and operate ships, vessels, etc.; C. F. Peck, J. A. McDuffie, W. A. Davis, G. H. Smith, W. H. Brower, New York.

Kitson Lighting & Heating Co. of Japan and China, Charleston, W. Va.; $1,000,000, commencing with $100; to buy, sell and manufacture apparatus or materials for the production of heat, light or power; A. D. MacCorkle, J. W. Malcom, J. E. Chilton, J. E. Scaggs, W. E. Chilton, Charleston.

Norwich Construction Co., Norwich, Conn.; $1,000, commencing with $200; to encourage new industries in Norwich; H. H. Osgood, C. P. Cogswell, C. D. Noyes, C. W. Gale, Z. P. Learned, A. Reid, J. C. Averill, J. T. Desmond, Norwich.

Western Iron Works, Los Angeles, Cal.; $50,000; Frank S. Livingston, Arthur H. Ruggles, Frank P. Snow, Wm. W. Wood, Cassius Smith.

Lafayette Telephone Co., Mexico, Mo.; $12,500; D. P. Moore, M. B. Moore, E. D. Graham, E. C. Kennan, P. M. Kennan.

Electrical Construction Co., Waco, Tex.; $35,000; to construct, maintain and operate telephone lines; E. Rotan, W. W. Seley, S. Sawyer, E. N. Stephenson, J. B. Earle, J. E. Boynton, C. C. Barrett.

Hygienic Filter & Refrigerating Co., Chicago, Ill.; $25,000; general manufacturing; W. S. Kammerer, J. H. McDonnell, J. J. Purcell.

Pelley River Mining Co., 259 Washington St., Jersey City, N. J.; $125,000; to mine silver, gold and copper; Roscoe M. Wiers, Ralph M. Jacoby, John M. Enright, Jersey City.

Thompson & Moab Telephone Co., Salt Lake City, Utah; $1,400; to build and operate a telephone line between Thompson and Moab, Utah; Arthur A. Taylor, Pres.; J. C. Taylor, Vice-Pres.; Robert James Thompson, Treas.; Chas. Wilson, Secy.

Eagle Iron Co., Attalla, Tenn.; $20,000; to manufacture iron, etc.; company has secured and will put in blast the furnace at Attalla; L. S. Colyar, George H. Webb and James H. Barr, all of Chattanooga, Tenn.

Mail Delivery Notice.

Special efforts are made to deliver our paper to its readers each week at the earliest possible moment. The largest binding and mailing establishment in New York begins work on Engineering News early each Wednesday evening, and all papers for Boston, Philadelphia and Washington are usually in the New York post-office by midnight; all Brooklyn and New York city papers by 3 o'clock—in ample time for the first delivery Thursday morning. The entire edition, including foreign copies, is in the mail soon after 6 o'clock Thursday morning. If your paper is not received promptly we advise that you make a complaint to your local post-office officials.

Nearly Every Prominent Contractor and Manufacturer of Contractors' Supplies READS ENGINEERING NEWS

AVAIL YOURSELF OF THIS PAPER WHEN BIDS ARE WANTED FOR CONSTRUCTION OR FOR FURNISHING SUPPLIES.
